Cleans soldering iron tips instantly. Simply insert hot iron tip into RE-TIP and then withdraw—all contaminants are instantly removed. Uniformly cleans tips up to ¼" dia.—prevents contaminated solder joints. Prolongs life tip; tips solder faster, longer. With base for use in shop, or hand held for portable use and tool box.

9482	RE-TIP base & cartridge	$6.25
9483	Portable RE-TIP (Refill Cartridge Only; Bubble Carded).	$2.65
9484	Refill Cartridge only (Boxed)	$2.65

CONECUT...MAKES CHASSIS PUNCHES OBSOLETE!

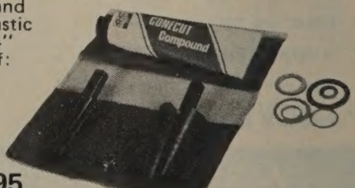
Drill a burr-free hole in seconds in sheet or tube. Saves time—no center punch hole—no pilot hole. Any number of diameter holes can be drilled—the tool advances, the larger the hole.

CONECUT SIZES:

3400	Drills holes from 1/4"— 13/16"	$12.95
3405	Drills holes from 5/8" — 1-3/16"	$19.95
3425	Cutting Compound (1 oz. tube)	$ 2.50

Set of two Conecut burr-free drills and cutting compound in convenient plastic carrying pouch. Hole size range: 1/4" to 1-3/16". Kit contains one each of:

3400 No. 1 Drill
3405 No. 2 Drill
3425 Cutting Compound



3420 CONECUT KIT **$34.95**

HUMISEAL COATINGS
GENERAL CHART

Listed in this General Chart of Properties are ten of the most frequently used HumiSeal Protective Coatings and their principal properties. These have been tabulated in order to facilitate comparison of their characteristics and selection of the most suitable type for a specific application. In addition to these HumiSeal types we manufacture a variety of coatings for special purposes, including high temperature applications. Should none of the coatings listed in this chart fulfill your requirements, we suggest that you contact us for recommendations.

	PROPERTIES OF LIQUID HumiSeal										THERMAL PROPERTIES		
HumiSeal Type[1]	Specific Weight (lbs. per gallon)[2]	Solids Content (% by weight)[3]	Viscosity, with catalyst when applicable (centipoises)[4]	Flash Point (°F)[5]	Drying Time for Handling[6]	Recommended Curing Conditions	Time Required to Reach Optimum Properties	Pot Life, at Room Temperature	Shelf Life, at Room Temperature	Coverage per gallon (in sq. ft.) After One Dip	Continuous Use Temperature Range (°F)	Thermal Shock Test[7]	Solderability[8]
1B12	7.3	20	30	40	10 min.	24 hrs. at room temp. or 30 min. at 170°F	24 hrs.	1 year	1 year	550	−75°F to +280°F	Passes	Good
1B15	7.6	35	470	30	10 min.	24 hrs. at room temp. or 30 min. at 170°F	24 hrs.	1 year	1 year	450	−75°F to +270°F	Passes	Good

2A53	7.8	54	300	70	30 min.	2 hrs. at 200°F	1 week	24 hrs.	6 mos.	400	−70°F to +250°F	Passes	Poor

HumiSeal TYPES LISTED IN BOLD PRINT COMPLY WITH THE REQUIREMENTS OF MIL-I-46058C

All technical data in this bulletin are based on test results using the stated standards and are believed to be correct. However, since the end use of HumiSeal materials (and the manner of storing and handling them) is beyond our control, we make no warranty — expressed or implied — as to the fitness of use, results to be obtained from or effects of use with respect to these materials. Their use shall be solely by the judgment of and at the risk of the end-user notwithstanding any statement contained in this bulletin.

1. The first digit in the type number specifies whether the product is a one-, or a two-component system.
2. Fed-Std 141a, Method 4184.
3. Fed-Std 141a, Method 4044.
4. Fed.Std 141a, Method 4287.
5. Fed-Std 141a, Method 4291.
6. Fed-Std 141a, Method 4061.
7. Mil-I-46058C.
8. Visual evaluation for ease of soldering with an 85 watt iron through a 2 mil film.
9. Fluorescent dye may be added if required.
10. Fed-Std 141a, Method 2121.
11. Fed-Std 406, Method 7031, Procedure A.
12. Fed-Std 141a, Method 6303.
13. ASTM-D150-65T, at 1 MHz and 25°C.
14. Mil-I-46058C Insulation resistance during 10th cycle, at 65°C and 98% RH.

FOR ELECTRONICS

OF PROPERTIES

HumiSeal Protective Coatings are available in one-quart or one-gallon cans, five-gallon pails, or fifty-five gallon drums. HumiSeal types 1B15 and 1A27 are also available in 16-ounce aerosol containers. All HumiSeal types listed in this chart may be applied by dip, brush or spray. Literature on recommended techniques for the proper application of coatings and preparation of the substrate is available upon request.

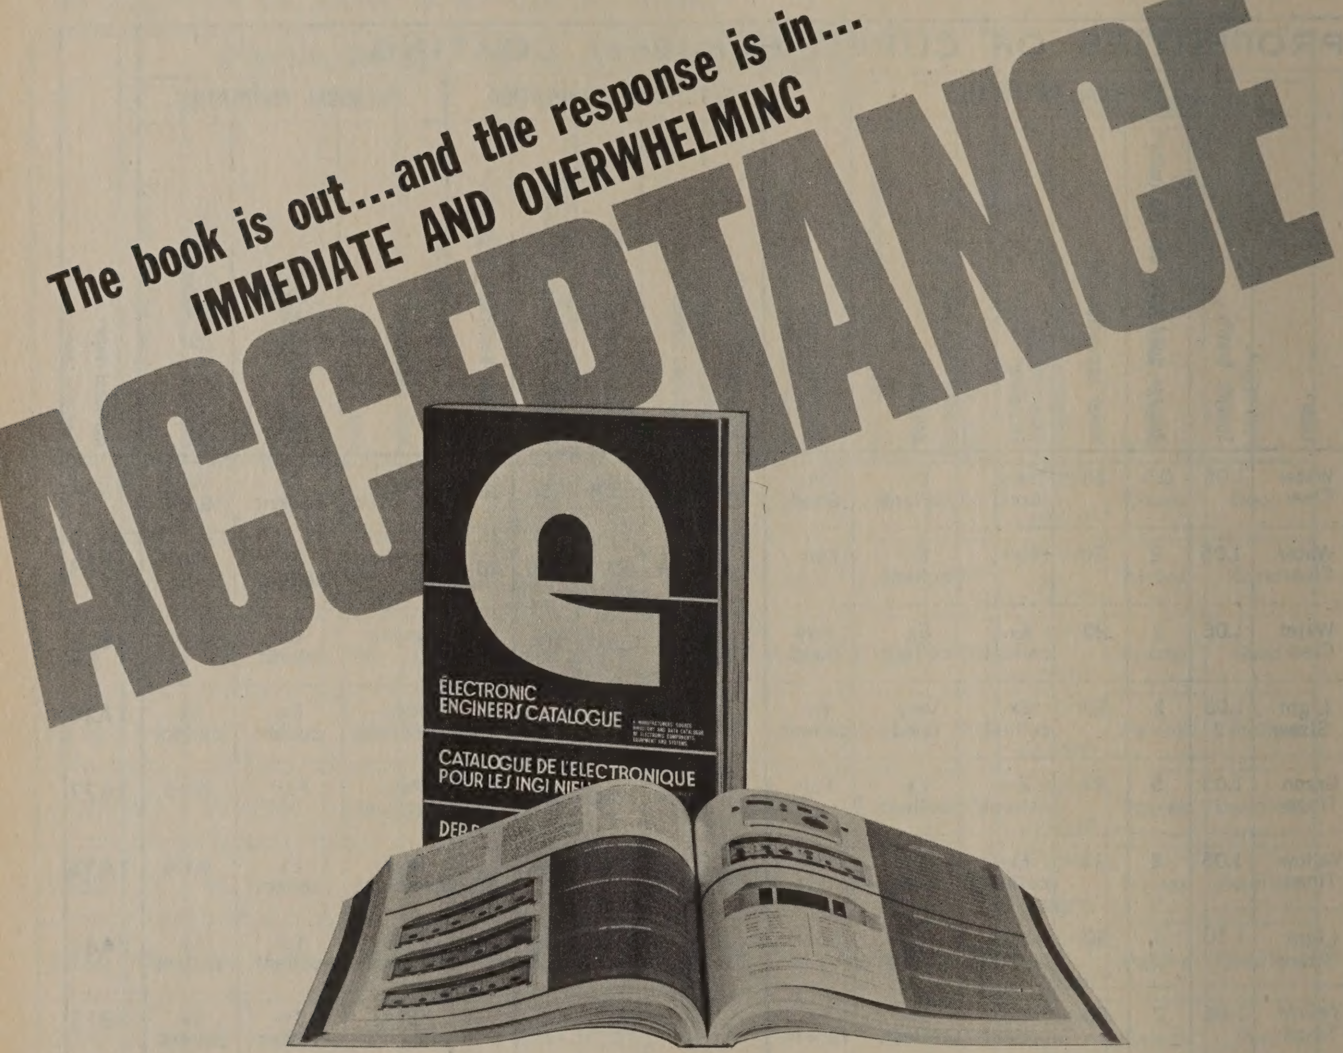
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER



The book is out...and the response is in...
IMMEDIATE AND OVERWHELMING
ACCEPTANCE
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGI NIE
DER

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/ source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

P.C. BOARDS

We are manufacturers of quality printed circuit boards with many years of experience, and our service has satisfied numerous customers from Coast to Coast.

We are specializers in many diverse industries; such as Medical Electronics, Electronic Security, Instrumentation, Navigational, Aviation, Emergency Lighting, Computers, as well as many others.

With extensive experience, know-how, and modern facilities backing our organization, we are confident that we can supply and fulfill your requirements.

Some of our more general capabilities include:

- *Single Sided*
- *Double Sided*
- *Plated Thru*
- *Tape Drilling*
- *Pierce & Blanking*

- *Gold Plating*
- *Nickel Plating*
- *Tin Plating*
- *Lead–Tin Plating*
- *Reflow Solder*

Whether you have a requirement for prototypes or production quantities, or wish further information, call or write. We are willing and able to serve you.

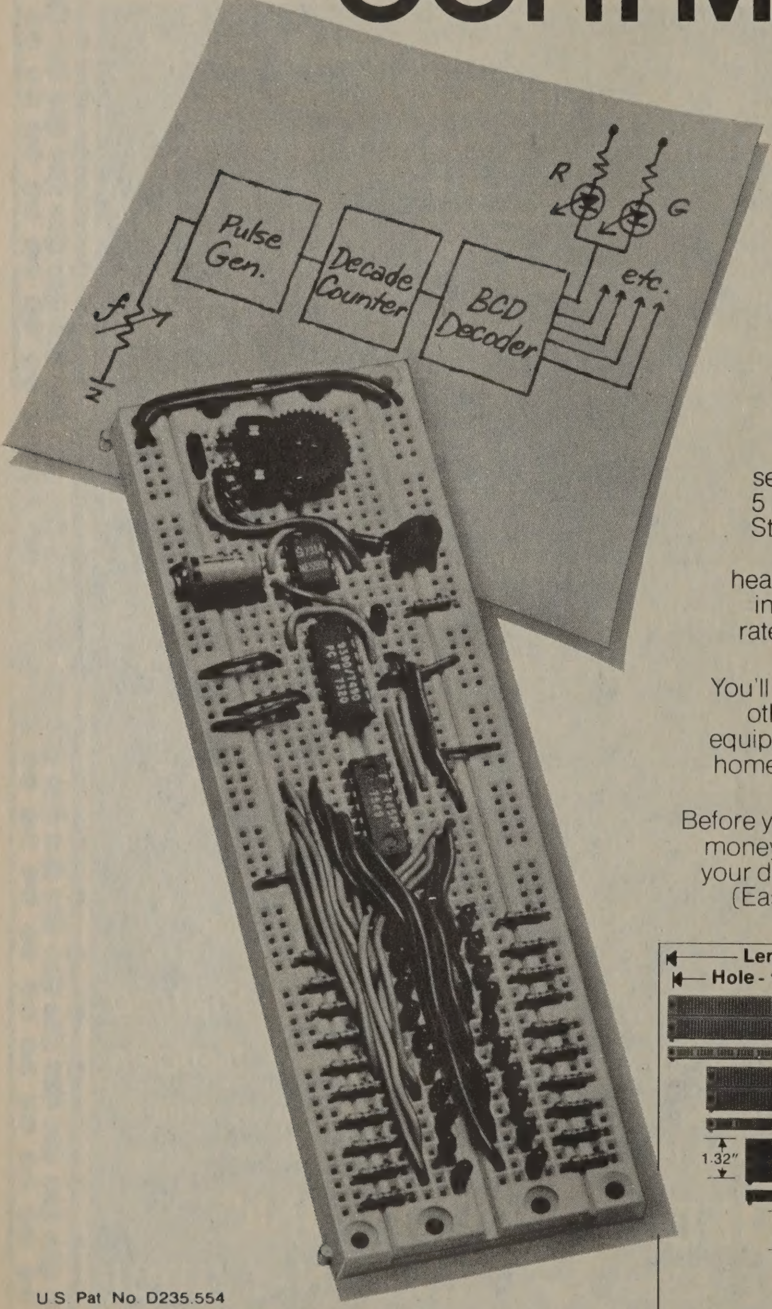
ONCE YOU'VE GOT IT DESIGNED, YOU'VE GOT IT MADE.



It's that easy when you use CSC's QT solderless breadboarding Sockets and Bus Strips. Working directly from logic or block diagrams, you plug in IC's, transistors, resistors, capacitors, LED's — virtually any component — and optimize circuits stage-by-stage, literally as fast as you can think. (No special jumpers required, either — just ordinary #22-30 solid hookup wire.)

When you're done, you've got a highly-visible working layout that someone else can reduce to schematic, while you get other projects underway.

Available for as little as $3.00,* QT units snap together into larger breadboards, and mount securely wherever you need them. Sockets have 5 interconnecting tie points per terminal and Bus Strips feature 2 separate rows of interconnecting terminals. And all QT models are built to last: heavy-duty prestressed nickel-silver contacts, vinyl insulated backing and glass-filled plastic sockets rated at better than 100°C insure optimum day-in, day-out performance.

You'll find QT Sockets and Bus Strips useful in lots of other ways, too. Mounted on power supplies, test equipment, bench or plug in cards, they're equally at home in lab, on production lines, in QC test jigs or in the field, for on-the-spot emergencies.

Before you start your next project, start saving time and money with QT Sockets. Pick up your phone and call your dealer — or order direct by dialing 203-624-3103 (East Coast) or 415-421-8872 (West Coast).

Length Hole-to-Hole	Length	Hole-to-Hole	Terminals	Unit Price $*
QT-59S	6.5"	6.2"	118	12.50
QT-59B	6.5"	6.2"	20	2.50
QT-47S	5.3"	5.0"	94	10.00
QT-47B	5.3"	5.0"	16	2.25
1.32" QT-35S	4.1"	3.8"	70	8.50
QT-35B	4.1"	3.8"	12	2.00
.7" QT-18S	2.4"	2.1"	36	4.75
QT-12S	1.8"	1.5"	24	3.75
QT-8S	1.4"	1.1"	16	3.25
QT-7S	1.3"	1.0"	14	3.00

All QT units are .33" thick.

See your CSC dealer or call 203-624-3103 (East Coast) or 415-421-8872 (West Coast)

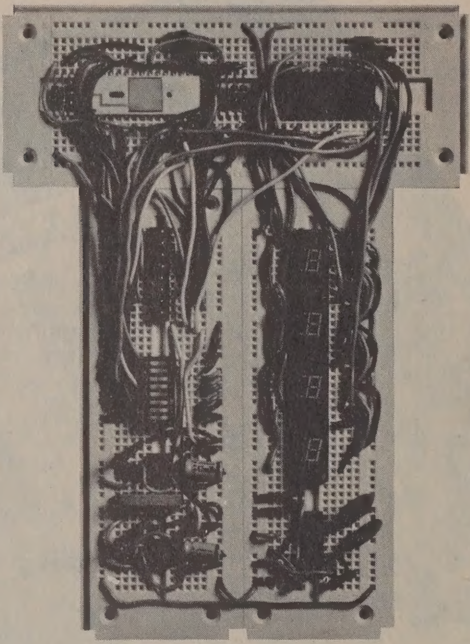
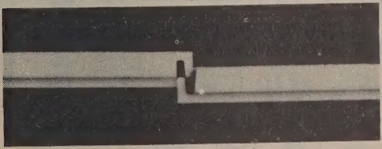
ANNOUNCING THREE NEW BREAKTHROUGHS IN SOLDERLESS BREADBOARDING.



Whether you design or build circuits for fun or for profit, you owe it to yourself to discover how fast and easy CSC solderless breadboarding can be. Now, more than ever. Because of three new breakthroughs in breadboard design. And our new EXPERIMENTOR™ sockets** that make the most of them.

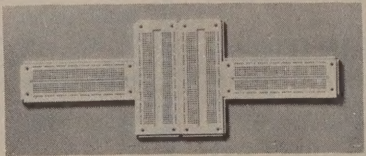
1. Price Who says a quality breadboard has to be expensive? For as little as $9.95, CSC's EXPERIMENTOR sockets let you design, assemble and modify circuits as fast as you can push in—or pull out—component leads. On a rugged one-piece socket with 550 solderless tie-points (94 five-point terminals *and* two 40-point bus strips).



Sockets lock together, snap apart to handle any size circuit with ease.

But don't let the low price fool you: EXPERIMENTOR sockets are precision-molded of durable, abrasion-resistant material, and feature CSC's non-corrosive, prestressed nickel-silver contacts for positive connections and longer life. All contacts are identified, too…with molded-in designations for easier circuit assembly and diagramming.

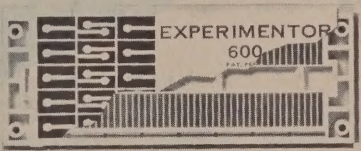
2. Compatibility CSC EXPERIMENTOR sockets end the "big-chip blues." They're the only ones with full fan-out capabilities for microprocessors and other larger DIP's, as well as 4-16-pin units. EXPERIMENTOR 600's 6/10″ center is ideal for microprocessor's, clock chips, RAM's, ROM's, PROM's, etc. While EXPERIMENTOR 300's smaller 3/10″ center is perfect for smaller DIP's. Both units, of course, accept transistors, LED's, resistors, capacitors, pot's—virtually all types of components with plug-in ease. As well as #22-30 solid hook-up wire for interconnections. Eliminating heat and lead damage to expensive components. And saving you more money, on parts.



Mix or match both models; arrange them vertically or horizontally.

3. Flexibility With CSC EXPERIMENTOR sockets, you can arrange your breadboard to suit your circuit…instead of vice versa. An exclusive snap-together interlocking system lets you instantly connect them. Vertically or horizontally. So you can mix or match 3/10 and 6/10″ centers…expanding or contracting to meet your requirements.

CSC EXPERIMENTOR sockets can be used alone, or mounted on any convenient flat surface, thanks to molded-in mounting holes and vinyl insulation backing that prevents shorts. You can mount them with 4-40 flat-head screws from the front, or 6-32 self-tapping screws, from the rear. But however you use them, EXPERIMENTOR sockets are an unbeatable way to build and test twice the projects in half the time.



Both models feature 94 five-point terminals (vertical lines) and two 48-point bus strips (one strip shown).

WHY WAIT? CSC EXPERIMENTOR sockets are available now from your CSC dealer, or by phone from CSC, at $9.95* for the 300 and $10.95* for the 600. Call 203-624-3103 (East Coast) or 415-421-8872 (West Coast)

IF YOU'RE NOT DESIGNING WITH A CSC PROTO-BOARD®, LOOK AT ALL YOU'RE MISSING.

Accessibility—All parts are instantly and easily accessible, for quick signal tracing, circuit modifications, etc.

Utility—Models are available with or without built-in regulated power supplies (fixed or adjustable).

Variety—A wide variety of models are available with capacities ranging from 630 to 3060 solderless tie-points (6 to 32 14-pin DIP's), to fit every technical and budget requirement.

Economy—Eliminate heat and mechanical damage to expensive parts. Save money by re-using components.

Versatility—Use with virtually all types of parts, including resistors, capacitors, transistors, DIP's, TO-5's, LED's, transformers, relays, pots, etc. Most plug in directly, in seconds.

Durability—All Proto-Board models are carefully constructed of premium materials, designed and tested for long, trouble-free service.

Expandability—Proto-Board units can be instantly inter-connected for greater capacity.

Visibility—All parts are instantly and easily visible, for quick circuit analysis and diagramming.

Speed—Assemble, test and modify circuits as fast as you can push in or pull out a lead. Save hours on every project.

POWER ON
Proto-Board no.203A
+5Vat 1.0 AMP
+15Vat 0.5 AMP
−15Vat 0.5 AMP
Continental Specialties Corporation, 44 Kendall St. New Haven, Connecticut 06511

Whatever type of electronic circuits you work with, you can do more in less time with CSC's solderless Proto-Board systems. As fast and easy as pushing in or pulling out a lead, you can design, test and modify circuits at will. Components plug into rugged 5-point terminals, and jumpers, where needed, are lengths of #22 AWG solid wire. In the same time you took to read this ad, you could be well on your way to assembling a new circuit.

Adaptability—Use in design, packaging, inspection, QC, etc. Works with most types of circuits, in many, many applications.

Flexibility—Use independently, or in conjunction with other accessories, such as scopes, counters, CSC Proto-Clip™ connectors, Design Mate™ test equipment, etc. One Proto-Board unit can serve a thousand applications.

CSC PROTO-BOARD SOLDERLESS BREADBOARDS

MODEL NUMBER	NO. OF SOLDERLESS TIE-POINTS	IC CAPACITY (14-PIN DIP'S)	MANUFACTURER'S SUGG LIST	OTHER FEATURES
PB-6	630	6	$15.95	Kit—10-minute assembly
PB-100	760	10	19.95	Kit—with larger capacity
PB-101	940	10	29.95	8 distribution buses, higher capacity
PB-102	1240	12	39.95	Large capacity, moderate price
PB-103	2250	24	59.95	Even larger capacity; only 2.7¢ per tie-point
PB-104	3060	32	79.95	Largest capacity; lowest price per tie-point
PB-203	2250	24	75.00	Built-in 1%-regulated 5V, 1A low-ripple power supply
PB-203A	2250	24	120.00	As above plus separate ½-amp +15V and −15V internally adjustable regulated power supplies

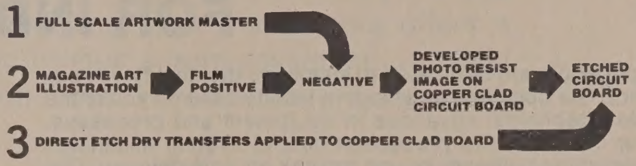
printed circuit kits••• DATAK

new photo etch kit......... *Makes printed circuits THREE WAYS*

Duplicate industrial techniques to make one or hundreds of identical printed circuits. Remarkable **POS-NEG**tm (pat. pend.) system will photocopy 1:1 art directly from a magazine page. Make 1:1 artwork masters, negatives, positives. Sensitize ordinary copper clad circuit boards: use your negative to expose; then develop and etch the final circuit. **No camera. No darkroom.** No tracing, pasting or film cutting. All materials supplied except photoflood bulb available at any camera store.



1 FULL SCALE ARTWORK MASTER
2 MAGAZINE ART ILLUSTRATION
FILM POSITIVE
NEGATIVE
DEVELOPED PHOTO RESIST IMAGE ON COPPER CLAD CIRCUIT BOARD
ETCHED CIRCUIT BOARD
3 DIRECT ETCH DRY TRANSFERS APPLIED TO COPPER CLAD BOARD

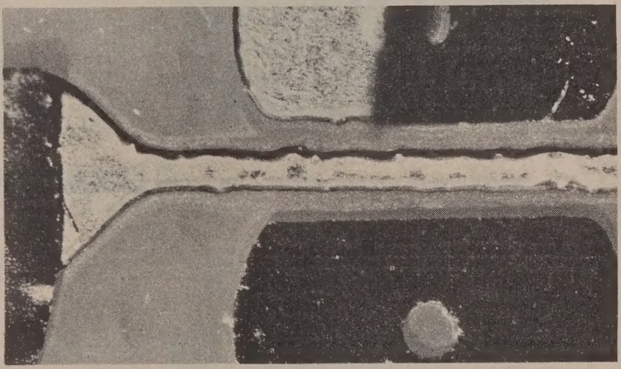
KIT CONTAINS: 5″x6″ steel printing frame with plate glass and backboard, 4 sheets 5″x6″ photocopy film, yellow filter, chemicals for 1 pint film developer and 1 pint film fixer, 5″x6″ copper clad board, spray can photo etch resist, 1 pint resist developer, 2 sheets 8½″x11″ layout film, 1 roll 1/16″ and 1 roll 1/32″ printed circuit tape, 8 sheets dry transfer direct etch PC patterns including pads, transistors, round can and flat pack ICs, DIP ICs, edge card connectors, lines, circles, jogs, etc., ¼ lb. anhydrous ferric chloride to make 1 pint etchant, instructions.

ER-4 COMPLETE PHOTO ETCH KIT $26.95

direct etch printed circuit kit

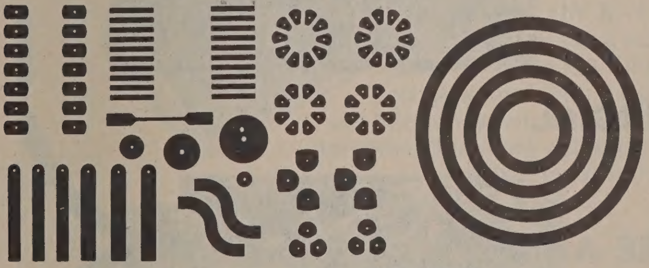
This one step kit uses a unique dry transfer resist that etches razor-sharp patterns. Lay out circuits directly on the copper board by rubbing down dry transfer patterns and lines. Connect with resist tape or leave unconnected for breadboards. Blow-up illustration shows 2 oz. copper circuit board **made only with materials in kit.** Black dry transfer resist is partly removed to show etched copper. Pattern is .015″ squeeze-through wire transferred between 2 DIP pads. Pad edges are spaced .030″ apart.

KIT CONTAINS: two 3″x4½″ and two 2¼″x3″ copper clad boards, 8 sheets direct etch PC patterns, 2 rolls PC resist tape (see ER-2 for description of patterns and tape), ¼ lb. anhydrous ferric chloride (makes 1 pint), combination storage box and etch tray, instructions.



ER-1 COMPLETE DIRECT ETCH KIT $6.95

photo etch and direct etch refill kits



DIRECT ETCH RESIST PATTERNS

8 sheets 3″x5″ 1:1 patterns include lines, circles, jogs, squeeze-throughs, TO-3 & TO-18 transistors, TO-99, TO-100, DIP & flatpack ICs, donut pads, roll of 1/16″ and 1/32″ resist tape. Withstands ferric chloride, ammonium persulfate, peroxide and other etch systems.

ER-2 DIRECT ETCH RESIST PATTERNS $3.95

DRY CONCENTRATED ETCHANT

¼ lb. anhydrous ferric chloride in vapor tight package makes 1 pint etchant, enough for 200 sq. in. of copper board. Costs less than liquid etch solutions.

ER-3 DRY CONCENTRATED ETCHANT $1.49

POS-NEGtm PHOTOCOPY FILM

Polyester base film makes negatives or positives directly from opaque or translucent art in one step. Handle in subdued light. Expose with #2 photoflood.

ER-5 SIX SHEETS 5″x6″ POS-NEG FILM $3.95

FILM PROCESS CHEMICALS

3 chemical packets make 1 pint litho film developer and 1 pint acid fixer. Handles 15 sheets copy film.

ER-6 FILM PROCESS CHEMICALS $1.95

PHOTO RESIST SPRAY

Photosensitive PC board coating. Unexposed coat is dissolved by resist developer. Exposed areas remain to act as an etch resist. Coats up to 400 sq. in.

ER-7 PHOTO RESIST SPRAY (2.5 oz. net wt.) $2.95

PHOTO RESIST DEVELOPER

Solvent blend develops exposed photoresist. Use with ER-7 spray resist.

ER-8 RESIST DEVELOPER (16 fl. oz.) $2.95

PRINTED CIRCUIT BOARDS FOR INDUSTRY

Our people are dedicated to supplying the quality you expect. Our complete and modern facility assures you of the latest technical advances in equipment and processes. Our computerized production control system eliminates production bottlenecks and insures on-time delivery. Our modern photo lab and chemical lab give us the tools and analysis without relying on outside sources. Our complete die tooling facility reduces both lead time and cost. Whatever your board requirements are, Defiance will respond with a prompt and competitive quotation.

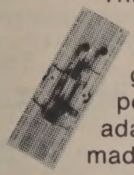
Solder is for sissies.

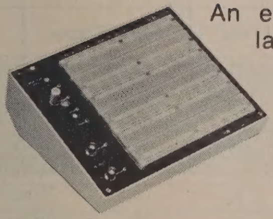
Are you still designing circuits the old fashioned way? Soldering and unsoldering? Burning up valuable IC's? If so, it's time you made a switch to solderless breadboarding. E&L Instruments offers a complete line of breadboarding products from sockets to the most complete systems for professional use. Here are five ways you can go solderless . . .

SK-10 Socket



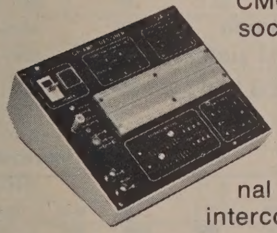
This precision solderless breadboarding socket will pay for itself in one afternoon. Integrated circuits and discrete components insert directly, without adapters. All interconnections are made with 20 to 26 gage solid conductor wire. $17.75.

Breadbox III



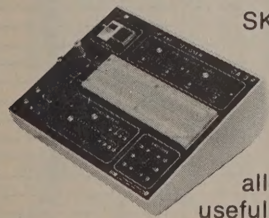
An economical approach to a large breadboarding area. Three SK-10 sockets, four 5-way binding posts, two BNC connectors, six BP-22 solderless breadboarding pins. $72.25

Op-Amp Designer #OA-2K



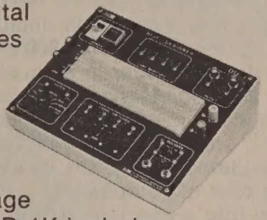
Powerful design tool for linear work and CMOS digital circuitry. SK-10 socket. Heavy current capacities on all three power supplies [+/– 15V & +5V DC]. Sensitive null detector and a full function generator with external frequency adjustment. All interconnections are solderless. $120.00 in kit form.

Op-Amp Designer #OA-3K



SK-10 socket. Plus and minus variable supplies (1 to 15V). This adjustable feature makes the unit exceptionally flexible, allowing it to be more useful for odd voltage requirements. The fixed 5 volt supply allows interfacing with TTL circuitry. $102.50 in kit form.

Digi-Designer #DD-1K



A must for every student, engineer or technician doing digital circuit design. Handles both IC and discrete components without soldering. Connections to the SK-10 socket are made using any solid 22 gage insulated wire. The DD-1K includes a clock, power supply, logic lights, pulsers, logic level switches and much more. All circuitry is now in one circuit board. $77.75 in kit form.

OEM and educational discounts available. All prices shown are suggested resale U.S.A.

Solder-Wrap® SOLDER-WRAP® is a new process for high density electrical interconnect systems developed and patented by United Wiring and Manufacturing Company. With SOLDER-WRAP®, interconnect costs have been brought back in line with semiconductor costs. This unique electronic system forms interconnects at speeds two to three times faster than conventional Wirewrap* methods. Routing speeds, including soldering time, range from 300 electrical connections per hour in manual operation to 2400 connections per hour on automatic equipment. The SOLDER-WRAP® process consists of routing a fine, insulated wire to the various protruding pins of components previously inserted into a specially patterned PC board. The individual wires and component leads are then soldered to the PC pads by a soldering probe which simultaneously thermal strips away the wire insulation at the soldering area. SOLDER-WRAP® should be considered for:

- Replacement of Wirewrap* boards
- Replacement of stitchweld boards
- Front end designs for two-sided boards
- High volume production when using the fan-fold SOLDER-WRAP® package

Advantages for SOLDER-WRAP® users include high surface and cubic density, fast engineering turn-around, low front-end tooling and testing costs and ease in changeability. As an example, the front end cost for 40 IC boards would run $308, including coding, keypunching and computer run. Compare SOLDER-WRAP® with other processes in Figure 1. SOLDER-WRAP® advantages can mean substantial savings for your operation in both time and money.

Some of the companies now using SOLDER-WRAP® are: McDonnel Douglas • N.A.S.A. • Bell Labs • Texas Instruments • Westinghouse • L.T.V. Systems • Honeywell • Collins Radio • Univac • Control Data • Hughes Aircraft • I.B.M. • Bendix.

UNITED WIRING AND MANUFACTURING CO. SOLDER-WRAP INTERCONNECT PROCESS COMPARISON CHART

PROCESS	REQUIRES ARTWORK	ENGINEER DESIGN	ENGINEER CHANGES	DENSITY	PRODUCTION COST	FIELD CHANGEABLE	COLD FLOW PROBLEM	PROTOTYPE PROCESS	SCHOTTKY LOGIC

ORDERING INFORMATION
SOLDER-WRAP™ BOARDS

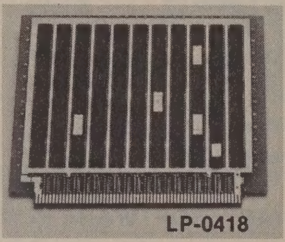
The following is a breakdown on how to order SOLDER-WRAP™ boards.

XX — XXXX — XX
A B C

A - These two digits are to define series SOLDER-WRAP™ boards.
PB = Augat socket pin in board. Mil grade
LP = Low profile socket commercial grade
NS = SOLDER-WRAP™ board without sockets

B - These four digits define SOLDER-WRAP™ board base number.

C - These two digits define SOLDER-WRAP™ back covers
00 = No SOLDER-WRAP™ back cover
01 = SOLDER-WRAP™ back cover FR4 - material



LP-0418

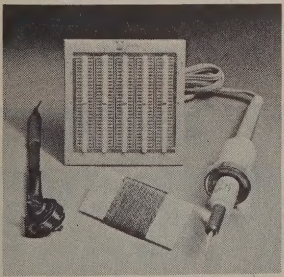
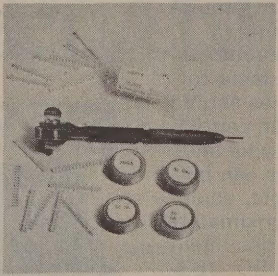
Prototype Kits

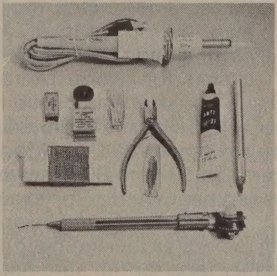
For Wiring Service and Automatic Wiring Equipment see e.e.m. Section 4100.



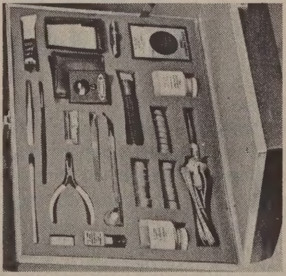
SOLDER-WRAP® STARTER KIT
U.W.M. Part Number 150-0100-001
Designed for experimentation with the SOLDER-WRAP™ process.
Price: **69.50**



SOLDER-WRAP® VECTOR BOARD & E.C.O. KIT
U.W.M. Part Number 150-0105-001
Designed for Vector & Varo type P.C. boards. It can also be used to make engineering changes on two-sided P.C. boards.
Price: **69.50**



SOLDER-WRAP® SPECIAL TOOL KIT
U.W.M. Part Number 150-0110-001
Kit contains all special tools required for SOLDER-WRAP™ prototype interconnect process.
Kit Price: **$175.00**



INDUSTRIAL SOLDER-WRAP® PROTOTYPE KIT
U.W.M. Part Number 150-0115-001
Our most complete prototype kit. The handsome attache case provides portability and contains an abundant supply of wire cartridges and other equipment for industrial applications.
Price: **$300.**

Wiring Services

UNITED WIRING & MFG. CO. is involved in every phase of the interconnect business — including in-house automatic SOLDER-WRAP® wiring services. Our automatic equipment can make 2400 connections per hour with accuracy constantly checked by sophisticated monitoring equipment. In case of a missed pin, stripped wire error or broken wire, a signal tells the micro-processor to halt the quipment until corrective action can be taken. Savings at a United Wiring Service Center range from 20% to 30% over other methods.* For example, on a minimum run of four boards (same logic type) wiring costs are 8¢ per wire. United Wiring also offers logic testing of boards on a service basis with costs running from 15 to 30 cents an IC location, depending on quantity.

NEW SOLDER-WRAP® BOARD DESIGNS

ARTWORK NON-RECURRING COST

	1-50 I.C.'s	51-100 I.C.'s	100-300 I.C.'s
Artwork Generation	$350.	$500.	$700.
P.C. Board Tooling	80.	110.	170.
Drill Tape	80.	160.	225.
Total Non-Recurring Cost	$610.	$770.	$1095.

Minimum Board Order on Special Design: 25 SOLDER-WRAP® Boards.

SOLDER-WRAP® SOFTWARE NON-RECURRING COST

1. Populating I.C.'s for two-sided board layout. Incl. 2, 3 & 4 . . . . Cost per I.C. $12.00
2. Coding Schematic, Keypunch, 2 Computer runs and documentation package. . . . . Cost per I.C. $ 7.70
3. Keypunch, computer runs and documentation package only . . . . Cost per I.C. $ 4.50
4. Computer runs & documentation package only . . . . Cost per I.C. $ 3.22

SOLDER-WRAP® WIRING SERVICES

CONTRACT WIRING SERVICES — 12 MONTHS USAGE

100K to 200K wires — 7 cents per wire
201K to 300K wires — 6 cents per wire.
301K to 500K wires — 5.5 cents per wire.
501K to 1MM wires — 5 cents per wire.
1MM to 2MM wires — 4.5 cents per wire.
2MM to 5MM wires — 4 cents per wire.
5MM to 10MM wires — 3.5 cents per wire.

LOW VOLUME PRODUCTION

One SOLDER-WRAP® Board. 14 cents per wire.
Two SOLDER-WRAP® Boards. 12 cents per wire.
Three SOLDER-WRAP® Boards. 10 cents per wire.
Four SOLDER-WRAP® Boards. 8 cents per wire.

Equipment Sales & Leasing

AUTOMATIC SOLDER-WRAP® interconnect equipment may be leased or purchased from United Wiring & Mfg. Co., Inc. This equipment performs all wire routing, cutting and soldering functions and checks for errors. The decision to lease, purchase or use United's in-house wiring capabilities should be based on your needs. If your volume is small, United can perform your wiring services for you at a savings of 20% to 30%. If your shop deals in medium to large volume, a 50% to 60% savings can be effected with leased or purchased equipment. For example, equipment wiring costs in a single shift operation would be approximately 3¢ per wire. A computer system generates the engineering documentation package and a disc or paper tape for the automatic SOLDER-WRAP® equipment. An operator, with one to two weeks training, can effectively man the SOLDER-WRAP® equipment. Additional training is required to operate the engineering documentation package for the software system. Either way — United's in-house service or using SOLDER-WRAP® equipment in your own shop — means total reliability plus a 30% to 60% cost savings for you!

For complete circuit board information see Section 1700.

Equipment Model	Stringing Conn/Hr.	Solder Cutting Conn/Hr	Avg. Conn. Per Hour	Cost/Wire One Shift	Cost/Wire Two Shifts	Cost/Wire Three Shifts
200	2400	2400	1200	$.0395	$.0263	$.022
300	3600	3600	1800	$.0307	$.020	$.016
400	4800	4800	2400	$.0252	$.0165	$.013

Assumption:
- SOLDER-WRAP® boards to meet United specifications.
- Average wire length 4".
- United's Tooling used on automatic equipment.
- Set up times not included. (Off Line)

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

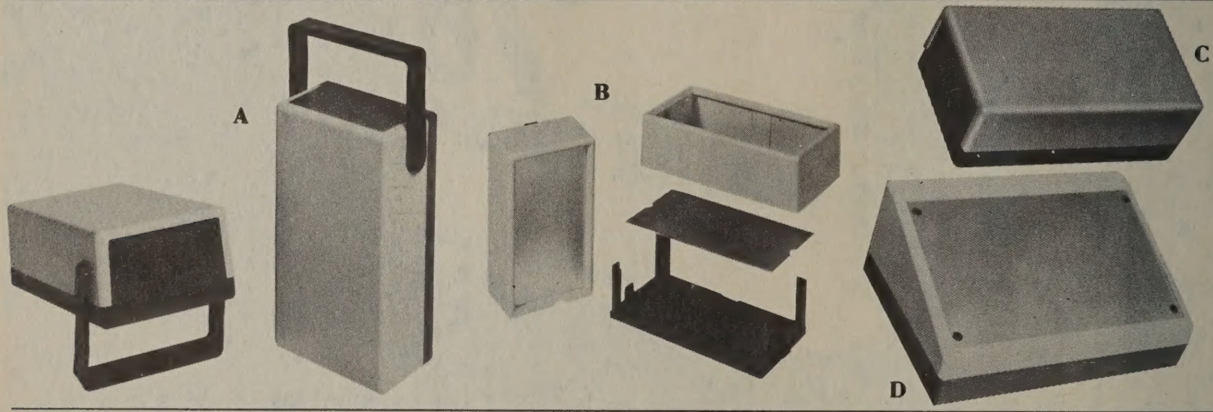
The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

verobox®

Quality, High Impact Enclosures

The Verobox System affords the designer or engineer a wide range of tough, durable and attractively styled package enclosures for a multitude of applications. The hi-impact polystyrene and ABS cases are available in a variety of sizes, shapes, colors and configurations. Punching, stamping, engraving or drilling of either face plate or case gives the greatest flexibility for designer requirements. Verobox Systems have been successfully used for meter, control and instrument enclosures in "one-off" and production runs. In addition to the styles shown here, we have other configurations plus a complete, economical custom molding capability for special applications. For further information including technical and engineering details, contact your local VERO representative or call us at our corporate headquarters in Hauppauge, New York.



These rectangular boxes are similar to the two-tone gray plastic boxes shown below, but have the added feature of a handle that locks in two positions. When in the raised position, the handle is used for carrying and when folded back, it ideally positions the box for benchtop use. Available in three sizes.

New Part No.	Old Part No.	Width	Height	Length	
65-2759J	90-30-187	3.150"	1.969"	5.906"	
65-2760D	90-40-187	4.331"	2.362"	7.402"	A
65-2760D	90-41-187	4.331"	3.800"	7.402"	

This newly developed box incorporates an aluminum panel into the design of the rectangular boxes. The panel mounts on the lower portion of the box allowing the top cover to be removed without disturbing the circuitry. Prior to wiring, the aluminum panel may be taken out of the case for ease of punching, drilling, silk screening, etc.

New Part No.	Old Part No.	Width	Height	Length	
65-3851A	95-20-087	2.529"	1.575"	4.724"	B
65-2753F	95-40-087	4.92"	2.76"	8.27"	

FOR A COMPLETE PARTS LISTING OR CUSTOM APPLICATIONS, CALL VERO AT (516) 234-0400

These two-tone gray plastic boxes are accurately molded from hi-impact polystyrene. Four threaded inserts are molded into the lower section of each box and the tongue and grooved sections provide tight closure.

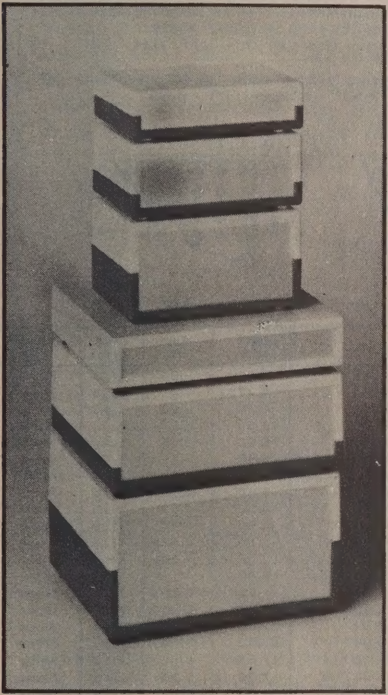
vero

Vero Electronics, Inc.

171 Bridge Road, Hauppauge, N.Y. 11787

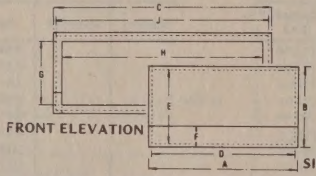
Tel.: 516-234-0400 TWX: 510-227-8890



These boxes consist of top and bottom sections which include fixing points for horizontally mounting P.C. boards or chassis plates. In Mark I boxes, the two sections are held together by four screws which enter through the base and are concealed by plastic feet through which they pass.

Mark II boxes have a unique clip together design, so that no screws are required. Four rubber stick-on feet are therefore used. Front and rear panels on both styles are automatically retained in position when the two halves of the box are put together. P.C. boards can also be mounted vertically in the same plane as the front panels in moulded-in guide slots.

These plastic Verobox enclosures moulded in light and dark grey high impact ABS provide a range of six attractive and durable enclosures incorporating anodized aluminum panels at front and rear. They require no further finishing operations and can be readily blanked, engraved or silk screened.



SPECIFICATION:

Casing - High impact ABS Plastic
Color - Light grey top, dark grey base
Front & Rear Panels - 16 s.w.g. anodized aluminum
Temperature Range - 40° C to +65°C

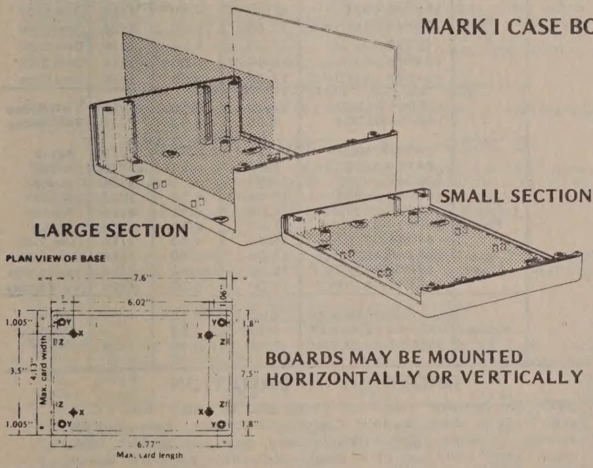
MARK I CASE BOX



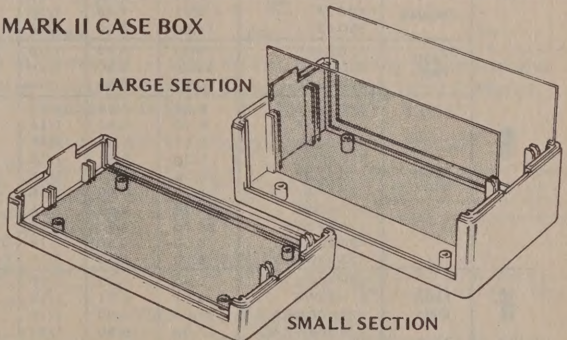
BOARDS MAY BE MOUNTED HORIZONTALLY OR VERTICALLY

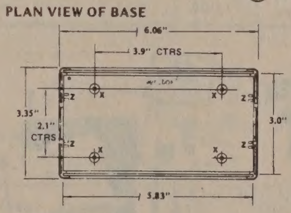
KEY:

X - .118" inserts for horizontally mounted board
Y - Full height corner pillars
Z - Integrally molded guide slots for vertically mounted boards.

NOTE: Horizontal fixing points are designed to accept a standard 3.94" x 6.3" European sized card. Compatible Vero D.I.P. Board - Order Part No. 10-1042D

MARK II CASE BOX





BOARDS MAY BE MOUNTED HORIZONTALLY OR VERTICALLY

KEY:

X-Board-mounting pillars for self-tapping screws (included with box).
Z-Integrally molded guide slots for vertically mounted boards.

Vector

VECTORBORD®—MICRO-VECTORBORD® PHOTO SENSITIZED BOARD

Vectorbord® and Micro-Vectorbord® prepunched terminal boards are time, work and money saving materials used throughout the electronic industry. Fire retardant material is precision punched in a wide variety of sizes, hole patterns, and thicknesses for later installation of terminals and components. Vector terminals in solder and wrapped wire models are available to fit all hole sizes. Pattern "A" or "AA" is good for experimental or other work where space is not critical. Pattern "B" is useful for work with small components such as resistors and capacitors. Pattern "G" is particularly useful for transistor usage. Patterns "H" and "P" are specially designed for use with integrated circuits and devices packaged with leads on 0.1 in. multiples.

Phenolic: MIL Spec PBE-P per MIL-P-3115 NEMA grade FR2. Copperclad phenolic meets NEMA FR2 and is 1 oz.
Paper Epoxy: MIL Spec P-22324 type PEE NEMA grade FR3. Copperclad FL-PX per MIL-P-13949E NEMA grade FR3.
Epoxy Glass: For 'P' pattern boards with 'WE' in suffix - Unclad: MIL Spec MIL-P181776 type GEE NEMA FR4 and G-10. Copperclad: MIL Spec 13949E type FL-GF NEMA grade FR4 and G-10. Color: green. Best mechanical characteristics. **For all other glass epoxy boards** - FR-4 type, max. temp. 130°C (266°F); color, blue; best hole quality in epoxy glass; can plate through holes in clad material.

Special sizes and hole layouts can be made to order if one of the standard catalog items does not meet requirements. When ordering special size boards the following MAXIMUM BOARD WIDTHS apply:
Pattern "A" in phenolic & epoxy paper or glass laminates: 20"
Pattern "B" all materials: 6"
Pattern "G" in phenolic & epoxy paper: 20". In epoxy glass: 16"
Pattern "H" in epoxy glass: 8.51" Pattern "P": 8.50"

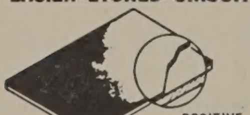
NEW — POSITIVE ACTING PHOTO SENSITIZED COPPER CLAD BOARD FOR FASTER, EASIER ETCHED CIRCUITS



POSITIVE
PHOTO SENSITIZED
COPPER-CLAD BOARD

32X–1 POSITIVE PHOTO RESIST KIT

New Vector positive acting coated photosensitized board speeds etched circuit manufacture because boards are coated with positive acting resist. Positive artwork is used for the circuit master pattern making use of readily available positive drafting aids. No reversing step required. A finished etched circuit can be made in less than an hour and boards etch in any common etchant. Vector postive acting developer must be used after exposure of the boards under U.V. light source such as a photo flood lamp or sunlight.

Kits 32X–1, 32XA-1 are recommended for trial evaluations of the system; later, purchase only boards and developer.

ORDERING INFORMATION

32X-1 Kit contains 1 bare and 1 sensitized 4½" x6½" I oz. c.c. 1 side 1/16 in. thick phenolic board, etching tray, ferric chloride etchant, developer, glass exposure plate, mask cutting film, tape, brush, razor knife, set of 4 sheets rub/transfer art work, layout paper, instruction sheets.

32XA-1 Kit has total of 7-1 oz. copper clad phenolic boards: 3 boards sensitized one side: 1-4½" x6½", 1-8.0" x5.1", 1-4.5" x 2.73"; 2 boards sensitized 2 sides: 1-4½" x6½", 1-4.5" x2.73"; 2 bare boards: 1-4½" x6½", 1-4.5" x2.7" plus larger assortment of rub/transfer art work, etching chemical, developer, and other materials described in 32X-1 kit above.

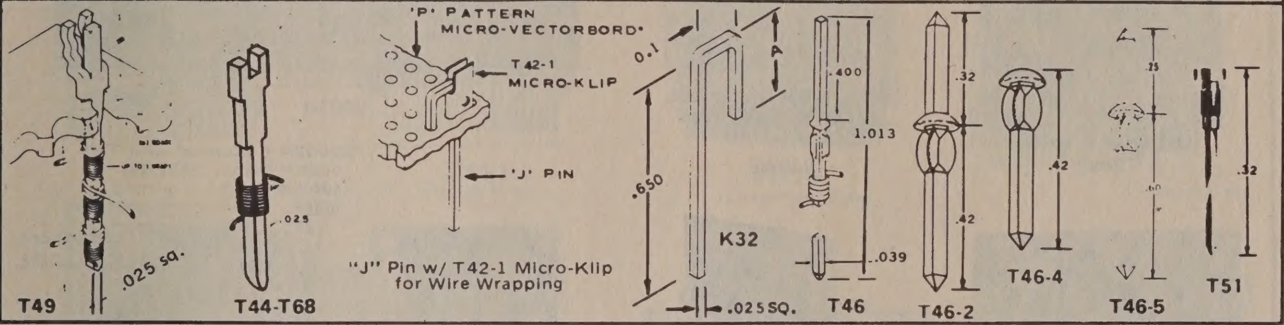
Vector WIRE WRAPPABLE – SOLDERABLE TERMINALS

WIRE WRAPPABLE TERMINALS AND PINS

Vector "wrap-post" terminals are stamped from high grade copper alloy and have sharp corners (maximum radius .003") for "gas-tight" connections when properly wrapped with Vector P160-4R Power Wrapper or other wrapping equipment. Like many other Vector terminals, wrap-post terminals may be installed in Vectorbord® with inexpensive hand tools. New gang insertion tools permit installing some models at rates up to 1200 per hour—write factory. **As a result of their unique board holding design, when properly installed, terminals hold tightly to meet all production requirements.** Wrap-post terminals may be installed wherever required without high cost machines. They are ideal for building sub-assembly production boards for later incorporation in larger assemblies Those with knurled or "stepped" shank designs may be used in plated-through holes.



T49 TRIFURCATED KLIP-WRAP

Unique three-fingered clip on upper end makes this a time-saving terminal for production or experimental uses. The spring clip holds leads from 0.018" to 0.025", 0.032" or 0.040" until soldered. Hand Insertion Tool P156 is adequate for installing a few at a time, but Spring Impact Tool P158 and D-8 Die Point are recommended for larger quantity installation due to the speed and ease of use.

T44-T68 MINIWRAP FOR 0.042 HOLES

Low profile wire wrappable terminals have slotted upper end for soldered wires. Ideal for miniature assemblies

K32 "J" PIN FOR 0.042 HOLES

Lowest cost wrappable terminal. May be used alone in circuit board hole by inserting into two adjacent 0.028" to 0.042" dia. holes and bending shorter leg over for retention. Hooked end can also be embedded in encapsulated assemblies and wraps made on protruding tail. Illustration also shows terminal being used to provide wire wrappable extension tail to T42-1, a solderable Micro-Klip terminal.

T46 MINIWRAP - 0.028" SQ.

Sturdy double ended terminal fits 0.042" dia. holes. Has flanged midsection.

STAR SERIES T46-2, -3, -4, -5 - 0.025" SQ.

This 0.025" sq. double ended terminal stands rigid in 0.042" holes without wobble due to four protrusions on the terminal corners in the terminal midsection. It is ideal for printed circuit applications because the seating flange creates a natural solder fillet bonding point.

T51 SERIES

Lowest profile rounded head is low enough to fit beneath installed DIP packages. Head diameter is .072" and may be used as a solder point for wave or "tack" soldering.

ORDERING INFORMATION

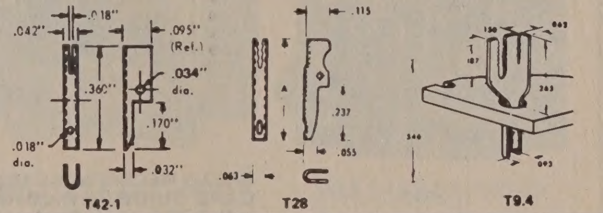
SOLDERABLE TERMINALS AND PINS

Suitable for PC Board Production, Prototyping and Experimenting



Push-In Terminals -- Hold WITHOUT Staking -- Inexpensive
Faster to Install -- Hold Component Leads Until Soldered
Popular Hole Sizes -- 0.042", 0.062", 0.093"

T42-1 MINIATURIZED COMPACT PUSH-IN

Fits 0.042" dia. holes such as in "P" Pattern Micro-Vectorbord® and can be mounted on 0.1 in. centers side to-side. Tintillate plated. Ideal for IC work because leads can be laid in slots or pass through terminal vertically. By addition of soldered K32 "J" pin series terminal, converts to wire wrappable type.

T28 SERIES

Compact push-in fits 0.062" dia. holes in printed circuit boards and Vectorbord® Patterns B,F,G and H. Tintillate or silver plated, copper alloy material.

T9.4 AND T9.6 SERIES

Push-in type fits 0.093" dia. holes in printed circuit boards or Vectorbord® "A" and "AA" Patterns. Serrated teeth (on all except T9.4A type) hold leads 0.032" to 0.040" in slots until soldered. Supplied with tintillate plating for easy soldering. T9.6 type has more "spring" action in slots and shank.

PLUGBORDS FOR GENERAL USE WITH CONTACTS
But Without Matrix or Circuit Patterns

Use for building prototype, test and short run plug-in circuits because almost any component from DIPs to large resistors can be mounted anywhere on the boards. Boards have an overall grid of prepunched holes: 0.042 in. dia. on 0.1 in. centers (Pattern "P"); 0.062 in. diameter on alternate 0.1 in. centers (Pattern "G"); or .062 in. dia. holes on 0.1 in. centers (Pattern "H"). Boards are available with varied connector arrangements and mating connectors are listed. Back to back contacts on each etched side terminated in independent hole pads. Most boards have holes for attaching card ejectors.

CONTACT SPECIFICATIONS. Etched contacts:
Epoxy glass Plugbords - 2 oz. copper .00005" nickel plate, gold flash.

Quality flame-retardant 1/16" thick board materials are the same as those used for Vectorbord® and Micro-Vectorbord®, see preceding page. Terminals to fit.

†Boards keyed with .1 offset on plug-in portion.

RECOMMENDED CARD CAGES
For above Plugbords: 4.5"x6.5" -CCK-13 or CCK-13P; 4.5"x4.5"- CCK13A or CCK13AP; 7.98"x9.6" - CCK17; 4.5"x9.6" - CCK4, CCK14 or CCK14P.

RECEPTACLE MOUNTED CARD GUIDES

The BR27 Series Card Guides provide rugged support for 1/16 in. freestanding circuit boards and sure guidance while engaging board and receptacle. This arrangement is commonly found on "mother boards" and in units where space is at a premium. Package quantity all catalog numbers: 2 guides; 2 screws, 4/40, Pan Hd., 3/4 in. long; 2 flat washers; 2 lock washers; 2 hex nuts, 4/40. In bulk quantities (more than 50 prs.) fasteners packaged separately from guides. Material is aluminum alloy, clear anodized.

ORDERING INFORMATION

Guide No.	Connector	For Plugbord Types:
BR27	R644, R644-3 (0.156")	4.5" wide Plugbords with centered contacts, such as Vector 838-1, 3474, 3677, 3682 and 3662 Series.
BR27-1	R636-1 (0.1")	4.5" wide Plugbords with centered contacts, such as Vector 3719 Series.
BR27-3	R630 (0.156")	2.73" wide Plugbords with centered contacts, such as Vector 3796 and 3797 Series.
BR27-4	R644-2 (0.1")	2.73" wide Plugbords with centered contacts, such as Vector 3795.

In the interest of improved design & performance, Vector reserves the right to make changes in its specifications without prior notice.

3690 CARD EXTENDER

PLUGBORDS WITH ETCHED TINNED PADS AND BUSES

Use for prototype, test, and short run plug-in circuits. All boards have an overall hole grid of 0.042 in. holes on 0.1 in. centers (Pattern "P"). All etched circuitry above contact area is tinned for easy soldering. Boards are available with varied contact arrangements and mating connectors are listed. Back to back contacts on each etched side terminate in independent hole pads. Terminals to fit.

3677, 3797 and 3795 SERIES

These Plugbords have etched tinned buses, interleaved between pad areas. All models have tinned 3-hole pad groups for easy component mounting and interconnection. DIPs or components may be soldered directly to pads, or terminals installed in pads. Socket tabs may also be attached to the pads to facilitate making component changes. The heavy etched and tinned interleaved ground and voltage buses make complicated circuit construction quite easy, while providing great flexibility. The 3677 series has 96 individual pads for mounting T0-5 and T0-18 transistors or round case integrated circuits.

4112 SERIES

These Plugbords have groups of 3-hole pads, interleaved "zig-zag" voltage bus, plus an overall etched ground plane on opposite side. The "zig-zag" design permits installed pins to connect or bypass the bus as desired. Reduced impedance and noise can be achieved with addition of Vector's double overhead trolley bus. DIPs or components may be soldered directly to pads, or terminals installed in pads. Socket tabs may also be attached to the pads.

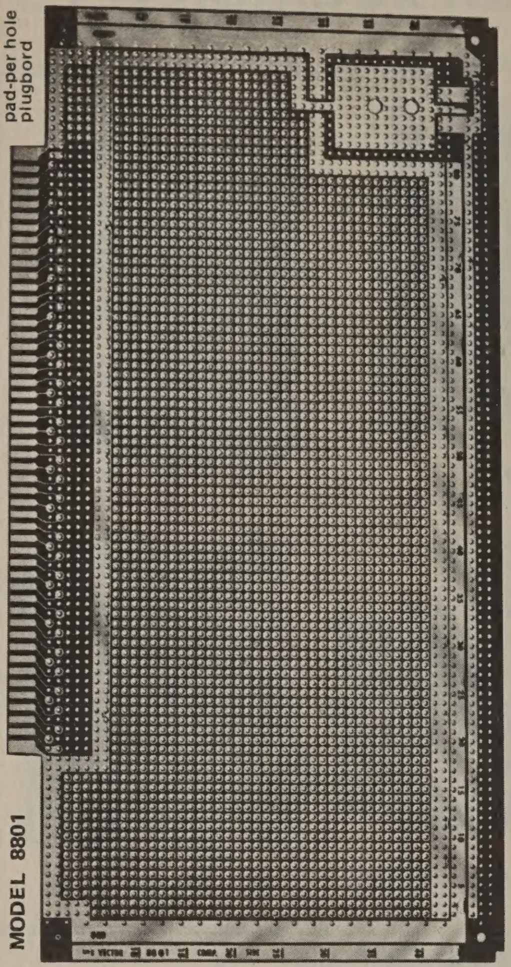
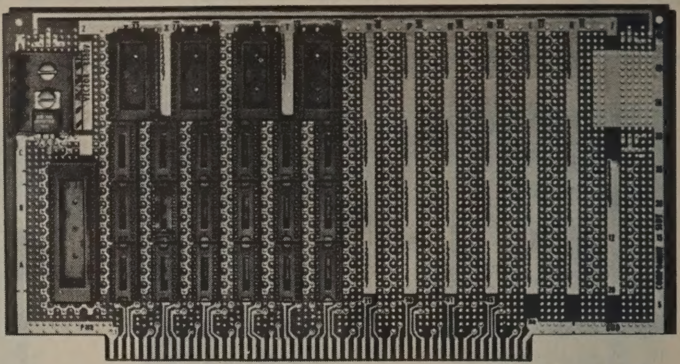
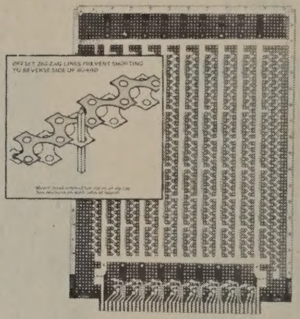
VECTOR MICROPROCESSOR PLUGBORDS

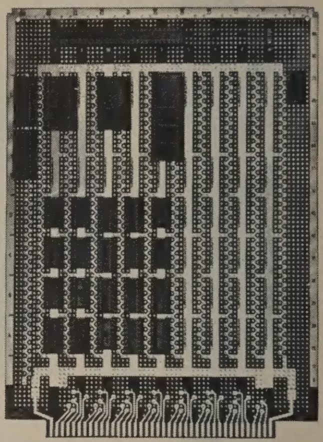




8800V
(Component side with added sockets. Available to order with sockets & terminals installed)



4350
(Wiring Side w/ Insert Showing Zig-Zag Bus)



4350
(Component Side w/ Added Sockets)

MICROPROCESSOR PLUGBORDS

With Vector Universal Microprocessor Plugbords, users can readily install any DIP device and quickly make the necessary interconnections to build peripheral interface equipment, expand memory capacity, or I.O. circuitry. Above FR-4 epoxy glass boards are furnished with an overall grid of 0.042 in. dia. holes on 0.1 in. centers, heavy tinned buses, plus nickel plated gold flashed contacts. Low in cost, the boards are planned for user installation and interconnection of wrap-post sockets wherever required. Large copper-free areas are provided for installation of flat cable I.O. connectors or large bodied discrete devices.

MODEL 8801 PAD-PER HOLE PLUGBORD

This plugbord measuring 5.313 in. high x 10.0 in. wide has 100 contacts (total two sides) spaced 0.125 in. centers and an overall pattern of 0.042 in. diameter holes spaced on 0.1 centers. Almost any device can be located anywhere on the board. Heavy tinned power and ground buses are provided on the board periphery and the one regulator position provided has prewired power, and ground connections. Tinned "donut" pads on both board sides with intervening clear areas surround all the individual holes within the peripheral buses. These pads provide solderable anchors for attaching almost any component or socket at any desired location. At the boards top edge, a copper free area approximately ¼ in. wide with 2 rows of holes is available for mounting I.O. connectors or other devices. Row and column markings, plus ejecter mounting holes are also provided. Board material is epoxy glass with hot tinned buses, nickel plated and gold flashed contacts. Mating Receptacles: R681 w/DIP solder tails fits Altair Motherboards; R681-1 - 3 level 0.025 in. square wrap post tail; R681-2 - 1 level 0.025 in. square wrap post tails fits IMSAI motherboards.

8800V — 10 in. wide by 5.313 in. high, has 100 (50 each side) contacts on 0.125 in. centers. Compatible with Altair 8800 and the IMSAI equivalent, the board can hold two 40-pin DIPs, eight 24-pin DIPs, and thirty-six 14- or 16-pin DIPs. Alternatively, it can hold fifty-two 14- or 16-pin DIPs, or ten 40-pin DIPs and eight 24-pin DIPs, or any combination in-between. Power is distributed to each DIP location by heavy copper tinned power and ground planes on opposite board sides for low impedance. Has two heat sink provisions, and one heat sink supplied with each board. For wiring ease, boards are identified by DIP zones as well as column and row hole designations.

Mating Connectors For 8800V

R681 — 50/100 contacts on 0.125 in. centers w/ soldertails
R681-1 — Same as R681 except w/ 0.025 in. sq. wrap-post tails

4350 — 7 in. wide by 9.6 in. long, has 80 (40 each side) contacts on 0.125 in. centers. Compatible with TI 980 series computer, the board will hold sixty-three 14- or 16-pin DIPs over the power and ground buses, or six 24-pin DIPs plus forty-five 14- or 16-pin DIPs, or 40-pin microprocessor DIPs anywhere by cutting one etched jumper lead per location. Heavy, back-to-back tinned copper buses provide distributed decoupling capacitance. For user convenience, an extra plus or minus voltage zig-zag power bus is supplied on each side of the board.

Mating Connectors For 4350, 3673

R680-1 — 40/80 contacts on 0.125 in. centers; 0.025 in. sq. wrap post tails
R680 — Lower priced version of R680-1; numbering does not match 4350

Quality flame-retardant 1/16" thick board materials are the same as those used for Vectorbord® and Micro-Vectorbord®, see preceding page.

RECOMMENDED CARD CAGES

For Plugbords: 4.5"x6.5"- CCK3, CCK13 or CCK13P; 4.5"x4.5" - CCK13A or CCK13AP; 7.98"x9.6" - CCK17; 4.5"x9.6" - CCK4, CCK14 or CCK14P.

In the interest of improved design and performance, Vector reserves the right to make changes in its specifications without prior notice.

WIRE WRAPPABLE PLUGBORDS

Vector wire wrappable Plugbords are furnished with an overall grid of 0.042 in. holes on 0.1 in. centers, tinned interleaved buses, and ground planes on one side of some models. DIP sockets and wire wrappable terminals or socket pins may be installed wherever required and connected however required. "Free" board areas without buses are provided on all models for mounting discretes or other large components. All boards are flame-retardant epoxy glass and furnished with the most popular edge connectors, nickel plated and gold flashed. Ejector holes are provided on all models, and a full line of supporting compatible card and module cages is available from Vector. "Special" features on the 4066 series are:

GROUND PLANES – A heavy overall 2 oz. tinned copper area on one board side can be used to reduce noise and transients, and to provide low impedance when used with buses on opposite side. A copper-free area surrounds each hole in the ground plane so installed terminals may be connected as required to one, or both, board side(s) as required.

ZIG-ZAG BUSES (on 4066 Series) -- Two uniquely configured independent bus paths accommodate terminal tails for connections as required. Use of high capacitance Vector double overhead trolley bus series with zig-zag bus lowers impedance for high frequency circuits, such as encountered in ECL 10,000 series logic.

CONTACT SPECIFICATIONS. Etched contacts:
–2 oz. copper .00005" nickel plate, gold flash.

ANY-DIP PLUGBORDS

These plugbords have an overall pattern of .042 holes and accept all DIP sockets with lead spacings of 0.1 inch by 0.3, 0.4, 0.6 and 0.9, and with up to 64 pins. W.W. sockets and Vector's Slit-N-Wrap tool are ideal for fast hookup. A corner of the DIP area can be used for mounting a low profile heat sink (one heat sink and mounting hardware furnished), or two regulators in TO-220 packages. Leads on one regulator position are prewired to raw power input, ground input and plane, and regulated power plane. The other regulator position is uncommitted. Boards have a full ground plane network on the component side, and a similar but interdigitated power plane network is provided on the other side (for either raw or regulated power). These planes provide low impedance and high distributed capacity for power buses, versatility in DIP positioning, and place power supply sources less than one quarter inch away from any DIP lead. Board material is epoxy glass with 2 oz. tinned copper circuit patterns, and nickel plated gold flashed contacts.

DIP Mounting Capacity:
4½"x6½" models: forty-two 14- or 16-pin, or sixteen 22- or 24-pin, or eight 40-pin, or five 64-pin.
4½"x9.6" models: sixty-three 14- or 16-pin, twenty-four 22- or 24-pin, twelve 40-pin, six 64-pin.

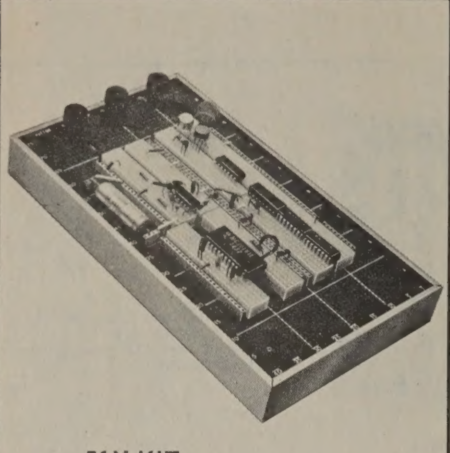
In the interest of improved design & performance, Vector reserves the right to make changes in its specifications without prior notice.

VECTOR ELECTRONIC COMPANY, INC. 12460 Gladstone Avenue, Sylmar CA 91342 Phone (213) 365-9661 TWX 910-496-1539

KLIP-BLOK/STRIP BREADBOARDING SYSTEM



51X KIT

(Circuit elements not included in kit)

51X KLIP-BLOK KIT - Assembled

Accepts up to 12 DIPs, has 970 tie points. Consists of big 4½"x8"x1/16" glass epoxy premarked Micro-Vectorbord® base, panel mounted on 1" high aluminum frame with eight 24-quad (T66-96) Klip-Bloks and four 48-contact Klip-Buses installed, ready for plugging in up to 12 DIPs and associated circuitry. Three 5-way binding posts are installed at one end. The Micro-Vectorbord panel provides space and facility for mounting extra large components. Kit includes stick-on MS9A and MS10A DIP contact Marker Strips, and special T49-1 Adapter Pins for plugging large components into Klip-Bloks/Strips.

No Soldering **Use With DIPs. Other I.C.s and Discrete Components** **No Wrapping**

Build circuits quickly with Klip-Bloks, Klip-Strips and Klip-Buses. Simply insert components into these spring clip units and make interconnections with ordinary wire. Designing, modifying and testing the circuit is easily accomplished without the need of special patch cords or risk of damaging components.

Klip-Bloks, Strips and Buses consist of spring clips with four connected tie points or 'quads.' Klip-Strips and Buses utilize the quads in strips of various lengths, from 4 to 48 tie points with insulated casings, while Klip-Bloks have these quads encased in nylon shells, either 8 (T66-32) or 24 (T66-96) quads each. All Klip-Bloks, Strips and Buses are spaced on 0.1" grids for optimum I.C. breadboarding. Klip-Bloks, Strips and Buses accept leads from 0.015" to 0.032" dia. Ordinary 22 ga. wire (0.0253" dia.) is ideal for strapping. Components may be inserted into the clips from either top or bottom. The Bloks serve as sockets for components with extra tie points for interconnections. Accompanying Klip-Buses make voltage and ground readily accessible.

Contacts used in Klip-Bloks and Strips are tin lead coated beryllium copper for thousands of reliable connections. Plastic housings on Klip-Bloks are nylon, and insulated brass shells are used on Klip-Strips and Buses.

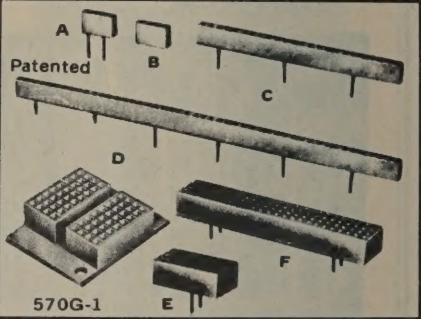
VERSATILE. Klip-Bloks, Strips and Buses fit "P" Pattern Micro-Vectorbord (0.042" dia. holes on 0.1" grid). Thus units may be "moved around" as needed with NO WASTED TIE POINTS. Plus, there is extra SPACE on the Vectorbord base to mount switches, pots, transformers--OR extra Klip units.

REUSABLE. Low-cost Klips and chassis panels may be used over and over again. Klips are good for thousands of insertions and may also be removed and replaced as desired.

Fig.	Part No.	Description	Pkg.Qty.
A	T45-4	Klip-Strip w/mtg. pins	16, 100
B	T45A-4	Patch-Klip - no mtg. pins	16, 100
--	T45-8	Klip-Strip - two quads	2, 10
C	T45-24	Klip-Bus	2, 10
D	T45-48	Klip-Bus	2, 10
–	P154-1	Insertion/Removal Tool for above Klip units	1
E	T66-32	Klip-Blok (8-quad)	4, 16
F	T66-96	Klip-Blok (24-quad)	2, 8
--	P92B	Removal Prod for Bloks	1
--	T49-1	Adapter Pins for leads to .050"	100
--	570G-1	Solderless Breadbd. Socket (2 8-qd. Klip-Bloks mounted on nylon base)-for 14-or 16-pin DIP. Stick-or screw-on.	1

EFFICIENT USE OF SPACE. Since components may be mounted on both top and bottom of the Vectorbord base, space is fully utilized. T49-1 Adapter Pins for leads to 0.050" dia. are available.

EXPANDABLE BREADBOARDS. 4½"x8" modules may be coupled together or mounted in larger frames for up to multiples of 144 sq. inches of breadboarding area.



PLUG-IN CASES For Building Modular Plug-In Circuits

ROUND CASES listed consist of a mica filled phenolic tube base type plug, either standard 7-pin miniature, 9-pin noval, or 8-pin octal type, and cover. Some listed models have interior wiring structures for mounting components. Covers attach with furnished screws. Other sizes and "specials" to order -- write factory.

Base Plug Type	Part No.	Dia.	Lgth.*	Furnished Internal Structure
7-pin Min.	G2.2-8	5/8"	2"	Center Screw + Insul. Spacer
9-pin Min.	G2.1-8	3/4"	2"	Center Screw + Insul. Spacer

TUBE BASE PLUGS

Mica filled phenolic or white glass filled polyimide material for building miniature plug-in units. Plugs match standard tube base sockets and have tinned phosphor bronze pins for soldering components on upper end. Flange on plug body serves as "stop" and bonding point for covers if used. Pins on plug-in side are 17/64" long. Models with recessed knurled nuts are available -- write factory. *Plugs listed below do not have center post.*

TURRETS

Post and Socket Types

Compact wiring structures are ideal for mounting discrete components on minimum chassis space. Socket type has ½" dia. phenolic post attached to socket, and one or two rings of tinned lugs for soldering components. Post type mounts with 6-32 screw into recessed knurl nut inside turret, or with protruding 6-32 screw. Many other sizes and types available -- write factory.

Part No.	Mounting Style	Turret Height	No. Term.	No. Rings	Spacing Betw. Rings

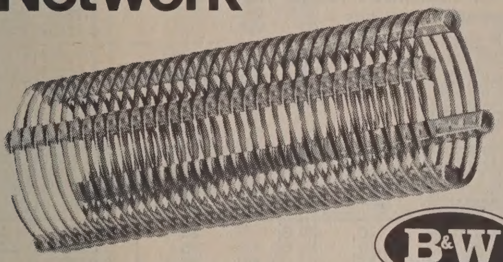
INDUCTORS

Air wound...Rotary... Band Switching Pi-Network



The B&W **Miniductor** line of rugged precision air-wound inductors gives you a large selection of standard diameters, wire gauges, and turn spacing to let you select the optimum coil for your power, Q, and size requirements. You can order standard coils from the listing at the right, or write for a quotation on your custom design in OEM quantities.

For medium and high frequency communications equipment, B&W rotary and band-switching pi-network inductors give the RF designer rugged, high-quality components for the medium power (to 1 kW AM) final amplifier and antenna tuner. Write for specifications.

Also from Barker & Williamson:

RFI and TVI filters, plate and filament chokes, dummy loads, RF and audio test equipment, coaxial switches and relays, antenna accessories, RF power meters, and custom manufacturing services.

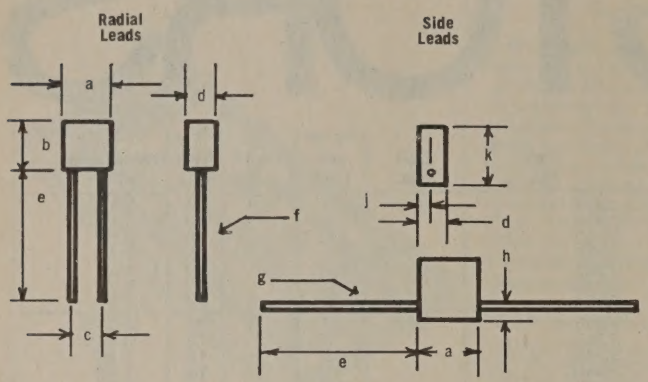
Encapsulated Subminiature and Miniature Toroidal Inductors



Features

- Applications: printed circuits and modules
- Environmental: designed to meet MIL-C-15305, Grade 1, Class B (−55°C to +125°C)
- Moisture and shock resistant, immersion proof
- Powdered iron toroidal core, low external magnetic field
- Identification: part number and inductance value printed in contrasting color

General Specifications (All Series)

Maximum operating temperature: 125°C
Rated temperature rise (at 90°C): 35°C
Dielectric withstanding voltage: 700 v rms
Terminal pull: 5 pounds
Altitude rating: 70,000 feet
Overload current: 1.4 times the rated current
Add Suffix -S to P/N for side leads configuration

HIGH Q MOLDED ADJUSTABLE COILS

The 48A Series of coils listed below may easily be tapped at 1/8, 1/4, 3/8, 5/8, 3/4, 7/8 turn if desired.

Frequency Range: 30 MHz to 250 MHz
Wire Size: 20 AWG tinned copper
Form Length: .73 inches
Coil OD: .310 inches
Lead Spacing: .408 inches
Core: 10-32 x 3/8″ Carbonyl J

Miller Part No.	Minimum Inductance	Maximum Inductance	D.C. Current

MOLDED SHIELDED MINIATURE RF CHOKES

An extremely useful series of chokes where extraneous coupling presents problems in dense packaging. Electromagnetic shielding limits coupling to less than 3% when two units are placed side by side.

Part Number	MS Type	Induct. Micro-henries ±10%	D.C. Resistance Max.	Milli-amp Rating Max.

MICRO MITE MOLDED RF CHOKES

Nicknamed the "Micro-Mite", these rugged coils exhibit high Q and very low distributed capacity, all concentrated into an amazingly small package. Size reduction ranges up to 80% of equivalent standard molded chokes. The construction of these coils permits miniaturization without the use of ferrite materials, thus maintaining temperature stability.

SUB-MINIATURE RF CHOKES

An extremely versatile series of iron core RF chokes designed to meet the industries' demand for high reliability, ultra-miniature components. The coils are ideally suited to network and filter design, delay lines, and computer applications. The coils are impregnated with a moisture resistant lacquer and on special order they can be fungus-proofed per JAN-T-152 using varnish per MIL-V-173A. They can also be encapsulated in epoxy resin to conform to Grade 1, Class B of MIL-C-15305.

9100 SERIES SHIELDED ADJUSTABLE R.F. COILS

These ultra compact adjustable coils offer a good inductance range with relatively small changes in Q. Tuning is accessible from either top or bottom of the assembly. Magnetic shielding is achieved by the use of cup cores while the copper shield offers effective electrostatic shielding. Printed circuit terminals on base and shield.

SHIELDED SUBMINIATURE ADJUSTABLE RF COILS

Dimensions: ½″ sq., x ⅝″ high.

These compact adjustable coils offer a minimum two-to-one inductance range with relatively small changes in Q. The tuning adjustment is accessible from either the top or bottom of the coil assembly. Magnetic shielding is achieved through the use of cup cores while the metal shield offers effective electrostatic shielding. Printed circuit terminals on base and shield.

ADJUSTABLE WIDE RANGE INDUCTORS

Dimensions: Max. dia. ⅞″ x 2¼″ long. Mtg. hole 5/16″.

Due to the wide range of these coils they will find immediate application in many prototype designs where the exact value of the required inductance is not known.

Miller Part No.	Inductance Min.	Inductance Max.	R Ohms Max.	Max. Current Ma.

DUAL LINE FILTER CHOKES

Miller Dual Duo-Lateral Line Filter Chokes are wound with two coils on one form, giving the advantage of small physical size in cases where space requirements are stringent and two single coils would occupy too much area. Identical in specifications, except for dimensions, to our single type Duo-Lateral chokes. They are wound on white ceramic forms 2″ in diameter by 4½″ long.

Cat. No.	Amps.	Ohms	uH	Dimensions

OVER 31 YEARS OF DEPENDABILITY

in the design and manufacture of coils and transformers for industry and defense. We specialize in the manufacture of coils and electronic assemblies to the most rigid military specifications.

FERRITE POT-CORE ASSEMBLIES
I.F. TRANSFORMERS
EPOXY ENCAPSULATED COIL ASSEMBLIES
BROADBAND MATCHING TRANSFORMERS
ANTENNA COILS AND TRANSFORMERS
OSCILLATOR COILS
BFO TRANSFORMERS
INVERTER-CONVERTER TRANSFORMERS
DELAY LINES
DIFFERENTIAL TRANSFORMERS
FILTERS (HIGH, LOW, BAND-PASS; TRAPS)
PHOTO-FLASH TRIGGER TRANSFORMERS
PULSE TRANSFORMERS
Toroidal Power Inductors
D.C. to D.C. Converter Transformers
Saturable Reactors

PARTS:
COIL FORMS AND BUSHINGS
SHIELD CANS
SPADE BOLTS AND MOUNTING HARDWARE
TUNING CORES
CUP CORES, POT CORES, TOROIDS
TERMINALS AND TERMINAL BOARDS
R. F. VARNISH, AND OTHER PARTS

CUSTOM WINDING

COMPLETE FACILITIES

for custom winding to your specification.

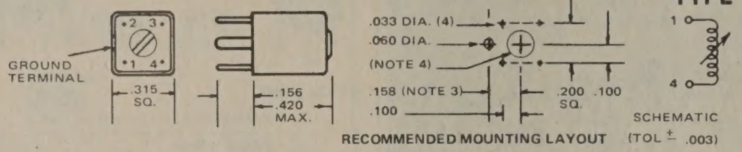
SUBMINIATURE SHIELDED VARIABLE INDUCTORS

TYPE 6740



NOTES:

1. Effective inductance and Q measured on Boonton 260A Q-meter in accordance with MIL-C-15305.
2. Self-resonant frequencies are measured at nominal inductance.
3. Ground terminal may be bent as required to fit existing layouts.
4. Provide .156 DIA. hole if bottom access to tuning core is desired. Tuning range on −38 thru −61 may be extended by allowing core to extend 1/16" below mounting surface (when Lmin ≈ ½Lnom).
5. Current rating is based on ¼ watt power dissipation.
6. MATERIALS—
   - Terminals: tin plated copper.
   - Terminal Base: molded phenolic.
   - Coil Form: polyester fiberglass.
   - Core: moisture-proofed powdered iron or ferrite.
   - Shield Can: tin plated copper.
   - Impregnation: varnish per MIL-V-173.

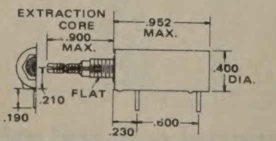
A	1.44±.12	.166	.95
B	1.44±.12	.182	1.5
C	1.44±.12	.213	2.5

Delevan Products are manufactured and tested in accordance with MIL-C-15305 to meet the high levels of performance demanded by today's quality-minded manufacturers. A comprehensive program of Quality Assurance and Environmental Testing insure the reliability of **Delevan** components.

MOLDED VARIABLE RF

SERIES 4000 & 4100

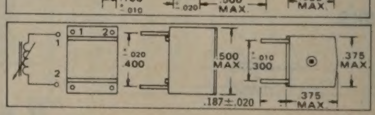
MILITARY SPECIFICATIONS:
MS-90543 (LT12V)
MS-90546 (LT12V)
Values .18uH to 70MH



SERIES 9405 & 9406

Values .08uH to 13MH

MILITARY SPECIFICATIONS:
MIL-C-15305C (LT6V)



coils and inductive components

- Molded RF
- Shielded RF
- Micro-i coils & chip inductors
- Transformers
- Molded variable RF
- Potted coils
- Custom inductors

This partial listing of Delevan Inductors is designed to give the Design Engineer a condensed overview of our product line. Our local representatives, distributors and factory sales engineers are available to serve your needs in the application of Delevan Products. They will be happy to provide a complete catalog of all our coils and other inductive components. See the index for the complete listing of the Delevan sales organization.

DALE®

INDUCTIVE COMPONENTS QUICK REFERENCE GUIDE

STYLE	DESCRIPTION
IR-2 **IR-4** 	**FLAME RETARDANT EPOXY CONFORMAL COATED CHOKES** designed primarily for commercial applications; combine durability and low cost. **Standard Tolerance:** ±5%, ±10%, ±20%, depending on value **Inductance Range:** .10 μh to 1000 μh
IM-2 **IM-4** **IM-6** 	**FLAME RETARDANT EPOXY-MOLDED CHOKES** designed to meet requirements of MIL-C-15305D, Grade 1, Class A, B. Offer precision performance, reliability and wide inductance range in small package. **Standard Tolerance: IM-2** = ±10% all values. **IM-4** = ±20% .15 thru .47 μh, ±10% .56 thru 33.0 μh and ±5% 36.0 thru 240.0 μh. **IM-6** = ±5% all values. **Inductance Range and Mil Standard: IM-2** = .10 μh to 1000 μh; MS-75083, 84, 85; **IM-4** = .15 μh to 240 μh; MS-18130, MS-90538; **IM-6** = 270 μh to 1000 μh; MS-90539.
IMS-5 	**MOLDED SHIELDED INDUCTORS** designed to meet MIL-C-15305D, Grade 1, Class A. **Standard Tolerance:** ±10% **Inductance Range:** 10 μh to 100,000 μh
IH **HIGH CURRENT CHOKES** 	**HIGH CURRENT FILTER CHOKES** designed to provide noise filtering for switching regulators, power amplifiers, power supplies and SCR or Triac control circuits.
TE **TD** 	**PRECISION TOROIDS**– Encapsulated (TE) and Dipped (TD), high Q and wide selection of Q vs. frequency ranges, plus a broad range of inductance values. TE style designed to meet MIL-T-27C, Type TF5SX20ZZ. **Standard Tolerance:** ±1%, ±2%, depending on value **Inductance Range:** .050 mh to 20 h
PL **LOW POWER TRANSFORMERS** 	**POWER TRANSFORMERS** with laminated construction for low cost industrial applications. Designed to meet U.L. specifications. P.C. mounting. Transformer secondaries may be series or parallel connected. **Input Voltage:** 115V, 60 Hz (PL-22 has dual primary for 115V/230V) **Wattage:** .75, 1.5, 4.5, 10 Various output voltages available from 4 to 230V.
ITC-1052 **CONVERTER TRANSFORMERS** 	**CONVERTER TRANSFORMERS** with high conversion efficiency from DC input to filtered DC output. Miniature size, P.C. board mount, for low power solid state circuits. **Power Rating:** To 3 w **Dimensions:** .40″ H x .75″ D **Input Voltage:** 1.5-30 VDC
PT-10, 20 & 50 **PULSE TRANSFORMERS** 	**TRIGGER TYPE PULSE TRANSFORMERS** designed for low cost trigger source isolation in half and full wave SCR power control circuits. P.C. and bobbin styles. **Primary Inductance Range:** 200 μh to 5,000 μh
CUSTOM COILS 	Dale offers wide custom capability in toroids, bobbins, RF transformers and inductors and variable pitch inductors.

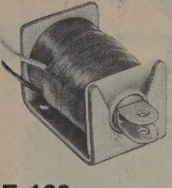
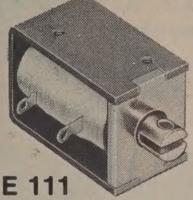
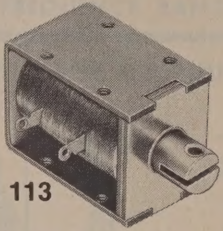
SOLENOIDS



E 109



E 111



E 113

- Voltages from 6 V to 230 V AC or DC
- Custom lead lengths and terminal variations
- Special plunger lengths and styles
- Impregnated or encapsulated models

Specifications

	Power Requirement Intermittent/Continuous (25%)	Pull (Continuous Only)
E 109	18 W/4.5 W	8 oz. @ .05" gap
E 111	20 W/5.2 W	20 oz. @ .05" gap
E 113	30 W/8 W	35 oz. @ .05" gap

- All metal parts are zinc plated.
- Staked yoke standard. You may specify conical or flat plungers on production orders.
- Life expectancy at rated load: 5×10^6.

VIBRATORS

E 305

E 301

- Improve distribution and flow of solid or liquid materials
- Long life
- Noiseless
- Adhesive mounting pad
- Easy to install

Specifications

Model: Miniature Vibrator, E 305

Voltage: 115 V AC, continuous duty (other voltages to specification)

Input: 5 watts

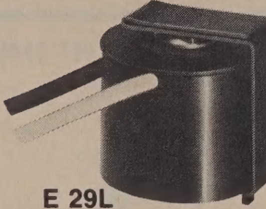
Vibrating Frequency: 120 cps.

Force: 2.5 g's

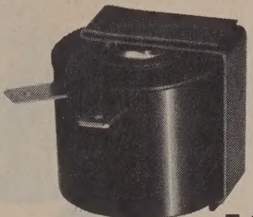
Size: 1.50" (3.81 cm) x 1.00" (2.54 cm) x 1.25" (3.18 cm)

Weight: 1.8 oz. (50 gms.)

BUZZERS



E 29L



E 29T

- Produce loud, distinctive sound
- Mount quickly, easily with single screw
- Manufactured with exclusive Uni-Weld® process

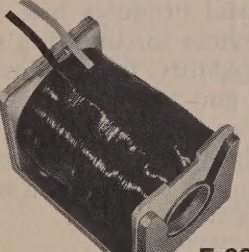
Specifications

Order by number code: E 29 or E 30	Terminals		Leads (5" Length Standard)	
	E 29	E 30	E 29	E 30
6 Volt, 60 Hz.	6E29T	6E30T	6E29L	6E30L
12 Volt, 60 Hz.	12E29T	12E30T	12E29L	12E30L
24 Volt, 60 Hz.	24E29T	24E30T	24E29L	24E30L
120 Volt, 60 Hz.	120E29T	120E30T	120E29L	120E30L

Ask about quantity prices.

Special voltages and terminals available.

CLICKERS



E 8600

- Creates distinctive sound in electronic keyboards
- Reduces chance of error on "silent", "soft-touch" keyboards

Specifications

Duty Cycle: Approx. 15% max.

Coil: 20 ohm

Coil Insulation: 1500 V AC, 60 Hz. to frame. Other voltages to specification. Special windings available to suit other operating conditions.

Recommended Conditions: 20 volt pulse for 5 millisecond duration. (Signal may be varied by changing the duration of applied pulse.)

Termination: 8" leads standard. Terminals available.

Coil products to your specifications

Coils for any application:
solenoids, power converters, relays, printers, reed switches, clocks, motors, clutches, tachometers, controls, transformers, vibrators, buzzers.

Check our capabilities:
random wound bobbin coils, thread interweave coils, coil assemblies, transfer molding, encapsulation, impregnation, fluidized bedcoating, ultrasonic welding.

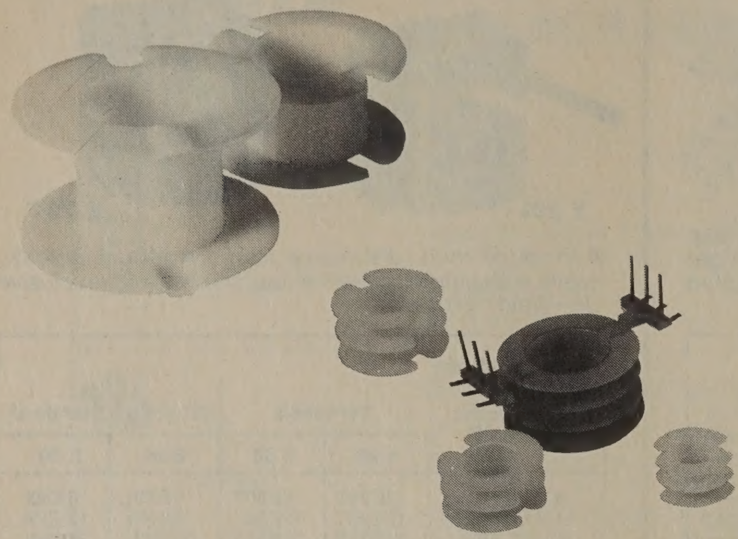
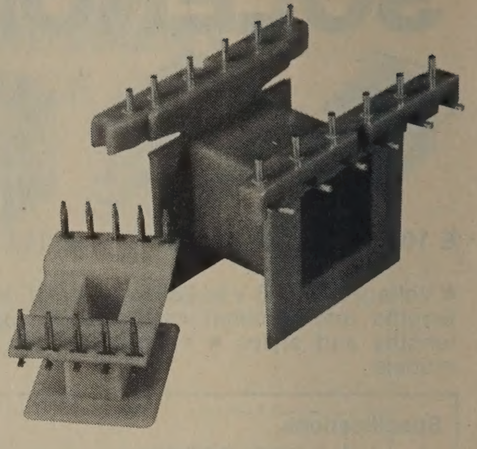
FROM DESIGN TO DELIVERY...





PRECISION INJECTION MOLDED COIL FORMS, BOBBINS, CONNECTOR HOUSINGS, AND COMMUNICATION PRODUCTS.

Harbison Industrial Products has complete in-plant facilities and services for injection molded products. Our in-house capability, in tool design, manufacture, part production and terminal insertion, assures the strictest quality for the components we provide. And our unique capability in either insert molding or post molding insertion can provide you with complete coil forms ready for winding.

The newest custom designed equipment and the ability to injection mold with modular family molding techniques — whereby a variety of different parts made from the same material can be produced in a single mold — affords attractive economies in tooling costs, without sacrificing the precision and quality of Harbison components.

We can meet or exceed the customary tolerances for injection molding your electrical and electronic components, and we mold in virtually any granular thermosetting plastic and most of the engineering thermoplastics, including nylon, Zytel 101*, Valox+, Delrin*, Noryl+, phenolics, and probably the material you're using now.

Write for the BR 16-2. It will give you an idea of how we may be able to help you.

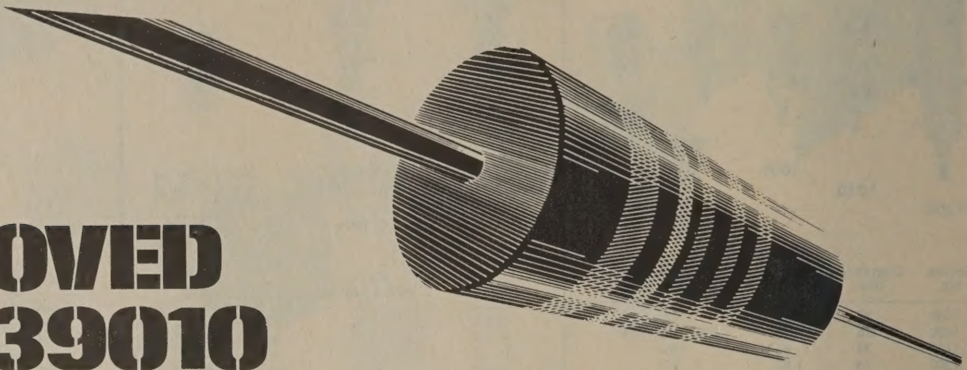
Inductors.



APPROVED MIL-C-39010

MIL-C-39010/1A - /2A - /3A FAILURE RATE "R" .01%/1000 HRS.
MIL-C-39010/4A - /5A - /6A - /7A FAILURE "R" .01%/1000 HRS.
MIL-C-39010/8A - /9A - /10A FAILURE RATE "M" 1.0%/1000 HRS.

Nytronics' history of technical leadership in inductors has a new chapter. The first company to extend the standard line concept to variable inductors has remained ahead in every subsequent step of refinement and miniaturization.

Today, there's a new place for a familiar group of inductors under highest reliability military specifications—MIL-C-39010 (latest revision). The unique "T" lead construction eliminates fine wire consideration that has previously concerned design engineers on critical circuitry.

With sizes ranging from the world's smallest shielded inductor to the most complex variable inductor . . . shielded, unshielded and variable, in hundreds of off-the-shelf values . . . it makes good sense to check first with Nytronics or your local distributor.

Now tested and approved to highest reliability military specifications.

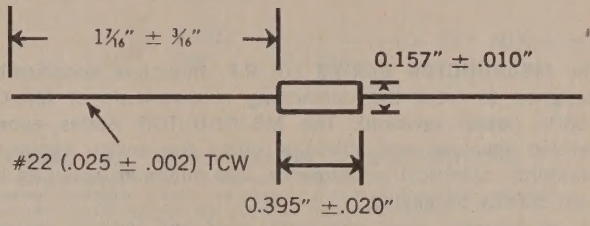
Inductors

MS-INDUCTOR SERIES
75087, 75088, 75089
MOLDED SHIELDED INDUCTOR

Ultra-Reliable Molded Shielded Miniature Inductor.
Inductance Range: 0.1uH to 100,000uH.

The **MS-INDUCTOR SERIES** are R.F. Inductors specifically designed to meet the demanding requirements of MIL-C-15305 (latest revision). The MS-INDUCTOR Series epoxy molded envelope and shielding offers the design engineer reliability, electrical performance, and minimum coupling in high density packaging.



ELECTRICAL CHARACTERISTICS

Inductance Tolerance: ±10% over the entire inductance range.
Dielectric Strength: 700 volts RMS at sea level.
Self-Resonant Frequency: Measured per MIL-C-15305 (latest revision).
Q: Measured on a Q-Meter.
Maximum Current: Based on temperature rise not to exceed 15°C at 90°C ambient.

DENSITY CHARACTERISTICS

Volume: 0.0076 cubic inches **Weight:** 0.75 grams maximum
Shielding: At 1000 cycles two units assembled side by side exhibit less than 3% coupling.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: −55°C to +105°C.

Terminal Strength: Meets five pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).

Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision), Grade 1, Class B. High frequency 10 cps to 2000 cps @ 15G ±10% maximum for 12 logarithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS.

Marking: Color coded per MIL-C-15305 (latest revision).

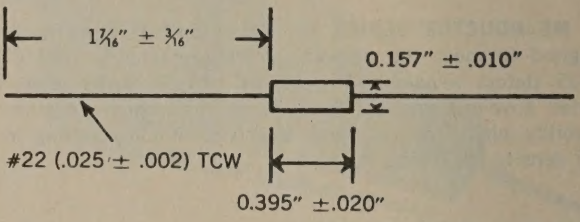
Inductors

MS-INDUCTOR SERIES
90537
MOLDED SHIELDED INDUCTOR
(Manufactured per MS-90537)

Ultra-Reliable Molded Shielded Miniature Inductor.
Inductance Range: 0.1uH to 100,000uH.
Unique "T" design eliminates Fine Wire considerations.

The **MS-INDUCTOR SERIES** are R.F. Inductors specifically designed to meet the demanding requirements of MIL-C-15305 (latest revision). The MS-INDUCTOR Series epoxy molded envelope and shielding offers the design engineer reliability, electrical performance, and minimum coupling in high density packaging.



ELECTRICAL CHARACTERISTICS

Inductance Tolerance: ±10% over the entire inductance range.
Dielectric Strength: 700 volts RMS at sea level.
Self-Resonant Frequency: Measured per MIL-C-15305 (latest revision).
Q: Measured on Q-Meter.
Maximum Current: Based on temperature rise not to exceed 35°C at 90°C ambient.

DENSITY CHARACTERISTICS

Volume: 0.0076 cubic inches **Weight:** 0.75 grams maximum
Shielding: At 1000 cycles two units assembled side by side exhibit less than 3% coupling.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: —55°C to +125°C.

Terminal Strength: Meets five pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).

Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305D, Grade 1, Class B. High frequency 10 cps to 2000 cps @ 15G ±10% maximum for 12 logarithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS.

Marking: Color coded per MIL-C-15305 (latest revision).

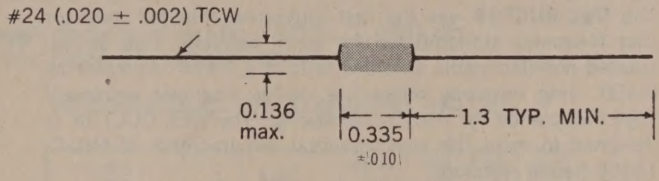
Inductors

SUPER WEE-WEE-DUCTOR

An Ultra-Reliable molded shielded inductor. Subminiature size for high density circuits. Great Inductance-to-size ratio. .10 uH to 10,000 uH. 0.136″ diameter x 0.335″ length. 61 stock values.



The **SUPER WEE-WEE-DUCTOR,** a shielded miniaturized inductor, provides a greater inductance-to-size ratio in a molded epoxy envelope. Use of unique "T" lead construction on all values from .10 uH to 10,000 uH assures exceptional reliability in ranges where fine wire sizes are used. This MS inductor series is designed to meet the stringent requirements of MIL-C-15305 (latest revision). This provides the design engineer with utmost reliability, electrical performance, and minimum coupling in high density packaging.

ELECTRICAL CHARACTERISTICS

Inductance Tolerance: ±10% (Q-Meter).
Dielectric Strength: 700 volts RMS at sea level.
Self-Resonant Frequency: Measured with full length leads on Q-Meter.
Q: Measured on Q-Meter.
Rating: I maximum based on ⅓ watt dissipation.

DENSITY CHARACTERISTICS

Volume: 0.0041 cubic inches.
Weight: 0.50 grams maximum.
Shielding: Less than 3% coupling with two units mounted side by side at 1000 cycles.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: −55°C to + 125°C.
Terminal Strength: Meets five pounds pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).
Moisture, Vibration and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision). High Frequency: 10 cps to 2000 cps @ 15G ±10% maximum for 12 lograithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS.
Marking: Color coded per MIL-C-15305 (latest revision).

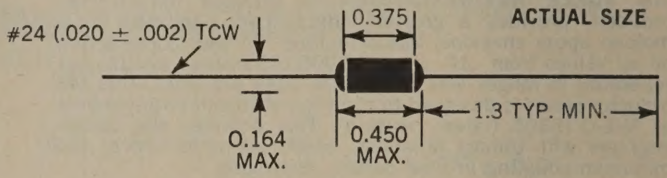
Inductors

WEE-DUCTOR

Miniature Shielded Inductor with high inductance-to-size ratio.
0.10uH to 180,000uH in 76 values
Designed to meet MIL-C-15305C.

The **WEE-DUCTOR** was the first miniature shielded inductor that Nytronics standardized for stock delivery. This encapsulated non-flammable shielded unit in a 0.164" diameter by 0.450" long envelope offers the design engineer extremely high inductance for density packaging. The WEE-DUCTOR is designed to meet the environmental requirements of MIL-C-15305 (latest revision).



ELECTRICAL CHARACTERISTICS

Inductance Tolerance: 0.1 to 22uH ±10% (Q-Meter); 27uH to 1,000 ±5% (1KC Bridge); 1,200uH to 56,000uH ±10% (1KC Bridge) 68,000uH to 180,000uH ±20% (1KC Bridge) measured at point on leads ½ inch from body.

Dielectric Strength: 700 volts RMS at sea level.

Self-Resonant Frequency: Minimum f_0 to be not less than 80% of published data, and measured with full length leads on Q-Meter.

Q: Measured on Q-Meter.

Maximum Current: Based on temperature rise not to exceed 40°C at 85°C ambient.

DENSITY CHARACTERISTICS

Volume: 0.0087 cubic inches **Weight:** 0.75 grams maximum
Shielding: Less than 3% coupling with two units measured side by side at 1000 cycles.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: —55°C to +125°C.
Terminal Strength: Meets five pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).
Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision). Low frequency 10 to 55 cps @ .06" maximum total excursion at rate of 1 linear sweep per minute for 2 hours repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS.
Marking: Printed with pertinent data.

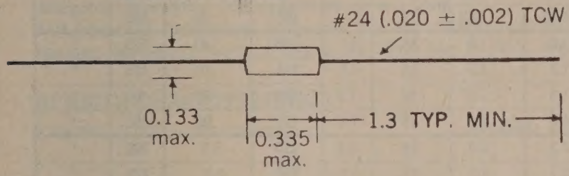
Inductors

WEE-WEE-DUCTOR SERIES

The smallest shielded inductor for high density circuits 0.10 to 1,000 uh 0.133" diameter x 0.335" length. We have 49 stock values.

The **WEE-WEE-DUCTOR** offers the Design Engineer a subminiature shielded inductor to solve special problems in density circuit application. This shielded inductor has great inductance-to-size ratio and is designed to meet the stringent requirements of MIL-C-15305 (latest revision).

0.10 to 10,000uH
0.133" diameter x 0.335" length
49 stock values



ELECTRICAL CHARACTERISTICS

Inductance Tolerance:	±10% (Q-Meter).
Dielectric Strength:	700 volts RMS at sea level.
Self-Resonant Frequency:	Minimum f₀ to be not less than 80% of published data, and measured with full length leads on Q-Meter.
Rating:	I maximum based on ⅓ watt dissipation.

DENSITY CHARACTERISTICS

Volume:	0.0041 cubic inches.
Weight:	0.50 grams maximum.
Shielding:	Less than 3% coupling with two units mounted side by side at 1000 cycles.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature:	−55°C to +125°C.
Terminal Strength:	Meets five pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).
Moisture, Vibration and Shock Resistance:	Meets requirements of MIL-C-15305 (latest revision). High Frequency: 10 cps to 2000 cps @ 15G ±10% maximum for 12 logarithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS.
Marking:	Color coded per MIL-C-15305 (latest revision).

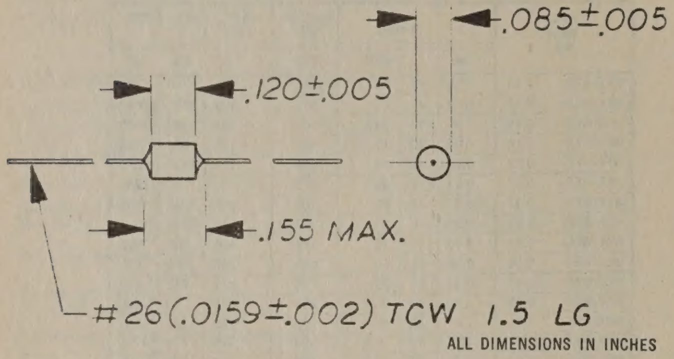
Inductors

PEE-WEE SERIES

The amazing **PEE-WEE DUCTOR** represents a 66% size reduction from the smallest magnetically shielded axial leaded inductor series heretofore available anywhere. Furthermore, this size reduction was obtained with negligible loss of electrical performance by employing several unique concepts in RF coil design.



ELECTRICAL CHARACTERISTICS:

Inductance Tolerance:	± 10% (Std).
L,Q,F, values:	Measurements per MIL-C-15305. (latest revision).
Incremental Current:	Incremental current in table is for 5% reduction in inductance value.
Dielectric Strength:	300 Volts RMS @ Sea Level.
Temperature Range:	−20°C to +80°C

DENSITY CHARACTERISTICS:

Volume:	.0007 Cubic Inches
Weight:	0.12 Grams
Shielding:	5% maximum coupling for two units side by side.
Marking:	EIA color coded

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS:

Terminal pull:	3 lbs. minimum.
Environmental:	Designed to meet the requirements of MIL-C-15305 (latest revision).

OPTIONS:

Inductance Values:	Additional Inductance Values from .025 uH up to 10,000 uH available on special order.

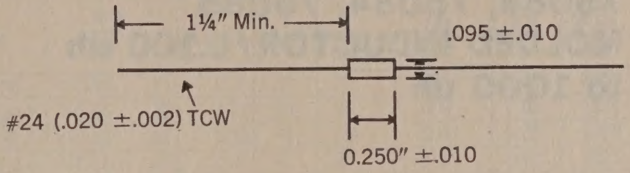
Inductors

DECI-DUCTOR

New Subminiature Inductor 0.10uH to 1000uH Range
0.100″ diameter by 0.250″ length 49 STANDARD VALUES

The **DECI-DUCTOR** offers the design engineer epoxy-molded reliability and uniformity in a subminiature R.F. Inductor. This Nytronics R.F. Inductor line is designed to meet all the environmental specifications of MIL-C-15305 (latest revision).



ELECTRICAL CHARACTERISTICS

Inductance Tolerance: ±10% over entire range.
Dielectric Strength: 700 volts RMS at sea level.
Self-Resonant Frequency: Measured per MIL-C-15305 (latest revision).
Rating: Maximum Current based on 35°C rise in 90°C ambient.

DENSITY CHARACTERISTICS

Volume: 0.002 cubic inches **Weight:** 0.35 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: —55°C to +125°C

Terminal Strength: Meets three pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).

Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision), 10 cps to 2000 cps @ 15 G ±10% maximum for 12 logarithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS (body mounted).

Marking: Color coded per MIL-C-15305 (latest revision).

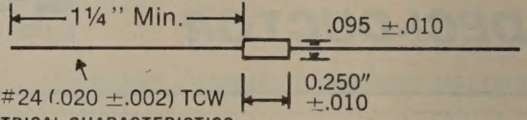
Inductors

Mili-Ductor



—MS INDUCTOR SERIES 75083, 75084, 75085 MOLDED INDUCTOR/0.100 uh to 1000 uh

The MS Inductor Series are RF Inductors specifically designed to meet the demanding requirements of MIL-C-15305 (latest revision). This MS Series is Epoxy Molded enveloped features reliability and uniformity in a Subminiature Inductor.

ELECTRICAL CHARACTERISTICS

Inductance Tolerance: ±10% over entire range.
Dielectric Strength: 1000 volts RMS at sea level.
Self-Resonant Frequency: Measured per MIL-C-15305 (latest revision).
Rating: Maximum current based on; 35°C rise in 90° ambient for phenolic, 15°C rise in 90° ambient for iron, 35°C rise in 70° ambient for ferrite core inductors.

DENSITY CHARACTERISTICS

Volume: 0.002 cubic inches; **Weight** .030 grams.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: —55°C to +125°C phenolic core, —55°C to +105°C iron and ferrite core.
Terminal Strength: Meets five pound pull test; five 360° rotations in alternate directions per MIL-C-15305 (latest revision).
Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision), 10 cps to 2000 cps @ 15G ±10% maximum for 12 logarithmic swings each of 20 minute duration repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS (body mounted).

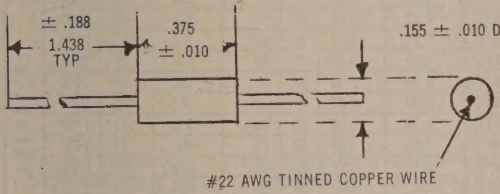
Inductors

RFC-SS SERIES

Molded inductors specifically designed to meet MIL-C-15305 (latest revision). Inductance from 0.15 to 240uH.



ELECTRICAL CHARACTERISTICS

Inductance Tolerance: 0.15 to 33 uH ± 10%
36 to 240 uH ± 5%
Measured on Q meter per MIL-C-15305 (latest revision).

Dielectric Strength: 700 volts RMS @ sea level

Rated Current: Based on max. temp. rise of 35°C (ambient 90°C) for RFC-SS-0.15 to 4.7
15°C (ambient 90°C) for RFC-SS-5.6 to -240

PHYSICAL AND ENVIRONMENTAL· CHARACTERISTICS

Operating Temperature: Max. 125°C for RFC-SS-0.15 thru RFC-SS-33
Max. 105°C for RFC-SS-36 to -240

Terminal Strength: Meets five pound pull test per MIL-C-15305 (latest revision).

Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision), high frequency 10 cps for 12 logarithmic swings, each of 20 minute duration repeated for each of three mutually perpendicular planes.

Printing: Color banded.

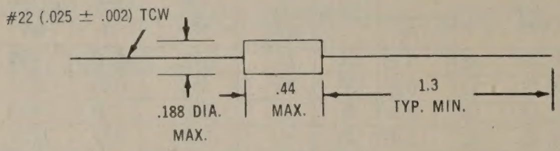
Inductors

RFC-S SERIES

Proven reliability molded inductors specifically designed to meet MIL-C-15305 (latest revision). Inductance 0.1 to 1000uH.

ACTUAL SIZE



ELECTRICAL CHARACTERISTICS

Inductance Tolerance:	0.1 to 22uH ±10% on Q-Meter 27uH to 1000 ±5% 1,000 cps bridge 120uH to 1000 uH ± 5% on Q-Meter
Dielectric Strength:	700 volts RMS at sea level.
Self-Resonant Frequency:	Minimum f_0 to be not less than 80% of published data and measured with full length leads on Grid-Dip Meter.
Q:	Measured on Q-Meter.
Rating:	⅓ watt dissipation for series S

DENSITY CHARACTERISTICS

Volume:	0.012 cu. in.
Weight:	0.90 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature:	−55°C to +125°C.
Terminal Strength:	Meets five pound pull test per MIL-C-15305. (latest revision).
Moisture, Vibration, and Shock Resistance:	Meets requirements of MIL-C-15305 Grade 1, Class B. High frequency 10 cps to 2000 cps @ 15G ± 10% maximum for 12 logarithmic swings, each of 20 minute duration repeated for each of three mutually perpendicular planes. (body mounted)

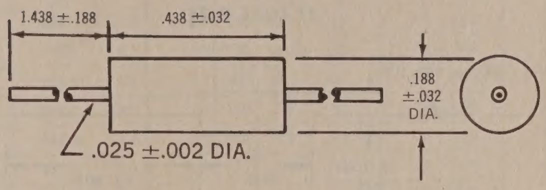
Inductors

MS-INDUCTOR SERIES
75008-75101
MOLDED INDUCTOR
(Manufactured per MS75008 - MS75101)



ALL DIMENSIONS IN INCHES

Proven reliability molded inductors designed to meet MS75008 and MIL-C-15305 (latest revision). Inductance 0.15 to 27.0 uhy.

ELECTRICAL CHARACTERISTICS

Inductance Tolerance: 0.15 to 0.47 uhy ±20%; 0.56 to 27.0 uhy ±10%
Dielectric Strength: 700 Volts RMS at sea level
Max. Temp. Rise: 35°C

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: —55°C to +125°C.
Terminal Strength: Meets five pound pull test per MIL-C-15305 (latest revision).
Moisture, Vibration, and Shock Resistance: Meets requirements of MIL-C-15305 (latest revision). High frequency 10 cps to 2000 cps @ 15G ±10% maximum for 12 logarithmic swings, each of 20 minute duration repeated for each of three mutually perpendicular planes. (body mounted)
Volume: S Type — 0.012 cu. in.
Weight: S Type — 0.90 grams
Marking: Color banded per MIL-C-15305 (latest revision).

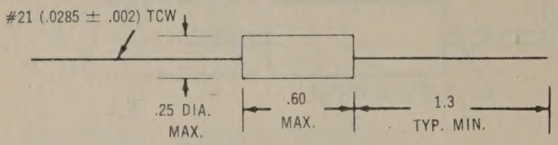
Inductors

RFC-M SERIES

Proven reliability molded inductors specifically designed to meet MIL-C-15305 (latest revision). Inductance 1.0 to 2200uH.

ACTUAL SIZE



ELECTRICAL CHARACTERISTICS

Inductance Tolerance:	1.0 to 22uH ± 10% on Q-Meter 27uH to 2200 ± 5% 1,000 cps bridge
Dielectric Strength:	700 volts RMS at sea level.
Self-Resonant Frequency:	Minimum f_0 to be not less than 80% of published data and measured with full length leads on Grid-Dip Meter.
Q:	Measured on Q-Meter.
Rating:	⅓ watt dissipation for series M

DENSITY CHARACTERISTICS

Volume:	0.029 cu. in.
Weight:	2.00 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature:	−55°C to +125°C.
Terminal Strength:	Meets five pound pull test per MIL-C-15305.
Moisture, Vibration, and Shock Resistance:	Meets requirements of MIL-C-15305 (latest revision). High frequency 10 cps to 2000 cps @ 15G ± 10% maximum for 12 logarithmic swings, each of 20 minute duration repeated for each of three mutually perpendicular planes. (body mounted)

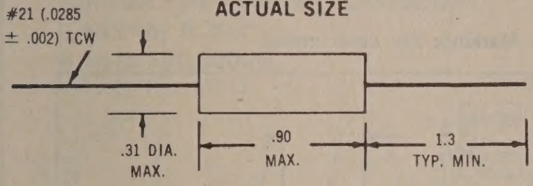
Inductors

RFC-L SERIES

Proven reliability molded inductors specifically designed to meet MIL-C-15305 (latest revision). Inductance 1.0 to 10,000uH.

ACTUAL SIZE



ELECTRICAL CHARACTERISTICS

Inductance Tolerance:	0.1 to 22uH ±10% on Q-Meter 27uH to 10,000 ±5% 1,000 cps bridge
Dielectric Strength:	700 volts RMS at sea level.
Self-Resonant Frequency:	Minimum f_0 to be not less than 80% of published data and measured with full length leads on Grid-Dip Meter.
Q:	Measured on Q-Meter.
Rating:	½ watt dissipation for L series.

DENSITY CHARACTERISTICS

Volume:	0.068 cu. in.
Weight:	4.10 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Operating Temperature:	−55°C to +125°C.
Terminal Strength:	Meets five pound pull test per MIL-C-15305 (latest revision).
Moisture, Vibration, and Shock Resistance:	Meets requirements of MIL-C-15305 (latest revision). High frequency 10 cps to 2000 cps @ 15G ± 10% maximum for 12 logarithmic swings, each of 20 minute duration repeated for each of three mutually perpendicular planes. (body mounted)

Inductors

Pee Dee Ductor Series

Marking: EIA color coded

The Pee Dee Ductor is a new, microminiature, axial-leaded RF inductor for hybrid circuit applications. It is significantly smaller than any unshielded inductor available anywhere. Designed to meet the requirements of MIL-C-15305 (latest revision), this reliable, high performance inductor has a standard inductance tolerance of ±10%. Values below 0.1 uh and above 1000 uh are available on special order.

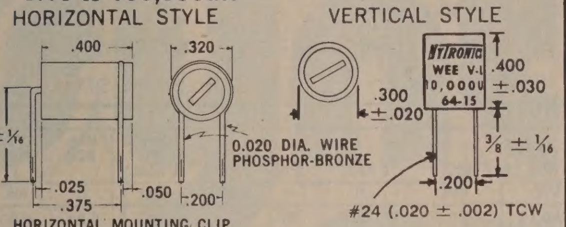
VARIABLE INDUCTORS

WEE V-L

NOW MIL APPROVED MIL-C-15305
(latest revision) — MS21381 & MS21402
Subminiature Shielded Adjustable Inductor
High Q Values
Vertical or Horizontal* Mounting
Unitized Epoxy-Molded Construction
0.400″ by 0.300″
0.10 to 100,000uH



HORIZONTAL MOUNTING CLIP
Nytronics Part No. ACS 57
(one required per unit)

ACTUAL SIZE

The **WEE V-L** is designed to accommodate close inductance adjustments in high-density circuits that demand exceptional stability and high "Q" in the smallest size available.
The **WEE V-L** is qualified MIL-C-15305 (latest revision). Printed board mounting is facilitated by 0.200 grid spacing and unit has shield construction to allow maximum density packaging. Standardized in 73 stock values.

ELECTRICAL CHARACTERISTICS

Adjustable Inductance Range:	±10%† over entire range as measured per MIL-C-15305 (latest revision).
Q and f₀ Values:	Minimum not less than 80% of specified value at L nominal.
Dielectric Strength:	840 Volts R.M.S. at sea level.
Working Voltage:	300 Volts D.C.
Maximum Current:	Based on temperature rise not to exceed 15°C at 90°C ambient.
Incremental Current:	Defined as the DC current required to cause a five percent reduction in the nominal inductance value.

DENSITY CHARACTERISTICS

Weight:	1.5 grams maximum
Volume:	.0346 cubic inches
Shielding:	3% coupling maximum when two units are tested side by side.

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Use Nytronics Tuning Tool No. B-469 or equal.

Torque:	0.75 to 6.0 inch-oz.
Operating Temperature:	−55°C to +105°C.
Moisture, Vibration, and Shock Resistance:	Meet requirements of MIL-C-15305 (latest revision). Low frequency 10 to 55 cps @ .06″ maximum total excursion at rate of 1 linear sweep per minute for 2 hours repeated for each of three mutually perpendicular planes. Shock: 50G, 11 MS. (body mounted)
Marking:	Manufacturer data printed.
Terminal Pull:	Three pounds.

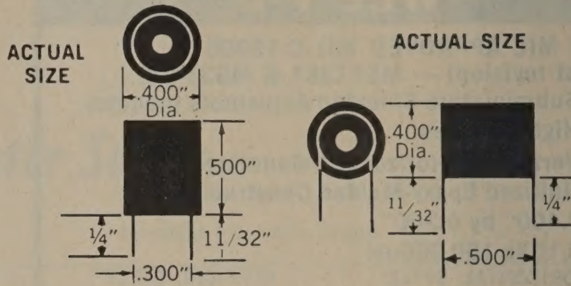
VARIABLE INDUCTORS

VIV-VIH

Miniature with inductance range of 0.10 to 4700uH in 29 values.
Encapsulated in epoxy resin for reliability.
Designed to meet MIL-C-15305 (latest revision).



Terminal Leads #22 (.025 ± .002) VCW

VERTICAL STYLE HORIZONTAL STYLE

The **VARIABLE INDUCTOR** offers high reliability and exceptional stability over extreme temperature variations. This small lightweight unit is furnished in vertical and horizontal styles to facilitate mounting on printed circuit boards. The unit is designed to meet the requirements of MIL-C-15305 (latest revision).

ELECTRICAL CHARACTERISTICS

Inductance Range:	0.33 to 4700uH Tunable Range ±20% 0.15 to 0.22uH Tunable Range ±15% 0.1 Tunable Range ±10% All measurements at 25°C on Q-Meter using miniature alligator clips mounted 1/32" from body. Q values ±20%
Self-Resonant Frequency:	Minimum f₀ to be not less than 80% of published data as measured with Grid-Dip Meter

DENSITY CHARACTERISTICS

Volume:	0.063 cubic inches
Weight:	2.6 grams

PHYSICAL AND ENVIRONMENTAL CHARACTERISTICS

Torque:	0.75 to 5.0 inch-ounces Use Nytronics Tuning Tool No. B-305 or equal.
Operating Temperature:	−55°C to +125°C
Terminal Strength:	Meets five pound pull tests.
Moisture, Vibration, and Shock Resistance:	Meets requirements of MIL-C-15305 (latest revision). Low frequency 10 cps to 55 cps @ .06" total excursion at rate of 1 linear sweep per minute for 2 hours repeated for each of 3 mutually perpendicular planes. Shock: 50G, 11ms.
Core Material:	Iron
Marking:	Manufacturer data printed.

YOKE SELECTION GUIDE

When you have a project calling for the design of a new cathode ray tube (CRT) display system, the challenge is to find the right component parts.

This is when you can rely on deflection yokes and components from Syntronic Instruments. Your confidence in Syntronic Instruments can be based on many facts. Syntronic is a leader in accumulated experience, with many capabilities that are unique in the industry, and with a reputation for specialization in precision electromagnetic devices.

Factor into your decision the fact that key component parts of Syntronic deflection devices are products of in-house manufacturing capabilities. Rigid standards have been placed on all raw materials to assure uniformity and reliability. The design of our own specialized production fixtures is reflected in improved products, delivered on time, and as specified. During production, all deflection yokes are subjected to progressive testing. The precise requirements of our quality controls have called for the design and building of our own test instruments which are proprietary to Syntronic. From concept to the final product Syntronic stands ready to help you with your challenge.

On the following pages, fundamentals of deflection yokes and their relationship to cathode ray tubes are discussed. Also, you will find a simplified method for selecting a deflection yoke to meet the requirements of the display system you are designing.

PUTTING THE YOKE AND CRT TO WORK

CRT displays consist of three essentials:

1. The display format
2. The yoke/CRT unit
3. The deflection circuit

The display format incorporates the size, shape and general make-up of the data to be displayed. The format is fundamental to the system and is defined by the customer. All design objectives are directed toward satisfying the display format requirements.

The yoke/CRT combination must be considered a unit essential to the achievement of the user's display quality.

The deflection circuit to be chosen follows a tentative selection of the yoke/CRT combination and not the other way around. To start with existing electronics might at first appear to be good value engineering but this limits the choices available in yokes and CRT's which can cause the total system to be less than optimum. Most often, the final yoke/CRT unit and the final deflection circuit result from an iteration process having as its principal goal the achievement of a quality display.

GETTING THE BEST FROM YOUR CRT

Begin with a CRT that's applicable to the display objective. Generally, a deflection yoke has no effect on an undeflected beam. A quality Syntronic yoke preserves the initial undeflected spot integrity and optimizes display performance in those areas away from center—particularly near the screen periphery.

POINTERS

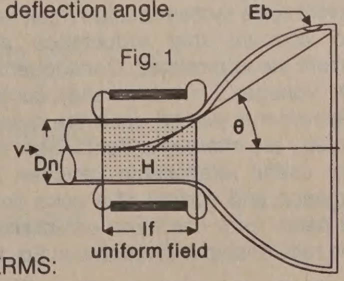
...From the viewpoint of brightness and resolution, operate the CRT with as high an anode and G2 voltage as is consistent with the CRT specifications.

...Deflection spot growth increases with beam current.

...With a greater deflection angle most factors, including spot elongation and defocusing, detract from the resolution.

...Geometric distortion increases with deflection angle.

Fig. 1



TERMS:

H = uniform magnetic field
Eb = beam acceleration in Kilovolts (anode voltage)
If = length of field H
θ = deflection angle
Dn = inside diameter of yoke coils
V = velocity of electron beam

DEFLECTION BASICS

Electron beam deflection is the result of the effect of transverse magnetic fields through which the beam passes in the yoke region on the way to the screen. As a result, an electron beam entering a magnetic field at a high velocity will follow a curved path. These magnetic fields are accomplished by passing current of the desired waveform though a coil or combination of coils surrounding the CRT neck near the funnel (See Fig. 1)

The sine of the deflection angle (theta, Θ, Fig. 1.) of the electron beam is proportional to magnetic field length and strength. Field strength is:

1. Proportional to the current flowing through the coil
2. Proportional to the number of turns of wire
3. Inversely proportional to yoke I.D.
4. A function of the kind of core material and structure

VITAL FACTORS THAT CONTROL YOKE SELECTION

Since the CRT deflection angle and neck diameter determine yoke length and I.D. it follows that the CRT sets the basic yoke form. The yoke can be modified to balance display resolution, geometry, and deflection current for a given coil inductance.

Within a particular yoke design, several essentials determine deflection current. These are:

1. Deflection angle. Deflection current is directly proportional to the sine of the deflection angle (theta, Θ , Fig. 1)
2. Anode voltage. Deflection current is directly proportional to the square root of the anode voltage.
3. Coil inductance. Deflection current is inversely proportional to the square root of inductance

ESTIMATING YOKE INDUCTANCE AND CURRENT

Estimating yoke inductance and current for a system design must take into account that inductance and current are interrelated. Consequently, the voltage (E = Ldi/dt) and current requirements placed upon the driving circuitry are interdependent. There is a very useful relationship between inductance and current of a yoke once the basic form has been established. This relationship is illustrated in Eq. 1.

$$\frac{LI^2}{2} = K \qquad \text{(Eq 1)}$$

where: L = yoke inductance in microhenrys
I = yoke current in amperes required to deflect a beam through an angle (theta Θ) with a specified anode voltage.
K = yoke energy constant in microjoules for deflection angle theta (Θ) at a given anode voltage

This basic energy equation permits a reasonable estimate of yoke inductance and current contingent upon the following identified parameters:

1. CRT neck O.D.
2. Maximum deflection angle
3. CRT Anode voltage
4. The angle corresponding to the half-axis of deflection
5. The time required to deflect through the angle defined in (4) above
6. The maximum applied or induced voltage across the yoke

With these factors known, the maximum allowable inductance can be computed using equation 2A for a linear driving circuit and 2B for a half sine wave flyback circuit.

$$L = \frac{E^2t^2}{2K} \quad \text{For linear deflection} \qquad \text{(Eq. 2A)}$$

$$L = \frac{2E^2t^2}{\pi^2 K} \quad \text{For resonant flyback deflection} \qquad \text{(Eq. 2B)}$$

where: L = maximum inductance in microhenrys
E = maximum voltage across the coil
t = time in microseconds for half-axis deflection angle
K = yoke energy constant in microjoules for the specified deflection angle and anode voltage

NOTE Equations 2A and 2B permit first-order approximations and are intended as a "starter" that shows the basic relationship between voltage, time, inductance and energy constant. The equations ignore circuit and yoke DC resistance.

Table 1 lists energy constants that can be used to estimate inductance and current requirements . These are rounded off and are valid only for yokes having a form factor established by a 70° maximum deflection angle and the listed neck sizes. The K factor is applicable only for a deflection of 20° at 10 KV.

IMPORTANT Significant variations in energy constants from those shown are possible depending upon individual design requirements related to geometry correction, resolution, sensitivity, length, and unique system requirements.

To convert these energy constants to an application other than 20° and 10 KV, use the following equation: (Eq. 3)

$$K(2) = K(1) \times \frac{\sin^2\theta \times E}{\sin^2 20° \times 10} \qquad \text{(Eq. 3)}$$

Where: K(2) = adjusted energy constant in microjoules
K(1) = average energy constant from table
θ = the applicable deflection angle
E = the applied anode voltage in kilovolts

Table of Energy Constants
(Table 1)

Approx. CRT Neck Dia.	Jedec Gauge	Average Energy Constant in Microjoules
22mm (7/8")	123, 128 141, 152	150
29mm (1 1/8")	126, 160	200
38mm (1 1/2")	110, 112 116, 162	250

EXAMPLE CALCULATION OF YOKE INDUCTANCE AND CURRENT:

(Assume a linear driven system)

Given:
1. CRT neck diameter = 22mm
2. Maximum CRT deflection angle = 70° (± 35°)
3. Deflection angle through which maximum rate of change occurs = 28°
4. Anode voltage = 20 KV
5. Time required for 28° change in beam position = 15 microseconds
6. Maximum voltage across the yoke = 50

Let's say that based upon these parameters, the yoke energy constant is 565 microjoules for 28° and 20 KV extrapolated from the table by use of Eq. 3. Yoke inductance can then be estimated using the following equation (2A):

$$L = \frac{(50)^2(15)^2}{(2)(565)} = 498 \text{ microhenrys (For linear driven system)}$$

With inductance computed as described, the current required to deflect 28° at 20 KV is ascertained by applying the basic energy equation (Eq. 1) and solving for I.

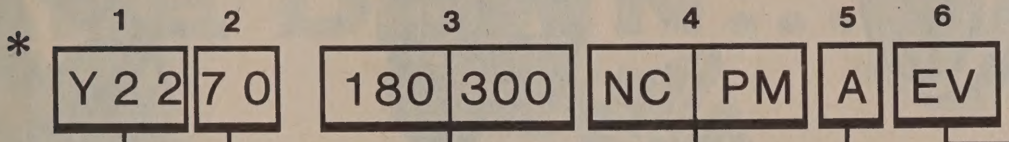
For Example:

Allowing for a manufacturing tolerance of 10% for inductance, let's choose 453 microhenrys as nominal for this calculation.

$$I = \sqrt{\frac{2K}{L}} = \sqrt{\frac{2 \times 565}{453}} = 1.58 \text{ amperes}$$

Now that yoke inductance can be estimated via the simplified method just described, there is an easy step to specifying a yoke "by the numbers" as explained in Chart 1.

HOW TO DESIGNATE A SYNTRONIC DEFLECTION YOKE BY THE NUMBERS



1. Indicate I. D. Series.
   Y22 = 22mm (Jedec gauges 123, 128, 141, 152)
   Y29 = 29mm (Jedec gauges 126, 160)
   Y38 = 38mm (Jedec gauges 110, 112, 116, 162)

2. Indicate the maximum CRT deflection angle.

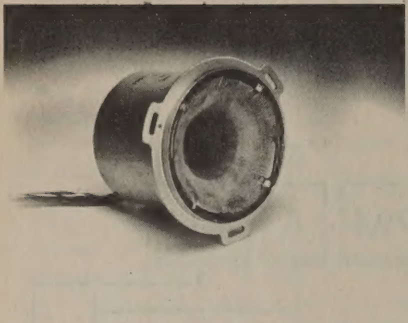
3. Indicate the Horiz (X) and Vert (Y) inductance in microhenrys respectively.

4. Specify basic accessories for pincushion correction and beam centering in that order, for integration with the yoke.
   NC = No correction
   PM = Permanent Magnet Correction
   EM = Electromagnetic Correction

5. Specify yoke resolution class.
   A = Best possible. Optimized.
   B = Excellent resolution. Best balance between sensitivity and resolution. Ideal for top quality displays.
   C = Good resolution. Commercial quality.

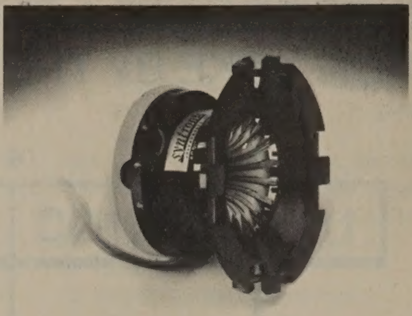
6. Designate basic yoke construction.
   EV = Environmental type. Encapsulated. Immune to environmental factors including altitude, heat, humidity, fungus, shock, vibration. Typical of military applications. Airborne, shipboard, etc.
   IC = Industrial/Commercial = Closed construction. High quality. For most quality applications.
   EC = Economy. Open construction. Good quality. TV monitors, lower cost alphanumeric displays. Medical waveforms.

*Coded yoke description--not a part number.



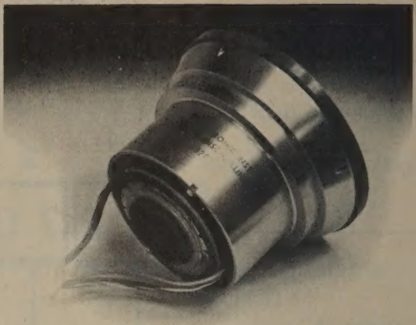
MILITARY/AIRBORNE/SHIPBOARD YOKES

Compact, lightweight, ruggedized yokes designed to withstand the rigors of environmental stresses. Typical applications include TV raster scans, HUD, HDD, alphanumeric, cockpit displays, as well as military ground support and shipboard displays.



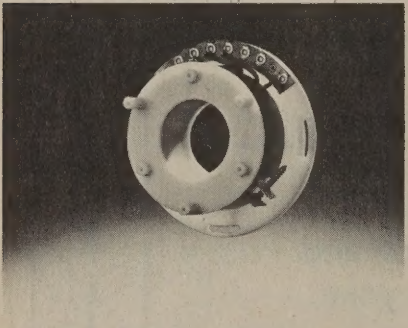
COMMERCIAL YOKES

Extensively tooled for volume production reflecting excellent cost effectiveness. Ideal for all variations of CRT terminals including alphanumeric computer output displays, medical waveform, and video. Can be supplied with built-in geometry correction and beam centering provisions.



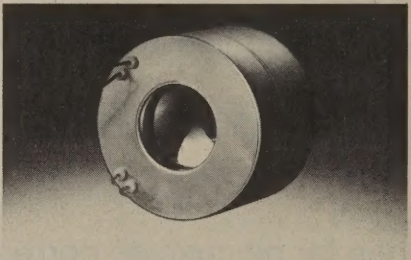
SPECIAL YOKES

Designed to solve unusual problems in unique displays such as phototypesetting, random graphics, vectors, line scan, monochrome or color projection, simulators, and applications demanding accurate beam positioning, superior focus, and zero astigmatism.



Y3802 YOKE
CHARACTER WRITING

Stator Ferrite Core. High frequency yoke provides effective way to produce display characters and symbols independent of main yoke. Mounts directly behind Y38 series of yokes. Low inductances as required.

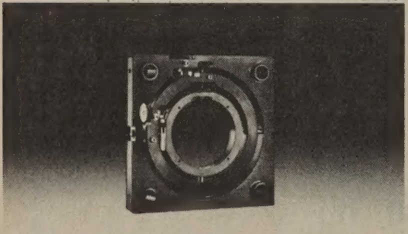


F50/55 FOCUS COILS

Static/Dynamic shielded units designed for electromagnetically focused precision displays where high resolution is required anywhere on the screen. Fits 38 mm (1½″) neck diameter CRT's.

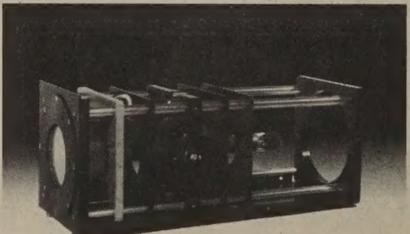
VIDICON

Complete package for ⅔″ Vidicon - Plumbicon. Front or rear loading. Printed circuit deflection coils. Self contained focus and alignment coils . . . also full line of 1″ Vidicon Yokes available.



MODEL D7450/D7675 MICROPOSITIONER COIL/LENS ALIGNER

For yokes and coils. Minimum backlash; fine adjustment of pitch, yaw, horizontal and vertical translation. Positive lock for each function without interaction.
D7450 for 3.5″ O.D. Coils
D7675 for 4.0″ O.D. Coils



CRT MOUNTS

Made for any size CRT. Fitted with micropositioner and magnetic shielding—rugged mount for bench or mobile applications.

It is impractical to attempt to catalog the variety of deflection yokes Syntronic Instruments, Inc., has designed and produced to satisfy thousands of unique specifications. The three yokes illustrated are symbolic of the basic forms in common use. Any yoke can be tailored to match specific objectives such as resolution, sensitivity, geometry, etc. and can be supplied in any inductance, single ended or push-pull.

PM and EM accessories available for Beam Centering, Pincushion Correction, Astigmatism Correction, to fit basic CRT neck diameters.

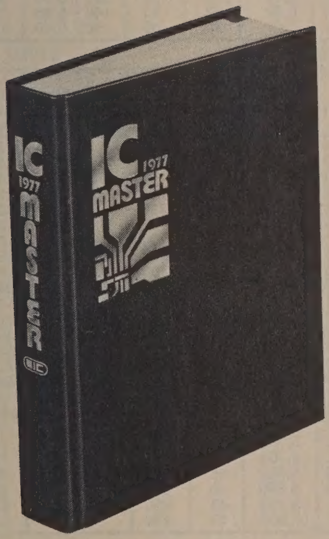
WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

TF	.225	.210	.110	.100	.020	0.2 Watt

TA SERIES

- MIN. "Q": 60 to 70.
- INDUCTANCE RANGE: .1 uh to 10 uh.
- FREQUENCY RANGE: 1 to 50 MHz.
- INDUCTANCE TOLERANCES: Less than 1.0 uh, ±10%. Greater than or equal to 1.0 uh, ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: +50 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

TF SERIES

- MIN. "Q": 60 to 80.
- FREQUENCY RANGE: 20 to 300 MHz.
- INDUCTANCE RANGE: .01 to 1 uh.
- INDUCTANCE TOLERANCES: Less than 0.1 uh, ±20%. Greater than or equal to 0.1 uh, ±10%. Closer tolerances available by special request.
- INDUCTANCE TC: +200 PPM/°C maximum.
- MAXIMUM POWER DISSIPATION: 0.2 watt.

TD SERIES

- MIN. "Q": 40 to 80.
- INDUCTANCE RANGE: 100 to 10,000 uh.
- RECOMMENDED FREQUENCY RANGE: 50 kHz to 10 MHz.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM/°C, maximum to +300 PPM/°C maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .50 watt.

TB SERIES

- MIN. "Q": 50 to 80.
- RECOMMENDED FREQUENCY RANGE: 50 kHz to 35 MHz.
- INDUCTANCE RANGE: 10 to 1,000 uh.
- INDUCTANCE TOLERANCE: ±5%. Closer tolerances available by special request.
- INDUCTANCE TC: From +60 PPM/°C maximum to +300 PPM/°C maximum, depending upon inductance value.
- MAXIMUM POWER DISSIPATION: .33 watt.

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-15305, GRADE 1, CLASS B (−55°C to +125°C). +125°C).
- DIELECTRIC WITHSTANDING VOLTAGE: 700 volts rms.

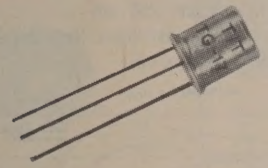
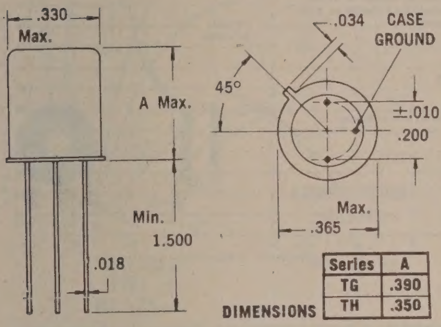
MINI-L HERMETICALLY SEALED R.F. INDUCTORS — TG, TH SERIES





Series	A
TG	.390
TH	.350

TG SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-T-27, GRADE 4, CLASS S.
- FREQUENCY RANGE: 10 to 500 kHz.
- INDUCTANCE RANGE: 1 to 500 mH.
- INDUCTANCE TOLERANCES: ±5%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°C.)

TH SERIES

- DESIGNED TO MEET THE REQUIREMENTS OF MIL-C-150305, GRADE 1, CLASS 0.
- FREQUENCY RANGE: 100 kHz to 10 MHz.
- INDUCTANCE RANGE: 10 uH to 1000 uH.
- INDUCTANCE TOLERANCES: 10 uH through 33 uH ±10%, 39 uH through 130 uH ±5%, greater than and including 150 uH ±3%.
- INDUCTANCE STABILITY: ±2% (−20°C to +85°C.)

TG SERIES

- HERMETICALLY SEALED, HIGH "Q" INDUCTOR IN A T0-5 TRANSISTOR CONFIGURATION.
- LOW EXTERNAL MAGNETIC AND ELECTROSTATIC FIELD.

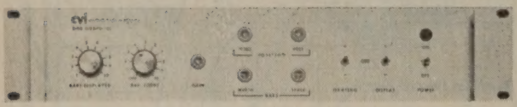
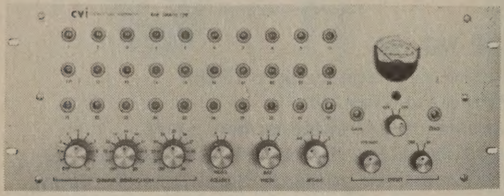
Bar Graph 101



A device accepting 10 signal inputs and converting these into a vertical "Bar" pattern as seen on the screen of a standard TV monitor. Rack mount, 3½" high, solid state.

$1250.

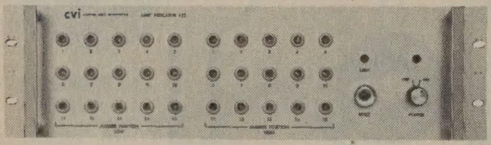
Bar Graph 120



Accepts 30 negative going input signals and produces a horizontal bar display with better than 1% accuracy. Has individual channel markers, zero suppression, decade expansion, and other features. Requires external sync. Rack mount, 7" high, solid state.

$4200.

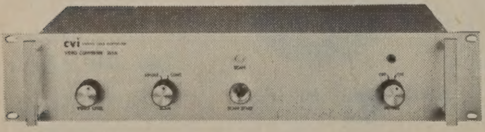
Limit Indicator 122



A device producing 15 separate "high" and 15 separate "low" vertical markers with automatic alarm when video falls outside of predetermined limits. Requires external sync. Rack mount, 5¼" high, solid state.

$3500.

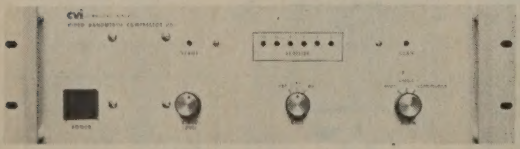
Video Converter 201-A



A unit which accepts a standard "real time" television input signal and uses high speed sampling to produce a "slow-scan TV" output signal for computer data reduction or other forms of video processing. Conversion accuracy is excellent, with negligible grey scale distortion. Rack mount, 3½" high, solid state.

$1950.

Video Compressor 260



This unit accepts standard composite video signals and performs sampling, digitizing, buffering, and slow scan TV conversion operations. Provides outputs for computer use and for direct connection of slow scan signals to voice grade communications circuits. Rack mount, 5¼" high; solid state.

$3000.

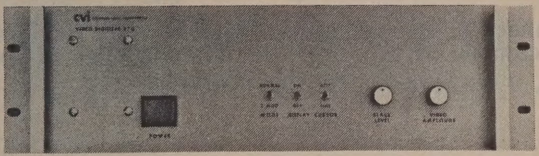
PHONE: (303) 444-3972 TWX: 910-940-3248 • COLO VIDEO BDR

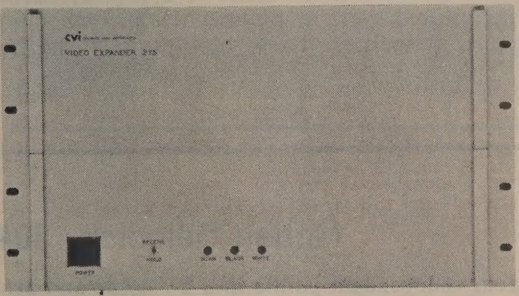
Video Digitizer 270A



An advanced version of the 260 which provides for directly computer addressable sampling. The 270 allows both computer input of video signals and the redisplay of computer processed information on a standard television monitor by means of photographic time exposures. Various options are available. Rack mount, 5¼″ high; solid state card file construction.

$4000.

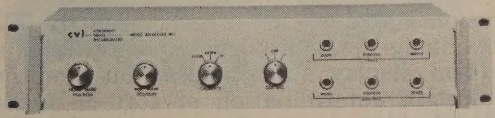
Video Expander 275



A solid state video memory capable of storing one frame of video information. Data may be fed into the 275 at a slow rate and used to build up a continuously refreshed image on a standard television monitor screen. The image buildup process may be continuously observed, and there is no fade-out or image degradation with time in the resulting display. 275 may be used as computer output display device or as slow scan video communications receiver. For communications applications it is a companion unit for CVI Models 260 or 201A Video Compressors. Available in 256x256 or 256x512 element resolution, 6-bit grayscale. Rack mount, 10½″ high.

$9000.	**275A**	1kHz	256x256
9000.	**275A-8**	8kHz	256x256
12000.	**275B**	1kHz	256x512
12000.	**275B-8**	8kHz	256x512

Video Analyzer 301



An instrument displaying "vertically line-selected" TV waveforms directly on the screen of a normal TV monitor. 1/1 waveform/picture ratio simplifies identification of individual picture elements. Display also includes an electronic reference grating and H and V markers. Requires external sync. Rack mount, 3½″ high; solid state.

$875.

Video Analyzer 302

Similar to Model 321, but does not have internal time base or field selection. However, the unit incorporates variable H and V sample widths. Requires external drive pulses. Rack mount, 3½″ high; solid state.

$1950.

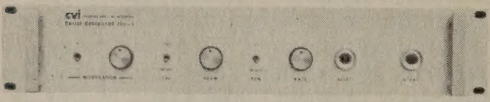
PHONE: (303) 444-3972 TWX: 910-940-3248 • COLO VIDEO BDR

Sync Stripper **302-2**

A utility unit producing sync, horizontal drive, vertical drive, and blanking signals from a standard composite video source. Allows interconnection and synchronization of video devices to camera or tape recorded signals. Size 9½ x 6¾ x 1¾″; solid state; self powered.

$250.

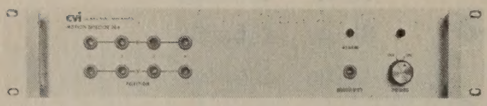
Raster Generator **302-5**



A device containing circuitry to generate very low speed rasters, up to one half hour in duration. Intended for use in recording sampled video information or other low frequency signals in conjunction with a conventional X-Y plotter. Produces pseudo topographical type displays with information vertically deflecting raster lines. Rack mount, 3½″ high; solid state.

$950.

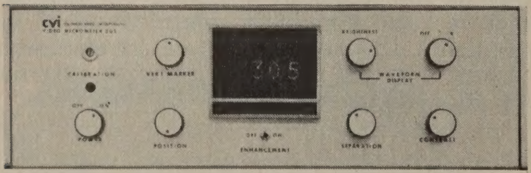
Motion Detector **304**



A device sampling four independent points in a TV scene and producing an alarm when a change in brightness occurs at any of the sampling points. Operates with standard, composite, video signals. Rack mount, 3½″ high, solid state.

$1250.

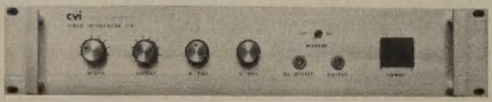
Video Micrometer **305**



Designed for dimensional analysis of objects seen by TV camera. Incorporates image enhancement circuitry and a unique video waveform display superimposed on monitor screen for more objective determination of soft or fuzzy edges. Accepts standard video signals. Solid state; table top mounting; 5¼″ high.

$3150.

Video Integrator **310**



An instrument producing a D.C. voltage directly proportional to the integral of a video signal falling within a selectable "window" area. Requires external drives. Rack mount, 3½″ high; solid state.

$1500.

CVI VIDEO INSTRUMENTS FOR DATA ACQUISITION — PROCESSING — DISPLAY — TRANSMISSION

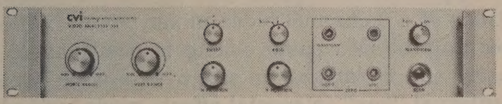
PHONE: (303) 444-3972 TWX: 910-940-3248 • COLO VIDEO BDR

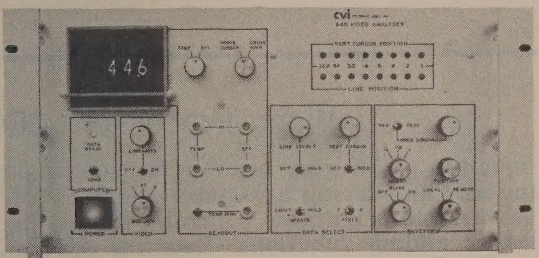
Video Analyzer 321



Laboratory version of the 301. Incorporates additional circuitry to allow chart recording of line selected video waveforms X-Y coordinate indication, noise analysis, computer data input, and other features. Requires external sync. Rack mount, 3½" high, solid state.

$2500.

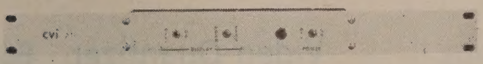
Video Analyzer 340



A sophisticated instrument intended to derive objective data from video signals. Functions include digitization of a selected TV line and processing of derived data. Several patterns are superimposed over input video for simplification of analysis. Solid state; rack mount; 8¾" high.

$14,500.

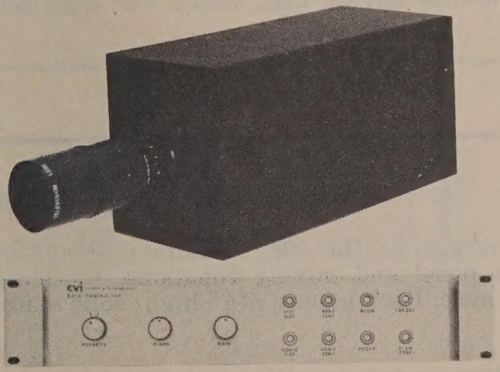
Video Analyzer 350



A low cost instrument for display of TV waveforms directly on a normal monitor screen, eliminating the need for a separate CRT display. Similar to the Model 301 but uses fixed sampling and also features a peak video level detection mode. Rack mount, 1¾" high; solid state.

$400.

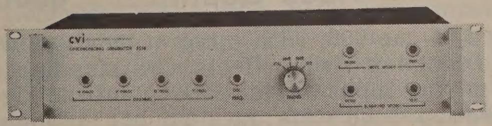
Data Camera 502



A TV camera intended particularly for research or industrial inspection uses. Accepts nearly any 1 inch tube and has various features such as externally controllable sweeps, beam blanking, dynamic gain control, plug-in low pass filters, and very wide range of operating rates. Options include video sampler, shading generator, and digital control of various functions. Camera is three chassis configuration: head, control unit, power supply. Requires external drives, blanking, or deflection voltages.

$4000.

Sync Generator 601-B



A unit intended for laboratory use when either standard or non-standard TV scan rates are required. Uses micrologic binary counters with adjustable feedback paths. Drive and blanking pulses are variable width, but sync is not EIA format. Incorporates dot/bar generator for test purposes. Rack mount, 3½" high, solid state.

$1025.

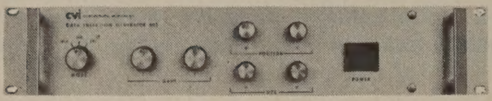
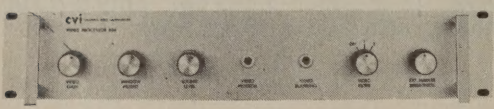
Data Insertion Generator 603



Combines the functions of a 2 channel video mixer, special effects generator, and video pointer. Moveable oblong is positionable to any point in TV raster and is variable in size over a wide range. Oblong acts as the internal "key" in special effects mode, and also generates a white "box" outline or solid square for marking purposes. Requires external sync. Rack mount, 3½" high, solid state.

$1250.

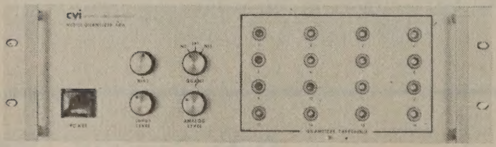
Video Processor 604



An instrument modifying the grey scale of a video input signal by selecting and amplifying a variable width "slice". Also incorporates variable brightness control, sync adding, and external marker adding functions. Requires external sync. Rack mount, 3½" high; solid state.

$950.

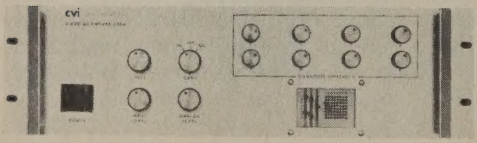
Video Quantizer 606



A device which allows the processing of a video input signal into 16 separate amplitude levels. Operates with tape, camera, or disc inputs and allows radical grey scale alterations or the generation of complex synthetic color signals. Rack mount, 5¼" high, solid state.

$3500.

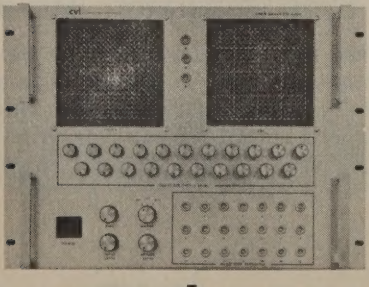
Video Quantizer 606A



An eight-channel version of the 606, containing a built-in color coding patch panel and mixing functions. Produces R-G-B outputs and sync. Rack mount, 5¼" high; solid state.

$2500.

Video Quantizer 606C

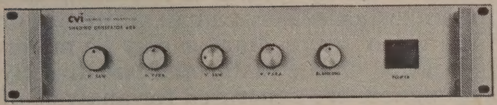


A 21-channel version of the 606, with integral patch panel for achieving a wide range of visual effects. Contains linear video amplifier for mixing input digital with quantized signals. Wide band operation. Solid state; rack mount; 14" high.

$5000.

cvi VIDEO INSTRUMENTS FOR DATA ACQUISITION — PROCESSING — DISPLAY — TRANSMISSION

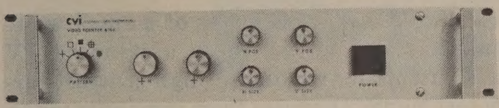
Shading Generator 608



Generates H and V sawtooth and parabolic waveforms of variable amplitude and polarity to provide compensation of brightness errors in video input signals. May also be used to drive external dynamic correction circuitry. Requires external sync. Rack mount, 3½″ high; solid state.

$950.

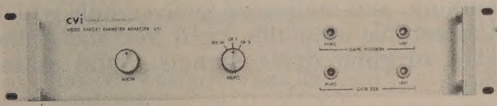
Video Pointer 610E



Generates five different oblong and/or cross patterns which are positionable to any location on the TV screen. Oblongs can be changed in size over a range of 10 to 1. Unit may be used for marking purposes or for positional measurements. Rack mount, 3½″ high; solid state.

$1950.

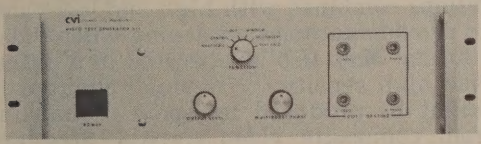
Diameter Analyzer 611



This device contains gating, slicing, and counting circuits to provide automatic measurement of the maximum vertical dimension of a target with moderate to high contrast. Both digital and analog output signals are available. Rack mount, 3½″ high; solid state.

$1950.

Video Generator 615



A test instrument providing grey scale, grating, dot, window, multiburst, and flat field signals. Multiburst is variable in position for monitor resolution checks, and multiburst frequencies to 20 MHz may be ordered. Requires external drive, blanking, and sync. Rack mount, 5¼″ high; solid state.

$2000.

X-Y Indicator 620

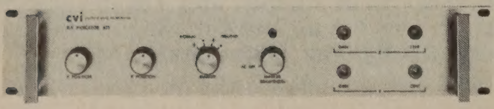
Generates white cross hairs superimposed over a video input signal. Allows rapid alignment of subject material with a predetermined location when used in conjunction with a standard TV camera and monitor. Accepts composite video on a terminated input and provides composite video out to a standard TV monitor. Size 11 x 8 x 1.65″. Mounting: Free standing or rack. Self powered.

$400.

cvi VIDEO INSTRUMENTS FOR DATA ACQUISITION — PROCESSING — DISPLAY — TRANSMISSION

cvi COLORADO VIDEO INCORPORATED • P.O. BOX 928 • BOULDER, COLORADO 80306 • U.S.A.
PHONE: (303) 444-3972 TWX: 910-940-3248 • COLO VIDEO BDR

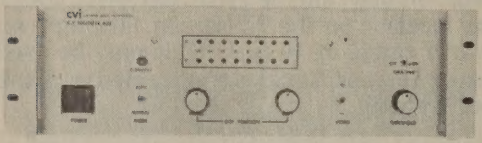
X-Y Indicator 621



An instrument accepting either composite or non-composite video signals and superimposing either a small white dot or set of cross hairs on the video image. Marker may be manually positioned to any location on the raster and two directly proportional DC output signals are generated for analysis of spatial location of subjects. Also contains built-in grating generator for evaluation of input signal quality. Rack mount, 3½″ high; solid state.

$1500.

X-Y Digitizer 622



This unit provides 8 bit digital X-Y coordinates of a small white dot that may be manually located anywhere on a standard TV image. Also incorporates automatic tracking of high contrast targets, and stable grating test signal. Operates from composite video. Rack mount, 5¼″ high; solid state.

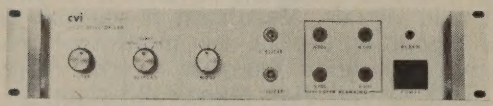
$4500.

Sync Delay 624

Accepts standard format vertical and horizontal drives and generates drives, blanking, and industrial sync signals which may be delayed by selectable amounts, both vertically and horizontally, from the original drive signals. Solid state; rack mount; 3½″ high.

$1250.

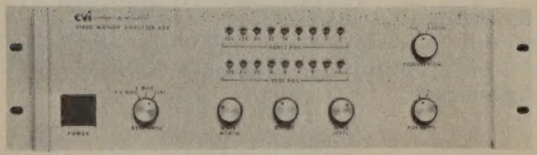
Video Detector 630



Provides gating functions combined with high and low video detection circuitry to provide automatic warning when video levels exceed preset limits. May also be operated in a differential mode to provide high sensitivity to small changes in contrast, such as might be produced by spots or hairline cracks. Operates from composite video signals. Standard rack mount, 3½″ high; solid state.

$1500.

Video Motion Analyzer 633



Accepts composite video signals and measures lateral motion of a high contrast video target in a selectable portion of the TV signal. Operates in two modes: one-line gate superimposed on target image; or variable gate to blank out all but target profile. Solid state; rack mount; 5¼″ high.

$4000.

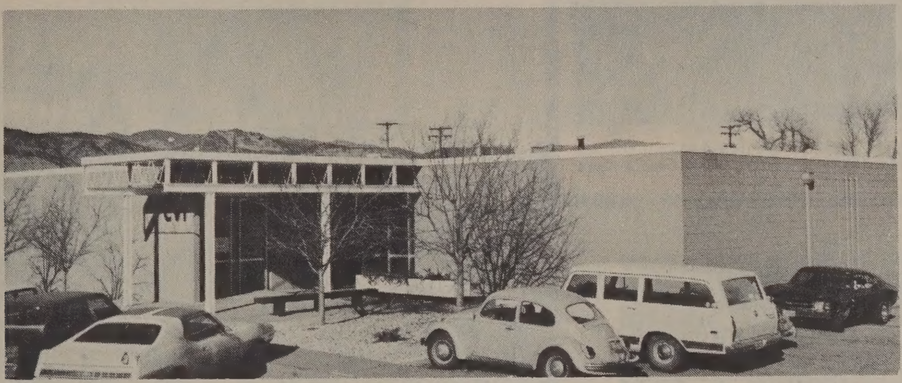
A few words about Colorado Video, Incorporated.

CVI specializes in the design and manufacture of instruments utilizing video technology. Particular areas of interest include research laboratory instrumentation, industrial inspection and control, computer input/output of television signals, video metrology, image alteration and synthesis, electronic art, scan conversion, and communications involving the transmission of TV pictures over audio grade circuits.



Colorado Video, Incorporated—3245 Prairie Avenue, Boulder, Colorado USA

CVI instruments are used throughout the world and are available for operation from 50 to 400 Hertz power sources and at various scanning rates. For technical assistance, please contact any of the following:

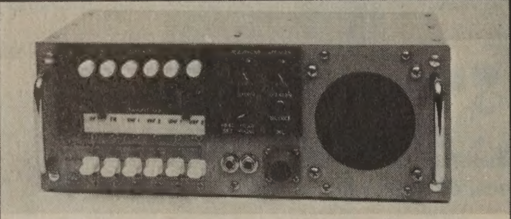
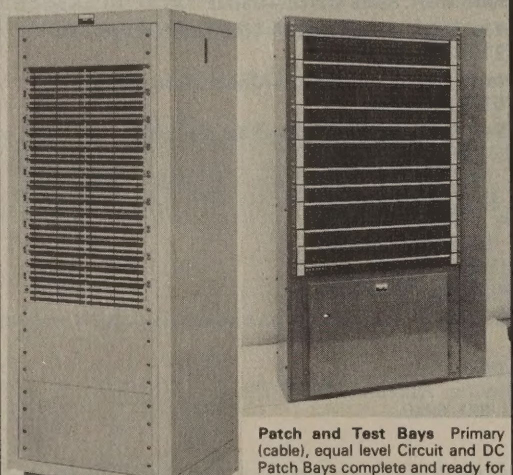
Loudspeaker-Amplifier Panels Single (SLP-4 shown) and dual units available with common or independent AC/DC Integral Power Supplies, or DC inputs. 5-1/4" H X 19" W X 6 " D

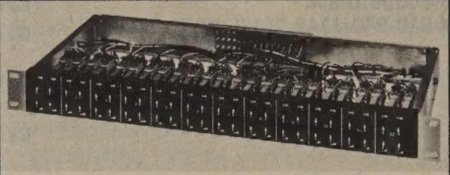


Air Traffic Control Tower Systems•Complete solid state Airport Tower units • FAA, Navy and Air Force approved • Models for 12 VDC, 24 VDC and 48 VDC power • Amplifiers for Tx and Rx circuits.

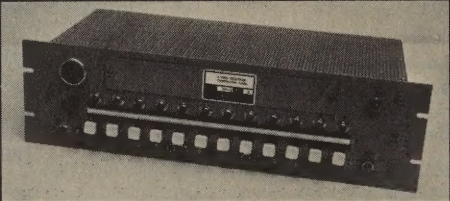
Mobile Air Traffic Control System AN/MRC-131 • Completely self contained • Provides 1 HF, 2 VHF, 2 UHF, 1 FM channels • Three operator positions • Power from motor alternator, 12 V DC battery, and 110/230 VAC rectifier charger • All frequencies in HF, VHF and UHF Air/Ground bands.



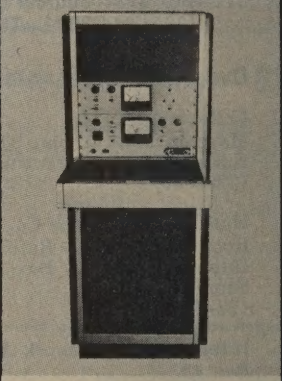
Patch and Test Bays Primary (cable), equal level Circuit and DC Patch Bays complete and ready for installation at site. Also, Patch, Test, Fuse and Distribution bays.



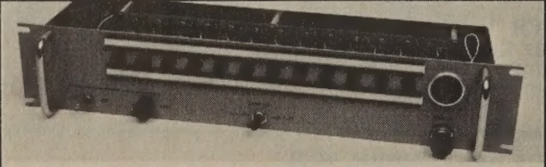
Variable Attenuator Panel - VAP-1230 Provides 12 channels of switchable attenuation from 0 to 30 DB in 2 DB steps, 600 OHMS input and output. 1-3/4" H X 19" W X 9" D. Other impedance and attenuation steps available.



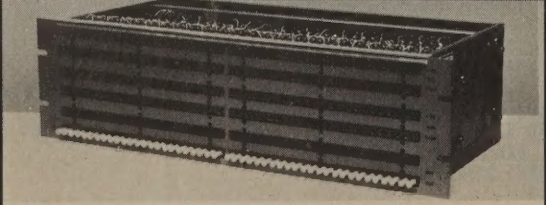
Voice Orderwire Unit TTP-12 • Provides selection 12 channels • Supplied with telephone handset • Adjustable Tx and Rx levels.



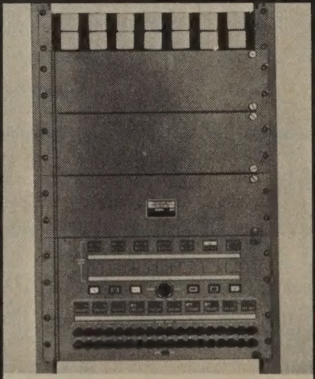
Magnet Charger Model 3 LV • High power for industrial users • 11000 watt seconds peak energy • Automatic 10 operations per minute • Available with Monitor Unit • Variable charging voltage 0-500 volts • Model 1 LV also available.



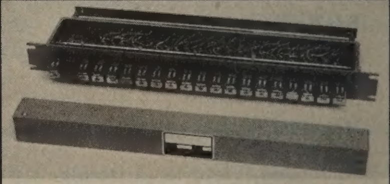
Local Alarm Panel LAP-12 • Model of 12, 24 and 36 points • Red lamp and audible alarm • 110 VAC, 48 VDC and 24 VDC optional power • Solid state construction.



Audio and Digital Patch Panels Miniature and standard telephone jacks in various configurations for telecommunications and computer patch and test facilities available in 2, 4 and 6 wire circuitry for audio; cut key and/or activity indicators for digital.



Supervisory Control, Alarm Systems • Custom designed to your requirements • Up to 256 points control and alarm • Excellent security Double scan with Parity • Computer control and logging available • Single master-multiple remotes • Fully solid state IC construction.



Relay Panel - RP Y-20 20 Plug in relays in 1-3/4" of panel space for various applications in communications and control field. A wide variety of voltage and contact arrangements available.

Fuse and Alarm Panel 40 fuses in 1-3/4" H. Panel with visual alarm and contact outputs for remoting alarm. FP-40A for 6, 48, 60-80, 120-130 VDC. F P -40B for 6, 12, 24 and 48 VDC applications.

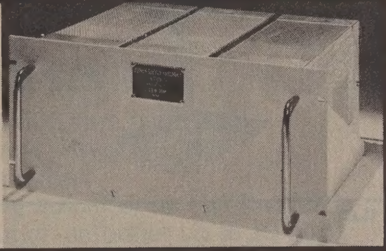
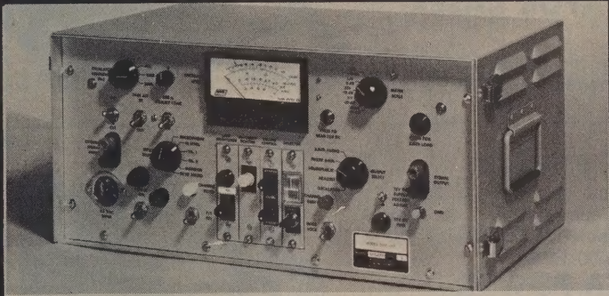
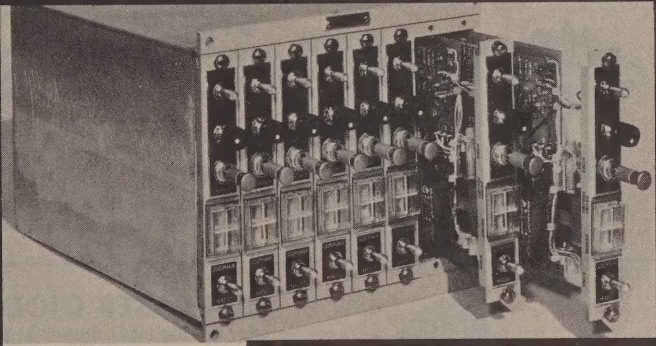
Air Traffic Radio Channel Control Systems 12 VDC, 24 VDC and 48 VDC,—12 and 24 VDC systems include (shown left to right): Jack Unit—audio unit; w/plug-in microphone amplifier/lamp brightner, recorder monitor, and speaker-headphone amplifier modules, — selector unit w/plug-in selector modules — multipin patch panel extender module (foreground). Flight service station selectors, power supply assemblies and supporting test set also shown on this page.



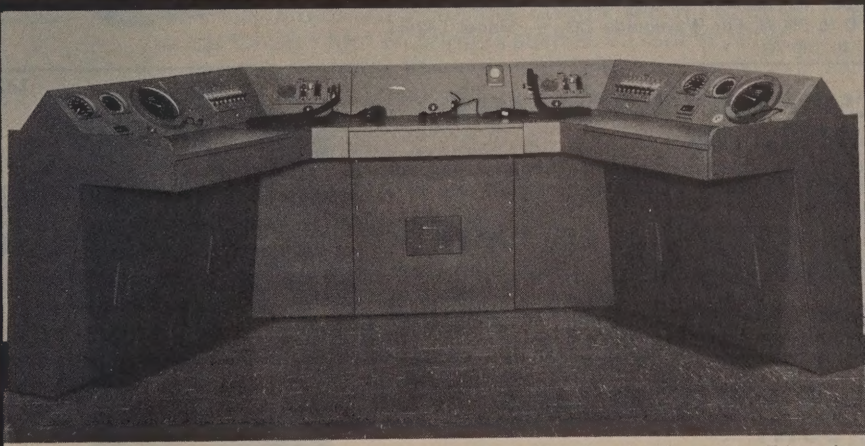
Power Supply Assemblies: Standard models include 12 VDC, 24 VDC and 48 VDC outputs with input @ 115 VAC 50-60 H_z single phase. (Other in/outputs available on request.)



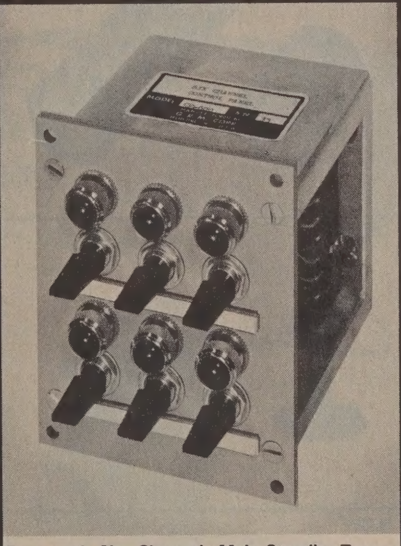
Module Test Sets designed to facilitate organization, direct and depot maintenance levels. The test set provides in/output signals and measurements required to access module performance, used with 12 and 24V radio channel control equipment.



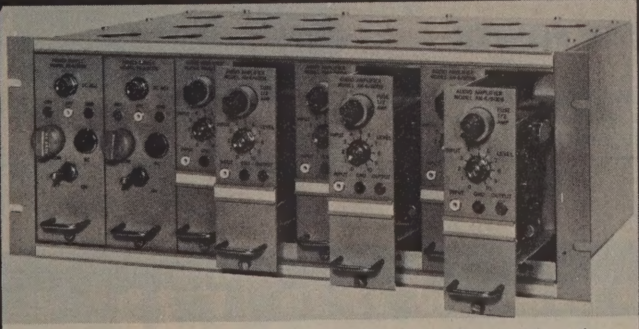
Flight Service Station Selectors provides standard radio channel control functions plus muting and individual volume control features with emergency and locking select and key switch.



Complete Communications Consoles designed to customer specifications, including: air traffic control — flight service stations — police, fire and maintenance dispatcher positions.



Four and Six Channel Main-Standby Transformer Control and Relay Panels — six channel control panel CP-600 shown. Other basic models include RP-600, SSP-400, and RTP-400. These units available in 12, 24 and 48 VDC.



Microphone, Line, Speaker and Mixing Amplifier Assemblies, regulating and non-regulating (6 channel regulating amplifier — AA-6/600B shown)

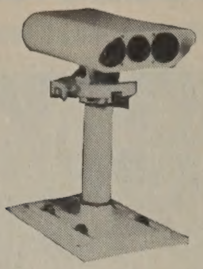
Additional Systems and Equipment:

- Voice frequency signaling and control system (RCAG)
- Voice frequency signaling system (VOR/VORTAC)
- Receiver selector XFMR
- Receiver muting XFMR
- Receiver selector/mixing XFMR
- Radio headset panel
- Receiver selector, 4 channel
- Receiver volume control panel
- Receiver muting panel

G.R.M. CORPORATION - COMPLETE MANUFACTURING SERVICES FOR OEM PROPRIETARY PRODUCTS

LASER POWER SUPPLIES, LASER DIODE PULSERS AND LASER SIMULATORS

LC20



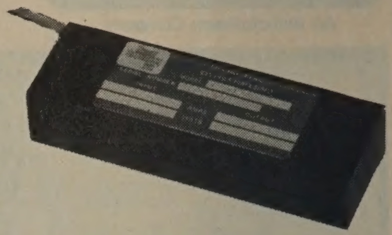
LC20 COMMUNICATION SYSTEM

Private telephone or computer communication. Easy installation. No FCC license required.

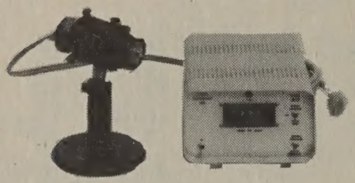
L23, 28, 40 HELIUM NEON LASER POWER SUPPLIES

Very compact highly efficient modular power supplies for portable lasers. Model L23 for 10 to 17V DC input, Model L28 for 24 to 32V DC input, and Model L40 for 117V AC input.

L23



ILCL



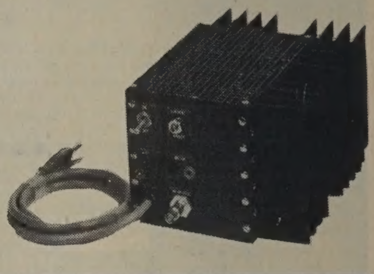
ILCL DIODE LASER PULSER SYSTEM

For driving diode lasers with power ratings of 1 to 100W. Features include a precision synthesized clock with optional rates from 0.1 to 1M PPS. Operates from AC line or batteries.

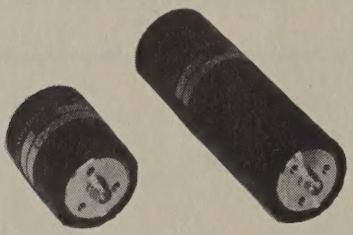
L12, 13 METAL VAPOR LASER POWER SUPPLY

Light weight, high efficiency for Helium Cadmium Laser, 150, 200, and 300W models. 117V AC, 50 to 400Hz input.

L12-13



ILC



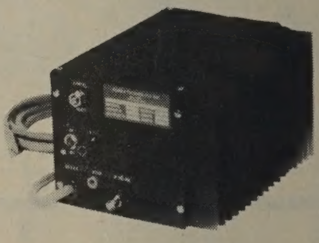
ILC LASER DIODE PULSER

For driving laser diodes at pulse widths of 7 to 200ns. Models available for pulse currents of 1 through 100A. Fast rise and fall times, internal clock for pulse rates of 1 through 10,000 PPS.

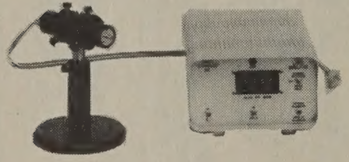
L30-L44 CO_2 LASER POWER SUPPLY

Light weight, high efficiency, low ripple, well regulated. For sealed off CO_2 Lasers — Model L30-32 150 to 300W, For Waveguide CO_2 — Model L42-44, 75 to 150 W.

L30



CS100



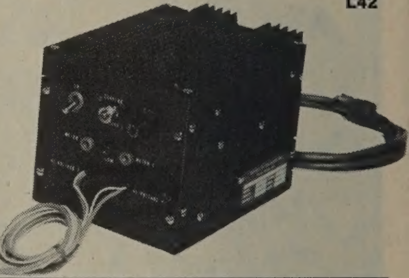
CS100 1.06 MICRON LASER SIMULATOR

Provides an eye safe low-power source which duplicates the pulse width and repetition rate of a Nd-YAG Laser.

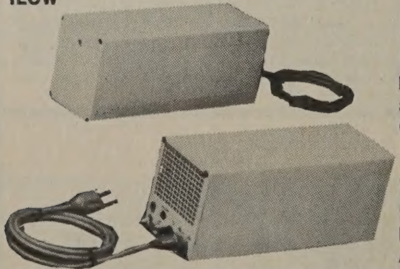
L42 WAVEGUIDE CO_2 LASER POWER SUPPLY

A variety of models are offered for single and double discharge lasers with input power from 35W to 150W. 117V AC and 28V DC models are available.

L42



ILCW



ILCW CW DIODE LASER MOUNT

Provides a power supply, DC to 100MHz modulator, and closed loop temperature control for operating CW Diode Lasers.

L18-L22 CO_2 LASER POWER SUPPLY

Light weight, high efficiency, low ripple, well regulated for flowing gas lasers. Models for 300 to 1500W. Air cooled or liquid cooled models.

L22

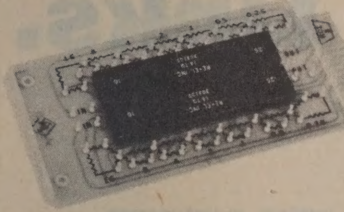
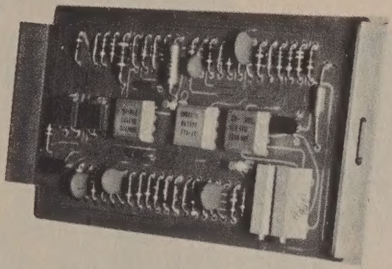
A COMPLETE LINE OF COMPONENTS FOR DATA COMMUNICATIONS SYSTEMS



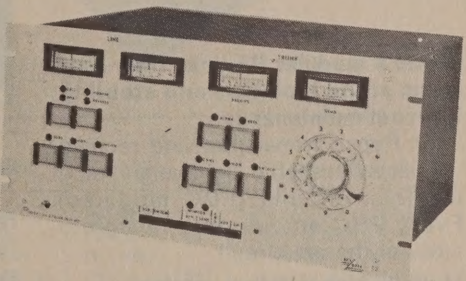
LINE CONDITIONING & INTERFACE DEVICES

C-303	• Dual strappable 0 to 31.75 DB 600 ohm pads
C-311	• 600 ohm in/out 30 DB data grade line amplifier
C-312	• 2W, 600/10K input speaker amplifier
C-314-XX	• Balanced and isolated summing amplifier up to 10 ports
C-315-XX	• Balanced and isolated distribution amplifier up to 10 ports



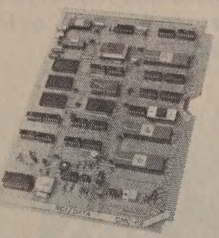
ALARMS—TELETYPE & CARRIER FAULT

C-351	• 45 to 200 Baud distortion/open line alarm
C-353	• Dual carrier detector/alarm
C-354	• Hi/Lo carrier alarm, detects out of tolerance data levels



INTERFACE—TELETYPE

C-362	• EIA to TTY convertor 20 or 60 ma, two to four wire option
C-363	• EIA to polar convertor
C-368	• Automatic Loop current regulator adjustable 15 to 70 ma
C-435	• Digital Filter—Virtually eliminates errors on noisy TTY circuits using "VART" receivers
C-460	• Data Delay Motor Start provides up to 1 second of data storage for slow turn on printers such as T.I. Silent 700®. . . Saves power, extends life.
C-480	• Telex line and trunk test set—test either mechanical or computerized telex exchanges.



NEW! COMPLETE MICRO COMPUTER

CMC-68—Most advanced 6800 type single board computer on the market. Includes: 1K RAM, 32 I/O Ports, ACIA with Telco compatible loop interfaces, DMA Controller, 8 Level priority interrupt control, 4-1KX8 ROM sockets . . . and many more features.

CONTROLS AND SIGNALING

C-324A	• Touch Tone® Receiver—Uses latest digital detector
C-325A	• Touch Tone® to Dial Convertor—Single card
C-326	• Selective Call—Module for C324A responds to 2, 3 or 4 Digit addresses

NEW!

FP68	• Data Link Encrypter—Meets new FED STD FIBS PUB 46
MSC	• Master Slave Clock System—Unlimited remote clocks

RE-EL CIRCUITS INC.

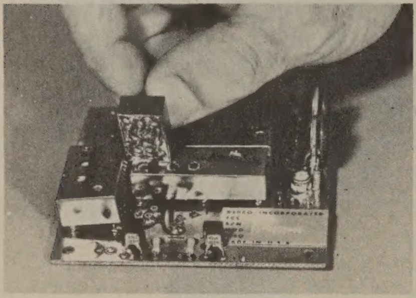
PRODUCTS FOR COMMUNICATION

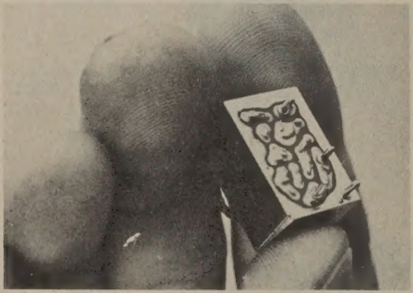
Here's what you gain with Repco's Modular VHF/UHF RF Communication Links.

Modular Design.



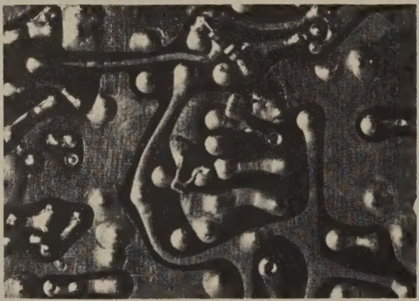
Repco's modular RF links offer maximum stage isolation and stability; low cost maintenance.
Each Repco transmitter and receiver is built with reliable, lightweight, plug-in block circuits (PBC modules). Every PBC module is a complete, state-of-the-art circuit.

Multiple transmission modes.
Repco transmitters and receivers are designed to carry tone, voice, or low-speed digital data.



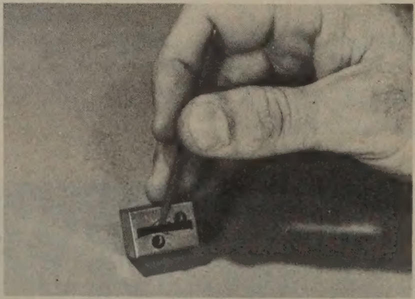
Small size.
PBC modules let us build Repco transmitters and receivers small, to help you meet tight packaging requirements. They measure only 3.32" x 3.32" x 1.00"... and weigh just 3.2 oz. (8 and 25 watt models are slightly larger).

Low current drain.
Repco's RF links were specifically designed for **low current consumption** . . . like 4.6 milliamps on some of our receivers when on standby.



Documented reliability.
Customers report RF systems in use for over two years . . . with no failures.

Design flexibility.
You get choices: low, medium, and high band, VHF or UHF; 12.5 and 15.0 VDC transmitters and receivers; a range of .5 to 25 watt transmitter output; some models capable of continuous-duty operation. Because most systems designers are demanding UHF transmitters and receivers for RF communications links, and maximum freedom in interfacing RF carriers with their present systems, we offer the versatility of our 450-470 Mhz UHF range.



Easy system maintenance.
Service methods are the most simplified available, because the **Modular Design** permits quick module replacement. Low cost PBC modules are available from our large in-stock, off-the-shelf supply.

And still low cost!
Not just because our transmitters, receivers, and crystals cost less . . . but because we save you costly delays. Typical delivery on large orders is eight weeks. (Evaluation units 4 weeks if crystals from Repco stock suit your needs.)

Repco's Quality Control.
We guarantee our assemblies to work. Backing that guarantee is a long history of building RF communication links . . . and nothing else. We work long and hard to deliver the utmost in reliability and design flexibility.

Type Acceptance/Certification.
All our transmitters and receivers have been type accepted or certified in Repco's name where applicable to current FCC Rules and Regulations. Some units offered for sale are for overseas applications. In Canada, our links are D.O.C. accepted.

Call or write today
for complete specifications and pricing information. Ask about our special evaluation offer.

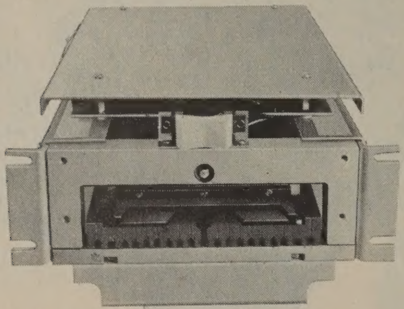
TEX-3076 Micro-min High-Level	0 to + 5 V ±2.5 V -5 to 0 V	750 K min for ±7.5% deviation 375K min for ±15% deviation	0.25% of bandwidth	N/A	Adjustable up to 1.4 V P-P into 10K, 8 V P-P open circuit	±1.5% of bandwidth	0.35"x1.00"x1.06"	Hermetically-sealed semi-conducters. Seperate case ground Amplitude and Frequency controls.
TEX-3081 High Frequency	0 to 5V or ±2.5V	50K Min	±0.5% of bandwidth	N/A	Adjustable up to 2.8V P-P into 47 K.	±1.5% of bandwidth	1.8"x1.03"x1.6"	600 kHz ±150 kHz accepts high speed PCM
TEX-3107 **TEX-3105** Low-Level	0 to 20 mV ±10 m V -20 to 0 mV	50K min Standard other impedances available	0.25% of bandwidth	120 dB min at dc	Adjustable up to 1.4 V P-P into 10 K, 8 V P-P open circuit	±2% of bandwidth or ±0.3% of center frequency	**TEX-3107** 1.03"x1.58"x2.0" **TEX-3105** 1.31"x0.8"x1.98"	Isolated Low-Level Differential Input eliminates need for separate DC Amplifiers.

Notes:

1. All VCO's available in standard IRIG proportional bandwidth (±7.5%, ±15%) and constant bandwidth channels (±2 kHz, ±8 kHz). Other frequencies and deviations are available.
2. Output Impedance of all VCO's is a nominal 40 K ohms.
3. Total Harmonic Distortion of all VCO's is less than 1%.
4. Amplitude Modulation of all VCO's is less than 10%.

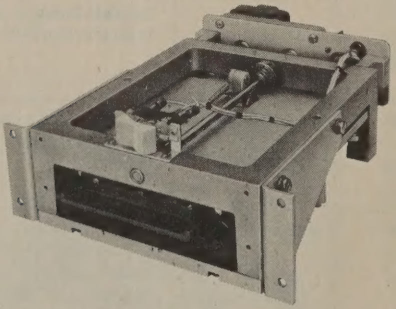
Take a card. Any card. There's an AMP card reader to

Or read it and write on it. Or read it and validate it. Or read it and capture it. No other manufacturer offers so broad a line—with so many features and options to meet your particular needs. No matter how you buy them—as complete, ready-to-use units or as individual components—our wide range of data entry products will give you the excellent performance and reliability for which AMP is noted. Typical applications include industrial control and automation, information systems, remote data collection, access control, military use.



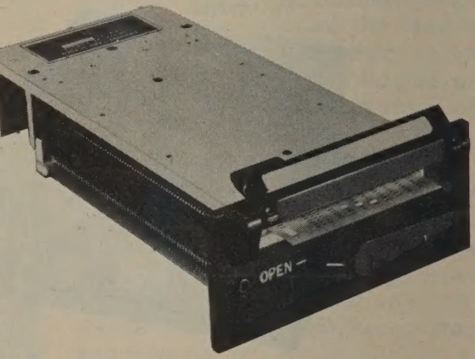
Card reader/scanner—Model 2982

- Senses all 960-hole positions of standard, 80-column card.
- Provides character serial, bit parallel data up to 2000 CPS.
- Offers outputs which are compatible with DTL and TTL.
- Integrated circuitry and solid-state components assure high reliability.



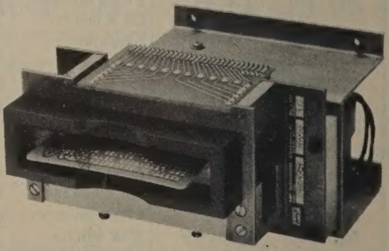
Tab-card reader—Model 2980/81

- Reads standard 80-column punched tab cards.
- Compact design allows positioning in small panel space.
- Available with parallel outputs, matrix and diode-isolated specials.
- Wipe and back-wipe contact operation has high inherent reliability.
- Available in 80-column and 22-column versions—motorized and manually operated.



Military static card reader Model 2972

- Approved for airborne equipment.
- Accepts standard 80-column paper or plastic punched cards.
- Reliable operation in extreme environments assured by extensive qualification program.
- Manual control eliminates need for external power.
- Great flexibility with a variety of electrical interface options. All input and output terminations are pluggable.
- Outputs compatible with TTL and DTL circuitry.



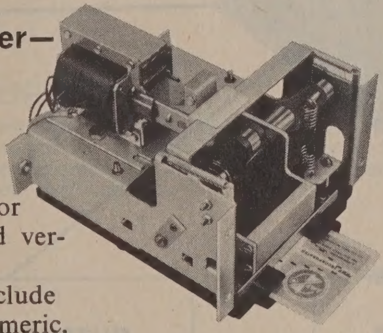
Combination tab-card/ credit-card reader—Model 144

- Accepts standard punched paper 80-column cards and plastic badges.
- Reads numeric or alpha-numeric data up to 12 characters.
- Fully automatic read cycle. Requires no operator control.
- Remote switch design offers reliable operation and long life in industrial environments.
- Completely pluggable interface adapts to "state-of-the-art" wiring techniques.

read it and program from it.

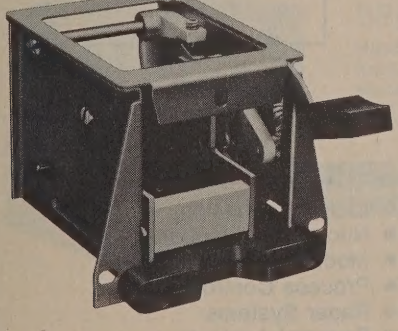
Low-profile magnetic card reader—Model 75

- Reads ABA track at 75 bits/inch.
- No motor required. Mechanical drive eliminates RF generation.
- Low profile. Suitable for use as a stand-alone accessory.
- TTL outputs are compatible with industry standards for design interface.



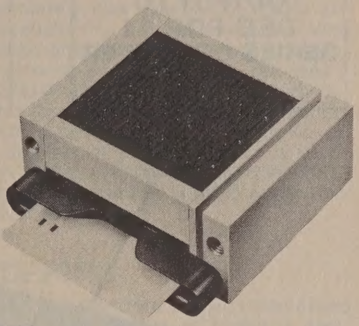
Credit card reader—Model 360/361

- Reads 15, 20 or 22-column credit or badge cards.
- Solenoid powered or manually operated versions available.
- Output options include numeric, alpha numeric, parallel and diode matrix.



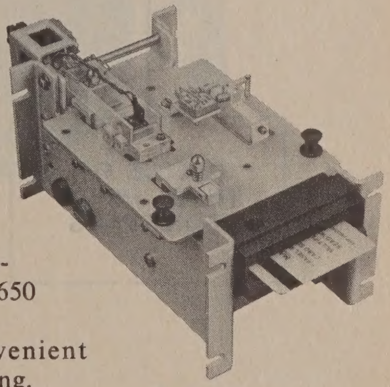
Matrix badge reader—Model 161

- Reads up to 17 columns of a standard badge or credit card.
- Small size and low cost adapt to limited space and budget.
- Output matrix available for numeric or alpha numeric data.



Credit and badge card reader—Model 130

- Maximum reliability, with proven switch design and a minimum of moving parts.
- Compact, rugged construction. Only two major assemblies for long life in severe environments.
- Low-temperature operation. Suitable for outdoor use to —40°F.
- No external power required. Reader operates with card insertion.
- No maintenance required. Designed to operate throughout life without adjustment or preventive maintenance.



Magnetic card reader—Model 210/211

- Slot design ensures proper card orientation.
- Reads and writes at 210 bits per inch, providing as many as 650 bits across the card.
- Designed for convenient behind-panel mounting.
- Card is returned or captured at user's option.
- Adaptable to IATA, ABA and THRIFT track requirements.

You name the card and the application. AMP has the card reader to match. For immediate information, call (717) 367-1105. Or write:

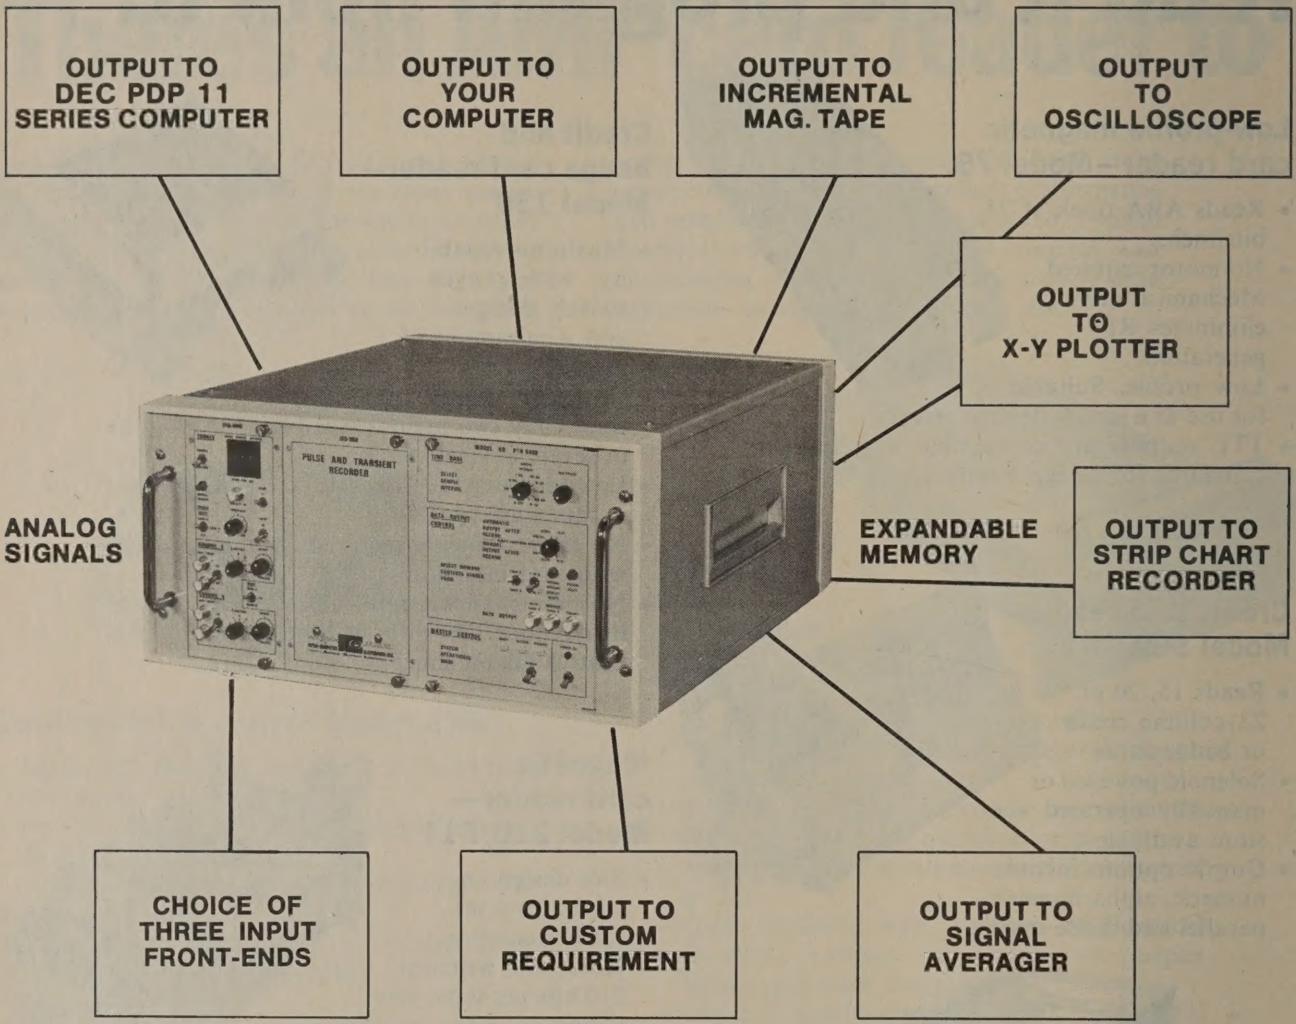
HIGH SPEED
TRANSIENT ANALYZERS & SIGNAL PROCESSING SYSTEMS



OUTPUT TO DEC PDP 11 SERIES COMPUTER
OUTPUT TO YOUR COMPUTER
OUTPUT TO INCREMENTAL MAG. TAPE
OUTPUT TO OSCILLOSCOPE
OUTPUT TO X-Y PLOTTER
ANALOG SIGNALS
PULSE AND TRANSIENT RECORDER
EXPANDABLE MEMORY
OUTPUT TO STRIP CHART RECORDER
CHOICE OF THREE INPUT FRONT-ENDS
OUTPUT TO CUSTOM REQUIREMENT
OUTPUT TO SIGNAL AVERAGER

FEATURES

- Sampling up to 100 MHz with 8-bit resolution
- Interfaces with I/0 of all Computers
- Standard Memory — 2048 words
- Expandable Memory — 8k, 16k and 32k words
- Records transient waveforms and repetitive signals
- Easily interfaced to TTY, printer, or magnetic tapes
- Complete remote of front-panel controls
- Analog output for oscilloscope, plotter and strip chart recorder
- Sampling interval from 10 nanoseconds to 50 seconds
- Split timebase, records two rates per memory record
- X vs Y recording
- Variable pretrigger mode stores data up to total memory capacity for baseline and leading edge of signal analysis

APPLICATIONS

- Laser Processing
- Nuclear Applications
- Medical Applications
- Process Control
- Radar Systems
- Spectral Analysis
- Chemical Analysis
- Electronic and Electrical
- Accelerated Food Processing
- Pollution Monitoring
- X-ray and Gamma Ray Detection
- Alpha, Beta Particle Recording
- Acoustical Analysis

ANN ARBOR
TERMINALS, INC

DISPLAY TERMINALS

COMPANY

Ann Arbor is a broad-line manufacturer of CRT display and terminal equipment directed toward the OEM market. Ann Arbor was incorporated in Michigan in 1970, and is wholly owned by its employees. It has delivered over 8000 terminals to date, and is currently delivering at a rate of over 300 terminals per month.

PRODUCTS

Ann Arbor utilizes a building-block approach to its product line. Its products are composed of highly-modular, functionally-partitioned PC boards, each of which is generalized and packed to provide a maximum of function and flexibility. This enables the company to offer an extraordinarily broad line of standard products and options at an economical price.

In addition, this approach enables the company to respond well to "custom" needs. Ann Arbor offers an X-MOD service aimed at the customer's low-volume, minor-change-to-standard-product requirements, and a Q-MOD service aimed at his high-volume, special requirements.

X-MOD SERVICE

Ann Arbor offers its X-MOD service where the customer requires a relatively simple modification to a standard unit and where the quantity required does not economically justify PC redesign, development of production and test fixtures, and preparation of formal product documentation. X-MOD's are accomplished by a technician who orders the closest standard unit from production and modifies it to the customer's requirements.

Q-MOD SERVICE

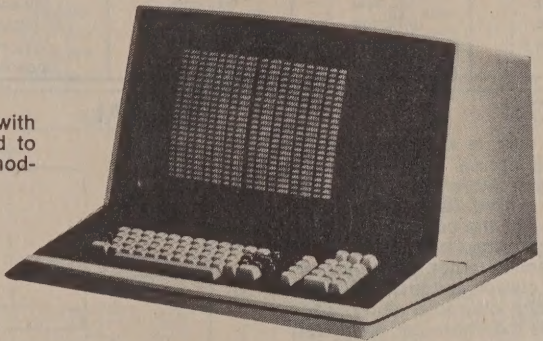
Ann Arbor offers its Q-MOD service where the customer requires major design changes to an existing product, or a completely new design. Q-MOD's are accomplished by a product engineer who develops and documents the product to the customer's specifications, releases it to production, and monitors the early deliveries to assure that the production test and QA procedures are adequate to assure delivery of a reliable, quality product. A non-recurring engineering (NRE) charge is included in Q-MOD quotations to cover these costs.

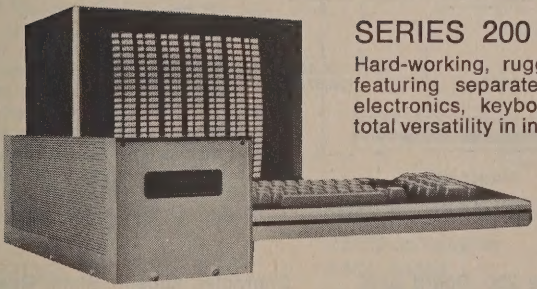
ORDERING

Ann Arbor's standard product line offers an enormous number of possible combinations of products and options and multiple options. Some combinations are not available. They are not technically viable or operationally practical. Others are available only in quantity. Purchase orders should be based on factory quotation only.

DESIGN III

High-performance desktop model with separable matching keyboard, styled to complement the decor of the most modern surroundings.





SERIES 200

Hard-working, rugged modular concept featuring separately-packaged display electronics, keyboard, and monitor for total versatility in industrial environments.

BOARD SETS

Pre-engineered memory, timing, cursor, and signal conversion functions in easy-to-use PC module form, for the OEM who prefers to package his own terminal electronics.

Cursor	Underline	Underline	Underline	Underline	Underline	Underline

OPERATION

The displayed data is stored in and refreshed from an internal refresh memory. The data remains stored and displayed until changed by the data source. The data is written and the cursor positioned under control of the memory address register. Characters enter at the cursor position. The cursor automatically advances after each character entry. Each entry overwrites the character previously displayed at that position; no other data on the screen is affected. Advance of the cursor past the end of a line automatically advances it to the beginning of the next line. Advance of the cursor past the end of the bottom line advances the cursor to the beginning of the top line (Page display) or all lines move up one, the bottom line clears, and the cursor remains in the bottom line (Roll display).

COMMANDS

Erase screen (clear and home)

Cursor	Underline	Underline	Underline	Underline	Underline	Underline

KEYBOARD

Upper/lower case terminals use the Ann Arbor KB300C Keyboard; upper case only terminals use the KB300B Keyboard. See OPTIONS-KEYBOARDS.

OPERATION

The terminal operates in the same manner as a KSR TTY terminal. As the operator strikes each key, its character code is sent to the computer as an asynchronous serial character at the specified baud rate. If the terminal is set for full-duplex, the computer echoes back the character (or an error message) to the terminal's memory, whereupon it is displayed on the screen. If the computer is not programmed for echo-back, the terminal may be set for half-duplex, whereupon the character is fed back into the terminal's memory as it is transmitted. In either case, the incoming data is stored and displayed as described for the RO terminal.

COMMANDS

Erase screen (clear and home)
Carriage return, line feed
Cursor left, right, up, down, and home
Cursor x-y positioning (absolute cursor address)

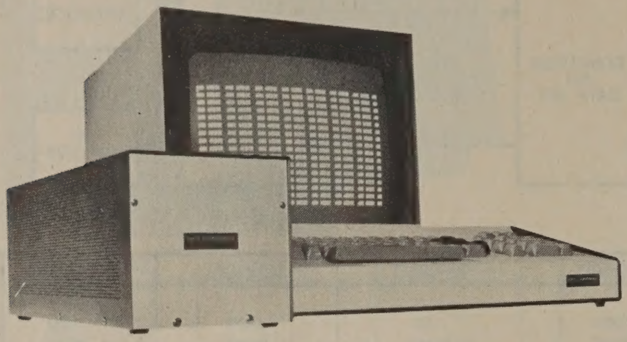
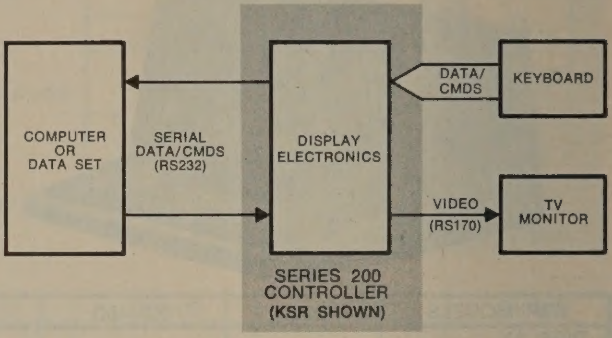
SERIES 200 CASE





COMPUTER OR DATA SET
SERIAL DATA/CMDS (RS232)
DISPLAY ELECTRONICS
DATA/ CMDS
KEYBOARD
VIDEO (RS170)
TV MONITOR
SERIES 200 CONTROLLER (KSR SHOWN)

All Ann Arbor terminals are available in the Series 200 Controller case. The Series 200 contains the same display electronics as the Design III, packaged for use with free-standing keyboards and monitors. The Series 200 is more rugged and less expensive than the Design III and permits the user greater freedom in tailoring his terminal configuration and monitor size to his specific application. The Series 200 interface is identical to the Design III, except that a keyboard input connector is added to the KSR units and a video output connector to all units. The keyboard input requires 7-bit-parallel ASCII data and a rising-edge strobe at TTL levels. The video output provides RS170-compatible composite video capable of driving most commercial TV monitors.

BOARD SET (KSR SHOWN)

All Ann Arbor terminals are available to qualified OEM's as board sets. These are the same printed circuit boards used in the Design III. When interconnected and powered according to documentation supplied, they perform all the functions of the applicable Design III specification. Board sets are supplied in groups of 25 sets minimum of a given model. The typical terminal board set consists of 4 boards: Timing, Memory, Cursor, and Serial. The Timing board generates the raster scan and memory timing for the specified character format, generates the timing for character-addressable memory load, generates the cursor video, and provides for asynchronous input control of memory load. The Memory board stores the full screen of data and generates the composite video for display of the data on the TV monitor. The Cursor board buffers incoming data to memory, holds cursor address, and mechanizes the roll/page and command set operations. The Serial board converts incoming serial data to bit-parallel for the Cursor board, converts bit-parallel keyboard data to serial for transmission, and provides gating for local, half-, and full-duplex operation.

PHYSICAL

Size: 4.5" x 8" (11.43 cm x 20.32 cm)
Spacing: 0.5" (1.27 cm), except 1" (2.54 cm) for memory only
Connector: PC edge-card on 4.5" end
Mating: Dual 22-pin, 0.156" (3.962 mm) c-c
Power: ±5 and ±12Vdc, ±2%
Accessories: Power Supply

ANN ARBOR TERMINALS, INC 6107 Jackson Road, Ann Arbor, Michigan 48103 / Tel: (313) 769-0926, TWX: 810-223-6033

ANN ARBOR TERMINALS, INC

OPTIONS

CR/LF OPTIONS

Ann Arbor terminals are factory preset to require both CR- and LF-codes to start a new line before end-of-line, and provide automatic wrap-around to new line at end-of-line. The AUTO LF ON CR option enables automatic line-feed on receipt of the CR-code alone. The NEW LINE option enables automatic carriage-return on receipt of the LF-code alone. The HOLD AT EOL option inhibits the automatic wrap-around at end-of-line.

SERIAL INTERFACE OPTIONS

Ann Arbor serial-data terminals are factory configured with an RS232-compatible interface for use with data sets, couplers, and computer TTY channels that are strapped, or strappable, for RS232. Alternatively, they can be configured for current-loop operation, either 20mA or 60mA, for applications requiring direct TTY replacement and/or high noise immunity. For special applications, the terminals can be provided instead with a TTL-logic-level interface.

BAUD RATE OPTIONS

The terminals are factory preset to one of the following baud rates, specified on order: 110, 300, 600, 1200, 1800, 2400, 4800, 9600 baud. The following baud rates are additionally available on some models: 50, 75, 135, 150, 900, 3600, 7200 baud.

BAUD CONTROL OPTIONS

The baud rate is preset by a jumper on the terminal's Serial board. It can be changed in the field by a qualified technician. The following options are offered for applications requiring easier field-selection. DUAL BAUD provides external-switch-selection between two preset baud rates, specified on order. SWITCHED BAUD provides internal switch selection of all available rates. KEYED BAUD provides keyboard selection of all available rates. SPLIT BAUD is offered for applications that require the terminal to send data at one baud rate and receive at another.

PARITY OPTIONS

The terminals are factory preset to generate either Mark or Even parity on outgoing data, depending on model, and to ignore parity on incoming data. The PARITY option permits specification, on order, of Even, Odd, Mark or Space parity on outgoing data, and parity detection on incoming data with errors displayed as a "?" symbol.

CHARACTER ACCENT

This option enables the characters on Ann Arbor terminals to be displayed with visual accents, to highlight or call attention to them, under command (computer or operator) control. Accents vary on individual models but include blink, dual intensity, and reverse video.

EXTERNAL SYNC

This option enables the video from Ann Arbor terminals to be superimposed on ordinary TV picture video. The terminal takes in either picture video or composite sync from the video source and puts out the same signal with the characters on the screen added to it. Controls are provided to add the full-screen of characters, just the bottom line (window), or none at all. A rotate command allows the successive lines on the screen to be rotated into the window. A manual sync control allows the window to be positioned wherever desired in the program output.

SWITCHABLE 0832

This option enables Ann Arbor 1632 terminals (16 lines x 32 characters) to display, and be operated, as 0832 terminals (8 lines x 32 double-height characters) under command or switch control. The option is particularly applicable to RO's because of the increased viewing range, but can also be applied to KSR's.

EXPORT MODELS

This option enables Ann Arbor terminals to operate to export power and TV standards.

RO SERIAL INTERFACE

This option enables Ann Arbor RO terminals to be written from a bit-serial, instead of bit-parallel, data source.

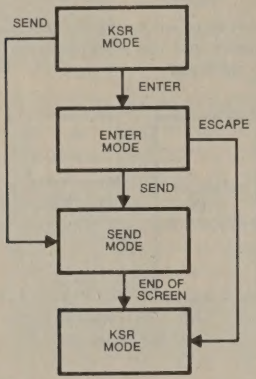
ANN ARBOR
TERMINALS, INC

OPTIONS

BATCH TRANSMIT

This option adds a screen-transmit capability to Ann Arbor KSR terminals. It enables the operator to write to the screen off-line at typing speed, and then transmit the entry to the computer at high-speed. The terminal is normally in KSR mode, full duplex. The terminal is put into ENTER mode on receipt of the Enter code. The terminal goes off-line; the computer can not interrupt. The operator enters data to the screen and, when finished, puts the terminal into SEND mode by entering the Send code. The terminal goes back on-line, transmits the contents of the screen to the computer and returns to KSR mode. Alternatively, when the operator is finished entering data, he may enter the Escape code which puts the terminal directly into KSR mode without transmitting the contents of the screen. In either case, the computer may read (or re-read) the screen at any time in KSR mode by simply sending (or re-sending) the Send code.



Mode	Key-board	Out-going Data Line from	In-coming Data Line
KSR	Active	Kybd	Active
ENTER	Active	Mark	Inactive
SEND	Inactive	Screen	Inactive
KSR	Active	Kybd	Active

EDIT

This option adds an editing capability to terminals equipped with the Batch Transmit option. The following functions are added under command control (operator or computer): Insert character, Delete character, Insert line, Delete line, Erase to end of line, Erase to end of page.

PROTECTED DATA

This option adds a form-filling capability to terminals equipped with Batch Transmit option. It features form generation by operator or computer, protected data-entry with tabulation, and compressed data-transmission. The option enables the operator or computer to set up protected fields on the screen. During ENTER mode, these fields are automatically skipped over; the operator cannot affect them. The operator can terminate entry into an unprotected field, and skip to the beginning of the next, by striking a Tab key. The operator can send and the computer may read, the complete screen or only the unprotected portions.

PRINTER OUTPUT

This option adds an RS232-compatible printer output to terminals equipped with the Batch Transmit option. The option enables the data transmitted from the screen to be steered to either the printer or computer under command control (operator or computer).

TRANSMIT CONTROL OPTIONS

These options are available for use with the Batch Transmit option. They permit the insertion of specified delays and/or control characters into the transmitted data stream. CTS CONTROL enables the start of data transmission to be controlled by a clear-to-send (CTS) input signal. START DELAY enables the start of transmission to be controlled by a preset delay. INSERT STX enables insertion of an STX-code as the first character of each data transmission, and an ETX-code as the last character. INSERT CR enables insertion of carriage return and/or line feed codes into the data transmission at the beginning of each line. CR DELAY enables insertion of a preset delay into the data transmission at the beginning of each line, eg., to allow time for a printer carriage return.

MONITORS

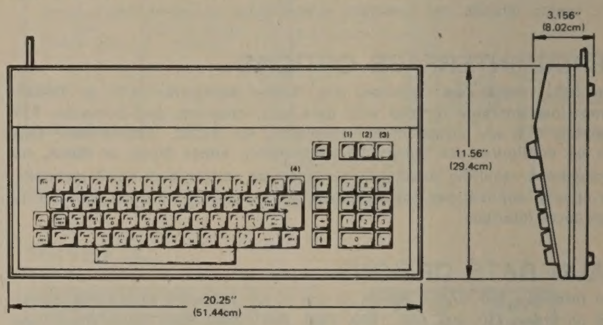
Ann Arbor offers a full line of TV monitors for use with its products. Available screen sizes range from 12 to 23 inches in diagonal to satisfy both near and distant viewing requirements.

OTHER

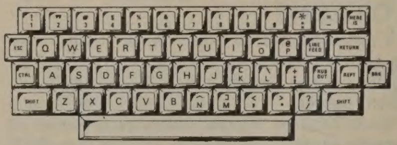
Ann Arbor offers a full line of accessories for its products, including mating connectors, video cables, RS232 cables, extender boards, and specialized test equipment.

KB300 SERIES KEYBOARDS

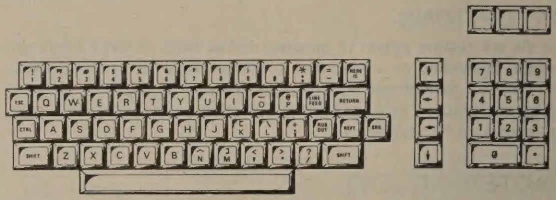
Ann Arbor KB300 Series keyboards are styled to match DESIGN III terminals. They are plug-compatible with both DESIGN III and Series 200 KSR units, and performance-compatible with Ann Arbor KSR controller board sets. Output is TTL-level 7-bit-parallel ASCII with rising edge strobe, via an integral cable and connector.



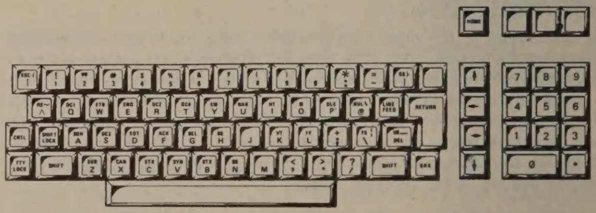
KB300A: 53 key, TTY33 type keyboard. Generates upper case character codes.



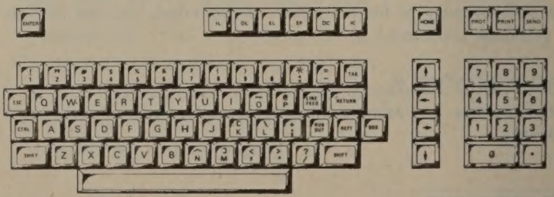
KB300B: 71 key, TTY33 type keyboard plus cursor and numeric pads. Generates upper case character codes.



KB300C: 77 key, TTY37 type keyboard plus cursor and numeric pads. Generates upper and lower case character codes, but special key locks keyboard into TTY33 upper-case-only code set when desired. All keys repeat at 15 char/sec when held down longer than ½ second.



KB300D: For Ann Arbor KSR terminals with batch transmit option. 79 key, TTY33 type keyboard including cursor and numeric pads. Generates upper case character codes.



ANN ARBOR
TERMINALS, INC

DESIGN MODULARITY

The design modularity of Ann Arbor's product line is illustrated below. It starts with a two-board character generator that displays characters in a specified format on the screen of a TV monitor. With the addition of a Cursor board, the character generator becomes Ann Arbor's standard RO terminal. With the addition of a Serial board (and a keyboard), it becomes Ann Arbor's standard KSR terminal. With the addition of a Batch board, it becomes the top of Ann Arbor's line: a KSR with Batch Transmit. All of the options available at the various stages of progression are the result of alternative strappings and/or stuffings of these PC boards.

Q-MOD PRODUCTS

Ann Arbor manufactures a number of products, developed to the requirements of specific customers that have not been generalized to be included in its standard product line. A few representative examples are outlined below. If you have a requirement that involves converting digital data into video, the odds are good that Ann Arbor is currently manufacturing something very close to your requirement.

Q101 CONTROLLER The Q101 Controller provides a burst-loaded RO terminal in a Series 200 case, capable of displaying both alphanumerics and full-graphics in black-and-white or in color. Alphanumerics format is 80 characters x 16 lines. Graphics format is 255 dots horizontal x 192 dots vertical. Data input is bit-parallel TTL, 10 Khz to 1 Mhz asynchronous.

Q102 CONTROLLER The Q102 Controller provides two burst-loaded 80 x 16-character alphanumeric RO terminals in a single Series 200 case.

Q801 CONTROLLER The Q801 Controller provides a strip-chart graphics display, with alphanumeric labelling/annotation capability. The graphics data rolls down through the alphanumeric data, from top to bottom on the screen, at rates up to 60 points per second with 8-bit amplitude resolution.

Q1101 CONTROLLER The Q1101 Controller provides the display electronics for a complete 80x24 character alphanumeric RO terminal on a single PC board.

Q2001 CONTROLLER The Q2001 Controller provides the display and control electronics for up to 32 complete data-entry/data-editing terminals. The electronics are packaged, one terminal per PC board, in a 19″ relay rack. The terminal keyboards and monitors can be located up to 300′ from the Controller.

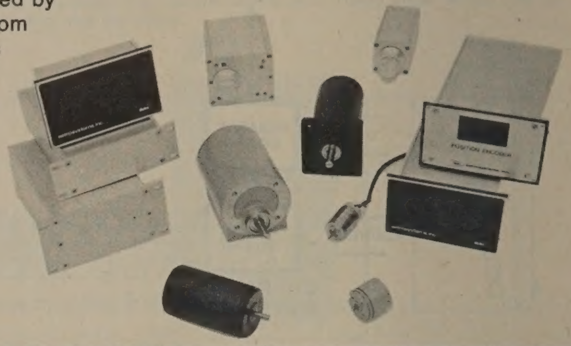
Industrial Controls

ENCODING SYSTEMS (Electromagnetic Absolute)

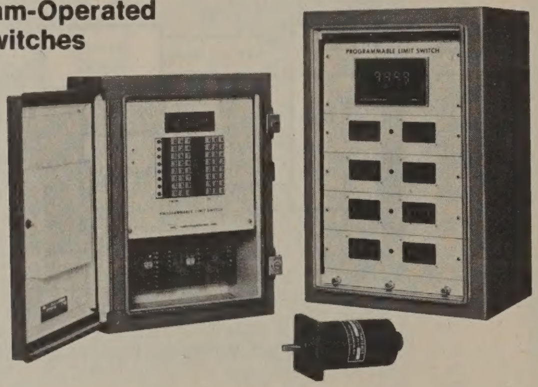
Rugged completely-passive magnetic transducers provide absolute position information, with a unique output for each position. Correct information is retained even when power is removed and readings are not affected by electrical noise. Systems offered in a range of full-scale counts from 360 to 10,000 in binary or BCD outputs. All associated electronics provided, including optional visual display. Transducers available in subminiature size or in NEMA housings.

Type	Code	Full Count	No. of Turns
Single Turn	Binary	10-15 Bits	1
	BCD	360, 1000 2000, 3600, 36,000	1
Multi-turn	Binary	16, 17 Bits	64
	BCD	10,000	10
		36,000	36
		100,000	100



Solid State Limit Switches

Replace Rotary Cam-Operated Switches



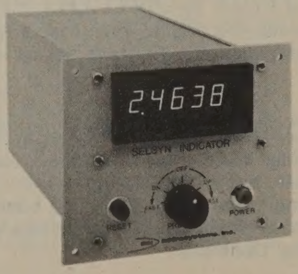
Permit rapid, remote programming of limits, even while machine is operating, to accuracies of 0.1°. Consisting of a small machine-mounted rotary transducer and a separate electronics control box, they are long-life replacements for cam-operated limit switches. Output signals are highly immune to external noise and are used to provide inputs to programmable controllers or to directly control machine operation. Plug-in keys or thumbwheel switches are used to independently set up to 8 pairs of upper and lower limits.

Ideal Input to Programmable Controllers

Solid State Selsyn Indicators

Accumulates and displays selsyn transmitter information

The ASI Solid State Selsyn Indicator is a replacement for electro-mechanical devices (including selsyn receivers, Productimeters and shaft angle encoders) which monitor the position of a selsyn transmitter or transmitter/differential transmitter combination. The highly reliable solid state unit has no moving parts, provides a bright five decade display.



Durapot

Electromagnetic DC-DC angular transducer

Wiperless D.C. potentiometers provide high reliability, very low noise level and low starting torque. Unique variable magnetic coupling produces a smooth, continuous D.C. output proportional to shaft rotation, with a linearity of 0.05% and a deadband of 0.02°. Available in subminiature or heavy-duty NEMA packages. Additional features include: short-circuit proof outputs, up to 20K ohm load and internal or external reference.

Single Speed Modules

Synchro-to-Digital Binary outputs of 8, 10, 12 and 14 bits. BCD outputs of 360, 1000 and 3600 counts.

Synchro-to-DC

Provides DC output from synchro input .1% and .1° resolution and accuracy available.

Digital-to-Synchro

Provides synchro outputs from 12 bit binary input.

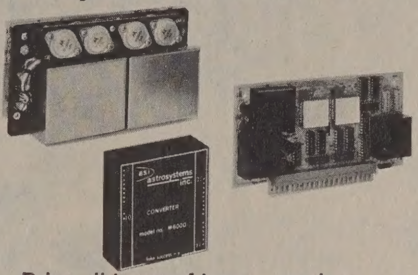
Dual Speed

Standard Module Sets accept dual-speed synchro inputs in the following ratios: 1:8, 1:10, 1:16, 1:20, 1:32, 2:36, and 1:64.

Multiplexing

Convert multiple synchro inputs at high conversion rates. Multiplex mixed voltages and frequencies.

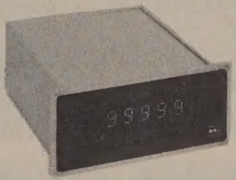
High Power Digital to Synchro Converters



asi astrosystems inc
CONVERTER
model no. M6000

Drive all types of torque receivers and/or control transformers. Accepts 12 or 13 bit binary information and convert to synchro or resolver information.

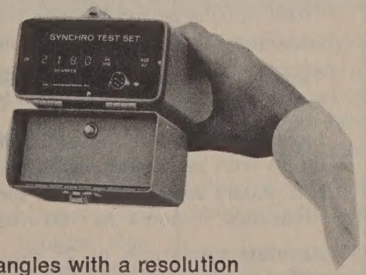
Angle Position Indicators



DIGITAL ANGLE INDICATOR
35999
PWR SYN RES
asi astrosystems, inc.

Completely electronic angle position indicators convert and display standard synchros and revolvers. Available in .01° or .01° accuracy and resolution. BCD outputs available. High accuracy C-500 autoranges for all standard voltages and frequencies and automatically compensates for synchro/resolver phase shifts.

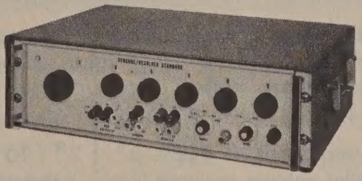
Synchro Test Set



SYNCHRO TEST SET
2180
DEGREES

Portable self-contained instrument for rapid inplant testing of synchros and servos.
Displays synchro angles with a resolution of 0.1°. Front panel displays indicate the synchro frequency and voltage as well as the shaft angle.

Standards and Bridges



SYNCHRO/RESOLVER STANDARDS

Standards, Bridges and Decade Ratio Transformers test and simulate synchros, resolvers and servo systems. All units are accurate to 2 arc seconds with resolution from 15° to .0001°

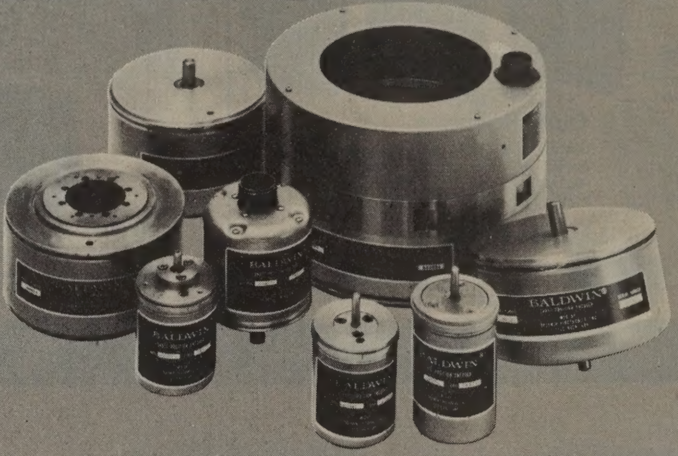
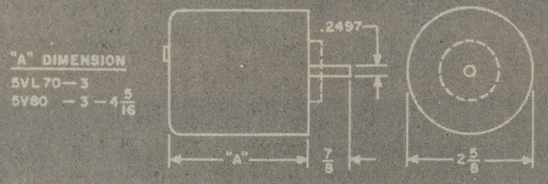
BALDWIN® ENCODERS



A COMPLETE LINE
OF LABORATORY TESTED AND FIELD PROVEN
OPTICAL ANALOG-TO-DIGITAL ENCODERS

5VL70 Series Incremental
5V80 Series Absolute



DOTTED PORTION—LOW TORQUE BEARING ASSEMBLY

Most economical encoders in the Baldwin line.

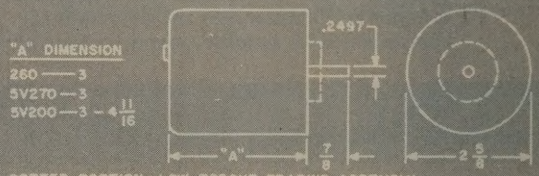
Incremental resolutions to 4096 counts per revolution with zero index available. Quadrature square wave or direction sensed pulsed outputs. Frequency response to 100 Khz. T^2 L compatible.

Absolute resolutions of 0-359, 2^8, 2^9, 10^3 and 2^{10}. Parallel outputs in cyclic binary, natural binary or BCD. Photocell or T^2 L compatible signal levels. Reverse count feature is standard. Gating option for sample and hold applications.

All feature single +5V operation, integrated electronics. 5V80 Series features field replaceable incandescent lamp. 5VL70 Series features long-life LED light source, (factory replaceable).

Options: low torque bearings, low inertia and metalized disks, thru shaft, side-exit cable and wide operating temperature range.

260 Series Tachometer
5V270 Series Incremental
5V200 Series Absolute



DOTTED PORTION—LOW TORQUE BEARING ASSEMBLY

These popular encoders offer high resolutions and a wide range of operating features in a small size.

Tachometer resolutions to 10,000 counts per revolution with zero index available. Frequency to 1 Mhz.

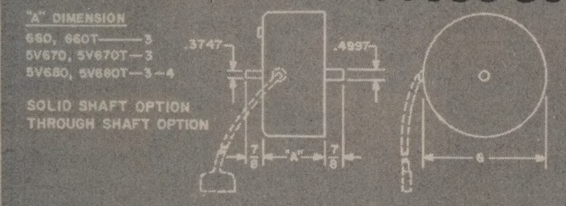
Incremental resolutions to 20,000 counts per revolution with zero index available. Photocell, quadrature square wave or direction sensed pulsed outputs. Frequency response to 100 Khz. T^2L compatible.

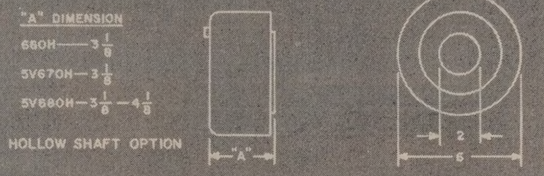
Absolute resolutions of 2^8 thru 2^{14}, 10^3, 0-3599, 10^4. Parallel outputs in cyclic binary, natural binary or BCD. Photocell or T^2L compatible signal levels. Reverse count feature is standard. Gating is optional.

Incremental and absolute encoders feature +5V operation. All have self-contained integrated electronics and easily accessible, single field replaceable lamp.

Options: Ruggedized and low torque bearings, low inertia and metallized disks, side exit cable, wide operating temperature range.

660 Series Tachometer 5V670 Series Incremental 5V680 Series Absolute





Unique in the field of direct reading optical encoders, this group offers a combination of high resolutions, great frequency response and a wide choice of mechanical configurations.

Tachometer resolutions to 24,000 counts per revolution index available. Frequency to 1 Mhz.

Incremental encoders offer resolutions up to 48,000 counts per revolution with or without zero index. Photocell, quadrature square wave or direction sensed pulsed outputs. Frequency response to 100 Khz. T^2L compatible.

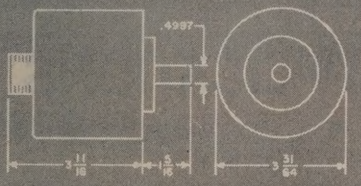
Absolute position encoders have standard resolutions of 2^{14} thru 2^{16}, 10^4 and 0-35999. Cyclic binary formats are offered in photocell or square wave output options. Natural binary or natural BCD outputs are other internal electronics options. Gating option is also available for customer sample and hold applications. Outputs are fully T^2L compatible.

Proprietary circuitry compensates for any changes in photocell levels due to temperature or supply voltage, thereby maintaining original accuracy. Electronic monitor output indicates marginal operation condition or power failure.

Incremental and absolute position encoders in these series feature single +5V operation. All employ integrated circuitry and a field replaceable lamp. Single, thru and hollow shaft designs are standard.

Options: Metallized disks, special bearing designs, serial outputs, wide operating temperature range.

3700 Series Incremental

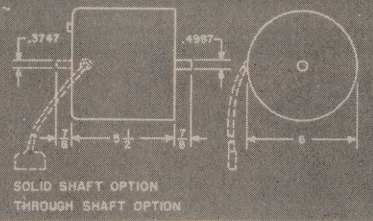


Most rugged encoder offered in the Baldwin line. Designed expressly for industrial applications.

Encoder is completely sealed against hostile environments. Heavy duty bearings, ½ inch shaft with contacting seal. Solid state, vibration immune light source. Internal integrated electronics with quadrature square wave or direction sensed pulsed outputs from noise rejecting differential line drivers.

Resolutions to 12,700 counts per revolution with zero reference option. Dual inch/metric resolution options have electrically selectable outputs. Disk is metallized glass.

690 Series Optical Resolver



This line of Baldwin absolute position encoders uses patented techniques to extend resolutions to 2^{17} thru 2^{20} per revolution while maintaining a 6 inch package diameter.

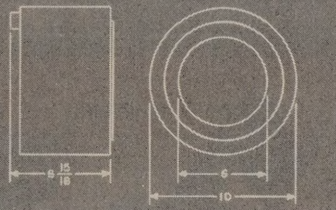
Internal electronics is integrated circuitry. Outputs are T^2L compatible.

Electronic compensation circuitry maintains accuracy for wide changes in temperature or power supply voltages. Dual detection stations cancel effects of bearing errors.

Solid and thru shafts are standard configurations. Lamps are field replaceable.

Options: Serial outputs, CW shaft rotation for increasing count, wide operating temperature range.

1190 Series Optical Resolver

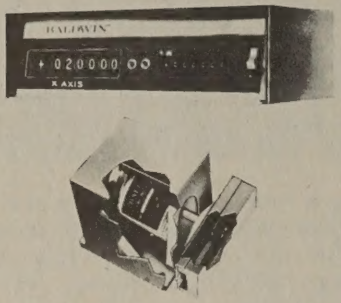


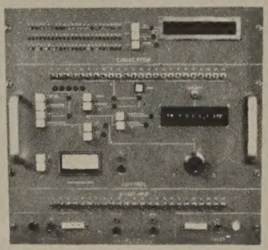
The 1190 Series with a hollow shaft feature complements the 690 Series optical resolvers. Resolutions of 2^{17} thru 2^{20} are standard.

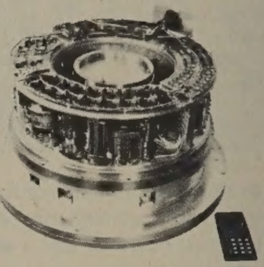
All features of 690 Series are incorporated in this design. Six inch hollow shaft permits passage of large waveguides or slip ring assemblies.

Construction is all stainless steel for strength and integrity.

ENCODER SYSTEMS







RPR SYSTEM

The BEI rack and pinion (RPR) system may be used to upgrade or retrofit mills, lathes, grinders, drills, etc. that would benefit from 1, 2 or 3 axis readout or control.

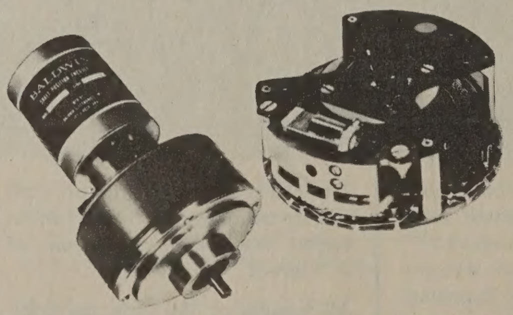
System consists of 3700 Series incremental encoder with precision pinion, housed rack, anti-backlash encoder mount, BC60 display and interfacing hardware and cables.

System resolution is .0005 in. or .01mm. Enclosed rack is supplied pre-assembled and pre-calibrated.

ULTRA-LOC™ SYSTEM

The "Ultra-Loc" System is a new Direct Drive Rate and Position System that features a 20,000-to-one speed range selectable by computer interface, 8421 BCD format, or manually controlled by thumbwheel switches. This direct drive system features slow rate capability 100 times less than sidereal with an error bit update rate over 3,000 Hz, eliminating the usual drive "jitter" or "bearing" noise.

The system is also offered as components consisting of the motor/optical encoder positioner and separate control electronics. Torque ranges from a few in./oz. to over 100 ft./lb. can be specified. Absolute-position information by optical encoder is offered thru 24-bits. The system is available in three standard model ranges of 12-14 bits, 14-16 bits and 17-21 bits and is designed as an OEM Drive System capable of being integrated with an existing Gimbal or Pedestal design.



CUSTOM APPLICATIONS

BEI's technical personnel stand ready to assist in applying encoders in custom configurations.

Unusual linear or non-linear codes, special supply voltages, RFI shielding, output interface buffers and parallel/serial converters.

Direct mounting on torque motor drives or low inertia capstan motors.

Compact designs containing 2^{13} bits in a size 11 servo package, multiturn configurations.

Space and military applications requiring high reliability criteria.

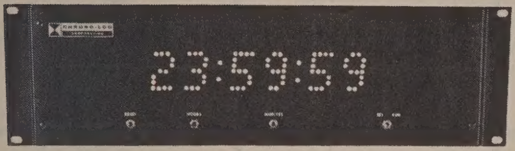
CHRONO-LOG CORPORATION

1957-1977
OUR 20th
YEAR

BIG TIME DISPLAY CLOCKS



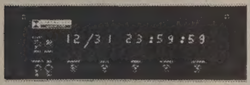
VISIBLE FROM 75 FEET

Features:

- **1½″ LED shaped characters**
- **Rack, panel or shelf mount**
- **24 or 12 hour time**
- **115/230 V., 50/60 Hz**

Options include standby battery, internal oscillator, parallel input, retransmitting Remote Displays, 12 V. DC power.

DIGITAL CLOCK/CALENDARS



SERIES 70,000
LED CLOCK/CALENDAR

- **Internal standby battery feature**
- **Panel or rack mounting**

CHRONO-LOG DIGITAL CLOCKS and CALENDARS are used wherever a digital BCD output of real or elapsed time is required, such as in data logging, data transmission, data processing, telemetry, and digital print-out systems. They can also provide outputs for driving remote digital time displays.

The Clock/Calendars provide buffered parallel and/or character-serial (bit parallel) TTL compatible BCD outputs of time.

- Digital Clocks with NIXIE® front panel displays, extended time ranges, and up/down clock/counters also available.

TIME CODE INSTRUMENTS

SERIES 9,000 TIME CODE READER
TIME CODE GENERATOR/READER

CHRONO-LOG TIME CODE GENERATORS and READERS generate and read serial modulated carrier time codes on analog magnetic tape recorders and transmission lines. DC level shift codes are also generated for oscillographic strip chart recorders.

IRIG and NASA codes are available. Multicode and slow code models as well as Automatic Tape Search Systems can be furnished.

ACCESSORY UNITS

VIDEO CHARACTER GENERATORS — accept up to 16 BCD digits from Chrono-log Instruments or other sources and generate a video signal for displaying the data on a video monitor or inserting the data into a video signal. Fixed alphanumeric characters, stored in a PROM in the Character Generator, can be included as part of the display.

STANDBY POWER PACKS — rechargeable battery units which provide +5 V DC standby power for Chrono-log Digital Clocks and Time Code Generators. Three different capacities are offered: 2.5, 12.5 and 30 amp-hours.

OUTPUT BUFFERS — accept a 21 bit TTL input word (normally hours, minutes, seconds and Power Failure bit) and produce up to ten (10) outputs to drive remote displays and data systems.

COMMUNICATIONS COUPLERS — accept serial or parallel BCD inputs from Chrono-log Units or similar devices and produce an ASCII Character output, bit serial, in the form of a 20 ma. or 60 ma. current loop, a TTL level shift output or an RS-232C output.

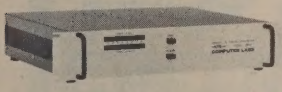
Data Converters...MHz Rates

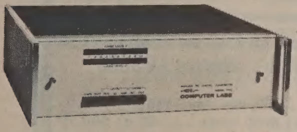
For Digital, Video, Radar, and Other High-Speed Data Acquisition Applications

Instruments

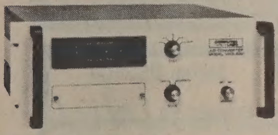
MOD-815/818 A/D
The MOD-815 and MOD-818 A/D's are ideal for TV digitalization at word rates up to 15 MHz and 18 MHz, respectively, at 8-bit resolution. ECL/TTL compatibility, various impedances, coding, and other options are available at no extra cost. Both have less than 30 ps aperture jitter and feature 2-card construction in less than 135 cu. in.



3815/3818 A/D
The 3815 and 3818 A/D's are self-contained 8-bit, 15-MHz and 18-MHz converters, respectively, with power supplies, front panel indicators, and built-in test words. Multiple no-cost options ease interfacing.



5000/7000 Series A/D
These high-speed precision instruments include internal track-and-hold, built-in test words, and power supplies. Bit resolutions of 6 bits through 10 bits at word rates through 10 MHz are available. Multiple no-cost options on input ranges, impedances, coding, and ac power ease system interfacing.



VHS Series A/D
The self-contained VHS Series offers the same features as the 5000/7000 Series at higher word rates: 6-bits at 75 MHz; 7-bits at 20 MHz; and 8-bits at 15 MHz.

TVDA "Deglitched" Series D/A
The TVDA Series of D/A's provide a "glitchless" output at update rates of 15 MHz at 8-bit and 10-bit accuracies. An internal deglitcher suppresses transients in the analog output of the converter, making this series ideal for reconstructing TV or other video signals. The TVDA's lead a broad line of D/A's that complement all of Computer Labs line of high-speed A/D's.

And more!

PDP-11 Compatible Disk Memory Systems. The new Computer Labs M3000 and M4000 Disk Memory Systems provide users of the DEC PDP-11 Minicomputer with a rapid access, mass storage memory system at a fraction of the cost of similar DEC systems. They offer 5 and 10 MBytes per disk system, respectively, with average positioning times as low as 35 milliseconds. In addition, Computer Labs offers a M 300A Bootstrap Loader at half the price of the equivalent DEC Loader.

Special Products. Computer Labs has extensive experience in supplying special products designed for use in various military and commercial programs.

Modules

MATV Video A/D
The MATV Series 8-bit A/D's are designed for direct digitalization of video signals. They are complete subsyitem modular devices which are ideally suited as cost effective television or radar digitizers since they can be used to digitize color TV at 3 times NTSC (dc to 11 MHz). The MATV is available for less than $1000 in quantity.

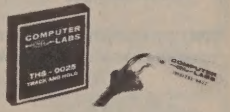
MDD Video "Deglitched" D/A
The MDD Series D/A's offer either 8-bit or 10-bit performance at update word rates from dc to 20 MHz. They have been designed for video reconstruction of digital signals and are ideal for CRT-driving applications. Each compact module contains an internal input register, high-speed D/A, deglitcher, and buffered output. Unit price is less than $400.

COMPUTER LABS
D/A CONVERTER
MDS-1020

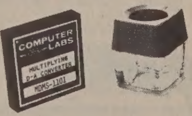
MDS/MDP High-Speed D/A
The MDS and MDP Series Converters are the world's fastest D/A's with settling times as low as 15 ns under worst-case conditions. They lead a broad line of Computer Labs D/A's containing over 50 models. The MDS/MDP Series is available in 8-bit, 10-bit and 12-bit versions with accuracies as good as ±0.01%.

COMPUTER LABS
DEGLITCHER
DGM-1040

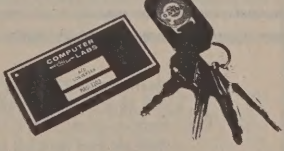
DGM D/A "Deglitcher"
Deglitchers can be used with almost any type of D/A to generate output signals with the extremely high spectral purity used for TV signal reproduction, CRT displays, waveform generation, and automatic test equipment. They can be used with update rates as high as 50 MHz.



THS/THC Track & Hold
These modules offer the broadest variety of track-and-hold (sample-and-hold) units available in the industry. In fact the THS-0025 is fastest track-and-hold in the world with an acquisition time of 15 ns and a bandwidth (3 db) of 60 MHz. These modules have been used to construct 13-bit A/D's with word rates as high as 10 MHz.



MDMS Multiplying D/A
The MDMS D/A's are the world's fastest two-quadrant multiplying D/A's available. Resolutions of 8,10, and 11 bits are available with analog and digital settling times less than 100 ns.



MAS A/D
These A/D's employ the latest high-reliability hybrid techniques to provide the customer with one of the smallest high-speed converters available. They are ideally suited for transient analysis, signal processing, radar, and fast process-control applications. This series is pin compatible with industry-standard A/D's.

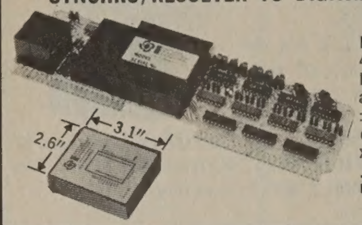
SYNCHRO CONVERTERS/DISPLAYS/ENCODERS

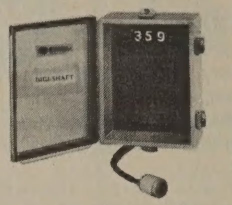
STANDARD LOW COST UNITS TO SATISFY ALMOST ANY SYNCHRO/RESOLVER OR SHAFT INTERFACING REQUIREMENT

SYNCHRO/RESOLVER TO DIGITAL Series SDC40/60



INPUT: 11.8/90 vrms L-L, 60 or 400 Hz. Ref: 26/115 vrms. **OUTPUT:** 16, 14, 12, or 10 Bits parallel binary or BCD. **ACCURACY:** ±2, ±4, ±6 or ±30 minutes of arc. **PACKAGE:** A) 2.6" x 3.1" x .82"h Module B) 2.6" x 9.25" x .9"h or 4½" x 6½" x .75"h repairable PC card.

PROGRAMMABLE LIMIT SWITCHES Series DLS



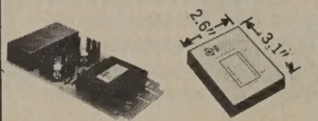
INPUT: Shaft angle position.
LIMITS: (A) Dwell (From-to): 8 per unit
(B) Set Point — 16 per unit
(C) Closure — 16 per unit
OUTPUTS: (A) Logic Levels
(B) Power Transistor
(C) Relay
(D) Display (LED)
ACCURACY: Up to ±.1°
PICKOFF: Resolver (size 15 or 11)
PACKAGE: (A) 19" x 12" x 8.75"h
(B) NEMA 12 — 16" x 12" x 8"

SYNCHRO/RESOLVER TO LINEAR DC Series SLD200

SYNCHRO TO LINEAR DC CONVERTER

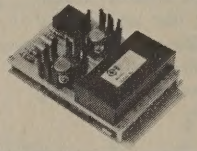
INPUT: 11.8/90vrms L-L, 60 or 400 Hz., Ref: 26/115vrms. **OUTPUT:** (A) −10 to +10 vdc linear with angles from −180° to +180° (standard) (B) 0 tc +10V DC linear with angle from 0° to 360° (special) (C) −10 to +10 vdc linear with angles from −90° to +90°. **ACCURACY:** ±6 minutes of arc at input speeds up to 1440°/sec, or ±15, ±30, ±60 minutes of arc. **PACKAGE:** (A) 2.6" x 3.1" x .82" Module; (B) 3.06" x 2.6" x 3.18"H Can; (C) 4.5" x 6.5" x .75"H repairable PC card.

DIGITAL TO SYNCHRO/RESOLVER Series DSC40/60



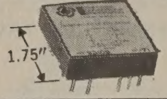
INPUT: 14, 12 or 10 bits parallel binary and 26/115 vrms reference. **OUTPUT:** 11.8/90 vrms. L-L, 60 or 400 Hz capable of driving 1VA, 2VA or 5VA LOADS: (up to 3 T.R.'s). **ACCURACY:** ±4, ±15 or ±30 minutes. **PACKAGE:** A) 2.6" x 3.1" x .82"h Module B) 4½" x 9¼" PC Card with edge connector (5VA units).

DC ANGLE TO SYNCHRO/RESOLVER Series LDS500



INPUT: ±10 vdc or ±100 vdc representing ±180° of angle. **OUTPUT:** 11.8/90 vrms L-L, 60 or 400 Hz capable of driving up to three size 11 T.R.'s (75 ohms L-L). **ACCURACY:** ±15 or ±30 minutes of arc. **PACKAGE:** (2) 4.5" x 9.25" x 2.0"h repairable PC Board with 22 pin edge connector.

SYNCHRO/RESOLVER TO SINE-COSINE DC Series SD100

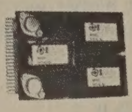


INPUT: 11.8/90 vrms L-L, 60 or 400 Hz. Ref: 26/115 vrms. **OUTPUT:** ±10 sin θ vdc; ±10 cos θ vdc. **ACCURACY:** ±2 or ±4 minutes of arc. **PACKAGE:** 1.75" x 1.75" x .6"h or 3" x 3" x .625"h Module.

INVARIANT SYNCHRO/RESOLVER TO SINE-COSINE Series SD100 I

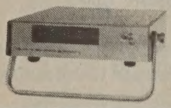
INPUT: 11.8/90 vrms L-L, 60 or 400 Hz. Ref: 26/115 vrms. **OUTPUT:** ±10 sin θ vdc, ±10 cos θ vdc. **ACCURACY:** ±4 minutes of arc. **INVARIANCY:** A ±10% change in the input or reference voltage results in a ±.5% change in the individual DC outputs. **PACKAGE:** 3" x 3" x .625"h Module.

DC SIN COS TO SYNCHRO DRIVERS Series DCS400



INPUT: ±10 vdc representing sin θ and cos θ. **OUTPUT:** 11.8/90 vrms L-L, 60 or 400 Hz capable of driving up to three size 11 T.R.'s (75 ohms L-L). **ACCURACY:** ±6, ±15, ±30 minutes of arc. **PACKAGE:** A) 4.5" x 6.5" x .8"h repairable PC Card. B) 4.5" x 9.25" x 1"h PC Card.

SYNCHRO ANGLE INDICATOR Series AI400

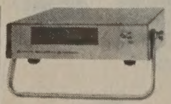


INPUT: 11.8/90 vrms L-L, 60 or 400 Hz. Ref: 26/115 vrms. **OUTPUT:** 5 Digit display and BCD data. **ACCURACY:** ±.03°, ±.05°, or ±.1°. **PACKAGE:** 9.5"w x 1.75"h x 12" Deep — Bench or Rack Mounting.

RECTANGULAR TO POLAR Series RP600

INPUT: R sin θ and R cos θ from 50 mv to 10 vdc. **OUTPUT:** R and θ. **ACCURACY:** θ: ±15 minutes at R = 10, R: ±.1% F.S. **PACKAGE:** 3.2" x 3.4" x 1.8"h Module.

BINARY ANGLE INDICATOR (BINARY TO BCD) Series BAC100



INPUT: Up to 16 bits of parallel binary data, TTL compatable. **OUTPUT:** 5 digit display of angle (0° to 359.99°) OR ANY OTHER SCALE FACTOR DESIRED FROM 0 TO 99999 REPRESENTING ENCODER POSITION, RANGE, PRESSURE, WEIGHT, ETC. **ACCURACY:** ±.01° (±1 lsb). **PACKAGE:** A) 7.0"w x 1.75"h x 8.25" deep — Bench or Rack Mounting B) 4.5" x 6.5" x 1.8"h PC Board requiring +5 vdc at 1 amp C) 2.6" x 3.1" x .82h Module.

ADDITIONAL PRODUCTS

- Hi Speed Multiplexed Syn to Digital
- Multiplexed Syn to Linear DC
- Digital Sin-Cos to Synchro
- Two Speed Digital to Synchro
- Selsyn to Digital/DC
- Azimuth Change Pulse Converters

ALL SYNCHRO INPUT/OUTPUT UNITS

- Available in 0°C to 70°C or −55°C to +85°C temperature range
- TTL compatable output and inputs or CMOS, or LP Shottky
- Operate from ±15 v, or ±15 and +5 vdc
- Transformer isolated inputs/outputs
- Solid State construction — 883 Level B Available
- CAN BE MADE FIELD OR FACTORY REPAIRABLE
- Available hermetically sealed and to MIL SPECS (E-5400)
- Delivery: Stock to 4 weeks (small quantity)

SPECIAL UNITS AND PACKAGES AVAILABLE ON REQUEST

Write or phone for detailed specifications, applications assistance and evaluation units.

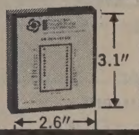
SYNCHRO CONVERTERS/DISPLAYS/ENCODERS

STANDARD LOW COST UNITS TO SATISFY ALMOST ANY SYNCHRO/RESOLVER OR SHAFT INTERFACING REQUIREMENT

SYNCHRO/RESOLVER TO BCD Series SBC



INPUT: 11.8/90vrms L-L, 60 or 400 Hz. Ref. 26/115vrms **OUTPUT:** 3 or 4 decade BCD — scaleable unipolar or bipolar. **ACCURACY:** ±30 or ±6 minutes of arc ±1 LSB. **PACKAGE:** 2.6" x 3.1" x .82" H Module. **OPTIONS:** Choice of Scale factors, Zero offset adjustments (±5%).

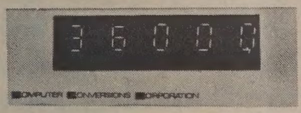
MULTITURN ABSOLUTE ENCODERS Series MDS90

INPUT: MULTI-TURN Shaft angle position. **OUTPUT:** 4, 5, or 6 Digit LED Display + BCD or Binary Data. **ACCURACY:** Up to ±1 pt. in 100,000. **PACKAGE:** Size 23 Pickoff with full or half rack electronics. **OPTIONS:** Zero Offset, NEMA 12 Housings, Presets, power supplies.

TYPICAL UNITS

Multiturn Encoders	Output Code	Resolution Counts/360°	Revolution for Full Count	Data Range
MDS90-DBC-16	Binary	2^{10}	64	2^{16}
MDS90-DBC-10	BCD	1000	10	10,000
MDS90-DBC-100	BCD	1000	100	100,000

LOW COST ANGLE INDICATOR Series AI540

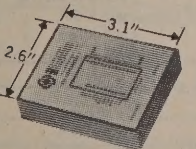


INPUT: 11.8/90vrms L-L, 60 or 400 Hz, Ref: 26/115vrms +115V 60 Hz power: **OUTPUT:** 4 digit or 3 digit, .5"H LED DISPLAY (unipolar or bipolar). **ACCURACY:** ±6 or ±30 minutes of arc ±1 LSB: **PACKAGE:** (A) 5.5"W x 7.5"L x 2.0"H PANEL MOUNT (DC supplies included): (B) 9½"W x 1¾"H, half rack mounting (DC supplies included. **OPTIONS:** Choice of scale factors, Zero offset adjustment (±5°).

MULTIPLEXED SYNCHRO TO DIGITAL Series MSH

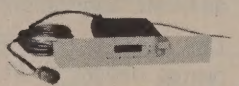
INPUT: 11.8/90vrms L-L, 60 or 400 Hz., Ref: 26/115v rms, up to 128 channels; **OUTPUT:** 12 bit parallel binary or 4 decade BCD (unipolar or bipolar: **ACCURACY:** ±6 minutes of arc ±1 LSB: **PACKAGE:** (A) Central converter — 2.6" x 3.1" x .82"H module, (B) Input Module — 1.5" x 2.0" x .6"H, (C) Transformer Module — 1.5" x 13⁄16" x .6"H (Scott "T" — 400 Hz) +1" x 1" x .8"H (Ref.). **OPTIONS:** (A) choice of scale factor on BCD output, (B) Linear DC output, (C) Systems mounted on PC boards and/or racks.

MULTISPEED SYNCHRO TO DIGITAL Series TSD



INPUT: 11.8/90vrms L-L, 60 or 400 Hz., Ref: 26/115 vrms: **SPEEDS:** 8, 16, 32, 9, 18, and 36: **OUTPUTS:** 16 to 19 bits parallel binary: **ACCURACY:** ±.02, ±.01 or ±.005 degrees: **PACKAGE:** Two or Three 2.6" x 3.1" x .82"H modules. **OPTIONS:** (A) Systems packaged on PC Cards or in racks; (B) 5 digit display.

ABSOLUTE ENCODERS Series DS90



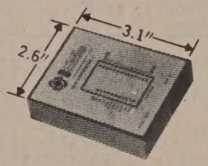
INPUT: Shaft angle position coupled to "DIGI-SHAFT" system: **OUTPUT:** four digit (.5"H) LED display (0 to 9999) +BCD or Parallel binary data (ANY SCALE FACTOR DESIRED): **ACCURACY:** ±1 part in 3600 (single turn) From shaft input to digital output: **PICKOFF:** Resolver (Size 8, 11, or 15): **PACKAGE:** (A) 5.44"W x 7.00" x 1.75"H: (B) Full or half rack: **OPTIONS:** Multichannels, Zero offset, Presets, DC output, Multiturn units with 5 digit (99999) output, NEMA 12 Housings.

TYPICAL UNITS (single Turn)

Pt. No.	Output	Counts/360°
DS90-DB-12	Binary Data	2^{12}
DSR90-36-BC	0-3599 display +BCD data	3600
DSR90-10	0-999 display	1000
DSR90L-25-BC	0 to ±2500 display +BCD data	±2500

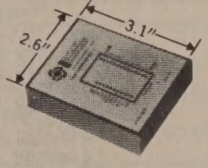
FULL SCALE OUTPUTS OF UP TO 9999 AVAILABLE
MULTITURN UNITS WITH UP TO 999999 FULL SCALE OUPUTS AVAILABLE

SOLID STATE CONTROL TRANSFORMER Series SCT



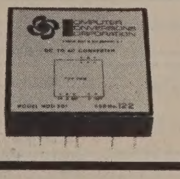
DIGITAL INPUT ANGLE (ϕ): 14, 12, or 10 bits parallel binary. **SYNCHRO/RESOLVER INPUT ANGLE** (θ): 11.8/90vrms L-L, 60 or 400 Hz. **OUTPUT:** E out=(V ref ±7%) sin (θ-ϕ) Sin wt: **GRADIENT:** .4 or 1vrms/degree. **RANGE:** ±7 or ±12.5 degrees: **ACCURACY:** ±4, ±15, or ±30 minutes of arc. **PACKAGE:** 2.6" x 3.1" x .82"H Module.

SOLID STATE CONTROL DIFFERENTIAL TRANSFORMER Series SCDX



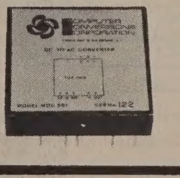
DIGITAL INPUT ANGLE (ϕ): 14, 12, or 10 bits parallel binary. **SYNCHRO/RESOLVER INPUT ANGLE** (θ): 11.8/90vrms L-L, 60 or 400 Hz. **OUTPUT:** (1) 9.2K (ϕ) Sin (θ-ϕ) Sin wt. [7vrms.] (2) 9.2K (ϕ) Cos (θ-ϕ) Sin wt. [7vrms.] **ACCURACY:** ±4, ±15 or ±30 minutes of arc. **PACKAGE:** 2.6" x 3.1" x .82"H.

MODULATORS Series MOD500



INPUT: 0 to ±10 or ±100 VDC and 26V/115Vrms reference: **OUTPUT:** 0 to 7vrms (other voltages available. **ACCURACY:** ±.2% F.S.: **NULL:** ±.1% F.S. **PACKAGE:** 2.6" x 3.1" x .625" Module. **OPTIONS:** Gain+Zero Adjust, external output transformers.

DEMODULATORS Series D400



INPUT: 0 to 5, 10, 25 or 100vrms, 400 to 5000 Hz, 5/26vrms reference. **OUTPUT:** 0 to ±5 or ±10VDC. **ACCURACY:** ±.2, .3 or .5% F.S. **NULL:** ±.1% F.S. **PACKAGE:** (A) 1.75" x 1.75" x .6"H Module. (B) 2.75" x 1.4" x .75"H Module.

CPS

A/D & D/A SIGNAL CONVERTERS

CPS has an established, performance proven line of medium-to-high resolution, fast settling time signal converter products for data acquisition, instrumentation, process control and other applications where product reliability is a must.

CPS supplies cost-effective off-the-shelf and custom engineered designs to fit OEM industrial and Mil-Spec needs, while meeting on-time delivery schedules. Pin-compatible units also available for replacement of designs supplied by such manufacturers as Datel, Analog Devices and Zeltex.

Standard Series Features

- High resolution
- TTL and CMOS compatible
- Low drift
- Low power
- Process current
- Multiplying D/A's
- Capable of meeting Mil-Spec 883

D/A CONVERTERS

Model	Special Features	Standard Output Range	Settling Time (μsec)	Linearity	Tempco PPM/C°	Case Size (inches) D x W x H	Price 1-9 $
8 BIT BINARY							
CYDAC-430 ③		0 to +10V, ±5V, ±10V, pin selectable	20	1/2 LSB	50	2 x 1.76 x 0.4	$ 31.00

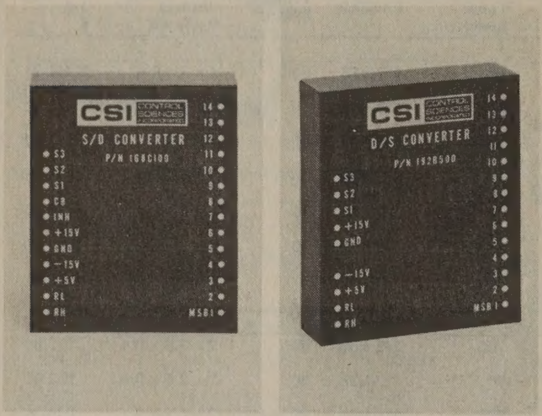
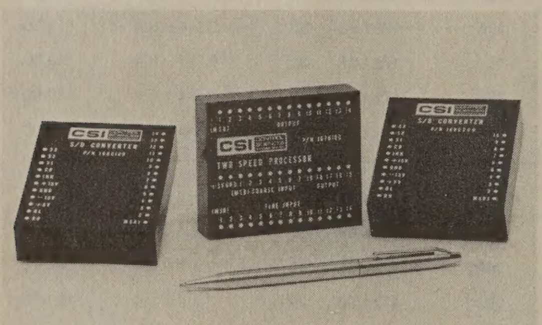
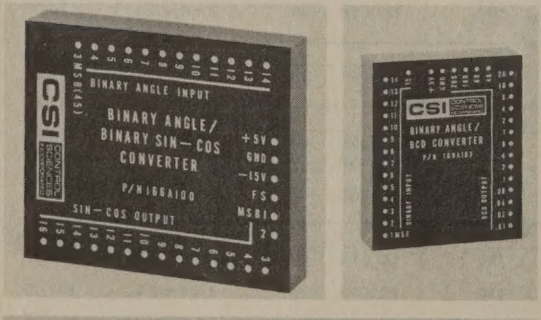
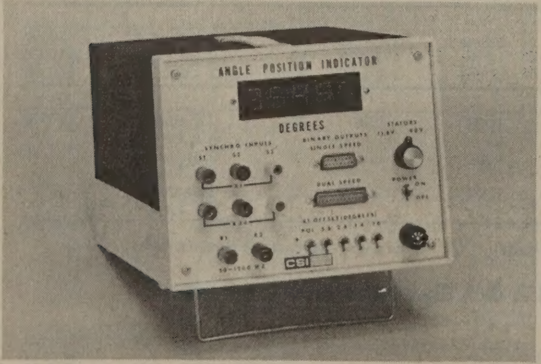
Synchro Converters









S/D MODULES

The series 168C are a family of miniature high performance "tracking type" synchro/resolver to digital converters. The converters function over the frequency range of 50 to 1200 Hz without need for external transformer modules. All digital input and output data is DTL & TTL compatible.

Series 168C100

14 bit (0.002°) resolution with 4 minute ±.9LSB accuracy and 3600°/sec tracking rate. Single module 3.12"x2.62"x.8".

Series 168C200

10 bit (0.351°) resolution with 30 minute accuracy and 10,800°/sec tracking rate. Single module 3.12"x2.62"x.8".

Series 168C300

1:8, 1:16, 1:32, or 1:64 two speed synchro/resolver input. $\text{Log}_2 N+14$ bits resolution, where N=speed ratio. Two modules 3.12"x2.62"x.8"

Series 168C500

1:36 (or 2:36) two speed synchro/resolver input. 16 bit (0.0055°) resolution with 0.41 minute accuracy and 720° tracking rate. Two modules 3.12"x2.62"x.8".

D/S MODULES

The series 192B are a family of DTL/TTL/CMOS compatible digital to synchro/resolver converters. Fourteen bit natural binary angle data is continuously converted back to analog form . . . either as 3-wire synchro or 4-wire resolver signals capable of driving most control transformers.

Series 192B500

14 bit (0.022°) resolution and 4 minute accuracy capable of driving 100 ohms L-L @ 11.8Vrms and 5K ohms L-L @ 90Vrms. Single module for 400 Hz 2.62"x3.12"x.8", external transformer module required for 60 Hz 4.40"x1.90"x1.50".

MULTIPLEXED S/D CONVERTER

Series 160A

The series 160A multiplexed synchro/resolver to digital converter is a complete system capable of digitizing up to 24 synchro/resolver inputs with multiple voltage and frequency inputs. Each system consists of three types of modules, Central Processor 3.12"x2.62"x.8", Input Module 2.1"x1.62"x.4" and a Reference Processor 2.1"x1.62"x.4". 13 bit (0.044°) resolution with 3.9 minute ±.5LSB accuracy. Sample rate 1/cycle, all channels simultaneously. Conversion time of 100 usec/channel. DTL & TTL compatible.

TWO SPEED PROCESSOR Model 167B100

The model 167B100 Two Speed Processor is for use with synchro to digital converters which receive input from both coarse and fine synchros. It is specifically designed for 36:1, 18:1 and 9:1 gear ratios but other non-binary ratios can be accommodated to special order.

BINARY ANGLE TO BCD CONVERTERS

Series 169A100

The 169A100 series are binary to BCD converters which are scaled to be compatible with binary angle measurement (BAMS) MSB=180°, next=90° etc. Models are available with 3, 4, 5 or 6 decade BCD, 8421 coding. Inputs and outputs are DTL/TTL compatible.

BINARY ANGLE TO BINARY SINE-COSINE CONVERTER Model 166A100

The model 166A100 converts a 12 bit binary digital angle, MSB=45°, to a corresponding 16 bit digital word representing of the sine or cosine of the angle over an input angular range of 90°.

ACP GENERATOR Model 165A100

The model 165A100 ACP Generator accepts 14 bits of parallel binary angle data from a "tracking type" synchro to digital converter and generates 4096 azimuth change pulses per synchro revolution and also generates one azimuth reference pulse corresponding to the synchro electrical zero.

ANGLE POSITION INDICATOR Model 805A100

The model 805A100 Angle Position Indicator is a laboratory instrument intended for use in measuring either single speed or two speed (1x/36x) synchro signals and displaying the angle in degrees on a 5 digit LED readout.

CSI Control Sciences Incorporated 8399 Topanga Canyon Blvd. • Suite 303 • Canoga Park, California 91304 • (213) 887-7344

DATA SPECIALTIES manufacturers a complete line of paper tape peripherals to suit a wide variety of applications. All the products shown are built around the revolutionary MODUPERF™ mechanism which features whisper quiet operation, MYLAR punching capability, long life die block (1,000,000 feet) and field replaceable modules.

The SRP-300 is a paper tape combo that connects, without modification, to any 300 baud teleprinter or CRT terminal thru the RS-232 connector and provides all the features of a conventional ASR.

The units are offered at various speeds with parallel or serial interfaces in table top or rack mounted configurations. In addition, the basic mechanism and interface/driver are available. Consult the chart below for details.

PRODUCT SUMMARY

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...
IMMEDIATE AND OVERWHELMING
ACCEPTANCE

ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGI NIE

The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

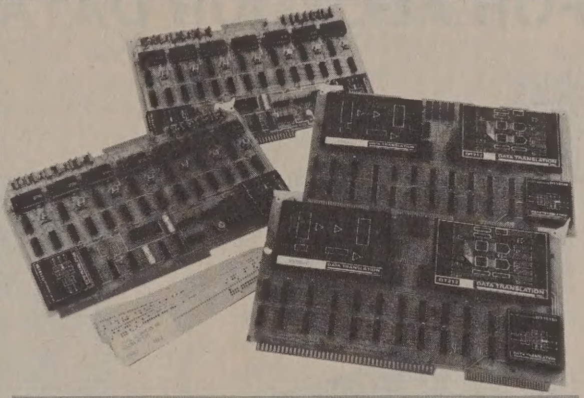
MICROCOMPUTER ANALOG I/O SYSTEMS
DATA ACQUISITION MODULES
DUAL D/A CONVERTER-POINT PLOTTER
DC-DC CONVERTERS

MICROCOMPUTER DATA ACQUISITION

SINGLE BOARD REAL TIME ANALOG I/O SYSTEMS.

These single board systems provide the most cost effective and fastest way to get analog signals into and out of your microcomputer. Just plug in the board and hook-up your analog signals. We've got the broadest selection of input and output capability—10mV to 10V or 4-20mA inputs, up to 64 channels on a single board, line buffered D/A outputs, point plotting, or 4-20mA outputs—all at a cost that says you can't afford to do it yourself. Twenty-two models are offered for:

- DEC LSI-11
- Intel SBC-80 Series & MDS-800(8080A)
- Computer Automation LSI-2 & 3
- Zilog MCB Series (Z-80)
- PCS Superpac



Intel compatible analog I/O system boards contain 9 different models.

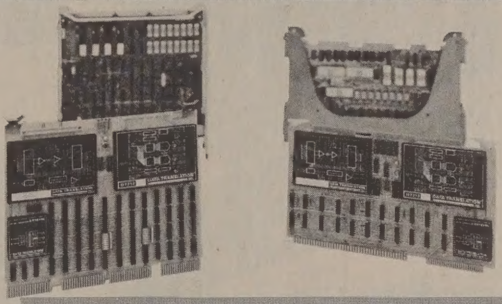
MODULES

DATA ACQUISITION MODULES

The second generation DATAX II data acquisition modules are complete with multiplexer, differential amplifier, sample/hold, 12-bit A/D converter, and all control logic...plus tri-state outputs for direct connection to computer busses.

MODEL	RESOLUTION	ACCURACY	ANALOG INPUTS	THROUGH-PUT RATE	PRICE
DT820/825	8 bits	±0.40%	8, 16	50 KHz	$130/140*
DT830/835	10 bits	±0.10%	8, 16	33 KHz	$140/150*
DT5701	12 bits	±0.03%	16	35 KHz	$175 *
DT57C01		(Low Power Version of DT5701)			$175 *
DT5702	12 bits	10mV to 10V	16	31 KHz	$175 *
DT57C02		(Low Power Version of DT5702)			$195 *
DT5720	12 bits	±0.03%	16	50 KHz	$575
DT5710	12 bits	±0.03%	16	100 KHz	$675
DT5710A	12 bits	±0.03%	16	125 KHz	$750

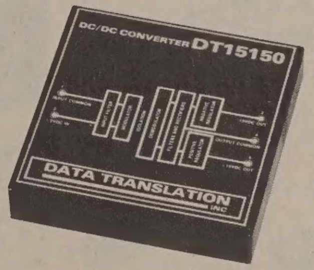
*OEM Price



LSI-11 and SBC-80 analog I/O system boards plug directly in the microcomputer.

DUAL D/A-POINT PLOTTER MODULE

The DT212 Point Plotter is the first standardized modular function for read-out of digital information from microcomputers onto CRT displays and analog recorders. Complete Point Plotter Module - contains Z control, selectable set-up delay, timing functions, X & Y axis D/A converters with power amplifier output and mode control. Low Cost - $245 in 100 quantity.



DC-DC CONVERTERS

DC-DC Converter, DT15150, provides ±15 volt outputs at 150mA with 65% efficiency from +5 volt power source.

DC-DC converter gives very low noise outputs of less than 1mV.

MODULAR DATA ACQUISITION SYSTEMS

DATA ACQUISITION SYSTEMS

DESCRIPTION

This comprehensive line of modern data acquisition systems gives the user a choice of units from low cost hybrid system up to a larger 250 kHz, 16 channel system. All models are complete, including automatic digital sequencing circuitry.

HDAS-16, HDAS-8: These devices are new miniature state-of-the-art hybrid systems featuring a programmable instrumentation amplifier, 16 channel single-ended or 8 channel differential operation, and 12 bits resolution at a 50 kHz rate.

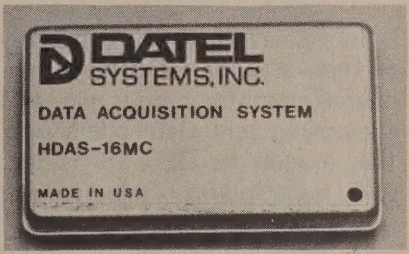
MDAS-16, MDAS-8D: These models are only 4.6 × 2.5 × 0.375 inches in size and cost $295. Features are 5 programmed input ranges, 16 single-ended or 8 differential channels, 12 bit resolution, and 50kHz throughput rate.

DAS-250: This model offers 16 channel capability at 250 kHz throughput rate. Resolution is 12 bits and the unit offers 0 to +10V or ±5V single-ended input ranges. Package size is 5.0 × 4.5 × 1.5 inches.

MDAS-PG-16D, MDAS-PG8D: These new models feature an internal resistor-programmed instrumentation amplifier with gain from 1 to 1,000. They give 16 channel, single-ended or 8 channel differential operation with 12 bits resolution at a 25 kHz rate.

DATA ACQUISITION EXPANDER MODULES MODELS MDXP-32, MDXP-32-1

These modules are companion devices to the MDAS-16, MDAS-8D, MDAS-PG16D, and MDAS-PG8D. Both models contain 32 analog multiplexer channels, permitting expansion of the MDAS models up to 48 single ended for 24 differential channels using single level multiplexing. With double level multiplexing, up to 256 single ended or 128 differential channels can be realized using one MDXP-32 and seven MDXP-32-1's.



The MDXP-32-1 contains a 32 channel multiplexer and address decoder. The MDXP-32 contains, in addition, an address counter and address detector logic.

Prices (1-9):	MDXP-32	**$199.00**
	MDXP-32-1	**$179.00**

Notes:

1. Includes programmable gain instrumentation amplifier
2. Models for other temperature ranges:
   HDAS-16MR, HDAS-8MR, −25°C to +85°C, $395.00
   HDAS-16MM, HDAS-8MM, −55°C to +100°C, $695.00
3. Coding: Bin = Straight Binary or Offset Binary
   2C = Two's complement
4. Double Buffered
5. At a Gain of 1. For Gain of 1000, 0.1%
6. At a Gain of 1

DATEL SYSTEMS, INC.

SINETRAC SERIES

A/D-D/A PERIPHERAL BOARDS THAT SLIDE INTO YOUR COMPUTER

Datel's SineTrac Series is a family of slide-in A/D-D/A analog peripheral boards for popular mini- and microcomputers. Datel offers SineTrac models for DEC LSI-11 and PDP11 computers; Data General NOVA and microNOVA models; and for microprocessor-based computers from Intel (SBC-80/10/20 and MDS-800) and Motorola (M6800 EXORciser).

All models feature outstanding performance with A/D throughput periods of 20 microseconds per channel and D/A settling of 4 microseconds. Extraordinary channel density is achieved by using Datel's in-house-manufactured hybrid A/D's, D/A's, and subminiature power supply modules. Most SineTrac models include analog channel address registers and control logic for automatic sequential channel scanning. Depending on the computer type, most models accept interrupt and DMA programming with software control of system mode.

All SineTrac series include a comprehensive diagnostic assembly language program on paper tape. Full systems manuals supplied with each product include a full listing of this program plus much more.

The SineTrac series offers a user relief from typical A/D-D/A interfacing problems such as interface circuit design, digital I/O cabling (only analog signal cabling is required), and a strong head start toward handling problems.

Analog specifications are excellent including 12-bit binary A/D-D/A resolution and accuracy, 100 megohm A/D input impedance, and 50 milliohm D/A output impedance.

Contact Datel for complete individual brochures on the SineTrac Series.

SINETRAC SERIES

SPECIFICATIONS COMMON TO ALL SINETRAC MODELS

DATA ACQUISITION SECTION (A/D ANALOG INPUTS)

SPECIFICATIONS
(Typical @ +25°C, dynamic conditions, unless otherwise specified)

ANALOG INPUTS

Number of Channels	Up to 64 channels, depends on model.
Channel Expansion	Up to 256 single-ended or differential channels.
Full Scale Input Voltage Ranges	0 to +5 volts 0 to +10 volts −5 to +5 volts −10 to +10 volts
Common Mode Range	±10 volts maximum
Input Overvoltage	±35 volts maximum sustained (no damage)
Input Impedance	100 megohms differential or to ground.
Input Bias Current	3nA typical, 10nA maximum
Input Capacitance	10pF, OFF channel, 100pF, ON channel to ground.

PERFORMANCE

Accuracy @ +25°C	Within ±0.025% of full scale range.
Resolution	12 Binary Bits (1 part in 4096)
Nonlinearity	±½ LSB maximum
Differential nonlinearity	±½ LSB maximum
Gain error	Adjustable to zero
Offset or Zero Error	Adjustable to zero
Gain Temperature Drift	Within ±30ppm of FSR/°C
Offset or Zero Temperature Drift	Within ±7ppm of FSR/°C
Common Mode Rejection	70dB min., DC to 1kHz, with 1 Kilohm unbalance
Power Supply Rejection	100dB to +5V Bus

DYNAMIC CHARACTERISTICS

Throughput Period	20 Microseconds max.
Acquisition Time	12 Microseconds
A/D Conversion Time	8 Microseconds
Aperture Time	50 nanoseconds
Sample/Hold Switch Feedthrough	0.01% Maximum
MUX Crosstalk from OFF Channels	0.01% @ 1KHz

DIGITAL OUTPUTS

Output Coding	Straight Binary (unipolar) Offset Binary (bipolar) 2's Complement (bipolar)	Jumper Selected

POWER CONSUMPTION

2.5 Amps or less typical @ +5VDC supplied from CPU bus connector. On-board DC/DC converter supplies ±15VDC to linear circuits.

PHYSICAL

Operating Temperature Range	0° to +70°C
Storage Temperature Range	−25°C to +85°C

DATA DISTRIBUTION SECTION (D/A ANALOG OUTPUTS)

ANALOG OUTPUTS

Number of Channels	Up to 8 single-ended or 4 single-ended
Channel Expansion	256 Channels addressable
Full Scale Output Voltage Ranges	0 to +5 volts 0 to +10 volts −2.5 to +2.5 volts −5 to +5 volts −10 to +10 volts
Input Coding	Straight Binary (unipolar) Offset Binary (bipolar) 2's Complement (bipolar)
Output Impedance	50 milliohms
Output Current	±5mA min., short circuit proof to ground.

PERFORMANCE

Nonlinearity	±½ LSB, maximum
Differential nonlinearity	±½ LSB maximum
Gain Error	Adjustable to zero using pot for each channel.
Offset or Zero Error	Adjustable to zero using a pot for each channel.
Scan Period Adjust	1 to 10 milliseconds
Gain Temperature Drift	±30ppm of output/°C
Zero Temperature Drift	(Unipolar output) ±5ppm of FSR/°C
Offset Temperature Drift	(Bipolar output) ±15ppm of FSR/°C
Settling Time	4 microseconds to ±½ LSB
Power Supply Rejection	±0.02% of FSR per 1% variation.

HOT LINE PHONES

Datel has provided Hot Line Phones to give you the fastest, best customer service possible. Use these Hot Line phone numbers—for **your** convenience.

DATEL SYSTEMS, INC.

ST-800 FOR INTEL'S SBC AND MDS MICROCOMPUTERS

Lowest Price
Starting at only $469 (single quantity) for a 16-channel, single-ended A/D input system, including the diagnostic program. Datel offers full systems with the lowest cost per channel.

Simple Channel Expansion and High Channel Density
Only two cards are needed to provide 80 single-ended or 64 differential A/D channels! A/D or D/A expansion simply consists of adding cards. High density CMOS LSI multiplexers offer up to 48 Differential Expander A/D channels per card. D/A's expand in 4 or 8 channel increments.

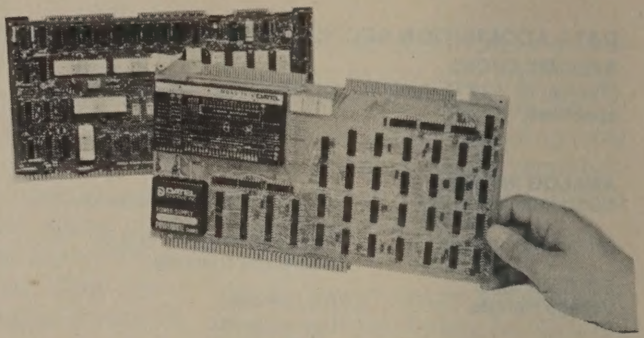
Highest Throughput Speed
A/D conversion and settling takes only 20 microseconds. When DMA is used, data bursts up to 36,000 samples per second may occur. Using Datel's System 256 remote A/D housing, throughput time can be reduced to 4 microseconds.

Jumper-Selected Automatic High-speed DMA
All A/D systems include jumper-selected control of a user-supplied Intel DMA (Direct Memory Access) Control Board. On-board channel address registers and logic automatically scan a program-selected channel group at the highest speed.

Diagnostic Test Programs on Paper Tapes Included

Complete Manuals Included
Programming manuals include sub-routine listings and programming examples.

On-board Start/Final Channel Logic for Lowest CPU Handling
Channel address registers free the CPU from channel counting and scan termination for highest speed and simplest programming.



PRICES (1-9 QUANTITIES)

Model	Description	Price
ST-800-32S	32 Single-ended A/D Channels	$495.
ST-800-16D	16 Differential A/D Channels	$495.
ST-800-16S	16 Single-ended A/D Channels	$469.
ST-800-ADX48D	48 Chan. Differential	$495.
ST-800-DA8	8 D/A Channels requires ext. ±15V @ .32A	$495.

ST-6800 FOR MOTOROLA'S M6800 EXORCISER MICROCOMPUTER

32 A/D and 2 D/A Channels on a single board that slides directly into Motorola's M6800 EXORciser Microcomputer.

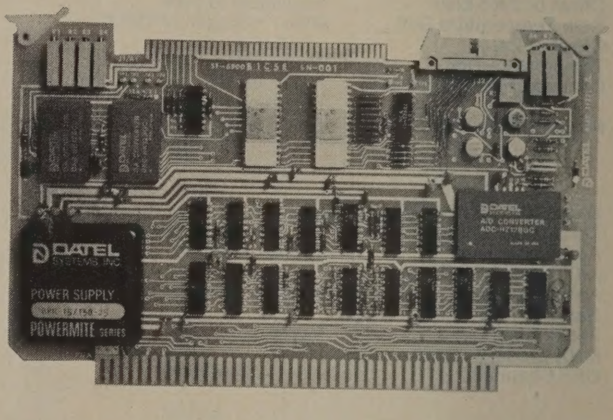
Expandable up to 128 A/D and/or D/A channels.

Prices from $335 (16 A/D chans, no D/A, no DC/DC conv.).

12-Bit Digital output port included on D/A boards.

Directly compatible with EXBUG and 6800 assembly language programs.

Comprehensive Systems Manual and Paper Tape Diagnostic Program included for immediate teletypewriter printout.



PRICES (1-9 QUANTITIES)

Model	Description	Price
ST-6800A2A	16 Single-ended A/D ch., no D/A, no DC/DC PS	$335.
	Add for 16 more A/D chan.	add $45.
	Add for ±15V DC/DC PS	add $60.
	Add for 2 D/A chan.	add $150.
ST-6800DA4	4 D/A chans. incl. DC/DC PS	$475.
ST-6800DA8	8 D/A chans. less DC/DC PS	$595.
ST-6800ADX48D	48 Diff. A/D Exp. Chans.	$495.

SINETRAC SERIES

ST-NOVA FOR DATA GENERAL'S NOVA MINICOMPUTERS

FEATURES

64 A/D and 4 D/A Channels on a single board that slides directly into Data General's NOVA series minicomputers.

Expandable up to 256 A/D and/or D/A channels.

Prices from $1445 (64 A/D chans, no D/A, with DC/DC conv.).

Speeds up to 45,000 A/D samples per second.

12-Bit Digital output port optional on D/A boards.

Choice of program control, interrupt, or DMA.

Directly compatible with NOVA series assembly language programs, NOVA BASIC and FORTRAN.

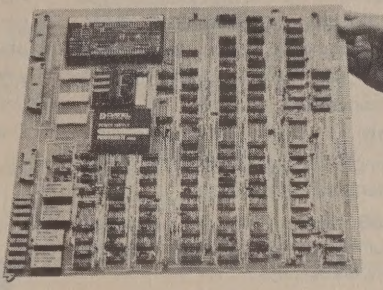
Comprehensive Systems Manual and Paper Tape Diagnostic Program included for immediate teletypewriter printout.

Optional interface to Datel's System 256 remote A/D-D/A housing for special performance.

ST-PDP FOR DEC'S PDP-11 MINICOMPUTERS

FEATURES

- 64 A/D channels plus 2 D/A channels optional on one slide-in PDP 11 board
- A/D Throughput period 20 microseconds—provides data bursts in DMA mode up to 45,000 samples per second
- Optional external System 256 remote A/D-D/A housing offers special performance, such as:
  1. A/D throughput down to 4 microseconds. Effective I/O rates in DMA of 200,000 samples/second.
  2. A/D resolution up to 14 bits at 60 microseconds throughput period
  3. Relay multiplexer option for 300V RMS common mode voltage with very high isolation.
  4. Up to 32 Simultaneous Sample/Hold amplifiers for fast dynamic events
  5. Minicomputer—style LED/Toggle switch binary front panel
  6. Channel expansion up to 256 channels, single-ended or differential
- Three Scan Start Methods
  1. Program scan start (via interrupt or program instruction)
  2. DMA-board adjustable 74123 integrated circuit scan timer
  3. External start pulse
- Fast Automatic Sequential DMA Addressing, Lowest CPU Overhead. On-board channel address counters and start/final address logic automatically start and terminate analog channel scans. Program control of random/sequential channel addressing
- Complete Systems manuals included. Comprehensive systems manual cover circuits, logic diagrams, programming timing, applications, troubleshooting and diagnostics.
- Paper Tape diagnostic programs included. These assembly language programs provide decimal printouts of preselected A/D scans for accuracy, calibration and troubleshooting. D/A programs offer square wave and saw-tooth oscilloscope outputs.
- Three Programming Methods
  1. Program Control Interface (PCI)
  2. Interrupt Service Interface (ISI)
  3. Direct Memory Access (DMA)



PRICES

Model	Description	Price
ST-NOVA1	64 SE or 32 Diff. A/D Channels 4 D/A Channels	$1795.00
ST-NOVA3	64 SE or 32 Diff. A/D Channels No D/A Channels	$1445.00
System 256 On-Board/Remote Models		
ST-NOVA4	64 SE or 32 Diff. On-board A/D Channels Remote (Sys. 256) D/A Channels	$1445.00
ST-NOVA6	Remote (Sys. 256) A/D and D/A Channels	$1070.00
System 256 (Remote A/D-D/A Housing) must be ordered separately, if used. Contact Datel for a System 256 Brochure.

MONOLITHIC & HYBRID A/D CONVERTERS

ADC-MC8B: An 8 bit low cost counter-type A/D which requires an external comparator.

ADC-EK SERIES: Series of low cost, monolithic CMOS A/D's using change balancing conversion principle.

ADC-HC12B: 12 bit low power CMOS A/D's featuring single supply operation for portable instrumentation applications.

ADC-HF12B: State-of-the-art ultra-high speed 12 bit hybrid A/D converter featuring 2 μsec. conversion time.

ADC-HS12B: 12 bit, 8 μsec. A/D converter with sample-hold in miniature hybrid package.

ADC-HX12B: Industry standard, low cost 12 bit A/D converter with 20 μsec. conversion time and internal buffer.

ADC-HZ12B: High performance, 12 bit A/D converter with 8 μsec. conversion time and pin-programmable inputs.

ADC-HU3B: A 3 bit expandable, parallel type A/D featuring 20 nsec. conversion time. Decoded binary output.

GENERAL PURPOSE MODULAR A/D CONVERTERS

ADC-ECONOVERTER
This lowest cost model is a counting type converter with 6 bit resolution and 50 µsec. conversion time for a full scale conversion.

ADC-89A SERIES
These low cost models are 8 bit binary or 2 digit BCD counting type converters with 200 and 100 µsec. conversion times respectively.

ADC-MA SERIES
These versatile 10 and 12 bit models feature pin programmable operating features with conversion times of 40 and 20 µsec. The ADC-MA12B2A is a pin and performance equivalent of the popular ADC-12QZ model.

ADC-149-14B
This low cost, high resolution converter uses the successive approximation method to achieve 14 bit resolution with a 15 ppm/°C tempco. Conversion time is 50 µsec.

ADC-CM SERIES
These 8, 10, and 12 bit converters use CMOS circuitry to achieve a low power consumption of 140mW for portable and remote instrumentation applications. These units can operate from either a single +12 to +15V supply or from dual ±12 to ±15V supplies.

ADC-L SERIES
These high performance successive approximation converters feature 8, 10, and 12 bit conversions in less than 20 µsec. and a low tempco of 10 ppm/°C. Specific input voltage ranges must be ordered by model number.

ADC-E SERIES
These models feature 8, 10, and 12 bit resolution with both binary and BCD coding. Conversion time is from 312 µsec. to 5 msec. depending on the resolution. Coding is sign-magnitude binary or sing-magnitude BCD.

ADC-EP SERIES
These high resolution models feature 14 binary bits or 4 BCD digits with a conversion time of 230 msec. Temperature coefficient is 13 ppm/°C. The analog front end of this converter is electrically floated from digital ground to give ±300V common mode input range with greater than 100 dB CMR. The input is 4 wire ratiometric with a flying capacitor reference input. An auto zeroing circuit stabilizes zero drift to less than 1µV/°C. A crystal controlled clock results in better than 60 dB normal mode rejection to input frequency noise.

ADC-ER SERIES
This series also features 4 wire ratiometric input along with operation from a single +5V supply. The analog input is differential with 70 dB of common mode rejection. The internal clock can be adjusted for synchronism with the power line frequency to give 40 dB of normal mode rejection to this noise. Resolution is 8, 10, and 12 bits with both binary and BCD models.

ALL MODELS
Have operating temperature range of 0°C to 70°C: have DTL/TTL compatible outputs; use DILS-1 or DILS-2 dual-in-line strips for sockets.

HIGH SPEED MODULAR A/D CONVERTERS

ADC-EH8B SERIES

These 8 bit successive approximation converters feature 4 and 2 μsec. conversion times at low cost. Temperature coefficient is 50 ppm/°C.

ADC-EH10B SERIES

This series of 10 bit converters uses the successive approximation method with 4 and 2 μsec. conversion times and 30 ppm/°C tempco.

ADC-EH12B SERIES

These 12 bit models are also successive approximation types with 8 and 4 μsec. conversion times. Tempco is 30 ppm/°C.

ADC-EH12B3

This 12 bit converter with 2 μsec. conversion time is the fastest 12 bit modular converter in the industry. Unipolar or bipolar operation is achieved by pin connection.

ADC-SH4B

This model is a 4 bit A/D converter with a self-contained sample-hold circuit. Time for both acquisition and conversion is 500 nsec. This device is designed for optical scanning and fast pulse code modulation applications.

ADC-G SERIES

These converters feature conversions of 100 nsec. per bit for 8 and 10 bit conversions with a tempco of 50 ppm/°C.

ADC-VH SERIES

These models use the parallel (or flash) conversion technique to realize a 4 bit conversion in 100 nsec. and 6 or 8 bit conversions in 200 nsec.

ADC-UH SERIES

This series is identical with the VH series except for faster conversion speed of 40 nsec. for 4 bits and 100 nsec. for 6 or 8 bits.

ADC-TV8B

This model is made up of hybrid and monolithic components. It performs 8 bit conversions at a 20 MHz rate.

ALL MODELS

Have operating temperature range of 0°C to 70°C; have DTL/TTL compatible outputs (ADC-TV8B has ECL on TTL compatible outputs); use DILS-1 or DILS-2 dual-in-line strips for sockets (ADC-TV8B uses a standard edge connector).

VOLTAGE TO FREQUENCY CONVERTERS

This line of modular and monolithic V/F converters feature 10 kHz and 100 kHz models with excellent linearity and stability characteristics. The VFV series offers the highest performance with a universal design which can be used as V/F or F/V converter by external pin connection. These devices have ±0.005% linearity for 10 kHz and ±0.05% linearity for 100 kHz; temperature stability is ±20 ppm/°C and ±100 ppm/°C maximum, respectively. For less critical applications the low cost, monolithic VFQ-1 is an excellent choice. If features a worst case linearity error of ±0.05% as a 10 kHz converter and can also be connected as an F/V converter. An external reference and several passive components are required with the VFQ-1.

Price (1-9)	**$49.00**	**$69.00**	**$7.50 (1)**	**$12.75 (1)**

Note:
*Can also operate 0 to 100kHz, with ±0.25% max. nonlinearity.
(1) 1-24 Price
(2) Require external reference and several passive components.

DATEL SYSTEMS, INC.

GENERAL PURPOSE MONOLITHIC AND HYBRID D/A CONVERTERS

DAC-IC SERIES: These 8 and 10 bit DAC's are low cost current output models. They are monolithic devices in 16 pin DIP packages.

DAC-HA SERIES: These models are new 10 and 12 bit multiplying CMOS DAC's with current output.

DAC-HZ SERIES: These high performance 12 bit DAC's have pin-programmable outputs and a 20 ppm/°C tempco. Models are available with either complementary binary or complementary BCD coding. A low drift version has a 10 ppm/°C max tempco. The different models in this series operate over 3 different temperature ranges and are in glass or metal cases.

ALL MODELS: Have operating temperature range of 0°C to 70°C except for those models specified otherwise; have DTL/TTL compatible inputs except for DAC-HU4B which is ECL compatible; use DILS-3 24 pin socket except for DAC-IC series and DAC-HA series.

	Model	Resolution	Accuracy (% FS)	Output	Settling Time	Linearity	Input Coding	Output Ranges	Gain Tempco	Temp. Range (°C)	Power Requirement	Case	Price (1-24)
8-Bit Monolithic	DAC-IC8BC	8 Bits	0.2%	Current	300 nsec.	½ LSB	Bin	0 to −2mA	20 ppm/°C	0 to 70	+5V, −15V	16-Pin DIP	$ 8.95

	DAC-HZ12DMM	3 Digits	0.05%						20 ppm/°C	−55 to +125			$119.00
12-Bit Low Drift	DAC-HZ12BMR-1	12 Bits	0.01%	Voltage	3 μsec.	½ LSB	C Bin (1)	+5, +10, ±2.5, ±5, ±10V	10 ppm/°C	−25 to +85	±15V	24-Pin DIP (Hermetic)	$139.00
	DAC-HZ12DMR-1	3 Digits	0.05%				C BCD	0 to +5, +10V					$139.00

NOTES:

1. All models in this series are also available with 3 digit BCD coding. Prices are same as binary. For correct model designation, change "B" to "D" in model number.
2. Coding: Bin = Straight binary or offset binary
   BCD = Binary coded decimal
   C Bin = Complementary binary or comp. offset Bin
   C BCD = Complementary binary coded decimal
   15 line = 8 bit input, no coding

HIGH PERFORMANCE HYBRID D/A CONVERTERS

HIGH PERFORMANCE HYBRID D/A CONVERTERS

DAC-HA SERIES: These models are new 14-bit multiplying CMOS DAC's with current output.

DAC-HF SERIES: This series of 8, 10, and 12 bit current output models feature a 10 mA full scale output current which settles in 25 nsec. for 8 and 10 bit versions and 50 nsec. for 12-bit versions for high speed applications.

DAC-HK SERIES: These models are identical in performance with the DAC-HZ series except that they have an input digital register.

DAC-HP SERIES: This series consists of a 16 bit comp. binary and a 4 digit BCD model. The two models have voltage outputs and are housed in a ceramic case.

DAC-HU4B: This model is a 4 bit, 15 line ECL input DAC for very fast applications. The 15 mA full scale output current settles in 20 nsec.

GENERAL PURPOSE MODULAR D/A CONVERTERS

DAC-9 SERIES

These low cost modular DAC's feature an excellent choice of both current and voltage output models with 8 to 12 bit resolutions. All units have internal voltage references except for DAC98BI and DAC-98DI which derive their reference voltage from the +15 volt supply. Output settling times vary from 300 to 500 nsec. for current outputs and from 5 μsec. to 20 μsec. for voltage outputs.

DAC-I SERIES

This series features low drift (15ppm/°C) current outputs with 150 nsec. settling time. Resolution is 8 through 12 bits with 2 BCD models.

DAC-R SERIES

This general purpose series features 8 through 12 bit performance with complementary input coding. Voltage output settling time is 5 μsec. The DAC-R12B is a pin and performance equivalent of the popular DAC-12QZ converter.

ALL MODELS

Have operating temperature range of 0°C to 70°C; have DTL/TTL compatible inputs; use DIL-1 or DILS-2 dual-in-line strips for sockets.

HIGH SPEED, HIGH PERFORMANCE MODULAR D/A CONVERTERS

DAC-169 SERIES

These low cost, high resolution DAC's feature 16 bit or 4 BCD digit resolution with .005% linearity and 10 ppm/°C temperature coefficient. By pin connection the output can be configured for either voltage or current output.

DAC-DG SERIES

These devices are 12 bit self-contained deglitched DAC's in a compact 4 × 2 × 0.4 inch module. Output settling is a fast 600 nsec. and glitch amplitude is less than 2 LSB's.

DAC-HI SERIES

These fast current output models feature settling times of 25 or 50 nsec. Resolution is from 8 bits to 12 bits with temperature coefficients 20 or 15 ppm/°C. This series is designed to drive a small value load resistor directly or the summing junction of a fast operational amplifier.

DAC-HR SERIES

This series features 13 through 16 bit resolutions with an ultra-low tempco of only 1.5 ppm/°C. This is achieved by a low T.C. resistor network and an oven controlled zener reference. Linearity is .0015% and these models have current outputs.

DAC-HV-100 SERIES

These ultra fast voltage output models have settling times from 100 nsec. to 50 nsec. with an output drive capability up to 100mA. These devices are ideal for fast applications where it is necessary to drive a 50 ohm cable directly.

DAC-TR SERIES

These models feature low tempco (7 ppm/°C) voltage outputs with 5 μsec. settling time. Input coding is complementary binary or complementary BCD.

ALL MODELS

Have operating temperature range of 0°C to 70°C; have DTL/TTL compatible inputs; use DILS-1 or DILS-2 dual-in-line strips for sockets.

	DAC-TR-12D	3 Digits	.05%									$129.00

NOTES:
1. Can also be connected for current output. Current output is 0 to +2mA or ±1mA for binary version and 0 to +1.25mA for BCD version.
2. Coding: Bin = Straight binary or offset binary
   BCD = Binary coded decimal
   C Bin = Complementary binary
   C BCD = Complementary BCD
   2C = Two's complement
3. Glitch amplitude is ± LSB's maximum.
4. Has 100mA output current drive capability.

ANALOG MULTIPLEXERS

This complete line of analog multiplexers offers a choice of operating features and prices for data acquisition system applications. The two modular models offer 8 and 16 channel capability. The MMD-8 is an 8 channel model with differential inputs and output and an internal differential buffer amplifier. The MM-16 features single-ended 16 channel operation and also includes an internal buffer amplifier.

The six monolithic models use dielectrically isolated CMOS circuitry. The analog and digital inputs are protected from both the loss of power and from overvoltages that exceed the power supplies. The CMOS FET analog channel switches have fast settling time, low capacitance, low leakage current, and high OFF resistance. These monolithic devices offer 4, 8, and 16 channel single-ended operation and 8 channel differential operation at economical prices. Channel addressing is done by a 2, 3, or 4 bit binary code, depending on the particular model. There is also an inhibit input which enables or disables the multiplexer.

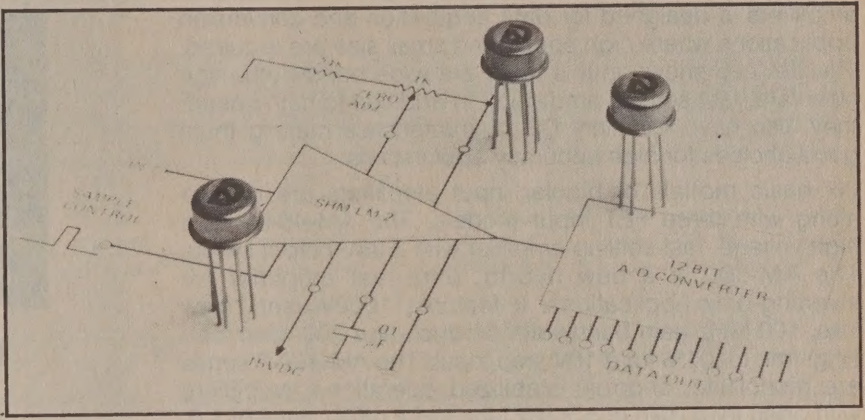
SAMPLE-HOLDS

This line of sample-hold devices includes modular, hybrid, and monolithic models and is the most comprehensive line in the industry. The models listed here cover a broad range of applications from ultra-fast and high accuracy down to lost cost, moderate performance units.



SHM-1: General purpose, high accuracy model with 5 µsec. acquisition time.

SHM-2, SHM-2E: Very high speed units with open loop circuit to achieve acquisition times as fast as 100 nsec.

SHM-3: A low cost, .005% accuracy model with 50 µsec. acquisition time.

SHM-4: A low cost, .005% sample hold with a faster 7 µsec. acquisition time.

SHM-5: A new ultra-fast sample hold designed for use with fast 10 and 12 bit A/D converters. Acquisition time is 350 nsec. to .01% and 200 nsec. to 0.1%. The SHM-5 also features high input impedance.

SHM-UH, UH3: These ultra-fast models feature acquisition times of 50 and 30 nsec. and are ideal for use with ultra-fast 8 bit A/D converters such as ADC-UH8B.

SHM-IC-1: This monolithic sample-hold offers excellent performance characteristics for .01% accuracy at a low cost.

SHM-LM-2: This monolithic unit also gives excellent performance at even lower cost.

SHM-HU: This hybrid model is specifically designed for ultra-fast video data conversion applications.

SHM-6: This hybrid unit features .01% accuracy with 1 µsec. acquisition time.

MONOLITHIC AND HYBRID I.C. OPERATIONAL AMPLIFIERS

This broad line of monolithic and hybrid operational amplifiers is designed for data acquisition and conversion applications where high speed and small size are required. The devices shown in this table are wide bandwidth, high slew rate, fast settling amplifiers. In addition to high speed, they also have excellent DC characteristics making them good choices for high accuracy applications.

Six basic models of bipolar input amplifiers are offered along with three FET input models. The AM-464-2 is a high voltage, fast settling amplifier with ±35V output swing. The AM-500 is a new hybrid, ultra-fast amplifier for inverting-only applications. It features 1000V/µsec. slew rate, 100 MHz gain bandwidth product, and 200 nsec. settling time to .01% for a 10V step input. The AM-490-2 series are monolithic, chopper stabilized operational amplifiers with open loop gain of 5×10^8 and input offset drifts of 1.0, 0.3, and 0.1 µV/°C maximum.

DATEL SYSTEMS, INC.

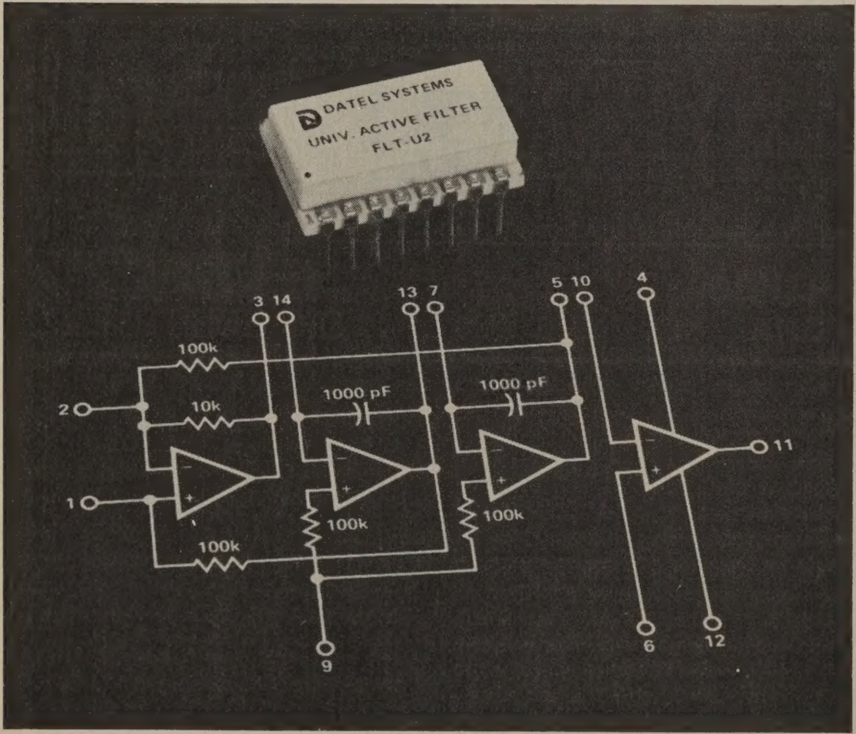
UNIVERSAL ACTIVE FILTER

DESCRIPTION

Datel Systems' model FLT-U2 is a universal-type active filter manufactured with hybrid technology. It uses the state variable active filter principle implemented with three committed op amps, resistors and capacitors, and a fourth uncommitted op amp which can be used to provide summing, buffering, gain, or an additional pole. The filter provides 2 pole lowpass, highpass, and bandpass functions simultaneously in addition to use in phase correction and notch circuits. The filter is tuned by 4 external resistors which set the gain, center frequency and Q of the circuit.

The Q range is up to 1000 and resonant frequency range is up to 200 kHz. Resonant frequency accuracy is typically ±5% and frequency stability is 100 ppm/°C. The units are packaged in a 16 pin double spaced ceramic DIP.



SPECIFICATIONS (Typical at 25°C, ±15V supplies)

Frequency Range	.001 to 200 kHz
Q Range	0.1 to 1000
f_0 Accuracy	±5%
f_0 Tempco	100 ppm/°C
Voltage Gain	0.1 to 1000
Output Voltage Range	±10V
Output Voltage	±10mA
Amplifier Gain Bandwidth Prod.	3 MHz
Input Offset Voltage	±6mV max.
Amp. Voltage Gain	300,000
Input Offset Current	200 nA max.
Input Bias Current	500 nA max.
Output Slew Rate	1 V/μsec.
Power Supply, rated	±15 VDC
Power Supply Range	±5 to ±18 VDC
Quiescent Current	9mA
Operating Temperature Range	0°C to 70°C
Package	16 pin double DIP
Price (1-9)	$16.00

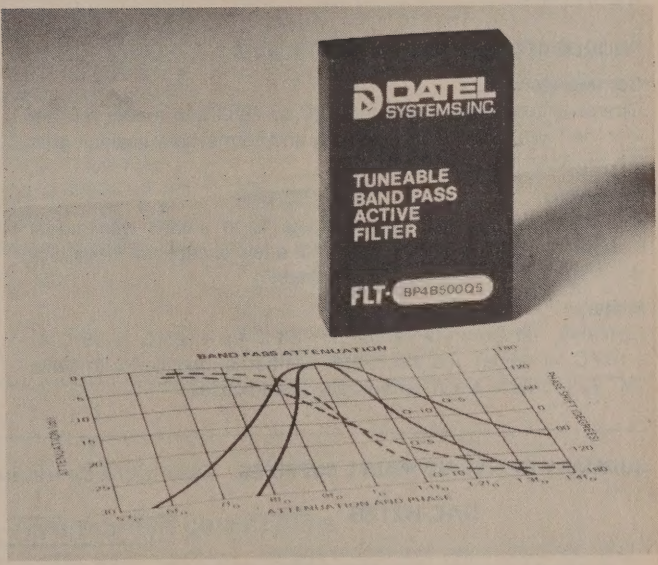
ACTIVE FILTERS/RESISTOR TUNED

GENERAL SPECIFICATIONS FOR ALL FILTERS:

Accuracy of Center or Cutoff Frequency	±3% (using 1% tuning resistors)
Input Voltage Range	±10V
Offset Voltage (adj. to zero)	±2mV
Output Voltage Range	±10V
Output Current (S.C. prot. to ground)	±2mA
Output Impedance	1 ohm
Temperature Range, Operating	0°C to 70°C
Socket	MS-12 ($5.00 each)



TUNING RESISTOR FORMULA:

$$R = 2\left\{\frac{f_0\,(\text{max.})}{f_0} - 1\right\}$$

R is in kilohms

f_0 is center frequency for Band Pass models or cutoff frequency for Low Pass models.

f_0 (max.) is the maximum specified frequency for the model chosen.

	Model	Frequency (1)	Type	Q	Gain Accuracy (2)	Input Impedance	Frequency Drift	Offset Drift	Power Requirement	Case Size	Price (1-9)

	FLT-LP6B50K	1 k-50 kHz		—						1.37″ × 2.87″ × 0.99″	$109.00
	FLT-LP6L50	1-50 Hz	Bessel	—	±.02dB	10⁹ ohms	±.05%/°C	±75μV/°C	±15VDC @ 28mA	2.0″ × 3.0″ × 0.99″	$109.00
	FLT-LP6L500	10-500 Hz		—						1.37″ × 2.87″ × 0.99″	$109.00
	FLT-LP6L5K	100-5 kHz		—						1.37″ × 2.87″ × 0.99″	$109.00
	FLT-LP6L50K	1 k-50 kHz		—						1.37″ × 2.87″ × 0.99″	$109.00

NOTES:

(1) For Low Pass models the frequency range can be extended another decade on the low frequency side with an increase by a factor of 10 of voltage offset and drift.

(2) For a gain of +1, using no external gain setting resistors.

THESE FILTERS ARE COVERED BY GSA CONTRACT

DATEL
SYSTEMS, INC.

HIGH RELIABILITY HYBRID CIRCUITS

Datel Systems, Inc. maintains a screening program to assure high reliability in its hybrid circuit product line. There are three levels of screening which give the user a choice in the reliability of the device he is purchasing. The higher reliability products are useful not only in military and aerospace systems, but also in such critical requirements as medical monitoring systems, process control systems, and automatic test equipment where a component failure could affect safety or cause expensive down-time of the equipment.

PRODUCT CLASSIFICATION

Commercial

Operating temperature range of 0°C to 70°C with model number identified with suffix "C". Both epoxy and hermetically sealed cases are available in this category.

Industrial

Operating temperature range of −25°C to +85°C with model number identified with suffix "R". With a few exceptions these products are all in hermetically sealed cases.

Military

Operating temperature range is −55°C to +125°C (−55°C to +100°C for some) and the model number is identified with suffix "M". All products are in hermetically sealed cases.

SCREENING LEVELS

Standard Product Screening

Basic screening program for all standard hybrid products. The screening procedure is described in Quality Assurance Procedure QAP-1001.

S-Screening Program

This screening program is considerably broader than the Standard Product Screening for a higher level of reliability. It applies to hermetically sealed devices only and the model is marked with a suffix "S". The screening procedure is described in Quality Assurance Procedure QAP-1002.

QL-Screening Program

This highest level of screening is in accordance with MIL-STD-883, Method 5004, Class B, and applies to hermetically sealed devices only. The model is marked with the suffix "QL". The screening procedure is described in Quality Assurance Procedure QAP-1003.

SUMMARY OF HYBRID MODEL SUFFIXES

Datel hybrid circuits are suffixed in the following manner:

DAC-HZ12B ——— ——— ———

SEAL
G = Epoxy
M = Hermetic

OPERATING TEMP. RANGE
C = 0°C to 70°C
R = −25°C to +85°C
M = −55°C to +125°C*

SCREENING LEVEL
Blank = Standard Product
S = S-Program Product
QL = MIL-STD-883, Class B

*In some cases −55°C to +100°C

DESCRIPTION OF SCREENING STEPS

This is a brief explanation of the purpose of the screening steps described in documents QAP-1001, QAP-1002, QAP-1003.

1. Pre-Cap Visual Inspection
This is a detailed examination under a microscope of the device prior to capping it. The purpose is to detect defective components, poor bonds or metallization, and unsatisfactory workmanship. Devices with the potential for failure under mechanical, electrical, or thermal stress can therefore be eliminated.

2. Stabilization Bake
The product is stored at an elevated temperature, non-operating, in order to stabilize circuit elements such as thin-film resistors. This is an accelerated aging process.

3. Temperature Cycling
The device is submitted alternately to high and low temperatures, non-operating, in order to remove potential failures due to thermal stress on bonds, etc.

4. Constant Acceleration
This test is the Y_1 plane, subjects the product to a constant accleration force in a centrifuge. Devices with weak wire bonds or poor chip bonding are eliminated.

5. Seal-Fine and Gross Leak
This test verifies the hermeticity of the device package and eliminates products which might degrade over a period of time due to the absorption of water vapor or other contaminants.

6. Pre-Burn-In Electrical Tests
Static and dynamic functional tests are performed on the device to determine that it conforms with data sheet parameters.

7. Burn-In
The product is subjected to elevated temperature, with power applied, for an extended period of time. The purpose of this test is to eliminate infant mortality failures.

8. Final Electrical Test
This final test verifies that the product still meets its specified data sheet parameters.

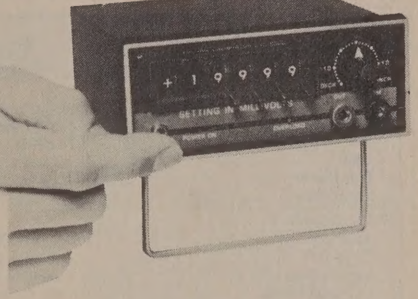
0.005% MINIATURE DIGITAL VOLTAGE CALIBRATOR

FEATURES

- ±19.999 Volts Isolated Bipolar Output @ 25mA
- 1mV Settability With ±1.5mV Continuous Vernier, 100μV Graduations
- Accuracy ±1mV of Setting With Low ±20μV/°C Drift
- Miniature Aluminum Case Includes Bench-Top Stand or Can Be Panel-Mounted
- Low Cost $295.00 (1-9)



GENERAL DESCRIPTION

A digital voltage calibrator small enough for bench-top use or panel-mounting is available from Datel Systems and fulfills many laboratory and portable applications. Datel's model DVC-8500 Calibrator offers full 4½ digit resolution (1mV steps) with a +19.999 Volt bipolar output. Up to 25mA output current may be drawn at the +1mV rated accuracy. This short-circuit proof output may be continuously varied within +1.5mV for precise vernier control. The ±20μV/°C drift specification applies over the 0°C to +50°C operating temperature range.

The DVC-8500 uses easy-to-operate digital lever switches to set the output voltage. Front panel banana jacks simplify the connection to calibration circuits while rear panel sense feedback inputs insure output accuracy.

An overload LED lamp is lit when output loading exceeds 25mA. The rear connector accommodates either standard dual 36-pin gold-plated PC board connectors or solder or crimp lugs using 4-40 hardware. The +10V reference is derived from an oven-stabilized zener diode and is brought out at the rear connector for voltage-tracing of external circuits.

The DVC-8500 is powered by a choice of 100, 115, or 230 VAC +10%, 47 to 440 Hz at 5 watts typical. The black-anodized extruded aluminum housing provides excellent shielding to electrical noise and a regulated power supply provides excellent stability and performance.

MODEL NUMBER DVC-8500

AC POWER SUPPLY
A = 115VAC
E = 230VAC
J = 100VAC
*±10%, 47 to 440Hz

PRICE (1-9)

DVC-8500 .... $350.00
Panel-Mounting Kit, P/N A-3022-1 .$ 10.00
(Consists of (2) U-Straps, rear PC-board connector, and hardware. Rubber feet and tilt-stand bale supplied for bench-top use are screwed to case bottom and must be removed before panel mounting).

SPECIFICATIONS:
(Typical between +20°C to +30°C at steady ambient temperature after 5 minute warm-up)

VOLTAGE OUTPUT

Output Voltage Range	0 to +19.999 Volts DC or 0 to −19.999 Volts DC, lever switch selected.
Output Current Range	0 to ±25mA (source or sink) to rated voltage output accuracy.
Output Overload	Greater than ±25mA (source or sink) will illuminate front panel LED overload lamp. Output is current limited (continuous short-circuit proof) to ±70mA (source or sink) at any voltage up to ±20VDC.
Output Impedance:	Less than 10 milliohms.

PERFORMANCE

Accuracy @ +25°C	Within ±1mV of setting when calibrated (equivalent to ±0.0005% of Full Scale) Due to all effects except temperature drift.
Resolution	±1mV increments and ±1.5mV Vernier with 100-V graduations.
Temperature Drift	Within ±20μV/°C
Operating Temperature Range	0°C to +50°C
Output Noise	25μV p-p, wideband
Reference Source	6.4V oven-stabilized zener diode

FRONT PANEL

Output Selector Switches	Six lever-operated, detented switches
Output Vernier	Rotary potentiometer, range ±1.5mV of selected output. Graduated in 100μV divisions.

INPUT/OUTPUT CONNECTIONS

Front Panel	Voltage output and output common available from two (2) gold plated brass deep banana jacks.
Rear Panel	PCB Connectors sense in VOUT.

POWER SUPPLY

Power Required	Choice of 100, 115, or 230 VAC, ±10% 47 to 440 Hz, 10 watts. 3-prong U.S. captive line cord installed. Ground wire connected to case, but transformer isolated ±300VDC from output common.

MECHANICAL DIMENSIONS

Case	5.56″W × 2.11″H × 5.78″D(141,2 × 53, 6 × 146, 8mm)
Bezel	5.86″W × 2.25″H × 0.50″THK (148,7 × 57.0 × 12,7 mm)
Weight	2.25 pounds (1,0 Kg)

MOUNTING	Choice of bench-top mounting or panel mounting through a cutout measuring 2.16″H × 5.59″W (54,8 × 142,1 mm) and secured by 2 U-Straps. See ordering guide for optional panel-mount kit.

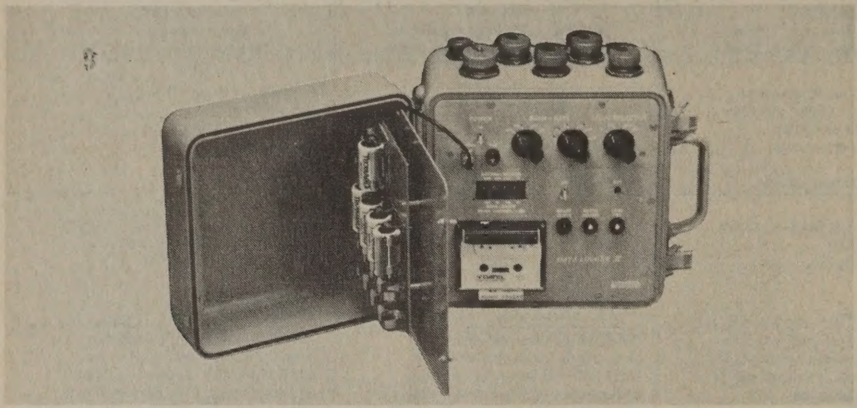
DATA LOGGER 2: A NEW INSTRUMENT FOR FIELD DATA LOGGING



Scientists and industrial researchers have long required a battery-powered, portable multichannel analog recording system for long term unattended data logging of slowly varying signals. The power and long-term requirements have been particularly difficult to achieve in a portable commercial instrument. Many applications in meteorology, pollution monitoring, oceanography, biomedicine, geophysics and natural resource exploration require an instrument which can literally be left in the field to run on its own batteries, recording slowly changing data unattended for up to a year.

SYSTEM DESCRIPTION

Datel System's new Data Logger 2 provides the missing link needed for a remote analog recorder with an output system compatible with most computer systems. Using this system, up to 64 analog inputs derived from physical variables can be displayed or printed out on a computer with the date and time of each measurement. Up to 120,000 separate measurements or samples can be recorded using a single digital magnetic tape cassette. By using a suitable computer program, each input can be displayed—identifying the physical quantity being measured—and properly offset and scaled to the correct engineering units.

In this way the Data Logger 2 system and computer will print out the day, hours, minutes and seconds, and then the actual measurement (i.e. temperature in degrees F, wind speed in miles per hour, etc.). Connected to a set of sensors, the sealed Data Logger 2 makes an ideal weather station, geophysical monitor, or oceanographic buoy data acquisition and recording system.

The complete Data Logger 2 system consists of three separate instruments: the Data Logger, the Tester, and the Reader/Interface. The Logger is the data acquisition and write-only digital cassette recording system. It runs from its own internal battery and makes scans of up to 64 channels at preselected intervals from 1 second to 30 hours. The Logger is housed in a rugged weatherproof metal case and weighs 20 pounds (9,1 Kg). Analog inputs are connected through sealed I/O connectors on the case. A typical data recording system consists of one Tester, one Reader/Interface, and several Loggers deployed for data collection at different locations. The tester is taken to the field to test and calibrate each Logger during set-up; completed digital cassettes are taken back to the laboratory for playback on the Reader/Interface.

DATA LOGGER 2 TESTER

The Tester is used to calibrate the Logger and to test all its functions before it is committed to long-term unattended recording. The tester checks all controls of the Logger, the battery status (voltage and current), Logger power drain, and tape heads. Simulated data generated on the Tester can be recorded on the Logger. The Tester will also display actual data or the simulated data on the Tester's LED readouts. In addition the Tester performs a complete self-check of all its own switches, displays, and batteries. The Tester is housed in a portable weatherproof case identical to that of the Logger.

READER/INTERFACE AND INTERFACE OPTIONS

The Reader/Interface for the Data Logger 2 system is a complete computer front end for playing back the digital cassettes recorded on the Logger. The Reader can be operated from front panel controls or can be remotely controlled on-line by a minicomputer, mainframe processor or other I/O device. Front panel displays allow the operator to manually step through a recording to find a sample on a particular date and time. Front panel binary and decimal LED's will display this date and time in addition to the raw binary data for that sample on a selected channel.

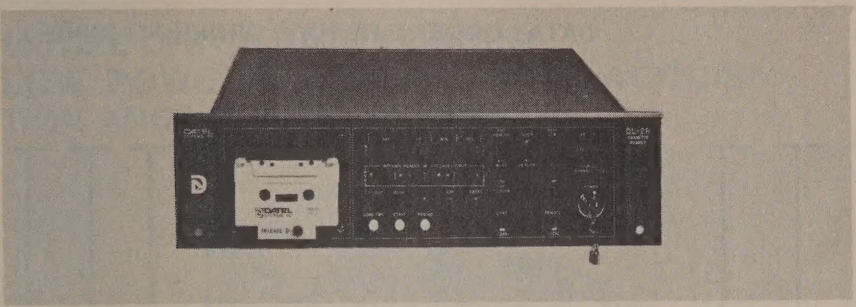
FEATURES

- 64 channel cassette digital tape data acquisition system in a sealed weatherproof, high reliability ruggedized metal case
- One year lithium battery supply
- −20°C to +60°C operating temperature range
- +10mV, ±5mV or ±5V, 0 to +5V Volt input ranges, 100 megohm impedance, 100dB CMR differential configuration
- 6mW standby power CMOS design, 1 watt power while scanning, +12VDC power
- 1 second to 30 hour selectable scan rates
- $3995. single quantity

KEY SPECS: DATA LOGGER 2

No. Channels	Up to 64
Analog Inputs, HI Level	0 to +5V or −5V to +5V (Single Ended)
Analog Inputs, LO Level	0 to +10mV or −5mV to +5mV (Differential)
Input Impedance	100 Megohms
Common Mode Voltage Range	±5V
Common Mode Rejection	110dB
Resolution	12 Bits, Hi Level 8 Bits, Lo Level
Accuracy, HI Level	.04%FS±½ LSB
Temperature Coefficient	±12 ppm/°C
Data Capacity	120,000 samples/300′ Cassette (2000 64 Channel Scans)
Scan Intervals	1 Second to 30 hours
Throughput Rate	5 samples/second
Power Requirement	12VDC (5 Lithium D-Cells) (100mA Recording, 1mA standby)
Operating Temperature Range	−20°C to +60°C
Weight	20 lbs. (9,1 Kg)

DATA LOGGERS/DATA LOGGER 2



DATA LOGGER 2 READER

By suitable computer programming an automatic search for a particular sample can be conducted.

The Reader is available with one of these interface types. A full parallel interface provides buffered TTL binary data at ranges up to 100 samples per second with the cassette tape moving continuously. This interface provides the highest output rate and may be used to load a computer memory in interrupt mode or block transfer (direct memory access).

The second interface is full serial (2 wire) to connect to teletypewriters and RS-232-C I/O devices such as CRT terminals and high speed printers in ASCII format. The teletypewriter (TTY) output provides a simple way to connect to a computer which has a TTY port. The teletypewriter can be used off-line to prepare paper tapes of the raw data and to get a "quick look" at the data. Feeding the paper tape back to the computer on-line will then produce a plain language print out with suitable programming. The RS-232-C outputs may also operate an acoustic coupler modem for telephone transmission or frequency-shift keying of a radio link. The TTY/RS-232-C serial interfaces are programmable from 75 to 9600 baud rates to accommodate different output devices and transmission lines.

The third Reader interface connects to a Kennedy 1600 incremental ½" magnetic tape transport. Tapes prepared using this transport may be played back at high speed on any 7/9-track mainframe processor tape deck. This tape-to-tape interface provides simplified no-wiring data entry to a computer and user retention of the data on a high speed tape medium.

Various user configurations of the Data Logger 2 system are shown in the "Data Logger 2 System Configurations" diagram.

LOGGER OPERATION

The Logger and Reader both employ Datel Systems' low power stepper-motor incremental cassette tape transport. This transport features very fast power turn-on permitting the transport to be normally off except during actual recording. Extensive use of fast turn-on circuits using MOS devices allows the Logger to operate for a year or longer (depending on sample rate) using only 5 D cell Lithium batteries mounted inside the front cover. While recording, the tape transport and data acquisition electronics are powered up for only 11 seconds maximum to record all 64 channels. The system then turns off except for a CMOS crystal-controlled clock circuit which initiates the next scan at the time determined by the manually selected scan rate. During each scan the data and time are automatically recorded on the cassette tape. A battery monitor will record if the battery voltage falls too low.

The Logger is rated for a year or more of operation at moderate sample rates over an operating temperature range of −20°C to +60°C. External inputs may be used to record 36 bit parallel digital data on command or to make an analog scan on external command.

Both high and low level analog inputs are accepted with unipolar, bipolar, or two's complement coding on the 12 bit A/D converter. The high level ranges are −5V to +5V or 0 to +5V; low level ranges are 0 to +10mV or −5mV to +5mV with 8 bit accuracy. The low level inputs are differential with 100 megohm input impedance, ±5V common mode range, and 100dB common mode rejection out to 100 Hz. Basic high level accuracy is ±.04% of full scale ±½ LSB with a temperature coefficient of ±12ppm/°C.

During recording the Logger draws a maximum 100mA of current from its 12V Lithium batteries; between scans only the crystal clock is running, drawing just 1mA maximum. A variety of power options may be used with Data Logger 2 including external AC, or +12VDC. In addition the internal battery holders may be rewired to accept rechargeable D cell nickel cadmium batteries or other types of D cells.

3 = 330 ohm pullup to +5V and 470 ohm pulldown to ground
*+5V must be supplied from external device

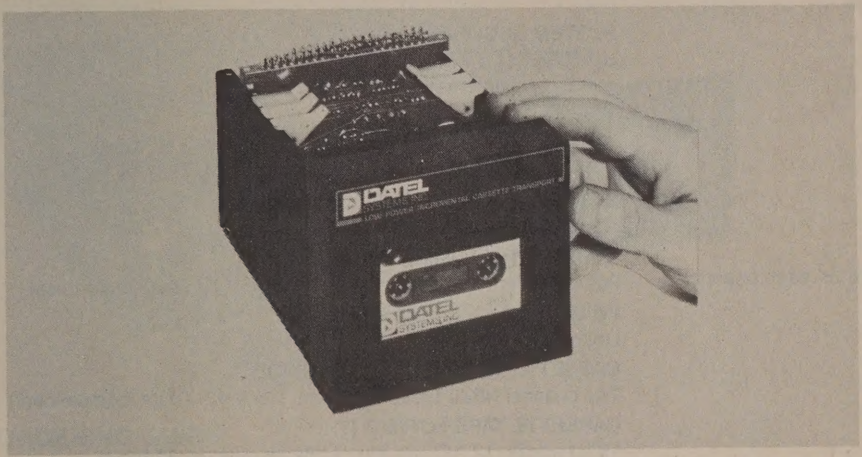
PRICES FOR THE DL-2R CASSETTE READER/DISPLAY/INTERFACE ARE AS FOLLOWS:

DL-2R-1 with full parallel computer interface	$3495.00
DL-2R-2 with TTY/RS232C serial interface	$3895.00
DL-2R-4 with 7 or 9-track ½″ tape interface	$3895.00

NOTES:
1. Both interfaces supplied with option 3 but can be used only one at a time. Can be swapped by removing DL-2R top cover.
2. ½″ Mag tape interface wired for Kennedy 1600/360 incremental, off-line write-only transport. Other transports require customer modification. Playback is 7/9 track, high speed ½″ IBM compatible.

DATEL SYSTEMS, INC.

MODEL LPS-16 DATA LOGGER LOW POWER CASSETTE DATA ACQUISITION AND LOGGING SYSTEM



FEATURES

- Sixteen Channel Analog Input
- Digital Input for Timing Information
- 12 Bit A/D Resolution
- 12VDC Battery Operated
- 900 Milliwatts Maximum Power Consumption
- C/MOS Logic Throughout
- True Incremental Recording
- Certified Phillips Cassette
- 2.2 Million Bit Capacity
- Total Weight 2 Lbs.
- Cassette Reader for Computer Entry

Datel Systems announces a new approach to the Data Logging system, a complete *Data Logging system in a Module*, occupying only 134 cubic inches weighing less than 2 lbs. and operating from a single 12VDC source requiring only 900 milliwatts when recording and microwatts during standby.

In incremental recording, the cassette tape moves only when information is presented. This conserves power in portable operation, and no tape is wasted because data is uniformly recorded in precise tape increments. Further, the length of time a cassette can be left unattended can be accurately predicted from the data rate, the number of bits, and the tape length.

Applications include oceanography, pollution monitoring, meteorology, seismology, or other remote data logging requirements. It is also ideal for other scientific and technical data acquisition uses both in the laboratory and in the field.

A cassette reader is available which allows the user to transcribe the digital data on the cassette to computer compatible media. These readers may be interfaced to produce IBM ½″ tape or to teletype, data terminals, acoustic coupler, or directly into a digital computer.

DATEL SYSTEMS, INC.

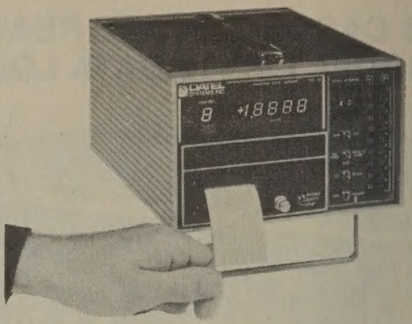
DATA LOGGERS/PDL-10

Meeting the demand for a high performance laboratory-grade printing data recorder, Datel's model PDL-10 Printing Data Logger accepts up to 10 floating analog input voltages and automatically prints them out at preselected intervals. The PDL-10 digitizes all selected inputs to 4½ digit accuracy, displays and prints them out as decimal voltages on a very compact inkless thermal printer. Analog inputs are accepted over ±199.99mV, ±1.9999V and ±19.999 Volt front-panel selected voltage ranges and are printed out every second with the channel number at preselected scan intervals.



SPECIFICATIONS

ANALOG INPUT

Number of Channels 10

Configuration
3-Wire differential inputs, transformer-isolated using a mechanical relay multiplexer.

Input Voltage Ranges
Choice of 3 DC ranges:
±.19999V; ±1.9999V; ±19.999V
preselected by ten front panel slide switches for each channel.

Overvoltage
Input is diode-protected for up to ±100V maximum continuous.

Common Mode rejection
108dB, DC to 60Hz with 1000Ω maximum input unbalance.

Common Mode Voltage Range
±20 volts maximum to signal guard. ±300 volts maximum to AC power ground.

Input Impedance (±20V input max)
(Differential) ....500 Megohms minimum.
(To Signal Guard) ....100 Megohms minimum.

Input Bias Current
500pA typ., 8nA maximum

PERFORMANCE

Accuracy @ +25°C
Within ±0.01% when calibrated due to all effects except temperature drift.

Temperature Drift
ZERO: ±1μV/°C GAIN: 20ppm/°C

Operating Temperature Range
0°C to +45°C

Storage Temperature Range
−25°C to +85°C

Sampling Rate
Pre-selected channels are advanced, displayed and printed one channel per second.

Scan Intervals
Intervals from 00 to 99 seconds or minutes

DISPLAYS

Input
A digital panel meter (DPM) displays the analog input voltage.

Channel
A single 0.43" (11 mm) red LED digit indicates channel 0 through 9.

Printing Method
Seven segment digits are formed on thermal paper using a thick-film resistor matrix printhead requiring no ink, hammers or ribbons.

Printer Digits
7-segment 0 to 9 digits 0.155" (4 mm) high. Spacing between printed lines: 0.2 inch (5 mm).

Line Capacity
Approximately 9000 lines.

Printout Format
Printout format is 9± .1.9.9.9.9 with the leading digit indicating channel number. Three lines are skipped between scans.

Printing Paper
Using heat sensitive thermal printing paper, 1.75"W (44,5 mm) and supplied in rolls 150 feet (45 mm) long.

FRONT PANEL CONTROLS

Channel Select and Input Range
(Ten 4-position slide switches) ".2V, 2V, 20V and SKIP".

Scan Interval
(Two decade thumbwheel switch) Sets the time interval between scan starts from 00 to 99 seconds or minutes.

Minutes/Seconds
(2 position toggle switch) Determines whether the Scan is set for minutes or seconds.

No Print/Run/Reset & Start
(Three position toggle switch) In NO PRINT, the instrument scans and displays but does not print. In RUN the instrument scans, displays and prints out.

In RESET & START, the scan timer is reset and starts timing. One scan is printed out one second from switch release.

One Channel/Scan
(Two position toggle switch) The ONE CHANNEL position prevents the multiplexer relay for the selected channel from disconnecting with each scan. In the SCAN position, normal relay cycling, display and printout occur.

Paper quantity
A lever indicates relative quantity of paper remaining.

REAR PANEL INPUT CONNECTIONS

Analog input voltages are connected using screwdriver barrier terminal strips. (30 terminals).

POWER SUPPLY

Choice of 115 or 230 VAC ±5, 10, 15 or 20 volts at 50 or 60 Hz only. Power consumption (all models) 30 watts, typical.

PHYSICAL DIMENSIONS

Mounting
Bench-top mounting with tilt-up stand and mar-proof plastic feet. Users can remove the feet and stand for optional ½-rack mounting.

Outline Dimensions
5.25"H × 8.5"W × 12"D (133 × 216 × 305 mm)

Weight
12 pounds (5,5Kg)

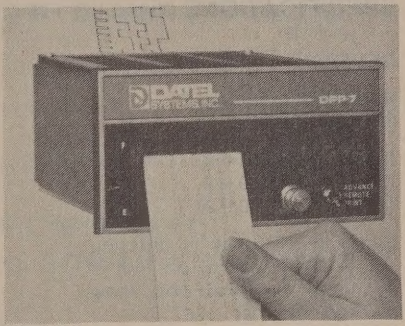
DIGITAL PANEL PRINTER/DPP-7

7-COLUMN THERMAL PANEL PRINTER

FEATURES

- 3 Lines/Second OEM-Reliable Thermal Printer using only 2 moving parts.
- Includes All Electronics for BCD Inputs with Input Storage Register
- 6 Numeric Columns and Sign
- Selectable Leading Zero Blanking
- Positive or Negative True TTL/DTL Inputs
- +5VDC Power (2.3 lbs) or AC (4.2 lbs)
- $475.00 Single Quantity
- Last Line Visible Immediately After Printing
- 2.3 Lb. Panel-Mounting Featherweight



Imagine a low cost 7-column panel-mounting printer just slightly larger than most digital panel meters. Imagine this lightweight, high-reliability digital panel printer installed in your instrument or system front panel. And imagine an ink-less, non-impact thermal printing method with only two moving parts which will last for years.

This is Datel's miniature 3 line per second DPP-7 thermal panel printer. A no-nonsense, simple to apply, OEM-designed digital output device that weighs in at only 2.3 pounds (1,1 Kg). OEM features are designed in to the DPP-7 such as selectable leading zero blanking, selectable positive or negative true coding inputs and choice of ±5VDC or AC line power. Full parallel TTL input BCD electronics are included as standard.

Other OEM design features include a selection of printout formats, manual print and advance front panel switch, and a low-paper switch output. A unique mounting technique uses an aluminum housing which attaches directly through a front panel cutout. This housing permanently holds the electronics, although the mechanical assembly can be completely removed for paper replacement using a single front panel thumbscrew. As the mechanical assembly is removed, it disconnects from the internal electronics PC board connectors, so that no lethal power voltages are exposed during paper reloading. However, the external PC board connectors at the rear of the case remain connected to the internal electronics.

The housing supports the weight of the mechanical assembly and is mounted on a front panel through a 4.50″ × 2.72″ cutout and secured by four screws. Three DPP-7 panel printers can conveniently be mounted across a 19″ × 3½″ high rack mount panel.

OEM pricing makes the DPP-7 ideal for instrument products. Comparable impact parallel printers with BCD decoding and drive electronics usually list for more than the DDP-7.

Standard 1¾″ wide thermographic papers are used in handy 150 foot rolls giving about 9,000 lines per roll with 5 lines per inch. The 7-segment digits are .155″ high with left-of-digit decimal points selectable at each digit. Seven column printing formats include sign and six digits or 2-channel (ident) digits, sign and 4 data digits. Other 7 column decimal formats are also available.

The DPP-7 Digital Panel Printer extends back 6.2″ from the front surface of the mounting panel (8.62″ for the AC powered versions), including space allowance for the two 30-conductor PC board connectors or AC fuses.

Three universal AC line voltages (100, 115, and 230 VAC) will power the DPP-7 Printer as well as +5VDC at 20 watts average (8 Amps peak).

The DPP-7 is ruggedly built, using a simple, but sophisticated mechanical design which is optimized for heavy duty OEM applications. A proprietary printhead character coating allows the head to be conservatively rated at 3 million lines.

DATEL SYSTEMS, INC.

DIGITAL PANEL PRINTER/DPP-7

SPECIFICATIONS (Typical @ +25°C unless noted)

GENERAL

Number of columns: 7
Formats Available.

Type 1: ±.9.9.9.9.9.9
Type 2: .9.9±.9.9.9.9
Type 3: .9±.9.9.9.9.9

(See other formats in ordering guide. Hexadecimal printout is available but will not allow blanked columns)

Decimal digit format:
7-segment 0 to 9 digits .155″ (4 mm) high with 10° slant and selectable left decimal point.

Printing method:
Thick film thermal print head, black characters on white paper (using 3M Type 161 paper)

Printer paper:
1.75″ wide × 150 feet long, (44,5 mm × 45 m), 3M-type 161 thermal paper roll with the thermal surface facing away from the center of the roll.

Paper advance:
Via linear solenoid and one-direction rotary clutch. Paper tears off cleanly by lifting against the paper slot top edge.

PERFORMANCE:

Max. printing rate: 3 lines per second
Print and paper advance cycle: 330 milliseconds
Line spacing: 0.2 inch (5 mm)
Line density: 5 lines per inch
Line capacity per paper roll: approx. 9,000 lines
Minimum print head life: 3 million lines
Average print pulse on-time 25 mSec. (height varied by temperature feedback)

INPUTS

DTL/TTL compatible, selectable positive or negative true, level sensitive. TTLLS low power Schottky logic used on all inputs.

Logic Levels:

Positive true:	+2.0V≤"1"≤+5.0V 0V≤"0"≤+0.5V	Note TTLLS
Negative true:	0V≤"1"≤+0.5V +2.0V≤"0"≤+5.0V	logic levels

Note:Pullup resistors to +5V may be optionally removed on all inputs and outputs.

Data: (24 lines)
Full parallel BCD (1-2-4-8), selectable positive or negative true, 1 TTLLS load plus 10 K ohm pullup to +5V. May be used with Form A (normally open) or Form B (normally closed) switch closure inputs. Level sensitive (rise-time non-critical). Data is stored (see timing, pg. 8)

Change Data Polarity: (Pin C1-B11)
Selects input polarity of data, decimal points and ±sign simultaneously.
LOW = positive true coding
HIGH = negative true coding
6 TTLLS loads, pus 1 K ohm pullup to +5V, level sensitive

Print and Advance Command: (Pin C1-B14)
Level sensitive for Form A or Form B contact closure, selectable positive or negative true.
1 TTLLS load plus 10K ohm pullup to +5V.

Pulse Width: 1 microsecond to 200 mSec (data must be valid 1 μsec. after leading edge and 500 nSec. before the print command).

Maximum print command rate: 3 per second.

Paper advance automatically occurs after digit printing. Holding print command TRUE longer than the busy output is true (200 to 330 mSec, typ) causes continuous 3 lines/sec. printing.

Change Print Polarity: (Pin C1-B7)
HIGH = negative true coding
LOW = positive true coding
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive

Leading Zero Suppress: (Pin C1-B4) blanks all leading zero's to the left of decimal point except a zero just left of the decimal point
HIGH = Leading 0's blanked
LOW = full print (no suppression)
2 Low Power TTL loads, plus 10K ohm pullup to +5V, level sensitive.
Note: Will not suppress if any characters are blanks.

Minus Sign: (Pin C1-B1)
Selectable positive or negative true using data level select input.

1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

Plus Sign: (Pin C1-A5)
(Selectable positive or negative true using change data polarity input). (Minus sign must also be printed since it is used as the horizontal portion of the plus sign).

1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.
Note: Printing "plus" sign only results in vertical portion of plus sign. See above. Usable as 100% overrange digit.

Blanked Character:
Created by loading 1-1-1-1 in a given column. Can be hard-wired. Not available for hexadecimal models.

Decimal Points: (6 lines)
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive

(Selectable positive or negative true using change data polarity inputs).

No-Print Paper Advance: (Pin C1-A3)
Ground this line 70±5 mSec. to advance one line. Hold to ground for continuous advance at 6.7 lines per second.

1 TTLLS load plus 10K ohm pullup to +5V.

No Print Paper Advance:
May also be created by loading the illegal BCD character 1-1-1-1 in all decimal locations, and disabling all decimal points and ± signs, then initiating a print/advance command.

Test: (Pin C2-B6) (Not available on hexadecimal models)
LOW = ±.8.8.8.8.8.8 printout when print/advance command is given.
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

Change Busy Polarity: (Pin C1-A2)
HIGH = positive true busy out
LOW = negative true busy out
1 TTLLS load, plus 10K ohm pullup to +5V, level sensitive.

DIGITAL PANEL PRINTER/DPP-7

SPECIFICATIONS (CONTINUED)

OUTPUTS

DTL/TTL compatible

Positive true: 0V≤"0"≤+0.4V
+2.4V≤"1"≤+5.0V

Negative true: +2.4V≤"0"≤+5.0V
0V≤"1"≤+0.4V

Busy: (Pin C2-B12) (Open collector TTL 7438 with 1K ohm pullup to +5V)
Remains TRUE during print and advance cycle (approximately 200 to 330 milliseconds). Data inputs may be changed 500 nSec. after transition to TRUE. Next print command can be enabled when busy goes FALSE. Selectable positive or negative true. 10 TTL loads.

Out of Paper: (Pin C2-B4) see dwg. pg. 10
Switch opening via mechanical pawl when approx. 6′ (2m) of paper are left on roll.

TEMPERATURE RANGES

Operating: 0 to +40°C (to +50°C at derated speed)

Storage: −25°C to +85°C (Paper darkens above +60°C)

Active printhead temperature sensor is employed to maintain proper print head temperature at all ambient temperatures and during warmup.

POWER SUPPLY—DC VERSION

Model DPP-7D (+5V):
Voltage:
+5 ±.5VDC Printhead Section 10 Amps peak @ 10% to 100% duty cycle depending on line rate and printout. 5 to 20 mS 10 Amp pulses occur several times per second in standby. A regulated power supply is recommended, using 16 gauge wire or larger not to exceed 10 ft. (3m.)

Voltage:
+5 ±.25 VDC Logic Section 300 mA typical, logic spikes 50 mV max. Separate PC board connection.

Model DPP-7Y (+12V):
Voltage:
+12 (−2,+3) VDC @ 2 Amps avg., 10 A pk, several milliseconds during line advance.

Model DPP-7Z (+28V):
Voltage:
+28 ±3 VDC @ 700 mA avg., 3.5 A pk, several milliseconds during line advance.

Connections: Two recessed ¼″ spade terminals.

Fuses: ¼″ dia. × 1¼″ long, SLO-BLO (+5V) 10A, (+12V) 4A, (+28V) 2A

POWER SUPPLY—AC VERSION:

105-125 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

Optional:
205-240 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

Optional:
90-110 VAC, 47-440Hz @ 40 watts max (10 watts, typ standby)

AC Fuse: ¼″ × 1¼″ Buss MDL or equivalent ½ A, SLO-BLO, 115VAC, ¼A, SLO-BLO, 230VAC.

Note: Case is isolated from 5V ground and AC line. A separate spade terminal is included to ground case.

+5V, 200mA max. logic power out available with AC version.

Optional dual-winding 115/230 VAC model available (see ordering)

WEIGHT (WITH HOUSING AND FULL PAPER ROLL)

5 Volt Version:	2.3 lbs.	(1,1Kg)
AC Version:	4.2 lbs.	(1,9Kg)

DIMENSIONS

Front panel mounting cutout:
4.50″ WIDE × 2.72″ HIGH (115 mm × 69 mm)

Front panel Bezel dimensions:
5.25″ WIDE × 2.82″ HIGH (134 mm × 72 mm)

Depth behind front surface of mounting panel including clearance for rear PC connectors and fuses:

5V Version:	6.2″ (158 mm)
AC 12V, 28V Version:	8.7″ (221 mm)

ULTRA LOW POWER INCREMENTAL DIGITAL CASSETTE RECORDER SYSTEMS ICT-SERIES

TRANSPORT FEATURES

- Simple, reliable capstan/pinch roller stepping motor drive
- Ultra-low power (700 milliwatts while writing) using CMOS electronics
- True standby incremental performance starts writing within 20 milliseconds
- Choice of complementary NRZ or ANSI/ECMA/IOS phase-encoding formats
- High data capacity: Up to 2.2 million bits or 300 foot cassette

RECORDER SYSTEM FEATURES

- Accepts digitized analog, serial or parallel digital inputs
- Ideal for +12VDC battery portable digital data recorders
- ANSI/ECMA/ISO systems automatically record preamble, postamble, CRC, CR, NULL, LF ASCII characters
- Optional A/D converter, 16 channel analog multiplexer, sample/hold and channel sequencer available
- Reader Systems available to interface most computer terminals, RS-232-C CRT displays, modems and teleprinters (TTY)

DATEL
SYSTEMS, INC.
LOW POWER INCREMENTAL CASSETTE TRANSPORT
DATEL
SYSTEMS, INC.

INTRODUCTION

Datel presents its ICT-series digital incremental cassette tape transport systems. These unique data recorders and reader systems offer a new concept to the instrument designer—miniature, removable ultra-low power, digital data storage. Using a Philips data tape cassette, low power incremental stepping motor and CMOS electronics, these recorders are ideal for portable-battery-powered data collection instruments.

Datel's cassette systems form the nucleus of your data recorder. They complement your selection of input transducers, signal conditioners and your computer system. Inputs to the optional A/D converter analog section have been standardized to 5 and 10 Volt levels commonly available from many sensors.

Reader/interface systems which are separate from the data recorder provide several output forms (full parallel, TTY/RS-232-C ASCII, ½" mag. tape) to adapt to different computers and printout devices.

Datel also offers a new concept to the engineer or scientist interested in data recording with tape systems. The ICT series offers a simplified approach with circuit card modules which are specified in terms familiar to circuit designers who know digital logic. Data entry, retrieval and power-up, power-down considerations are simplified to the point of providing and accepting logic levels at the required times. For a complete system design, details of the transport's flux levels and motor drive are transparent to the designer, requiring only a knowledge of ultimate word size, bit rate and data capacity. Yet Datel's transport and individual card modules are fully specified so that customized systems may be created at any level from transports alone up to fully packaged systems.

With very fast power turn-on, the tape moves only when actually recording or creating a gap. At all other times when not recording data, the transport and power-multiplexed electronics remain turned off to save tape and batteries.

The fast turn-on, turn-off feature means that tape is up to writing speed within 10 milliseconds with no coasting when turned off. Data systems such as seismic recorders may be designed to record only when data is actually present, providing a very large data capacity per cassette. Hand-held stock inventory recorders move the tape only when keyboard data has been entered.

MODELS AVAILABLE

Datel offers these cassette recorders and companion readers as complete systems or as general purpose component modules for the widest range of applications. The basic ICT-series transports are available with a family of printed circuit cards, parallel-to-serial/formatter cards, A/D converter, multiplexer and sample/holds for analog inputs. Transport and PC cards may be purchased separately at any time to build complete customized low power digital recording systems.

APPLICATIONS

Complete Cassette Data Logging Systems from Datel are available to record up to 16 or 64 analog channels, both as user-mounted modular systems and as stand-alone, weather-proof automatic data acquisition/logging systems (refer to Datel Models LPS-16 and DL-2). Applications include oceanographic buoys and submersible probes, portable air and water quality environmental monitors, traffic and noise loggers, natural resources exploration, vehicular testing, seismic and geophysical measurements, RF field strength and transmission loggers, unmanned weather stations and biomedical loggers.

DIGITAL CASSETTE TRANSPORT SPECIFICATIONS

(Typical over −20°C to +70°C unless noted)

General

	Model ICT-WA Phase Encoded ANSI/ECMA/ISO Format	Model ICT-WZ Complementary NRZ Format
Recording Medium	Philips magnetic tape cassette, certified for digital operation by using a bit-error check for dropouts. The transport is designed to accept cassettes complying with ANSIX3, 48, ECMA-34 and ISO/DIS3407 specs.	
Number of Tracks	One half-width track	Two half-width tracks, recorded simultaneously
Recording Direction	Two directions by flipping cassette over	One direction only

Tape Motion

	Model ICT-WA	Model ICT-WZ
Motor	4-winding 24 pole, permanent magnet stepping motor	
Equivalent Tape Speed Range	Zero to 0.063 inches per second (1, 59 mm/sec)	Zero to 0.163 inches per second (4, 13 mm/sec)
Nominal Tape Speed	0.063 in./sec. (1, 59 mm/sec) at 100 steps/sec.	0.163 in./sec. (4, 13 mm/sec) at 100 steps/sec.
Bit Density	800 bits per inch (1600 FRPI) 32 bits per mm	615 bits per inch (615 FRPI) 24 bits per mm
Bit Cell Spacing	0.00125 inches per bit 0,0318 mm per bit	0.00163 inches per bit 0,0414 mm per bit
Bit Writing Rate	Zero to 50 bits/second, asynchronous	Zero to 100 bits/second, asynchronous

Stepping Motor Characteristics

	Model ICT-WA	Model ICT-WZ
Tape Drive Capstan Diameter	0.118 inches 3,0 mm	0.1246 inches 3,16 mm
Capstan Rotation Step Angle	0.6°	1.5°
Stepping Rate	Zero to 100 steps per second, asynchronous	Zero to 100 steps per second, asynchronous
Number of Stator Windings	4	
Winding Resistance	450 ohms per winding, ±20%	
Winding Inductance	335 millihenries per winding, ±20%	
Motor Steps per Bit Cell	2	1
Winding Voltage	±10V min. to ±24V max.	
Hub and Capstan Torques and Tape Tension	Suitable for cassettes within ANSI/ECMA/ISO specifications	

Tape Head Characteristics

Tape Saturation Current	5mA typ.
Suggested Write Current	7.5mA typ.
D.C. Resistance	50ohms ±20%
Effective Track Width	0.057 inches (1, 45 mm)
Nominal Space Between Tracks	0.035 inches (0,88 mm) (Tracks are symmetrically spaced)

*Data Characteristics Using Datel's Electronics & Cassettes

	ICT-WA	ICT-WZ
Recording Format	Single track full serial, externally clocked using 8-bit bytes phase-encoded per ANSI/ECMA/ISO standards	2-track serial complementary NRZ 1's on Track 1, 0's on Track 2
Connector Type	Dual-readout 44-pin PC edgeboard fingers (male) to connect to card cage. Mates to a Cinch #251-22-30-160 or Viking 2VH-22/IAN or Datel #ACC-2075060	
Error Rates (Typical)	3 Repeatable errors per cassette 1 Repeatable error in 5 cassettes	
Character Record Length	8-bit bytes	8, 10, 12, 14 or 16 bit characters or words
File or Block Length	Blocks consisting of 2 min. up to 256 max. usable data bytes per block	Files consisting of 1, 2, 4, 8, 16, 32 or 64 characters or words per block or any length
Gaps	0.8″ (20, 3mm) nominal noiseless gap written between each block. No gaps within blocks. One-half gap generated before each data block and the other half after the data block.	2-bit intercharacter, or inter-word gaps added before each character, 12-bit end-of-file gap written after each file.
Gap Stepping Rate	250 steps/sec.	100 steps/sec.
Time to Generate Full Gap Length	5.1 sec.	0.12 sec.
Power Consumption *(Transport & Tapehead only)*	700 mW typ. @ 100 steps/sec. (+12VDC @ 60 mA)	

*ICT-WA incremental idle time between bytes must not exceed 500 msec.

Data Capacity

(Assuming 64 8-bit characters per block or file, plus non-data characters and 282 feet (86 m) usable recording area)

	ICT-WA	ICT-WZ
Block or File Length including Controls and Gaps	1.48 inches (37, 6 mm)	1.06 inches (26, 9 mm)
Block or Files per Cassette	2260 blocks (recording one side)	3200 files
Bit Cells per Block or File (including Gaps and Control Characters)	1200	652
Times per Block or File (not including gaps)	11.2 seconds	6.4 seconds
Time to Fill a Cassette (continuous running at max. step rate)	10.2 hours per side	5.8 hours
Bit Writing Rate	50 bits/sec.	100 bits/sec.
Playback Speed, typical	250 bytes/sec. (2.5 ips) TI 733 ASR) or higher	1700 bits/sec. (LPR-16 Reader, 2.75 ips)
Time to Generate Full Gap Length	5.1 sec. @ 250* steps/sec.	0.12 sec.@ 100 steps/sec.

*2.55 second half-gap generated before and after each data block.

Physical (all models)

Weight	1.25 pounds (0,567 kilogram)
Dimensions	3.91″High × 4.5″ Wide × 4.2″ Deep (99,3 × 114, 3 × 106,7 mm)
Maximum Extension in Front of Mounting Panel (door closed) (door open)	1.40″ (35,6 mm) 2.26″ (57,4 mm)
Maximum Depth Behind Mounting Panel	1.94″ (49,3 mm) from panel front surface with card cage—5.59″ (142,0 mm) from panel front surface
Mounting Method**	Front insertion into a panel cutout, secured by (4) 4-40 bolts inserted from the rear into tapped Helicoil thread inserts, 0.187″ (4,76 mm) deep
Mounting Position	Horizontal or vertical. Recommended with cassette vertical, tapehead at top for easy cassette insertion.
Temperature Range (Operating)	+10°C to +45°C, −20°C to +70°C
Power Consumption (Auxiliary Cards and EOT/BOT Detector)	Phase Board, ANSI Formatter, Block Formatter, and Expander consume approximately 120 microwatts each (+12VDC @ 10 microamps). The EOT/BOT Lamp and detector consume 900 mW (+12VDC @ 75mA).
Relative Humidity	20% to 80%, non-condensing

**Shock or vibration must be negligible while recording

DATEL SYSTEMS, INC.

RECORDER SYSTEMS/ICT SERIES

ICT SERIES SELECTION GUIDE

The model numbering shown has been designed so that a user can select exactly the electronics configuration required by the application. Cost requirements and mounting considerations are an important point to consider when ordering. For example, most users will find the optional card cage ideal for mounting the drive and formatting electronics cards. However, these cards or the entire cage may be separately mounted if a user needs shorter front panel depth. This will require a user-fabricated cable for interconnection scheme; however the cards are small enough (3″ × 4″ × 76,2 × 101, 6 mm) to be self-supporting when mounted in a PC jack.

In particular, users selecting only the Write Step card ICT-WZ2A2Aor ICT-WA2A2A1A1 systems) may have the Write Step card attached directly to the transport without requiring the card cage. (Optional at extra cost, contact Datel.) (The WZ version is Model ICT-WZ1B2A-3942, $475).

SEQUENCE OF CARDS

In general, ICT systems should be selected by filling up the card cage from the transport on back. The mother-board writing on the bottom of the card cage assigns specific cards to particular cage card guides and connector slots. Cards further back from the transport will not work without all the preceding cards. One exception to this is that the ICT-WA Expander can be used without the Block Formatter if the user is willing to count bytes and terminate the block externally.

Users are encouraged to purchase as complete a system as required for the application. Choosing fewer cards or only the transport will generally require user design of electronics equivalent to these offered by Datel. The ICT electronics are proven designs with efficient packaging at reasonable costs. Datel's ICT electronics will save a designer who is not thoroughly familiar with tape electronics the circuit debugging time and expense required of an original design. This is particularly important as the card level approaches the cassette transport. Experienced users or those with custom format are, however, encouraged to purchase only the transport and optional write step card and proceed with their design.

SIMPLIFIED ICT-WA ANSI/ECMA/ISO MODEL SELECTION

Five system configurations should be considered by the user, ranging from transport only to a full system. These systems are summarized below. EOT/BOT is optional at $30.00 more and is required for full ANSI/ECMA/ISO compatibility.

Model Number	Description	Input Type	Price
ICT-WA1 (Transport System)	Transport Mechanism Only	Direct Inputs to writeheads and 4-phase motor windings	$325.00
ICT-WA1B2A1A1 (Unformatted Serial System)	Transport, Cage and Write Step Card	CMOS logic inputs, unformatted, full serial, single channel. The Write Step Card supplies 100 Hz shift clocks to externally shift in data.	$475.00
ICT-WA1B2B2A1 (Parallel ANSI System	Transport, Cage Write Step, Phase Board, and ANSI Formatter Cards	CMOS full parallel 8-bit bytes. User must code bytes and end block.	$745.00
ICT-WA1B2B2B1 (Formatted ANSI System)	Transport, Cage, and 4 cards through Block Formatter	CMOS full parallel 8-bit bytes. Automatic byte count and block termination.	$870.00
ICT-WA1B2B2B2 (5-Byte Parallel ANSI System)	Transport, Cage and 5 cards thru Expander	CMOS full parallel, (5) 8-bit Bytes (40 bit parallel.) Automatic byte count and block termination	$995.00
ICT-WA2A2A1A-3928	Transport with write step on standoffs	CMOS unformatted full serial. Write step supplies 100 Hz shift clocks.	$440.00

SIMPLIFIED ICT-WZ COMPLEMENTARY NRZ MODEL SELECTION

Four systems should be selected ranging from transport to full system.

Model Number	Description	Input Type	Price
ICT-WZ1 (Transport System)	Transport Mechanism Only	Direct Input to Write-head windings and 4-phase stepper motor windings.	$325.00
ICT-WZ1B2A (Unformatted Serial System)	Transport, Card Cage. Write Step Card	CMOS logic inputs, unformatted full serial. Write Step requires external write clock timing but codes write-head signals to complementary NRZ coding.	$540.00
ICT-WZ1B2A-3942	Transport less Cage, with Write Step mounted to transport by standoffs.	Same as above.	$475.00
ICT-WZ1B2B (16-Bit Parallel System)	Transport, Card Cage. Write Step and Formatter Cards.	Accepts full parallel or serial 8 to 16 bits CMOS data and formats in files of selectable word length. Parallel inputs are stored. Files are jumper-selected to any length.	$720.00

Contact Datel for optional analog input (A/D Converter) to the ICT-WZ system.

DATEL SYSTEMS, INC.

ASTER CATALOG —

rmerly O-T-S Catalog) The only na-
nal catalog designed exclusively
distributors and their customers
aturing electronic parts, instru-
nts and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

DIRECT SALES CATALOG

WELCOME . . .

To DIGITAL's Direct Sales Catalog. This is our 3rd edition. The success of the first two has proven that you, the specifiers and buyers of DIGITAL's products, find real value in the *Ultimate Unbundling* concept of our Direct Sales Catalog.

DIGITAL's order-by-mail approach to computer-related products saves you both time — and money. Time, because you can place your order straight from the catalog. You avoid the time consuming hassle of having to go through a third party, and the delays caused by not having literature at hand. Money, because you don't have the cost of warehousing OEM quantities.

How can DIGITAL offer these savings? From our position of leadership as a supplier of small- and medium-scale general purpose computers and peripherals, we have seen these products become simpler to use, reliable to operate, and easier to maintain. The sophisticated computer user is more than competent to buy, install, operate, and maintain them without extensive — and expensive — pre- and post-sales support. Prices, too, have dropped dramatically to the point with some products that it is uneconomical to sell them via traditional computer-industry channels. And, generally, the products are available off-the-shelf. The products are *ready* to be sold by mail. With sale-by-mail, our cost of sales/support is reduced. These significant savings are, in turn, passed on to you!

Why You Should Buy from this Catalog

Not everyone will, or should, buy through our catalog. But if you fall into any of the following categories, you undoubtedly will benefit by buying the Direct Sales Catalog way. You should look seriously at buying by mail. . . .

- If you are already a specifier of DIGITAL's equipment and are adding more units of a type with which you are already thoroughly familiar.
- If you have evaluated the products through traditional methods such as sales calls, training sessions, and field testing and are now ready to place follow-on orders for the same products.
- If you feel confident you can specify and install your own equipment and associated products.
- If your organization cannot earn DIGITAL's large-quantity or OEM discounts because of either overall insufficient quantities or unpredictable delivery scheduling.
- If you can abide by our Terms and Conditions (see pg. 113) and just want to save some money.

Buying by Mail is Easy

The catalog is designed to be easy to use and simple to order from. We have included detailed step-by-step instructions to assist you in placing an accurate, complete order. To simplify your task, we also have preprinted order forms available which you can use for order entry. Shipping Cost and Sales Tax Information Tables are included for your convenience. All this information is covered in the *How to Order* section starting on page 109.

NEW in this edition

Microcomputers:	*LSI-11, PDP-11/03*
Graphic Terminal:	*VT55 DECscope*
High-Speed Printer:	*LS120 DECwriter III*
More Interface Modules:	*For PDP-8, PDP-11*
Acoustic Coupler:	*DFO1*
Paper Tape Reader:	*PRSO1*
Buffered Send Receive:	*For DECwriter II*

If you have any questions, you can call our Direct Sales Catalog Desk toll free from 8:30 am to 5 pm EST. The number is 800-225-9480 (Mass. (617) 481-7400 x 6608).

For those of you who have used our previous editions, you will find this one interestingly different. More technical information. More product illustrations. And — most important — newly cataloged products such as the LSI-11 and PDP-11/03 Microcomputers, the VT55 DECscope with graphic capabilities, LS120 DECwriter III, plus many more Interface Modules.

Excellent Warranty Protection

Our warranty protection is unmatched in the industry, in terms of assured satisfaction with your purchase.

- You have a 10-day, no-cost, any-reason return period. You pay only for the return shipment.
- Plus a product warranty of 90 days. Return any defective unit prepaid and insured to a product repair center within this period and we will repair or replace it without charge if the damage or malfunction is due to DIGITAL's negligence. The repair centers are listed on page 115.

What About Price Protection?

Catalog prices will generally be honored by DIGITAL throughout the full period in which Catalog 1-77 is effective (through June 30, 1978). However, should it become necessary to revise prices on any products, you will be informed of these changes when we process your order. If you are using an out-of-date catalog, you should call the Catalog Sales Desk to check prices and product availability.

What are the Terms and Conditions?

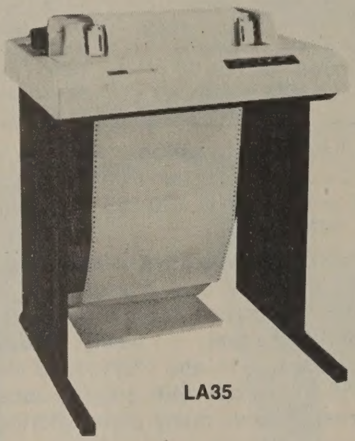
Catalog products are offered subject to the terms and conditions on page 113. (They are also printed on the back of our preprinted order forms.) Briefly, they contain provisions for a no-cost, 10-day acceptance period and a minimum of 90 days of factory warranty. If you are not completely satisfied with your purchase, ask DIGITAL within the 10-day acceptance period for a Return Authorization Shipping Number, then return the purchase prepaid and insured in its original shipping container to DIGITAL's warehouse. Your entire purchase price will be refunded.

The discount policy is up to 9 percent off list price for cash with the order; up to 5 percent for cash within 30 days for approved current Open Account Customers. See page 110 for our definition of an Open Account Customer.

We look forward to doing business with you and are standing by to process your orders quickly — and efficiently.

LA35 & LA36 DECWRITER II

PRINTER TERMINALS 30 CPS



LA35

LA36

- *Office-environment quietness.*
- *True 30-character-per-second printing throughput.*
- *Full 132-character line length.*
- *10 characters per inch standard. 16.5 optional. 6 lines per inch vertically.*
- *Upper and lower case printing plus numerics and symbols.*
- *ANSI typewriter keyboard on LA36. APL characters optional.*
- *Multipart forms up to 6 high.*
- *Form width variable from 3 to 14⅞".*
- *ASCII 128 character set (and keyboard on LA36).*
- *Optional numeric keypad, LA36 only.*
- *Asynchronous data transmission at switch selectable baud rates of 300, 150, and 110.*
- *20 mA current loop interface or EIA RS-232C.*
- *Full-duplex or half-duplex with local copy option.*
- *Buffer memory option for dynamic editing with store and forward capability on LA36.*

DECwriter II is a fast, small, quiet 300-baud interactive hard copy terminal. It functions as an economical, remote or local hard copy input/output device to a host computer. Priced competitively with comparable printer terminals, DECwriter II features improved throughput, reliability, print quality, and forms handling versatility. It is a true 30 characters per second printer — yet is so quiet that it can readily be used in an office environment. Measured exterior noise level is no more than 65 dB at 30 feet.

Two types of terminals are offered here: The LA36 Series which is a full send-receive terminal, and the LA35 Series which is a receive-only printer. Both terminals can accept multipart forms from 3 to 14⅞" wide.

An exciting new option that provides Buffered Send-Receive capabilities for LA36 is now available, see box on page 9. It provides the user local storage of data for editing before transmission, batching for highest-speed (300 baud) "burst" transmission, and storage for later transmission when line charges are lowest. This option can be added to all existing LA36 terminals.

DECwriter II achieves its 30 cps throughput by having a 16-character buffer storage receiving incoming data. This buffer stores characters during printing, carriage return, and line feed. When there is more than one character in the buffer, the terminal automatically switches to a 60 cps catch-up printing operation until all characters are printed. Thus DECwriter II makes full use of a 300-baud communications line.

The full ASCII complement of 96 upper and lower case letters, numbers, and symbol characters are printed by DECwriter II. However, the reduced 64-character ASCII subset can be accommodated by setting the CAPS LOCK key. This reduced set maps the lower case keyboard characters into their upper case equivalents so that only upper case characters are transmitted. The printout format is a full 132 character positions with 6-lines-per-inch vertical spacing. Horizontal character spacing is 10 per inch standard with option of having closer spacing of 16.5 per inch.

LA35 & LA36 DECWRITER II

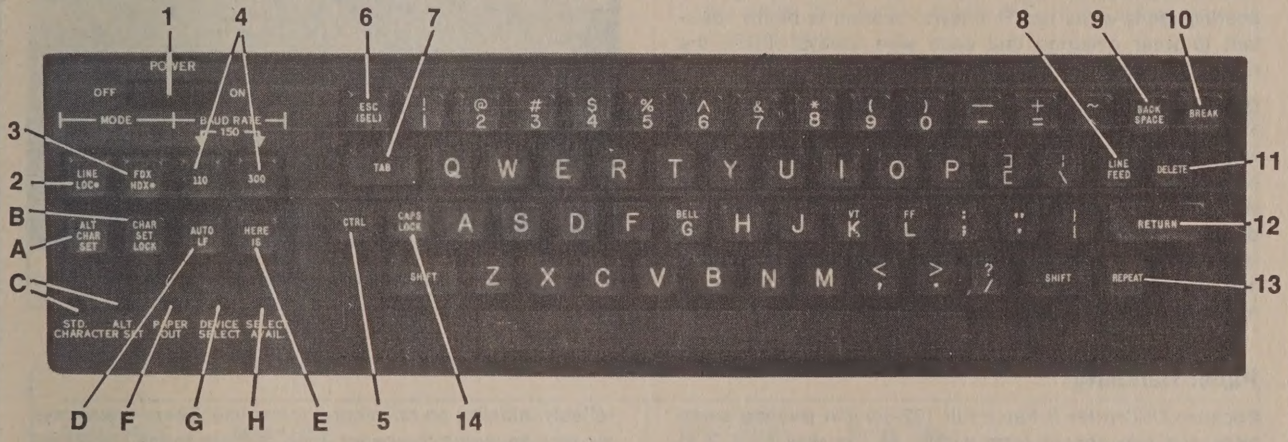
TYPEWRITER KEYBOARD — LA36

The keyboard of the LA36 Series is built to a universally accepted standard — the office typewriter (ANSI standard). The key layout, stroke, and touch are familiar to any typist. This means that training and familiarization time can be kept to a minimum, and maximum throughput can be achieved quickly. DECwriter II's keyboard is user-proven, having undergone vigorous testing since the fall of 1973.

Three-key rollover protection is incorporated in the design to eliminate multiple-keying errors. Up to three keys can be depressed at one time but the input will be correct if one of the first two keys struck is released before the third.

Switches adjacent to the keyboard allow the operator to power-up, select transmission rate, choose on-line or local operation, half- or full-duplex operation, and to activate optional features. In the local mode DECwriter II functions as a typewriting device allowing operators to add information to the printout.

An optional 14-key numeric keypad is available for those applications that require extensive numeric data entry. The keypad fits in the keyboard bezel to the right of the main keys.



STANDARD FEATURES — LA36 KEYBOARD

1. POWER-ON/OFF — Turns power on or off.
2. LINE/LOC — Connects the LA36 to the host computer (LINE) or, when depressed in the locked position, to itself (LOCAL).
3. FDX/HDX — Selects either full-duplex or half-duplex (when depressed, in the locked position) with local copy operation.
4. BAUD RATE — Selects clock frequency for transmission/reception at one of the following rates:

300 (normal)	30 characters/second at 10 bits/character
150	15 characters/second at 10 bits/character
110	10 characters/second at 11 bits/character

For 300 BAUD operation:
Depress and lock only the key labeled 300
For 110 BAUD operation:
Depress and lock only the key labeled 110
For 150 BAUD operation:
Depress and lock both keys

5. CTRL — In combination with other keys, causes some "control" (nonprinting) action to take place at the host computer. See Table I.
6. ESC(SEL) — Directs the host computer to treat the next received character as a command.
7. TAB — Directs the host computer to advance the print head the programmed number of spaces.
8. LINE FEED — Sends a line feed command in the data sent to the host computer.
9. BACK SPACE — Sends a BS code to the host computer. Moves the printed head one space to left in half-duplex mode.
10. BREAK — Causes reception of data from the host computer to be interrupted (in half-duplex operation).
11. DELETE — Transmits a DELETE code to host computer.
12. RETURN — Sends a carriage return command in the data sent to the host computer.
13. REPEAT — Repeats to the host computer any character being pressed simultaneously.
14. CAPS LOCK — Generates all upper-case characters plus numerals and eliminates lower-case alphas.

OPTIONAL FEATURES — LA36 KEYBOARD

A. ALT CHAR SET — When depressed and in the locked position selects the Alternate Character Set to be printed.

B. CHAR SET LOCK — When depressed in the locked position determines whether the operator or a remote device controls changes between ASCII and APL or other alternate character sets.

C. STD/ALT CHARACTER SET — These Light Emitting Diodes light to signify which character set has been selected. Either the one above STD or ALT will be illuminated.

D. AUTO LF — When depressed in the locked position AUTO LF inserts a local line feed after each carriage return whether typed locally or received from the host.

E. HERE IS — When depressed will send up to a 20 character message down the communication line.

F. PAPER OUT — Will light when the terminal is out of paper.

G. DEVICE SELECT — Will light when the terminal has been remotely selected to transmit. SELECT AVAIL will then be extinguished.

H. SELECT AVAIL — Will light when the terminal is available for remote selection.

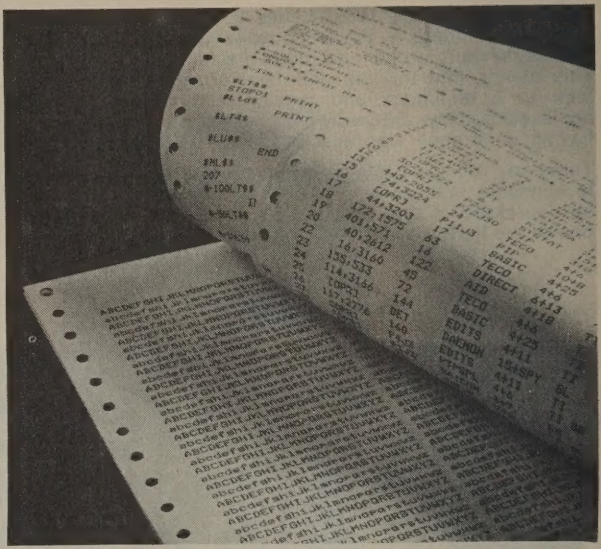
LA35 & LA36 DECWRITER II

Print Quality

The secret of DECwriter II's print quality is the design of the printhead. It comprises a 7 by 7 dot matrix which produces a far more legible image than the more conventional 5 by 5 matrix. The printhead wires are permanently lubricated and their curvature and support mechanism has been developed by computer simulation. The mechanism is protected by a massive heat sink. The results? Long life with minimal wear.

To ensure uniform density of the character impressions the motion of the printhead wires is controlled from a constant-current source. For absolute accuracy in both horizontal and vertical dot placement the printhead has a ruby sapphire bearing guide at its tip. This jewel bearing is highly resistant to wear ensuring that each wire always strikes the ribbon and paper at the proper location.

Dye-based ribbons per a DEC specification are used instead of carbon-based. These latter ribbons tend to unduly wear printhead wires which leads to poor character legibility. The ribbon feed system is also designed to eliminate smudging of the impressions. The ribbon is advanced only during carriage motion and is in fact directly driven by this motion. This eliminates a separate ribbon advance circuit and associated actuators. DECwriter II's mechanical ribbon rewind mechanism is also particularly trouble free.



DECwriter II prints easily read upper and lower case characters formed in a 7 by 7 dot matrix positioned precisely by a proprietary new carriage system.

Paper Handling

Because DECwriter II has a full 132-column printing capability and can accept form widths all the way from 3 to 14⅞″ — including 9½″ teleprinter forms — the same forms can be used on both line printers and keyboard printers, reducing inventory costs and headaches.

To accept different forms widths the right tractor moves horizontally. The left tractor can be adjusted to permit precise horizontal alignment on preprinted forms.

Six-part forms can easily be handled because of the tractor system for forms feeding. This system is the same as that found on high speed computer output line printers. Because a stepping motor drives the two pin-feed tractors the tractors reliably initialize on an integral forms line. There are always six pins engaging the paper, thus multiple forms are pulled with uniform tension without interleaf slippage and misregistration.

As an aid to the terminal operator the top of DECwriter II is beveled and the ribbon is positioned away from the paper. The printed characters are therefore easily visible. The printhead, too, moves four spaces to the right whenever there is a pause in printing lasting over 1,300 millisecs. The printhead returns to its operating position within 100 millisecs once printing commences. Other operator aids are detailed in the Options section.

Interface: Software

The DECwriter II will function with software handlers written for teletypewriters and other hard-copy terminals — in general. But it is important to review the exact interactive relationships in matching DECwriter II to the particular application. The following considerations are key to successful utilization:

1. **Transmission Mode** — Full-duplex or Half-duplex operation is possible. In the full-duplex mode the keyboard is logically separated from the printer. In half-duplex mode, the printer will copy all printable characters typed on the keyboard.
2. **Word Length** — 7-bit data words plus even or no parity. All outgoing characters are transmitted using even-parity protocol (a word is judged correct if it contains an even number of ones). Jumpers can be moved to provide no parity with parity bit marking, or parity bit spacing, and, alternately, odd parity protocol.
3. **Variable Baud Rates** — By switch selection on the terminal 110, 150, or 300 baud transmission rates are possible. Word length varies with the baud rate. At 110 baud, word length is 11 bits while at 150, and 300 it is 10 bits.
4. **Print Format** — Both upper case and lower case printout is possible. The CAPS LOCK feature also allows upper case only printout. Where forms fill-in is frequently called for options such as tab control and forms feed-length selection should be specified. Also if the terminal will be used in programming applications where APL is used, the optional dual ANSI/APL character set option should be specified. Further consideration should be given to the benefits of the compressed font option. This changes the horizontal spacing of the characters from 10 per inch to 16.5 characters per inch allowing the full 132 characters to be printed in only 8″ of space. Thus the printout can be on 8½″ wide paper for easy filing in standard cabinets.

LA35 & LA36 DECWRITER II

Interface: Software (Cont'd)

5. **Command Responses** — How DECwriter II reacts to commands from the host computer is an important consideration. Instructions such as line feed or carriage return cause movement of the printhead. Table II spells out the standard and optional codes in use. The host computer, too, must be programmed to respond to control commands from the keyboard. These are generated by striking the CTRL key followed by another key, see Table I.
6. **Optional Operational Controls** — Other interactive controls are optionally available. For example, a selective addressing option allows a transmitting device such as the host computer or another master terminal to select a single terminal, or a group of terminals, or all terminals on the same communications line to receive the transmitted data. A terminal, too, may identify itself to the network by application of the answerback option. Here on receipt of an ENQ or enquiry code the terminal transmits a 20 character identity. This same message is transmitted by the operator pressing the HERE IS key. An automatic line feed option allows the terminal to transmit both a carriage return signal and a line feed signal each time the carriage return button is depressed. And an automatic paper-out signal can be optionally generated.
7. **Buffered Send Receive** — A 4K, 8K, 12K, or 16K local memory and control option has recently been introduced for LA36. This buffer allows data to be stored prior to transmission.

TABLE I — CONTROL SIGNALS FROM KEYBOARD

(CTRL) (C)	Signifies that the end of text has been reached.
(CTRL) (B)	Signifies that all characters to follow are to be treated as text.
(CTRL) (BEL)	Signifies an alarm condition.
(CTRL) (Space, Y, Z, X, P, Q, S, F, U, V)	Special commands associated with Buffered Send-Receive Option.

TABLE II — COMMAND CODES FROM HOST COMPUTER

Character(s) and Octal Code(s)	Action Taken
BEL (007)	Sounds alarm bell.
BS (010)	Moves printhead back one space to left.
SI (017) and SO (016)	Part of ANSI/APL selection option. When code SI is received, character set to be printed shifts from ANSI to optional APL standard. SO code restores operation to normal.
LF (012)	Advances the paper upwards one line.
CR (015)	Moves printhead to left margin. Can also trigger an automatic LF command as an option.
SP (040)	Space Bar. Moves printhead one position to the right.
(041 to 176)	Prints all printable characters including numerics, punctuation symbols, upper case, and lower case alphas. Moves printhead one space to the right.
NUL (000) and DEL (177)	The terminal does not respond to these characters which are often used with slower electro-mechanical devices as fill or pad characters.
ESC 1 (033 061)	Part of the forms control option. This code sets a horizontal tab in any or all of the 132 character columns. Fill characters, or a time delay, required from host computer.
ESC 2 (033 062)	This code clears all horizontal tabs.
ESC 3 (033 063)	Part of forms control option. This code sets up to 84 vertical tabs. Host computer must provide time delay or fill characters.
ESC 4 (033 064)	This code clears all vertical tabs.
ENQ (005)	Activates answerback option resulting in transmission from terminal of up to 20 character terminal identity.
FF (014)	Part of form feed option. This code causes form to be advanced to top of next form.

Interface: Hardware

The keyboard version LA36 is normally configured for full-duplex operation with the standard 20 mA current loop interface. It can either be passive with the host computer providing the current source or, by a local wiring change, become an active device. In the half-duplex mode, transmission can take place only in one direction at a time. In this mode DECwriter II can also be either active or passive.

The optional EIA Standard RS232C interface is also available. Physically it comprises a customer installed cable and associated module. As a further option the EIA interface can be provided with modem control which includes auto answer, timed disconnect, and half/full duplex logic to provide both the LA35 and LA36 with half-duplex capability.

An integral acoustic coupler kit is an option. Two muffs are mounted on the rear of the terminal and accept a standard telephone handset.

Included are a carrier detector light and a new terminal cover to contain the muffs. The coupler can transmit full- or half-duplex serial, binary, asynchronous data at rates from 0 to 303 bits per second.

LA35 & LA36 DECWRITER II

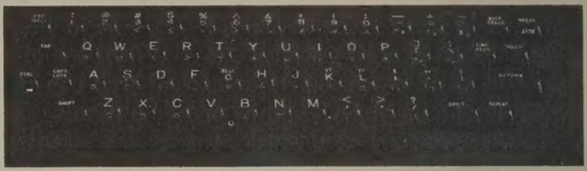
OPTIONS DESCRIPTION

All options described here are to be user installed.

Basic Mounting Kit for Options

Cat. No. LAXX-LB

This option provides the expansion logic and 6 mounting spaces to mount the DECwriter II communications and forms-handling options. This option also contains logic to automatically sense and activate new options as they are added to the DECwriter II.



Optional APL keyboard.

Character Set Options

Cat. No. LAXX-PK

This dual character option allows DECwriter II to be used as an ANSI/APL terminal. With this option installed, the DECwriter II has two character sets and selection of the desired set is possible via the receipt of Shift In (SI) and Shift Out (SO) ASCII control codes or via the ALT character set switch on the operator's control panel. The Character Set Lock switch is used to lock-out either manual control or host computer control of character set selection.

Paper Handling and Printout Options

Cat. No. LAXX-KV — Forms Feed Option

This option consists of a single-width, double-height module, a cable and a forms-control switch unit. The forms-length switch unit mounts inside the top cover on the printer mechanism side plate. It contains an 11-position switch to select the desired forms length and a reset button which, when depressed, defines the present paper position as top-of-form. The receipt of an FF character (can also be generated from the console panel in half-duplex or local mode) causes the form to be advanced to the next top-of-form.

NOTE: The host computer software must send fill characters or provide time delay to use this option.

Cat. No. LAXX-KY — Form Control Option

This option provides all of the features of the LAXX-KV, plus it provides horizontal and vertical tab capability. The horizontal tab uses ESC 1 to set a tab in any column (132 tabs maximum) and an ESC 2 to clear all horizontal tabs. The vertical tab uses ESC 3 to set up to 84 vertical tabs per form and ESC 4 to clear all vertical tabs.

NOTE: The host computer software must send fill characters or provide time delay to use this option.

Cat. No. LAXX-LZ — Paper Out Sensor

This option alerts the operator to a paper-out or paper-jam condition. An LED on the console panel will illuminate when a paper out has occurred. When using a 20mA interface, printing will stop and data will be discarded. When using the LAXX-KG EIA, interface, the ready line will be dropped and a forced disconnect will occur. Use of EIA with modem control allows the user a choice of actions on paper out. (See LAXX-LG)

Cat. No. LAXX-KJ — Compressed Font Option.

This option changes the horizontal spacing from 10 characters per inch to 16.5 characters per inch. This allows 132 columns to be printed in 8″ space. A 40% reduction in paper usage is achieved allowing 132 column reports to be filed in standard file cabinets.

Operator Assist Options

Cat. No. LA36-KK — 14 Key Numeric Pad Option

Comes with new keyboard bezel and cable.

Cat. No. LAXX-LA — Auto Line-Feed Option

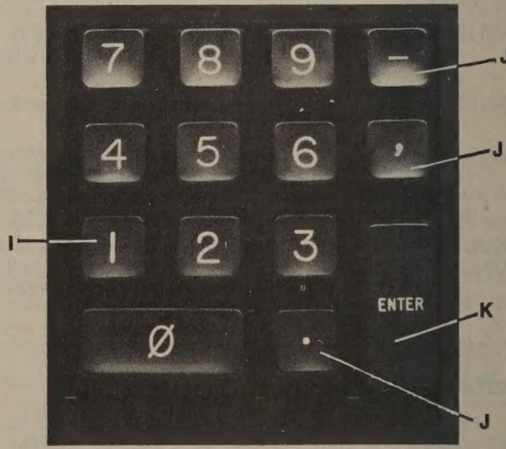
This option allows the operator to depress the auto LF pushbutton on the operator's control panel and in this state cause the DECwriter II to transmit a carriage return and line-feed character each time the carriage return button is depressed on the main keyboard. With the auto LF button up, the DECwriter II reverts back to normal mode of operation. The option also features, as an installer option, the ability to generate an LF automatically upon receipt of a carriage return code from the host computer.

Cat. No. LAXX-KX — Answerback & Auto Line Feed Option

This option provides all of the features of the LAXX-LA, plus a manual and automatic answerback capability. The answerback option allows transmission of a user-determined terminal identification message of up to 20 characters. This feature is activated upon receipt of an inquiry (ENQ) code or by the operator depressing the HERE IS button on the console. Message generation is accomplished by means of 20 7-bit DIP switches on the option board. These switches are easily changeable to alter the Answerback message.

Cat. No. LAXX-NE — Print Window

The Print Window is a clear plastic cover that mounts over the entire carriage system to provide both noise-free operation and protection of the print head and paper from foreign objects.



Optional Keypad Features for LA36

I 0 thru 9
Numerical keys aid in data input.

J . / , / –
Point, comma and minus sign are essential symbols for numeric data.

K ENTER
This instruction functions like CR and other "input data" signals.

LA35 & LA36 DECWRITER II

OPTIONS DESCRIPTION (Cont'd)

Cat. No. LAXX-LN — Print Window, Scale, Pointer

This option consists of the Print Window and three indicators: Column Scale, Line Indicator, and Column Pointer. The Column Scale is a 17.25″ long strip that is marked off in 132 divisions representing the possible column locations. The scale adheres to the bottom lip on the print window. The Line Indicator mounts on the print head and is used to establish two printing locations. One part indicates the baseline of the characters in a particular line. When setting up a form or rolling back to a previously printed line, this indicator is used to exactly align where the next character will print on the line. The other part of this indicator shows where the next character will print with respect to the column position. The Column Pointer is used in conjunction with the Column Scale to indicate the number of the column where the next character will be printed.

Communications Options

Cat. No. LAXX-KG — EIA Interface

This option provides an EIA RS232-C interface. A 9-foot cable with 25-pin data-set-type connector is also supplied.

Cat. No. LAXX-LG — EIA Interface & Modem Control

This option provides an EIA RS232-C interface for the DECwriter II. The option includes auto answer, timed disconnect and half/full duplex logic to provide earlier model DECwriters with half-duplex. A 9-foot cable with 25 pin data-set type connector is also supplied with this option. Straps are available on this option to send timed break (230 ms), 3000 ms long space, forced disconnect, or do nothing (stops printing, discards data) on a paper-out condition. Modem controls are also provided on this option for use with the Selective Address option.

Cat. No. LAXX-KW — Selective Address Option

This option allows the capability of operating in a selection control environment when connected to a multipoint Common Carrier Leased Private Line facility or an equivalent customer-provided communication network. It allows a transmitting device (CPU or controlling terminal) to act as a master and select a single terminal, a group of terminals, or all terminals on the same communications line to receive the transmitted data.

Each terminal connected to the line has the capacity of selecting itself as master once the previous master has relinquished the multi-party line.

Cat. No. LAXX-LM — Integral Acoustic Coupler Kit

The option provides coupling to phone lines with hardware mounted completely within the DECwriter. It comprises two muffs which are mounted to the rear of the terminal cover and are capable of accepting standard telephone handsets. Included with the option are a carrier detector light and a new terminal cover to contain the muffs. The coupler can transmit full- or half-duplex serial, binary, asynchronous data at rates from 0 to 303 bits per second. The coupler may also be set to transmit or ignore BREAK. Signals: Serial, binary, asynchronous 0 to 303 baud maximum transmission rate.

Transmit Frequencies:	Mark 1270 ±10Hz
	Space 1070 ±10Hz
Receive Frequencies:	Mark 2225 ±10Hz
	Space 2025 ±10Hz

BUFFERED SEND RECEIVE OPTION

NEW

Catalog Number — LAXX-NS, -NT, -NU, -NV

The LA36 DECwriter II can be equipped with a solid state buffer option which provides the user local storage of data for batch transmission at rates up to 300 baud. The electronic store and forward capability is an alternative to electromechanical automatic send and receive (ASR) devices using either magnetic or paper tape media. In addition, the electronic buffer's easy-to-use editing capability can minimize communication line charges.

In normal use, savings in line charges will pay for the buffer within four months.

The option consists of one microprocessor-based printed circuit board with an integral power supply and a mounting bracket. The entire assembly is mounted inside the LA36. This option is user installed. The terminal must have an EIA interface for this option.

Other features are:

- *Field installable in any DECwriter II.*
- *110, 150, or 300 baud rate transmission.*
- *Available with 4K, 8K, 12K, or 16K memory.*
- *Parity check on each character and parity selection.*
- *Stand-alone power supply.*
- *CONTROL code operation, see Table I.*
- *Line search capability.*
- *Margins selectable for 72, 80 or 132 characters.*
- *X ON, X OFF and restraint control.*

In the keyboard send/receive (KSR) mode, the LA36 communicates directly with the communication line; the buffer appears transparent. In the buffer mode, the LA36 communicates only with the buffer. The buffer can be set for any of the LA36 communications modes — full- or half-duplex at either 110, 150 or 300 baud.

When the buffer is turned on, by striking the CONTROL key and the SPACE key twice, it immediately asks the operator what line length is wanted. After selection of 72, 80, or 132 character length, the buffer accepts information as it is entered, on a line-by-line basis. If the operator wants to change a line, he enters a FIND command by striking the CONTROL and F keys. The LA36 prints FIND . . . and the operator types in up to 15 characters from the line he wishes to edit. The terminal then finds and prints that line. The operator can delete that line and, if desired, insert one or more lines in its place. The operator can then edit another line or add more material at the end of the text. While entering a line, the operator can use the DECwriter II's DELETE key to correct individual characters. The DELETE key backspaces the print head over the previous character and overstrikes it with a slash. When the correction is typed in, a line feed is generated so the correction may be printed on the following line. This allows the operator to read the corrected copy easily. (The correction is on the original line in the buffer.) Also, the operator can order the buffer to print its entire contents.

When the message is complete to the operator's satisfaction, it can be transmitted. Or, being compatible to X-ON, X-OFF protocol, the message can be remotely transmitted later in the day when line charges are lower. Control codes can be entered in the text by preceeding them with a CONTROL V command. This prevents them being treated as commands to the buffer. When the operator orders the buffer to be emptied, the buffer gives him a second chance, to prevent accidental erasure.

Electrical power for the buffer is provided by its own power supply which is included with the option. The option mounts conveniently within the LA36. Logically the buffer is in series between the LA36 Logic Module and the EIA interface (must be ordered if not present on existing installation).

LA35 & LA36 DECWRITER II

OPERATIONAL SPECIFICATIONS

Printout

Printing Speed: 30 char/sec throughput, serial asynchronous.

Number of Columns: 132.

Printing Characters: 96 or 64 switch selectable ASCII Character set. APL optional.

Control Characters: 32 ASCII Character set.

Keyboard Characters: 128 or 96 switch selectable. APL optional.

Type: Impact 7 by 7 dot matrix.

Character Size: 0.70 by 0.100″.

Vertical Spacing: 6 lines/inch.

Horizontal Spacing: 10 char/inch or 16.5 optional.

Carriage Return: 500 msec maximum.

Line Feed: 33 msec.

Slew Speed: 5 inches/second (30 lines/second).

Paper Handling

Tractor feed, 6 engaging pins, movable tractors for 3 to 14⅞″ forms, manual print gap adjustment for 1-6 part forms, vernier vertical and horizontal adjustment for custom preprinted forms.

Keyboard (LA36)

Standard ANSI typewriter-like layout, mechanical contact with four parallel switches of inlaid rolled gold. APL character designations optional.

COMMUNICATIONS

Rates

110 baud 11 bit, 150 and 300 baud 10 bit; switch selectable at keyboard panel.

Modes of Operation

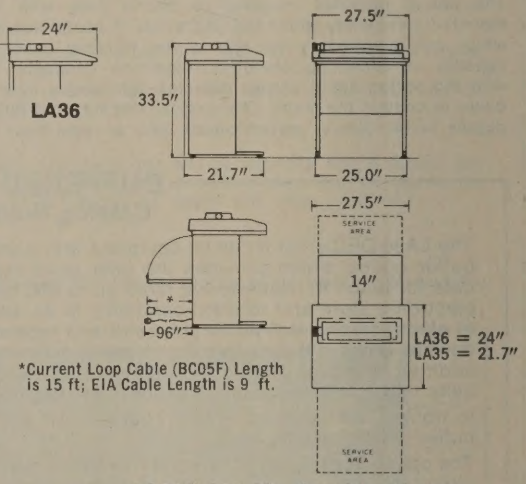
Local or full duplex on-line, switch selectable at keyboard panel.

Parity

No parity, eighth bit marking on transmit; odd or even parity, with or without parity error printout, jumper-selectable.

Interface

Integrated 20 mA current loop, full-duplex passive or active operation (jumper selectable). Connectors are 8 pin Mate-n-Lok™ type.



*Current Loop Cable (BC05F) Length is 15 ft; EIA Cable Length is 9 ft.

LA36/LA35 Site Considerations

MECHANICAL SPECIFICATIONS

Color: Off-white top with flat-black base.

Mounting: 1 free-standing unit.

Height: 33.2″ **Depth:** 24.0″

Width: 27.5″ **Weight:** 102 lbs.

Environment

Temperature: 10°C to 40°C (50°F to 104°F) operating. −40°C to 66°C (−40°F to 151°F) non operating.

Humidity: 10% to 90% (relative, noncondensing) operating. 5% to 95% (relative, noncondensing) nonoperating.

Noise: 65 db at 3 feet.

ELECTRICAL SPECIFICATIONS

Input Current: 115V ac (2A) 60 Hz or 230V ac 50 Hz. Power cord included with grounded plug for wall outlets. LA36 and LA35 are UL listed.

Heat Dissipation: 300 W printing; 160 W nonprinting.

SUPPLIES SPECIFICATIONS

Paper

Single-Part: 15-lb. paper minimum; 0.010″ card stock max.

Multi-Part: 2-6 part (no cards except last copy). Max. Thickness: 0.020″. All parts of multi-part forms must be identical in width.

Note: NCR or 3M paper, up to 6-part. Must use ribbon on top copy. First surface impact paper not recommended.

Continuous-feed, fan-fold business forms with 3- or 4-prong margin crimps on both margins (multi-part). Stapled forms are not recommended and may damage tractors and other areas of the machine. Dot or line glue margins acceptable.

Caution: Do not line glue both margins as air will not be able to escape and poor impressions will result.

Ribbon

Digital-specified nylon fabric, spool assembly 0.5″ wide by 40 yards.

™ Mate-n-Lok is a trademark of Amp, Inc.

LA36 MAINTENANCE MANUAL

A comprehensive manual for the do-it-yourselfer; provides installation, operation, theory, electrical and mechanical servicing information, engineering drawings, and an illustrated parts breakdown.

LA35 & LA36 DECWRITER II

SUPPLIES AND ACCESSORIES

Accessories

To complement DECwriter installations, a range of custom-tailored accessories is available either individually or in combination kits as follows:

Work Surface Shelf, LAXX-KC — Attaches to either left or right side of terminal. Dimensions: 24L by 15″W.

Wire Shelf, LAXX-KD — Attaches to back of terminal to collect printer paper. Dimensions: 10½L by 18W by 2″H.

Basket, LAXX-NC — Attaches to back of terminal to collect printer paper. It is deeper than the LAXX-KD wire shelf and holds up to one complete box of single or multipart forms. Dimensions: 12L by 16W by 13″H.

Casters, LAXX-KB — Attaches to back legs of terminals so they can easily be moved.

Vinyl Dust Cover, 12-12375 — Protects DECwriter II when not in use. Clear vinyl.

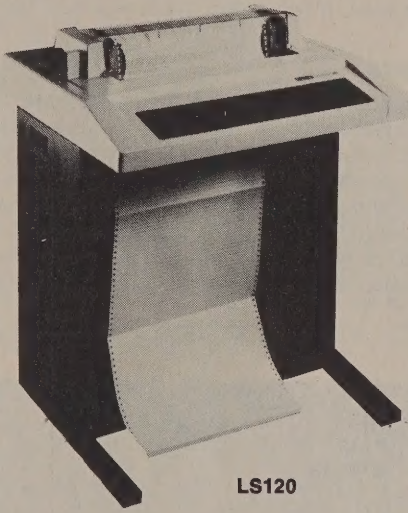
LS120 DECWRITER III

PRINTER TERMINALS, HIGH SPEED 180 CPS

Standard Features

- *180 cps printing.*
- *110, 300 or 1200 baud operation plus additional, operator-selectable rates of up to 4800 baud.*
- *Full- or half-duplex operation.*
- *X-ON, X-OFF (DC1, DC3) FDX protocol.*
- *ETX/EOT or reverse channel HDX protocol.*
- *RS232C interface.*
- *Paper-out switch.*
- *Switch-selectable automatic line feed.*
- *Selectable automatic new line.*
- *Auto-answer with time out protection.*
- *132-column printing; 10 characters per inch horizontal; 6 lines per inch vertical spacing.*
- *Fine vertical adjustment for forms alignment.*
- *128-character ASCII upper/lower case set.*
- *ANSI keyboard with multi-key rollover.*
- *Prints 6-part forms.*
- *Handles variable width forms (3 through 14⅞"W).*
- *Self-test mode.*
- *Print window.*
- *Adjustable left and right tractors.*
- *Switchable parity selection and parity error detection.*
- *7 by 7 dot matrix printing.*



LS120

Optional Features

- *Forms package, including length of form, top and bottom of form, horizontal and vertical tab (relative and absolute), left hand and right hand margin setting and direct positioning.*
- *User programmable 20 character Answerback option, which includes additional space for storage of user defined machine set-up parameters.*
- *APL alternate character set.*
- *Front Mounted Parity Switch for operator convenience.*
- *Compressed font (16.5 characters per inch).*
- *14-key numeric pad.*
- *300 baud integral acoustic coupler.*
- *Compatibility with DECwriter II standard accessories and suppiies.*

The LS120 DECwriter III is a low cost, interactive hard copy serial data communications terminal designed for operation at 1200 baud.

DECwriter III draws upon field-proven sub-assemblies used in other DIGITAL terminals. DECwriter III meets high standards of reliability, ease of maintenance and accuracy of DECwriter II and DECprinter.

A microprocessor-based options controller module provides flexibility in the DECwriter III, making it suitable for a wide range of applications. For example, the terminal can utilize half- and full-duplex as well as echoplex protocols. In addition to the terminal's basic 1200 baud rate, other rates from 110 to 4800 baud can be selected.

Further, DIGITAL offers a number of standard options for the machine, allowing the user to tailor terminals to each specific application.

The DECwriter III is equally at home in both communications and interactive computer console applications. Its 180 cps print speed, combined with its integral 1K character buffer provides highly efficient machine throughput. In addition, the DECwriter III incorporates a "smart" look ahead print capability which automatically returns the print head to the first *printing* position of each successive line. Its quiet operation makes it a suitable addition to any office environment.

Field-proven subassemblies used in both the LA36 DECwriter II and the LA180 DECprinter are incorporated in the DECwriter III. These include a 7 by 7 dot matrix print head, ANSI keyboard, logic circuitry and power circuitry. In addition, the DECwriter III contains a microprocessor-based options controller module for additional forms handling and communications capabilities. This module has been designed to allow for future buffered send/receive capabilities and editing features. The LS120 uses a 128-character upper- and lower-case ASCII character set. Optional character set ROMs enable the user to print non-standard characters.

LS120 DECWRITER III

Incoming Buffer Storage

The LS120 incorporates a 1K character FIFO buffer for temporary storage of incoming data. If data is received at a rate faster than DECwriter III can process and print it, the buffer will protect the data stream, against loss. If the buffer becomes full, the terminal can be switched to automatically issue an XOFF (DC3) command to the sending device to stop transmitting data. When the buffer has been emptied, the terminal will issue an XON (DC1) command for resumption of transmission.

Keyboard

The keyboard layout is an ANSI standard typewriter styled keyboard. An optional APL character set option can also be ordered. DECwriter III features a multi-key rollover keyboard, which prevents the operator out-typing the keyboard even at low baud rates. Each key activates a gold-inlaid multi-contact switch capable of generating more than 100 million characters without an error. The keyboard's "CAPS LOCK" key permits the operator to lock the alpha keys in upper case while leaving numerals and special symbols in lower case. Any operator hesitation longer than two seconds moves the print head four spaces to the right. This provides a clear view of the last character printed. Last character visibility can be overridden by the operator. An optional 14-key numeric pad is also available.

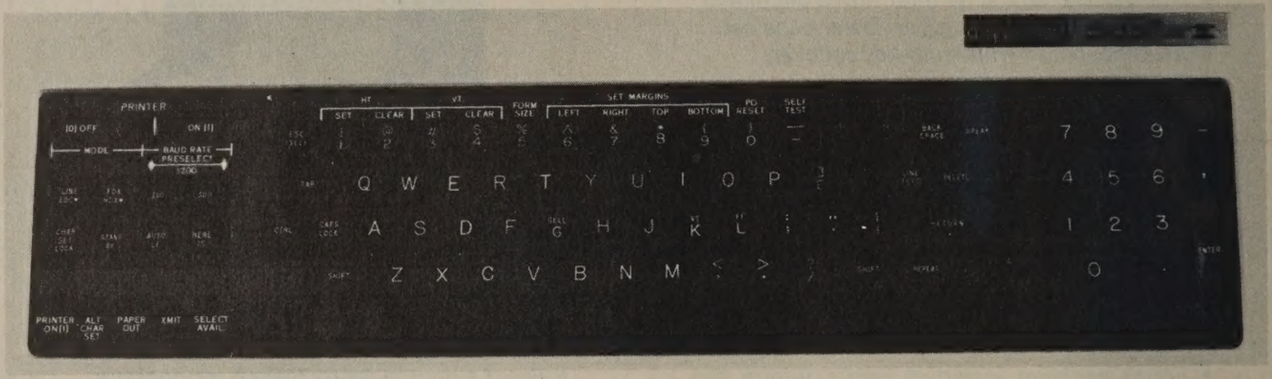


TABLE I — CONTROLS AND INDICATORS

PRINTER ON/OFF	This rocker switch applies or removes ac power to the machine electronics.
LINE/LOC	Connects the terminal to the host computer (LINE). When depressed, a disconnect is issued and the terminal can be used in off-line operations.
HDX/FDX	Selects either full-duplex or half-duplex (when depressed and locked) with local copy operation. (The echoplex feature can be defeated by the user.)
BAUD RATE	The two pushbuttons labeled 110 and 300 determine the line speed at which the DECwriter III sends or receives data. Depressing both buttons selects 1200 baud operation. When both buttons are in the up position, a user pre-determined rate of 2400, 4800 or a split rate of either 75/1200 or 150/1200, can be used.
AUTO LINE FEED	When this pushbutton is in the down position, carriage return and line feed are transmitted whenever the carriage return on the main keyboard is struck. When a carriage return is received from the communications line, a line feed can also be generated.
PRINTER ON INDICATOR	Indicates that ac power is being applied to machine electronics. This light will blink when power is ON, but the terminal is in a NOT READY condition.
ALT CHAR SET INDICATOR	Indicates that the alternate character set is being used, when installed.
PAPER OUT INDICATOR	Indicates that the terminal has run out of paper. This indicator will also come on when the LS120 cover is open.
XMIT INDICATOR	When ON, indicates that the terminal is transmit enabled.
SELECT AVAIL INDICATOR	Reserved for future use.
CHAR SET LOCK	Depression of this button locks the terminal into the selected standard or alternate character set.
STANDBY	Allows keyboard operation in LOCAL mode while holding the communication line.
HERE IS	This button functions only when the answerback option is installed. When pushed, it causes transmission of a user-determined identification message of up to 20 characters.

LS120 DECWRITER III

Print Head

DECwriter III's print head is based on the technology used in DIGITAL's DECprinter and DECwriter II. The wires are permanently lubricated for long life and resistance to wear by paper and ribbon. Wire curvature and support mechanism are designed by computer simulation for minimal wear and fatigue. The use of constant current solenoids and a ruby jewel head bearing insures precise character formation and uniform density of character impression. Field experience with over 60,000 units has proved this 7 by 7 dot matrix design to be extremely reliable.

Carriage System

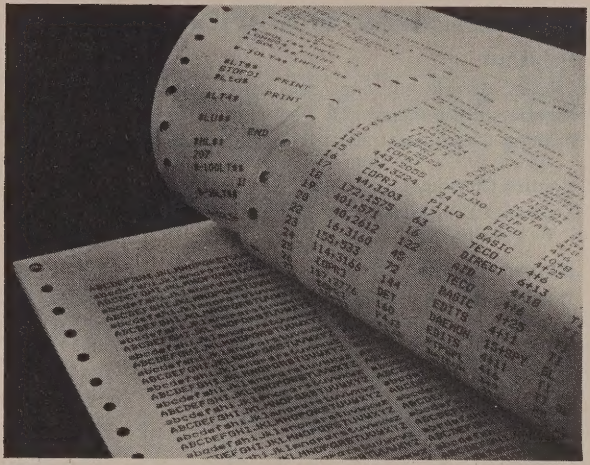
The carriage system smoothly and quietly transports the print head along the horizontal axis, providing accurate character positioning. A precisely adjustable print gap assures clean, clear impressions on a variety of forms sizes of up to six parts. The carriage is controlled by a servo system which assures accurate dot placement. The dc motor operates in the forward direction at up to 18″ per second, and has a maximum carriage return time of 275 milliseconds.

COMMUNICATIONS

The terminal supports half-duplex transmission with both coded character turnaround protocol and reserve channel protocol. For the character turnaround command, the operator may select between ETX or EOT. In addition, the LS120 provides operator-switchable local copy (echoplex) capability for systems where neither the processor nor the modem provides this function.

Many 300 and 1200 baud half- and full-duplex modems are compatible with the LS120. These include the Bell 103 and 202 Series, the Vadic 3400 and the Bell 212A.

The LS120 allows the user a choice of alternatives in the event of a paper out. One condition issues a short break, signaling the host to take appropriate action while holding the communication line. The other condition, for use in unattended operation, issues a DTR disconnect signal.



DECwriter II prints easily read upper and lower case characters formed in a 7 by 7 dot matrix positioned precisely by a proprietary new carriage system.

Parity selection is handled through switches on the options controller module. For operator convenience, an optional parity switch can be installed under the LS120 cover.

If a problem occurs on the system, the operator can utilize a self-test feature in local mode. This initiates a constant ripple pattern, which tells the operator whether the problem is in the terminal or in some other part of the system.

OPTIONS

Cat. No. LAXX-RF — Programmable Answerback Package

The optional answerback package for the DECwriter III features a user programmable 20 character answerback message. The answerback option utilizes a PROM that can be programmed by the user directly from the terminal's keyboard. In addition, separate PROM space is provided for the user to store machine set-up parameters.

Cat. No. LAXX-RB — Read Only Answerback Package

This option performs the same functions as the programmable option except it does not have the capability of blasting PROMS. Therefore, any PROM being used on this option must have been previously blasted on the programmable version.

Cat. No. LAXX-RA — Optional Forms Handling Package

A comprehensive option package for quick and easy handling of single- or multi-part forms can be added to the DECwriter III. Through simple keyboard commands, the operator can set all forms handling parameters. Also, by a direct positioning feature, the print head can be ordered to any horizontal or vertical print position with a single command. Tabbing can be accomplished through either absolute or relative addressing — providing a high degree of flexibility for the user.

Cat. No. LAXX-RC — APL Alternate Character Set

This dual character option allows DECwriter III to be used as an ANSI/APL terminal. With this option installed, the DECwriter III has two character sets and selection of the desired set is possible via receipt of Shift In (SI) and Shift Out (SO) ASCII control codes. Character Set Lock switch, located on the LS120 console panel, is used to either lock-out manual control or host computer control of character set selection.

Cat. No. LAXX-RM — 14 Key Numeric Pad Option

14 Key Numeric Pad Option comes with new keyboard bezel and cable.

Cat. No. LAXX-KJ — Compressed Font Option

This option changes the horizontal spacing from 10 characters per inch to 16.5 characters per inch. This allows 132 columns to be printed in 8″ space. A 40% reduction in paper usage is achieved allowing 132 column reports to be filed in standard file cabinets.

Cat. No. LAXX-LM — Integral Acoustic Coupler Kit

The 300 baud option provides coupling to phone lines with hardware mounted completely within the DECwriter. It comprises two muffs which are mounted to the rear of the terminal cover and are capable of accepting standard telephone handsets. Included with the option are a carrier detector light and a new terminal cover to contain the muffs. The coupler can transmit full- or half-duplex serial, binary, asynchronous data at rates from 0 to 303 bits per second. The coupler may also be set to transmit or ignore BREAK. Signals: Serial, binary, asynchronous 0 to 303 baud maximum transmission rate.

Transmit Freq: Mark 1270 ±10 Hz Space 1070 ±10 Hz
Receive Freq: Mark 2225 ±10 Hz Space 2025 ±10 Hz

Cat. No. LAXX-RN — 20 mA Current Loop Interface

This option provides a 20 mA interface. A 15′ cable is also supplied.

Cat. No. LAXX-RD — Operator Selectable Parity Switch

The option provides a rotary switch which is conveniently located under the LS120 cover. With this option installed, it is not necessary to change parity selection by means of access to the options controller module.

LS120 DECWRITER III

OPERATIONAL SPECIFICATIONS

Printout

Printing Speed: 180 char/sec, serial asynchronous.

Number of Columns: 132

Printing Characters: 96 or 64, switch selectable ASCII Character set. APL optional.

Control Characters: 32 ASCII Character set.

Keyboard Characters: 128 or 96 switch selectable. APL optional.

Type: Impact 7 by 7 dot matrix.

Character Size: 0.75 by 0.100″

Vertical Spacing: 6 lines/inch.

Horizontal Spacing: 10 char/inch or 16.5 char/inch optional.

Carriage Return: 275 msec maximum.

Slew Speed: 7½ inches/second (45 lines/second).

Paper Handling

Tractor feed, 6 engaging pins, movable tractors for 3 to 14⅞″ forms, manual print gap adjustment for 1-6 part forms, vernier vertical and horizontal adjustment for custom preprinted forms.

Keyboard

Standard ANSI typewriter-like layout, mechanical contact with four parallel switches of inlaid rolled gold. APL character designations optional.

COMMUNICATIONS

Rates

110 baud, 11 bit; 300 baud and higher, 10 bits. Four switch selectable rates from console panel: 110, 300, and 1200 are standard user-determined. Fourth rate of 2400, 4800, or a split rate of either 75/1200 or 150/1200, can be used.

Interface

EIA RS232C. Supplied with 9 foot cable and terminated in a standard 25 pin EIA connector. An optional 20 mA current loop interface is also available.

Modes of Operation

Full-duplex, half-duplex, and echoplex modes on-line; or LOCAL switch selectable at keyboard panel. SWITCH SELECTABLE STANDBY MODE places LS120 keyboard into a LOCAL mode while the printer remains ON-LINE.

Parity: Input and output parity ODD, EVEN, and NO parity, bit 8 marking, or NO parity with bit 8 spacing are switchable choices. An output character with improper parity will force a substitute character to be printed.

MECHANICAL SPECIFICATIONS

Color: Off-white top with flat-black base.

Mounting: 1 free-standing unit.

Height: 33.5″

Width: 27.5″

Depth: 24″

Weight: 107 lbs.

Environment

Temp: 10°C to 40°C (50°F to 104°F) operating.
−40°C to 66°C (−40°F to 151°F) nonoperating.

Humidity: 10% to 90% (relative, noncondensing) operating.
5% to 95% (relative, noncondensing) nonoperat.

Noise: 65 dB printing at 3 feet.

ELECTRICAL SPECIFICATIONS

90-132V ac or 180-264V ac, user-selectable; 50 or 60 Hz ±1 Hz. Included w/grounded plug for wall outlets. UL listed.

Heat Dissipation:
400W printing; 100W nonprinting.

SUPPLIES SPECIFICATIONS

Paper

Single-Part: 15 lb. paper min; 0.010″ card stock max.

Multi-Part: 2-6 part (no cards except last copy). Max. thickness 0.020″.

All parts of multi-part forms must be identical in width.

Note

NCR or 3M paper, up to 6-part. Must use ribbon on top copy. First surface impact paper not recommended.

Continuous-feed, fan-fold business forms with 3- or 4-prong margin crimps on both margins (multi-part). Stapled forms are not recommended and may damage tractors and other areas of the machine. Dot or line glue margins acceptable.

Caution

Do not line glue both margins as air will not be able to escape and poor impressions will result.

Ribbon

SUPPLIES AND ACCESSORIES

Accessories

To complement DECwriter III installations, a range of custom tailored accessories are available either individually or in combination kits as follows:

Work Surface Shelf, LAXX-KC — Attaches to either left or right side of terminal. Dimensions: 24L by 15″W.

Wire Shelf, LAXX-KD — Attaches to back of terminal to collect printer paper. Dimensions: 10½L by 10W by 2″H.

Basket, LAXX-NC — Attaches to back of terminal to collect printer paper. It is deeper than the LAXX-KD wire shelf and holds up to one complete box of single or multi-part forms. Dimensions: 12L by 16W by 13″H.

Casters, LAXX-KB — Attaches to back legs of terminals so they can easily be moved.

Vinyl Dust Cover, 12-12375 — Protects DECwriter III when not in use. Clear vinyl.

LA180 DECPRINTER I

HIGH SPEED PRINTER 180 CPS

Features:

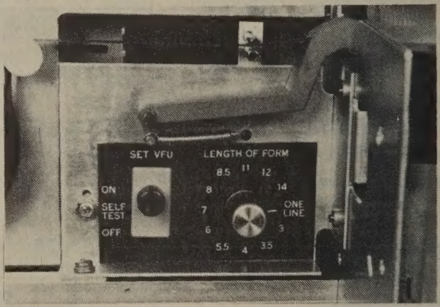
- *180 characters per second.*
- *Parallel interface.*
- *Accommodates 6-part form (0.20 max. thickness).*
- *Handles variable-width forms, 3 through 14⅞"W.*
- *132-column print; 10-characters-per-inch horizontal spacing, 16.5-per-inch optional.*
- *6-lines-per-inch vertical spacing.*
- *128-character ASCII upper/lower case set with control codes and symbols.*
- *7 by 7 dot matrix.*
- *Backspace capability.*
- *Quiet operation.*
- *Excellent character readability.*
- *Fine vertical adjustment for accurate forms placement.*
- *Paper-out switch.*
- *Paper-out override.*
- *Switch-selectable forms length (11 lengths).*
- *Drives 100' cable.*
- *Self test capability.*

DECprinter

High-speed line printer **LA180** has a handsome styling to blend in with office or computer room decor.

The LA180 DECprinter I is a 180-character-per-second, 132-column hard-copy printer. Utilizing a 7 by 7 dot matrix printing technique and a field-proven printhead, the LA180 provides highly legible and reliable printing of the full 128-character ASCII upper and lower case set. Each LA180 is equipped with a standard parallel interface; however, the unit may also be utilized as a serial device by the addition of one of the optional serial line interface kits.

Forms flexibility is provided by the LA180's ability to accommodate up to six-part forms and handles variable width forms from 3 to 14⅞" wide. Forms length is switch settable, see figure, in eleven lengths, from one line to 14", with fine vertical tractor release adjustment for precise location of printing.



Paper feed is tractor-driven by a stepping motor. The tractor design provides four pin paper engagement of the form on a flat bed, ensuring control and positive feeding of multi-part forms. A paper-out sensor and switch is provided as a standard feature.

TABLE I — OPERATOR CONTROLS

POWER ON-OFF	Applies and removes ac power to entire machine.
ON-LINE/OFF-LINE	Enables or disables communications.
HEAD OF FORM	Feeds form to the next top-of-form or single-line, if forms switch is set in single-line position and ON-LINE/OFF-LINE switch is in OFF-LINE position. If the paper-out indicator is set, printing can be continued to the next top-of-form by pressing the Head-of-Form button for each line or holding button in until Head-of-Form is reached.
LENGTH OF FORM (ROTARY SWITCH)	Selects any of 11 form lengths.
SET VFU	Used in conjunction with the Length-of-Form switch to reset forms length.
SELF TEST	Will run a ripple test pattern locally if set in test position with machine in on-line mode.
FORMS THICKNESS ADJUSTMENT	Located on right side of printhead carriage; selects proper gap for 1-through-6-part form. Approximately 1 click for each part.
RIGHT AND LEFT TRACTOR ADJUSTMENT	Thumb screw may be loosened to allow tractor movement for various form widths.
FINE VERTICAL TRACTOR RELEASE	Line-feed knob may be depressed inward and rotated in the appropriate direction for precise location of printing with respect to vertical zones.

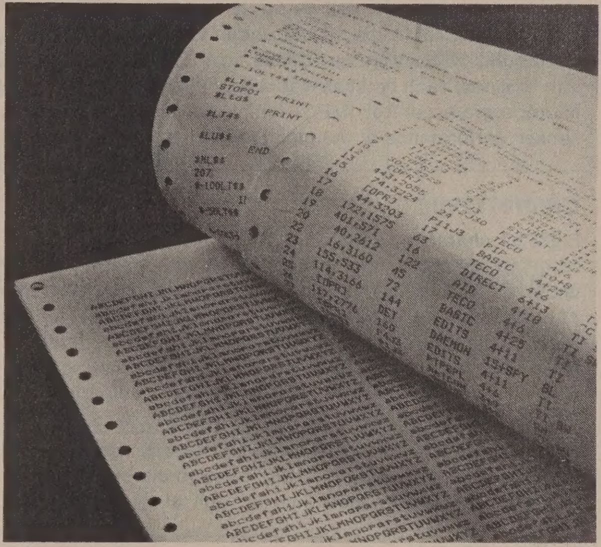
LA180 DECPRINTER I

Print Quality

The secret of LA180's print quality, see figure, is the design of the printhead. It comprises a 7 by 7 dot matrix which produces a far more legible image than the more conventional 5 by 5 matrix. The printhead wires are permanently lubricated and their curvature and support mechanism has been developed by computer simulation. The mechanism is protected by a massive heat sink. The results? Long life and minimal wear by paper or ribbon.

To ensure uniform density of the character impressions, the motion of the printhead wires is controlled from a constant-current source. For absolute accuracy in both horizontal and vertical dot placement, the printhead has a ruby sapphire bearing guide at its tip. This jewel bearing is highly resistant to wear, ensuring that each wire always strikes the ribbon and paper at the proper location. LA180's printhead has a rated life of 100 million characters.

Dye-based ribbons per a DIGITAL specification are used instead of carbon-based. These latter ribbons tend to unduly wear printhead wires which leads to poor character legibility. The ribbon feed system is also designed to eliminate smudging the impressions. The ribbon is advanced only during carriage motion and is in fact directly driven by this motion. This eliminates a separate ribbon advance circuit and associated actuators.



DECwriter II prints easily read upper and lower case characters formed in a 7 by 7 dot matrix positioned precisely by a proprietary new carriage system.

Paper Handling

Because DECprinter I has a full 132-column printing capability and can accept form widths all the way from 3 to 14⅞″ — even 9½″ teleprinter forms — the same forms can be used on both line printers and keyboard printers.

Six-part forms can easily be handled because of the tractor system for forms feeding. A stepping motor drives two pin-feed tractors. Thus the tractors reliably initialize on an integral forms line. There are always six pins engaging the paper; therefore, multiple forms are pulled with uniform tension without interleaf slippage and misregistration.

To accept different forms widths, the right tractor moves horizontally. The left tractor can be adjusted to permit precise horizontal alignment on pre-printed forms.

Character Set and Code

The full, 96-character, upper- and lower-case set is standard with the LA180. Data is interpreted in a read-only memory (ROM). Changing the ROM enables the user to print non-standard characters. The standard ASCII set, shown in Table II, consists of 10 numerics, 26 upper-case alphas, 26 lower-case alphas, and 34 special characters, including DELETE, a nonprinting, nonspacing control code. The total character and control code count is 128.

?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400x6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

As an aid to the terminal operator, the top of LA180 is beveled and the ribbon is positioned away from the paper. The printed characters are therefore easily visible. The printhead, too, moves four spaces to the right whenever there is a pause in printing lasting over 1300 milliseconds. The printhead returns to its operating position within 100 milliseconds.

A compressed font option is available. This option changes the horizontal spacing from 10 characters per inch to 16.5 characters per inch. This allows 132 columns to be printed in 8″ space. A 40% reduction in paper usage is achieved allowing 132-column reports to be filed in standard file cabinets. This option, once installed, must be removed if 132-column printing is again required.

TABLE II — COMMAND CODES FROM HOST COMPUTER

Character(s) and Octal Code(s)	Action
BEL (007)	Sounds audible tone. A separate tone is sounded for each of up to eight BEL codes in succession.
BS (010)	Moves printhead one space to left.
LF (012)	Prints content of line buffer, returns printhead to left margin, and advances paper one line.
FF (014)	Advances paper to top of next form (FORM FEED).
CR (015)	Moves printhead to left margin.
SP (040)	Stores "space character" in memory.
(041 to 177)	All printable characters. Received and stored in memory prior to printing.
DEL (177)	Clears memory.

LA180 DECPRINTER I

Microprogram Control

Functions once performed by printers under hardware control are handled in the LA180 under the control of a 512-instruction microprogram. These instructions are divided into routines, each dedicated to a specific machine function. Microprogram control (MPC) initiates a machine function, senses performance of the function, and, based on that performance, determines which routine is to be performed next. Because the LA180 allows the user to monitor machine functions and operator controls, he can design his software to modify specific routines and to change the printer's responses as desired to meet changing operational requirements.

Control Logic

Eight-bit characters reach the LA180 from the user's interface and are processed through the single-character buffer under MPC, loading the character-buffer RAM with a line of data. From the RAM, characters are presented on a FIFO basis to the character-generator ROM, which generates the firing matrix through which the print head forms the printable characters. The ROM also contains decoding information for the nonprintable command characters.

The carriage servo and printhead subsystems are activated under MPC to move the printhead through the character cell and print the commanded dots in each of the seven rows.

A CR (carriage return) character causes the MPC to move the printhead to the left margin. A BS (back space) character causes the MPC to move the printhead one column to the left. An LF (line feed) character causes the MPC to activate the stepper motor drive and advance the paper one line. An FF (form feed) character advances the paper to the top of the next form.

DECprinter is shipped with no parity. The user can select even parity or odd parity, with parity error printout, by changing jumpers.

Interfacing

LA180 is generally connected via a local parallel interface to the host computer. Buffered serial interfaces (LAXX-NW for EIA RS232C and LAXX-NX for 20 mA current loop interconnection) are optionally available. They mount directly into LA180 and come complete with interface cabling. The standard parallel interface requires a BC11S-XX cable that plugs into a 40-pin Berg connector on the LA180 logic module. (Interface cable not supplied with terminal.) The cable can be any length up to 100 feet. The interface pin assignments for the host computer are shown in Table III. The diagram associated with Table II shows the recommended drivers and receivers for maximum noise rejection.

TABLE III — INTERFACE CONNECTOR PIN ASSIGNMENTS

Pin No.	Signal	Pin No.	Signal
A	Data Strobe	KK	+5V dc*
M	Data 1	B	Data Strobe Ret
K	Data 2	N	Data 1 Ret

OPERATIONAL SPECIFICATIONS

Printing Speed: 180 characters/second.

Number of Columns: 132

Printing Characters: 96-character ASCII set.

Control Characters: 32

Printing

Type: Impact, 7 by 7 dot matrix.

Vertical Spacing: 6 lines/inch.

Horizontal Spacing: 10 characters/inch; 16.5 per inch opt.

Single Line Skip: 32 ms

Slew Speed: 7.5″/second; 45 lines/second.

Carriage Return Time: 275 ms max.

Communications

Parallel transfer standard. Optional serial buffered EIA RS232C or 20 mA current loop.

MECHANICAL SPECIFICATIONS

Mounting: 1 free-standing unit.

Size: 33.2H by 27.5W by 20.0″D

Weight: 102 lbs. approximate.

Color: Off-white top with flat black base.

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature: 10°C to 40°C (50°F to 104°F)

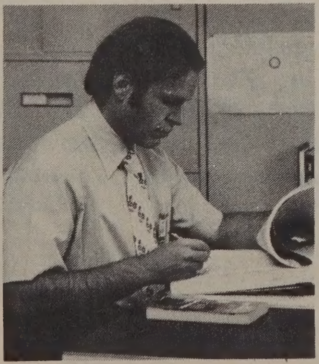
Relative Humidity: 10% to 90% noncondensing; maximum wet bulb 29°C.

Noise: 65 dB at 3 feet.

ELECTRICAL SPECIFICATIONS

Input Voltage and Frequency:
LA180-PA — 115V ac 60 Hz
LA180-PD — 230V ac 50 Hz

Heat Dissipation: 400W printing, 100W nonprinting.



?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400 x 6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

LA180 DECPRINTER I

SUPPLIES SPECIFICATIONS

Paper

Single-Part: 15-lb. paper min.; 0.010″ card stock max.

Multi-Part:
2-6 part (no cards except last copy). Max. thick. 0.020″. All parts of multi-part must be identical in width.

Note
NCR or 3M paper, up to 6-part, must use ribbon on top copy. First surface impact paper not recommended.

Continuous-feed, fan-fold business forms with 3- or 4-prong margin crimps on both margins (multi-part). Stapled forms are not recommended and may damage tractors and other areas of the machine. Dot or line glue margins acceptable.

Caution
Do not line glue both margins as air will not be able to escape and poor impressions will result.

Ribbon

Digital-specified nylon fabric, spool assembly 0.5″ wide by 60 yards.

SUPPLIES AND ACCESSORIES

To complement the installation, a range of custom tailored accessories is available either individually or in combination kits. A set of casters for the back legs allows the printer to be conveniently moved. To catch the printer paper, a wire frame paper basket is available. It attaches to the back of the printer, see illustration. Printer paper, multi-part forms, and ribbons are listed in the ordering information.

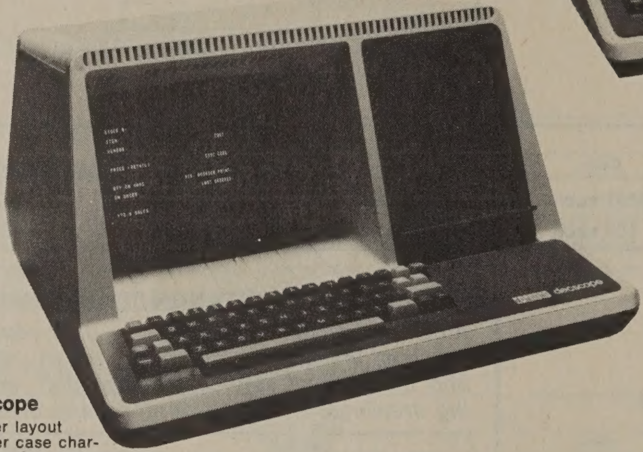
VT50/ VT52 DECSCOPE

VIDEO TERMINALS

VT52 DECscope has more features than the VT50: Keypad at right, upper and lower case alphabet, and advanced cursor control. Screen display capacity is 1920 characters (24 lines of 80 characters).



VT50 DECscope has a typewriter layout keyboard, upper case character display, and a screen-display capability of 960 characters (12 lines of 80 characters).

Features:

- *Price-competitive with teletypewriters.*
- *1920- or 960-character screen with twenty-four or twelve lines of 80 characters.*
- *Highly reliable keyboard featuring typewriter layout.*
- *Numeric function keyboard, VT52 only.*
- *Asynchronous data communication at individually switch-selected transmit and receive baud rates from 75 to 9600 baud.*
- *ASCII code utilized, plus additional commands through escape sequences.*
- *Extensive cursor controls.*
- *Horizontal tabs.*
- *Exclusive hold-screen mode prevents data loss regardless of host computer transmitting speed.*
- *Easy interfacing with 20-mA current loop or RS232C levels.*
- *Keystroke click for rhythmic typing.*
- *Three-key rollover protection.*
- *Full-duplex and full-duplex-with-local-copy modes.*
- *Printer interface option, VT52 only.*

DECscope is a character-oriented video terminal designed to replace electromechanical devices. Intended for asynchronous data communication systems, DECscope is compatible with most popular computers. DECscope is simple for operators to master, and noiseless for locations requiring silence. DECscope can reduce the high costs, both obvious and subtle, of teletypewriters and other video data terminals.

The savings in operating costs are most meaningful. DECscope has a high throughput compared to teletypewriter devices. High reliability is the key to improved throughput. Electromechanical maintenance is eliminated, and electronic maintenance is minimal. DECscope costs less to keep running, and it keeps running longer.

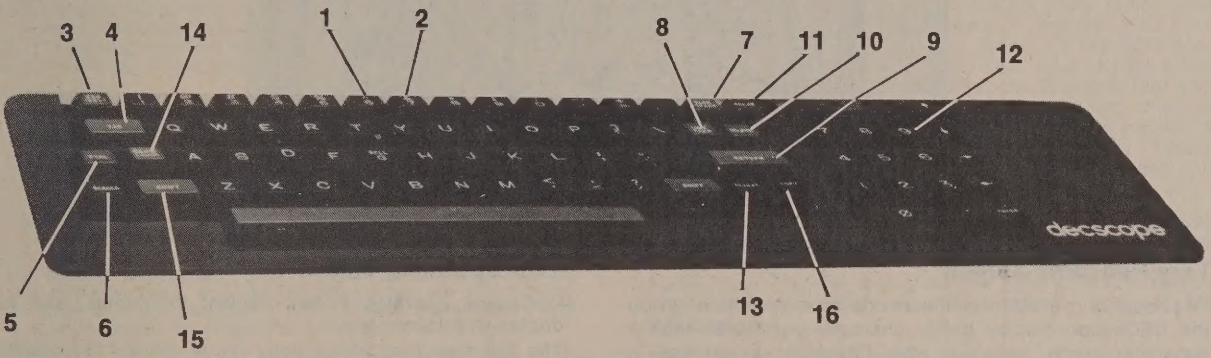
VT50/ VT52 DECSCOPE

TYPEWRITER KEYBOARD

The keyboard is built to a universally accepted standard, the office typewriter (ANSI standard). DECscope's key layout, stroke, and touch are familiar to any typist. See keyboard close-up illustration. Training and familiarization time can be kept to a minimum without sacrificing operating accuracy and speed.

In hospital and other sensitive locations, DECscope can operate in absolute silence. When silence is not required, operator can turn on an audible-response switch to produce a key-stroke click that encourages rhythmic, high-throughput keying, without the annoying noise of a teletypewriter.

DECscope also increases the operator's speed with three-key rollover protection to eliminate multiple-keying errors. Up to three keys can be depressed yet transmission will be correct if one of the first two keys typed is released before the third.



KEY AND CONTROL LOCATIONS AND FUNCTIONS

1. Labels can be placed here to identify 10 user-defined escape sequences called up by individual keys.
2. Ribbed lines cast in cabinet associate displayed escape sequence names with keys selecting them.
3. ESC (SEL) — Transmits the character ESC (escape) which, when received by the terminal from the host, introduces an escape sequence. If the terminal is in the local-copy mode or the host software echoes ESC back to the terminal, the ESC key initiates escape mode, indicating that the next character received is to be interpreted as a command rather than a character. Many software systems also assign a special meaning to the ESC character.
4. TAB — Moves cursor to the next tab stop; stops are positioned every eight spaces through 72nd space, then every space to 80th. No effect when cursor is at 80th.*
5. CTRL — Allows special characters to be transmitted. When control key is held down, the bit two of any character transmitted by the DECscope is sent as zero. These special characters are frequently used by system software, and some have special meanings to the DECscope when the host echoes them back or transmits them.
6. SCROLL — Functions only when DECscope is in hold-screen mode. Allows one new line to be displayed. With SHIFT key down, allows 12 or 24 new lines to be displayed, filling screen with new data.
7. BACK SPACE — Moves cursor one space left.*
8. LINE FEED — Moves cursor down one line. Also scrolls display after 12th or 24th line.*
9. RETURN — Moves cursor to left margin on same line.*
10. DELETE — Transmits a character which the host computer can use to institute a last-character erase sequence.
11. BREAK — Forces an interrupt of incoming messages when used with half-duplex system. Holds transmission line low as long as key is pressed. Included for compatibility with half-duplex systems.
12. NUMERIC KEYPAD (VT52 only) — In alternate-keypad mode (VT52 only), numeral, decimal point, and ENTER keys transmit unique escape sequences, distinguishing them from alphanumeric keys.
13. REPEAT (VT52 only) — Repeats, at rates up to 30 characters a second, any key held down simultaneously.
14. CAPS LOCK (VT52 only) — Generates all upper-case characters, plus numerals.
15. SHIFT — Generates all-upper-case characters, plus upper symbols on key caps.
16. COPY or PRINT (VT52 only) — Functions when external hard copy option installed. Controls printout operation.

*These special functions occur only when character is echoed or transmitted from host computer to DECscope.

Very Readable Screen

P4 phosphor is used for optimum character definition, giving the DECscope display better character resolution than a consumer-grade television set. Character brightness is operator-adjustable. The screen is recessed and tilted to avoid glare from overhead lighting. Because no filter covers the screen, it can be easily cleaned by the operator. However, for users with special applications, DECscope will accept colored filters.

Screen size is either 12 lines by 80 characters (upper case only plus numerics and punctuation) on the VT50 Series or 24 lines by 80 characters (full 96 ASCII character set) on the VT52 Series. The VT50 has a 5 by 7 dot matrix for character shapes while the VT52's matrix is 7 by 7. Excellent upper and lower case definition is achieved, see illustration.

The screen's 80 character per line format allows the exact display of FORTRAN or COBOL full-card images; thus the DECscope can take the place of a key punch and card reader for program entry.

A wide range of cursor controls is provided, including both incremental and extended-movement commands utilizing escape sequences. Up, down, right, and left movements, see Table I, plus 8-space tabbing are available. Individual characters, lines, or the full screen can be erased using simple commands (ESC J and ESC K).

Use of the extended-movement commands can greatly increase an operator's throughput in form-filling tasks, for example, because the host computer software can interactively position the cursor at the next answer required, based on previous answers.

Two Operating Modes

DECscope operates in two modes: full-duplex, and full-duplex-with-local-copy.

The full-duplex-with-local-copy mode allows the operator to display and verify each character as it is being keyed for transmission. This feature makes DECscope compatible with software written for half-duplex terminals. In the conventional full-duplex mode, the character is keyed to the host computer and can be echoed back for display.

Switch-selectable transmit and receive speeds are set individually to the same or different speeds.

Transmission and reception speeds can be 75, 110, 150, 300, 600, 1200, 2400, 4800, or 9600 baud.

TABLE I
MANUAL CURSOR CONTROL COMMANDS

Cursor Direction*	From VT52 Keypad	From Keyboard	Other Action
Up one line	▲	ESC A	No Scroll
Up one line		ESC I (VT52)	Scrolls down
Down one line	▼	ESC B (VT52)	No Scroll
Down one line		LF	Scrolls up
Right one column	➤	ESC C	No erase
Right one column		Space	Erases
Left one column	◀	ESC D (VT52)	No erase
Left one column		BS	No erase
Home		ESC H	To start of top line

*Where indicated, cursor direction movement is only applicable to VT52.

SCREENFILTERS — FOR VIDEO TERMINAL

Acrylic filters are available for use with DIGITAL's VT52 and VT50 Video Terminals. Filters serve to reduce excessive glare from overhead lighting. Filters are available in three color choices. Shipping Weight: .5 lbs.

Cat. No.	Color	Qty. 1-5		Qty. 6-Up

12-13195-01	Amber				
12-13195-02	Green				

VT50/ VT52 DECSCOPE

Interface: Software

Basically DECscope will operate with software handlers written for teletypewriters or other video terminals. But as with any interactive device the unique operational features of DECscope must be carefully considered for the intended application. The following aspects are key:

1. *Transmission Mode* — Full-duplex or full-duplex with local copy operation. Asynchronous transmission.
2. *Word Length* — 7-bit data words, plus even or no parity. All outgoing characters are generated using even-parity protocol (a word is judged correct if it contains an even number of ones). A slide switch on the bottom of the DECscope enables the operator to select no parity where the usual parity bit is always in a mark condition. Odd parity, and space, can be obtained by moving a jumper wire.
3. *Variable Baud Rates* — By switch selection from 75 to 9600 baud operation is possible. However, word length varies depending on baud rate. At 75, 150 and higher, the word length is 10 bits while at 110 baud the word length is 11 bits.
4. *Character Display Format* — If upper and lower case display is mandatory then the VT52 terminal must be used since the VT50 terminal has upper case capability only (plus numerics and punctuation symbols). Also the VT50 can present 12 lines of characters where as the VT52 has 24 lines. Both have a display width of 80 characters.
5. *Command Responses* — How DECscope reacts to commands generated by the host computer is a fundamental consideration. For example, commands such as control codes, escape sequences, cursor position control, automatic screen erasing, and hold-screen modes are all received from the host computer in ASCII format. Table II and Table III document the respective codes and their actions.

Interface: Hardware

Two interfaces are available for DECscope, the 20 mA current loop and the EIA RS232C standard. The VT50 has, as a standard integral feature, a 20 mA interface. For systems requiring EIA compatibility, an optional, user-installed interface (BN50A-7F) may be ordered. The VT52 can be ordered with either a 20 mA or EIA interface. For later conversion, optional, user-installed interfaces are available to provide both EIA capability for 20 mA-equipped units and 20 mA capability for EIA-equipped units. Refer to DECscope option listings on page 30.

The 20 mA loop is optically coupled and provides sufficient gain for systems requiring more than 20 mA switching capacity. The current loop can be operated off-line to insure that it is functioning properly before system installation. DECscope is passive with this interface in that the host computer supplies the driving current. Generally the DECscope with this interface is used for data input applications where the terminal is located no more than one thousand feet from the host computer. The actual reliable working distance depends on the cable used, the electrical noise present at the installation, and the host computer circuitry. Typical assignments: inventory control, job status, computer console, nursing station, and educational systems.

DECscopes equipped with the EIA interface are commonly used for remote order-entry or order processing from any location that has access to a dial telephone network or leased line. Typical assignments: time-share terminals, credit checking, order entry, reservations, and program development.

TABLE II — COMMANDS FROM HOST COMPUTER

Character(s) and Octal Code(s)	Action Taken
BEL (007)	Sounds the audible alarm.
BS (010)	Moves the cursor left one position, unless it was at the start of a line to begin with.
TAB (011)	Moves the cursor rightward to the next TAB stop, unless the cursor was at the end of a line to begin with. (TAB stops are fixed in columns 9, 17, 25, 33, 41, 49, 57, 65, 73, 74, 75, 76, 77, 78, 79, and 80.)
LF (012)	Moves the cursor down one line — performs an upward scroll if the cursor was on the bottom line.
CR (015)	Moves the cursor to the start of the same line it was on.
ESC (033)	Serves as a signal that the following character is to be interpreted rather than displayed; ESC introduces multicharacter commands called "Escape Sequences."
Displayable Characters (041 to 176)	The character is displayed at the cursor position; then the cursor is moved right one column, unless it was at the end of a line to begin with.
Space (040)	Space (040) blanks the character at the cursor position and moves the cursor right.
NUL (000) and DEL (177)	The terminal does not respond to NUL or DEL, in order to be compatible with slower electromechanical devices that use these characters as filler.

TABLE III — ESCAPE SEQUENCE COMMANDS FROM HOST COMPUTER

Escape Sequences	Effect
ESC = (033 075) VT52 only	Enters alternate-keypad mode. In Alternate-keypad mode, keys on the numeric pad transmit unique Escape Sequences to distinguish them from similar keys on the main keyboard, and to invoke user-defined functions.
ESC (033 076) VT52 only	Exits alternate-keypad mode and returns to Numeric-keypad mode. (Alternate-keypad mode remains in effect until this command disables it.)
ESC A (033 101)	Moves the cursor up one line, unless it was already on the top line — does not perform a scroll.
ESC B (033 102) VT52 only	Moves the cursor down one line, unless it was already on the bottom line — does not perform a scroll.
ESC C (033 103)	Moves the cursor HOME: to the start of the it was already at the end of a line — does not erase the character at the old cursor position.
ESC D (033 104) VT52 only	Moves the cursor left one column, unless it was already at the start of a line — same as BS (010).
ESC H (033 110)	Moves the cursor HOME: to the start of the top line.
ESC I (033 111) VT52 only	Moves the cursor up one line — performs a downward scroll if the cursor was on top line.
ESC J (033 112)	Erases all data from the cursor position to the end of the screen.
ESC K (033 113)	Erases all data from the cursor position rightward on the same line.
ESC Y (033 131) VT52 only	Direct Cursor Addressing feature — moves the cursor to any specified position on the screen, regardless of where it was before. Format is: ESC Y Line Number Column Number Line Number is one character; octal code 040 to refer to the top line, 041 to refer to the second line, . . . 067 to refer to the bottom line. Column Number can legally range from 040 (left-most column) to 157 (right-most column). The cursor is moved to the specified column of the specified line.
ESC Z (033 132)	Requests terminal to identify itself. Terminal will respond with a three-character Escape Sequence unique to its own configuration.
ESC [(033 133)	Enters Hold-screen mode. In Hold-screen mode, data will not be scrolled off screen until operator requests it by striking Scroll key.
ESC (033 134)	Exits Hold-screen mode. (Hold-screen mode remains in effect until this command disables it.)

Printer Option VT52 Only The first three Escape Sequences perform the exact same functions as the COPY key:

ESC]	(033 135)	Print the Screen
ESC Λ	(033 136)	Enter Auto-Print Mode
ESC ___	(033 137)	Exit Auto-Print Mode
ESC V	(033 126)	Print Cursor Line
ESC W	(033 127)	Enter Printer-Controller Mode
ESC X	(033 130)	Exit Printer-Controller Mode

VT50/ VT52 DECSCOPE

Controlled Scrolling

To allow time for reading long messages coming in at high speeds, the operator or host computer can put DECscope into a hold-transmission mode by initiating ESC [(033 133). Cancellation of this mode is achieved by ESC / (033 134).

When the terminal enters the hold-screen mode, the current line or any subsequent line selected by the operator is displayed until a line feed occurs or the 80th character position is reached. When an LF (line feed) is received, it is not immediately processed but stored in the housekeeping portion of the terminal's memory. Receipt of any subsequent character will cause the terminal to transmit X-OFF (023). That character, and any others which may be received between that time and the time at which X-OFF (023) is interpreted by the host and transmission is stopped, will be stored in a 13-position overflow portion of memory.

If the operator, by pressing the SCROLL key, allows another line to be displayed, the line feed is processed, then the overflow characters are processed (displayed) until the next LF is encountered. If the overflow is exhausted without encountering an LF, the terminal transmits X-ON (021).

If the host fails to stop sending and the overflow area fills, the terminal will process the line feed and the characters in the overflow area regardless of hold-screen mode.

The Auxiliary Keypad on VT52

An advanced feature of the VT52 is the auxiliary keypad that operates in one of two modes. Software can place the terminal in a mode in which the keypad as well as the main keyboard's numeral keys can be used for data entry. If it is desired to distinguish between the typing of keys on the keypad and keys on the main keyboard, software can select a mode — Alternate Keypad Mode — in which each key on the keypad transmits a unique Escape Sequence. See Table IV.

Easier manual control of the cursor is facilitated by "arrow keys." If the codes transmitted by the "arrow keys" are echoed back to the terminal, they will cause the cursor to move one position in the direction the arrow points in. The CONTROL, SHIFT, and CAPS LOCK keys do not affect the codes transmitted by the keys on the auxiliary keypad, in either keypad mode.

Printer Interface — VT52 Only

The VT52 Printer Interface Module, VTXX-KA, is a field-installable option available on all new VT52s and certain units already in the field. It provides a data path between the VT52 Video Terminal and a serial or parallel printer such as the LA35 or LA180.

When this option is incorporated, there is a COPY (or PRINT) key at the lower right corner of the main keyboard. Using this key, the operator can make the terminal output text to the printer in one of two ways. The two variations depend on whether the operator holds down the SHIFT key when the COPY key is typed. If the COPY key is pressed without the SHIFT key down, then the terminal will output the entire contents of the screen to the printer. If the COPY key is pressed while the SHIFT key is held down, then the terminal enters Auto-Print Mode. Auto-Print Mode allows a variable number of lines of text to be the output to the printer. Whenever the terminal gets a Line Feed command to move the cursor down one line, the line the cursor was on at the time will be the output to the printer. This will be true for as long as the terminal remains in Auto-Print Mode. To take the terminal out of Auto-Print Mode, the operator types the shifted COPY key a second time. None of these three uses of the COPY key cause any codes to be sent to the host computer.

The three commands which the operator can issue by using the COPY key can also be issued from the computer. To command the terminal to send text to the printer, the host sends the VT52 Escape Sequences ESC], ESC ∧ and ESC ___ (see Table III). There are two additional ways in which the host computer can operate the printer:

- By specifying individual lines to be printed, ESC V.
- By placing the terminal in a mode in which it sends the characters it receives to the printer instead of to the screen (Printer-Controller Mode ESC W, enter mode and ESC X, exit mode).

When the terminal receives ESC V from the host, it will output the entire contents of the line which the cursor is on to the printer.

If the printer has more than 80 columns, the columns to the right of the 80th column will never be used by the line-at-a-time PRINT commands, since it is impossible to construct a line on the screen of the VT52 with more than 80 columns. Many programs, however, will want to control the actions of the printer in more detail, without the "interpretive" activity of the VT52 (trimming blanks and inserting line delimiters). For example, the program may want to be able to print in all 132 columns of the printer, overprint lines, or send control codes to the printer. A program does this by placing the VT52 in Printer-Controller Mode. In Printer-Controller Mode, every character the VT52 receives will be passed directly to the printer without being converted or otherwise acted upon by the VT52. The VT52 becomes essentially a remote printer controller.

VT50/ VT52 DECSCOPE

Printer Interface — VT52 Only (Cont'd)

The characters ESC W, which the host sent to the VT52 to cause it to enter Printer-Controller Mode, are not passed to the printer. When the VT52 receives ESC X, which causes it to exit Printer-Controller Mode, the ESC will already have been sent to the printer. Instead of sending the X to the printer, the VT52 sends the character CAN (whose code is 030) to cancel the effect of the ESC. The action of the printer is not instantaneous and may lag behind data transmission from the host to the terminal. But in situations where information which has been requested to be printed might be destroyed or altered before it can be printed, the terminal will cease processing incoming characters. The terminal begins putting incoming characters in its Silo buffer, and transmits X-OFF to the host. When the necessary printing has been finished, the terminal will begin to process the characters in the Silo. When it has processed all the characters in the Silo, the terminal will send X-ON to the host to indicate that it is ready for more characters.

When the terminal is in Printer-Controller Mode, so that data flows through the terminal and out to the printer as it is received from the host, the terminal will use the Silo, and X-OFF and X-ON signals, to limit the data rate on the transmission line to a rate the printer can keep up with. Therefore, the maximum data rate for output to the printer via Printer-Controller Mode is the minimum of the baud rate between the terminal and the printer, and the baud rate between the terminal and host.

On the interface module itself, there is an 8-position rotary switch. The switch selects which of the interfaces (serial or parallel) will be used and, if the serial interface is selected, which baud rate will be used. Selectable serial baud rates are: 150, 300, 600, 1200, 2400, 4800, and 9600 baud.

The host cannot determine if the terminal operator has pressed the COPY key. Host software MUST support synchronization with X-OFF/X-ON (must suspend its transmission promptly upon receiving X-OFF and resume upon receiving X-ON), or else the Silo may overflow, interfering with the accuracy of the output.

Status Reporting

When VT52s and VT50s are used in the same computer system, software can send each terminal a command (ESC Z) to identify itself. The VT52 will automatically transmit a three-character Escape Sequence which identifies it as a VT52. The host thus determines which features can be used with the terminal presently attached. For example, if a printer option is attached to the VT52, the Escape Sequence ESC / M is transmitted to alert host to the presence of the printer.

The significance of the status reporting feature is that VT50s, VT52s and future VT models can be freely interchanged within a system, with the software responding correctly to each different type of terminal.

PAPER TAPE READER ACOUSTIC COUPLER

SERIAL PAPER TAPE READER — PRS01

The PRS01 is a small, portable paper tape reader that connects into the serial line of a system console or terminal. The reader provides a convenient and inexpensive method of loading paper tapes using the keyboard device codes of the terminal. It is designed primarily for loading maintenance and diagnostic programs. Because the reader produces a 20 mA serial asynchronous signal, it can be interconnected to a console device or terminal, or to any 20 mA current loop input if no console device is available.

A switch on the reader permits selection of either the console keyboard or the PRS01 as the computer input device. This lets the user switch back and forth between devices without having to disconnect the reader once it is installed. Operation is continuous with start and stop functions controlled by a front panel switch. Outside of this, the reader is similar in operation to the low-speed reader on an ASR teleprinter.

The PRS01 reads 8-level tapes with in-line feed hole. Two versions of the reader are available so that transfer rates of 300 baud or 2400 baud can be used. 115V ac or 230V ac models can be ordered, see table.

The entire reader, including a self-contained power supply, is housed in a small 2-piece plastic case. The back cover is removable for easy access to all sub-assemblies which are mounted inside the front cover.

OPERATIONAL SPECIFICATIONS

Feed Hole: In-line.

Tape Level: 8-level.

Transmission Rates:
PRS01-AA, PRS01-AB: 2400 baud (approx. 120 char/sec.).
PRS01-BA, PRS01-BB: 300 baud (approx. 22 char/sec.).

Interface: 20 mA current loop, passive, with Mate-N-Lok connector (12-09378-01).

Data: Data is in the form of a serial pulse string. Each character time consists of one "start" bit, eight "data" bits, and one "stop" bit. The "stop" bit (or "1") is current flowing.

System Connections

The PRS01 reader can easily be connected to computer systems with or without terminals. If the computer does not have a terminal, an adapter cable is normally used to connect the reader cables to the computer's terminal interface. Because the type of adapter cable needed depends on which computer terminal interface is used, it may have to be purchased separately.

If the computer has a terminal, then the standard interface cable supplied with the reader is used to interconnect the components. This interface cable uses a "Y" connection so that it can be inserted between the terminal and its interface.

PRS01

ELECTRICAL SPECIFICATIONS

Power Requirements:
PRS01-AA, PRS01-BA: 1.0A @ 117V ac (±10%), 50/60 Hz
PRS01-AB, PRS01-BB: 0.5A @ 230V ac (±10%), 50 Hz

MECHANICAL SPECIFICATIONS

Operating Temperature: 15°C to 32°C (59°F to 90°F).

Humidity: 20% to 80% (noncondensing).

Dimensions: 12W by 7½H by 5¼″D.

Weight: 6½ lbs.

Cat. No.	Baud Rate	Power Input	List	Cat.	Cash	Shipping Weight
PRS01-AA*	2400	115V ac 60 Hz	$750	$713	$683	9 lbs.
PRS01-AB*	2400	230V ac 50 Hz	750	713	683	9 lbs.
PRS01-BA*	300	115V ac 60 Hz	750	713	683	9 lbs.
PRS01-BB*	300	230V ac 50 Hz	750	713	683	9 lbs.

*Includes "Y" cable 10′ long, male and female loose Mate-N-Lok connectors for computer and terminal.

ACOUSTIC COUPLER — DF01-A

DF01-A Acoustic Coupler can be used to connect DIGITAL and other terminals to remote computing systems via ordinary telephone sets and public switched telephone network. Both 20 mA current loop and EIA RS232C interfaces are standard in the DF01-A.

Through slide switches, the user may choose either full- or half-duplex operation.

"Sound-seal" cushions on the DF01-A hold the telephone handset firmly in position and provide excellent acoustic shielding. Good durability is provided by an injection-molded case made of special impact-resistant material. All electronic circuitry, switches and connectors are mounted on a single printed circuit board.

Operating Modes: Originate only, in half- or full-duplex.

Data Rate: Up to 300 baud.

Receiver Sensitivity: −35 dBM in acoustic mode.

Frequencies:

	Send	Receive
Mark	1270 Hz	2225 Hz
Space	1070 Hz	2025 Hz
Frequency Stability	0.3%	0.4%

Modulation Technique: Audio Freq. — Shift Keyed (AFSK).

Transmit Power Level: −21 dBM ±3 dBM.

Line Coupling: Acoustic coupling to telephone line.

Interface: 20 mA teletype levels or EIA RS232C (both available on the same unit; both outputs can be used simultaneously if desired).

Compatibility: Used with remote terminals (teleprinter, typewriter, CRT display, plotter, card reader) to provide information transfer to/from a Bell 103A2 (or equivalent) dataset. Cannot be used with 230V 50 Hz, nor is it compatible with European modems.

Controls and Indicators: Power ON/OFF. Full-duplex/half-duplex (slide switch). Carrier ON indicator light.

Cables: Supplied w/8′ cable equipped with Mate-N-Lok connector at terminal end for connection to terminals equipped with DEC compatible 20 mA interfaces. A cable should be ordered (DEC No. BC05D-25) to connect the DF01-A to terminals already equipped with EIA interface and cable.

MECHANICAL SPECIFICATIONS

Operating Temperature: 0°C to 60°C (32°F to 140°F).

Size: 7.5W by 3H by 12″L. **Wt:** 6 lbs. **Mounting:** Table case.

ELECTRICAL SPECIFICATIONS

Power Requirement: 115V 60 Hz (less than 10W).

Cat. No.	List	Cat.	Cash	Shipping Weight
DF01-A*	$760	$722	$692	8 lbs.

*Operators manual supplied with each unit.

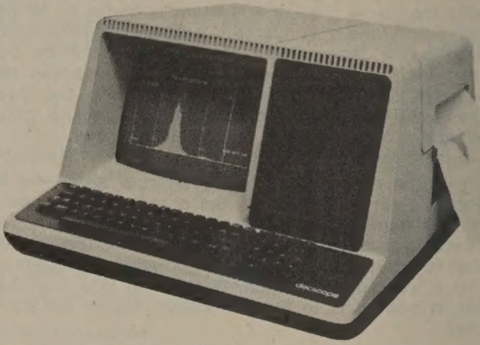
VT55 DECGRAPHIC SCOPE

GRAPHIC TERMINAL WITH COPIER OPTION

- *Upper and Lower Case Text.*
- *Switch Selectable Transmission Rate (75 to 9600 baud).*
- *Can Interface to any CPU; Serial ASCII Transmission.*
- *A 19 Button Keypad for Directing Cursor Movement and Numerical Entry Applications.*
- *Upward and Downward Scrolling.*
- *Electrolytic Copier Option.*
- *Hardcopy Output of both Alphanumerics and Graphics.*
- *Universally Accepted Standard Typewriter Keyboard.*
- *Choice of Interface and Cable to Host Device; 20 mA Current Loop, or EIA RS232-C.*
- *Direct Cursor Addressing Capability in Alphanumeric Mode.*
- *Generation of User Defined Codes from the Keyboard.*
- *A Repeat Key on the Keyboard.*
- *25 Seconds per Copy.*
- *Hardcopy can be by Keyboard Button Selection or Under Program Control.*



The VT55 is an on-line interactive CRT terminal that offers waveform graphics — a new and significant capability which meets the needs of a variety of applications. Two graphs of 512 data points each can be displayed with a screen resolution of 512x by 236y. These graphs can be in point-plot or histogram (shaded) format. Graph markers (20-point vertical lines) are available (one per data point) to facilitate data editing and graph generation. In addition, the VT55 allows simultaneous display of any combination of text and graphics. It can hold up to 1920 characters in 24 lines of an 80 characters-per-line matrix. The 24th line of text is positioned below any graphs to facilitate labeling the x axis.

To complete the picture, a user can take a permanent record of a display image with the VT55's optional hard-copy unit. By simply pressing a specified key, the VT55 supplies a hard copy reproduction of the display screen for both characters and graphs.

The display of alphanumeric and graphic data is performed by the raster scan method. Raster scan infers that the beam of the cathode ray tube is swept completely across the phosphor surface of the tube 50 or 60 times (depending on the power line frequency) in a second. Information, generated via the memory, turns the beam on and off, intensifying dots on the phosphor at the proper time to produce characters and graphics on the video screen. This is basically the same method used by consumer television sets.

For most applications, the VT55 will be interfaced to a host computer and operated in the full-duplex communication mode. Data transmitted by the VT55 is received by the host computer. Data received by the VT55 is determined solely by the host computer. ASCII 96-character set plus 32 control codes can be transmitted.

The VT55 is capable of sending and receiving at baud rates from 75 to 9600 bits per second. Data is sent in serial digital format for the 20 mA current loop interface models. The EIA interface models allow the use of the VT55 with RS232-C signals.

Alphanumeric Mode

In the Alphanumeric mode, data received via the serial line input is stored in the alphanumeric memory and printed as characters, numerals, and symbols on the screen if the code represents a printable character.

Received printable symbols are displayed on the video screen in a 24-horizontal line by 80-vertical column format. Each character is displayed as a 7 by 7 dot matrix; the matrix size is approximately 4.0mm by 4.0mm. Character placement on the screen is controlled by the alphanumeric cursor. The cursor is a blinking, underlining line that indicates the screen position in which the next received character is to be placed. When receiving a new character, the cursor automatically increments to the right. The cursor may also be shifted around the screen by receipt of alphanumeric cursor control commands or the auxiliary keypad.

Graphics Mode

Graphics mode performs in essentially the same way as Alphanumeric mode with regard to character font, control codes, etc. The only difference is that the subset of 32 lowercase characters is replaced by a set of 30 special characters to extend the capability of the terminal in printing equations and fractions and plotting line graphs.

When the VT55 is in the Graph Drawing mode, incoming digital data, aside from the control codes, is treated as graph plotting information. This data represents Graph Drawing mode instructions and data points. The VT55 can plot two 512-point graphs, graph 0 and graph 1, each represented as a line graph or histogram. Vertical and horizontal lines that span the viewable screen area may be displayed anywhere in the viewable area of the screen. These lines can be combined to form grids to aid in labeling values on the graphs. The VT55 has graph markers as an additional graph feature. These are short vertical markers useful in defining important features on the graph. All graph features of the VT55 are individually controllable by the programmer. All data is stored in a separate graph memory. Keeping graph information separate from the alphanumeric information storage allows superposition of the alphanumeric and graph information and allows the removal of one type of information without affecting the other. For example, a label could be printed over a graph and then removed without affecting the graph. See figures on p. 33 for some typical graph capabilities.

*Apparent distortion of close-up photo of CRT is due to curved surface of screen.

Graphics Mode (Cont'd)

The VT55 has an ensemble of nine graph commands which permit loading of individual points on the two graphs and loading and clearing of individual markers, vertical lines, and horizontal lines. The user may choose to blank this data from the screen, but hold the data in the internal graph memory for later viewing. All graph memory may be cleared with one instruction when desired.

Copier

The optional copier allows the user to make a hard copy duplicate of the video screen. The paper copy includes the displayed graphs as well as the alphanumeric characters. The copier is contained within the VT55 cabinet and the paper output emerges from the right side of the terminal. Upon command, the VT55 generates a hard copy of the display on the screen. Using a scanning technique, the terminal generates the image of the display in about 25 seconds. The display image is approximately 3H by 7½"W. As the copier uses rolled paper, many lines of text and graphs may be formatted on a standard letter-size sheet of paper. The roll is 8½"W by 100'L. The copier's scanning technique consists of scanning an electrode across a surface of special recording paper in exactly the same pattern as the raster scan on the VT55 screen. An electrode on the opposite face of the paper receives a voltage from the VT55 microprocessor in conjunction with the image to be recorded. The potential across the two electrodes causes a current to pass through the recording paper and actually plates metal from one of these electrodes onto the paper to form a dark point.

Keyboard

The VT55 keyboard is compatible with ANSI standard typewriter keyboard. This keyboard layout is similar to the layout found on an office typewriter, rather than on a keypunch machine. It contains the keys that generate the 96-character set of ASCII and a control key for the generation of the 32 control codes. Unique VT55 function keys are on the keyboard as well. See Operational Specifications for details of other keyboard features.

?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400 x 6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

VT55 DECGRAPHIC SCOPE

Software

The following high level software facilities are currently available under the following PDP-11 operating systems and languages.

- *RT-11, a high performance, real-time operating system designed for dedicated single-user or foreground/background applications.*
- *VT55 support under RT-11 is available as follows — RT-11/FORTRAN Extensions*
  RT-11 BASIC
  FOCAL/RT-11
- *RSX-11M, a multi-processing real-time system designed for a wide range of applications where many tasks must be monitored and controlled concurrently.*
- *The VT55 is supported by FORTRAN using the same subroutine calls and functions as the RT-11 version.*

OPERATIONAL SPECIFICATIONS

ALPHANUMERICS

Character Lines: 24

Character Columns: 80

Control: Blinking alpha cursor.

Character Set: 96-character upper and lower case ASCII subset plus 32 control characters and special graphic characters.

Special Features: Upward and downward scroll, bell, erase, erase, tabulate, cursor control, character on a line.

Character Format: 7 by 7 dot matrix.

GRAPHICS

Resolution: 512 horizontal by 236 vertical points.

Graphs or Histograms: Two single-valued functions of x, each individually controlled.

Grid: 512 vertical lines and 236 horizontal lines, each individually controlled.

Graphic Marker: 512/graph, total of 1024. Each graphic marker is individually controlled.

Special Features: Individual blanking and unblanking of all graphic features, clear all graphics.

Linearity: ±½ point.

USER CONTROLS

Intensity: Variable to adjust screen brightness.

Parity: Even, odd or non parity switch selectable.

Power/Logic Reset: Turns line voltage on and off and resets unit to Alphanumeric mode.

KEYBOARD

Format: ANSI x 4.14-1971 standard typewriter keyboard.

Keyclick: Audible feedback on each keystroke.

Error Correction: Three-key rollover to reduce errors caused by fast typing.

Special Keys: Extra control keys for special and commonly used control functions include ESC, TAB, SCROLL, BACKSPACE, BREAK, LINE FEED, RETURN, COPY, REPEAT.

Keypad: 19 button keypad efficiently designed for entry of numeric data plus special user defined codes may be generated with special Terminal mode.

COPIER

Image Copied: Display on screen less the alphanumeric cursor.

Time/Print: Approximately 25 seconds/copy.

Copy Size: Approximately 3H by 7½″W.

Paper Roll Size: 120′L by 8½″W.

Character Format: 7 by 7 dot matrix.

Graph Field: 512 points horizontal by 236 points vertical.

User Controls: Variable character width adjustment.

Baud Rate/Interface Mode: Allows choice of baud rate, full-duplex, full-duplex with local copy and local mode with rotary switches.

Hold Screen Mode: Allows interruption of data transmission for extended display viewing.

Terminal Identifier: Terminal will respond with ESC/E when receiving ESC/Z.

COMMUNICATIONS SPECIFICATIONS

INTERFACE

Type: 20 mA current loop or EIA RS2326 interface.

SPEED

Full-Duplex: 75, 110, 150, 300, 600, 1200, 2400, 4800, and 9600 baud.

Full-Duplex with Local Copy: 110, 150, 300, 600, 1200, 2400, 4800, and 9600 baud.

Full-Duplex, Split Speeds: Transmission at 75, 150, 300, or 4800 baud with reception at 110, 600, 1200, 2400, 4800, or 9600 baud.

TRANSMISSION

10-Bit Length: 75, 150, 300, 600, 1200, 2400, 4800, and 9600 baud.

11-Bit Length Parity: 110 baud only. Generated on transmission as even parity or a mark. (No parity is switch-selectable.) Parity is not checked on reception.

SUPPLIED CABLE LENGTH

20 mA Model: 25′ max. length 1000′.

EIA Model: 25′ max. length 50′.

SCREENFILTERS — FOR VIDEO TERMINAL

Acrylic filters are available for use with DIGITAL's VT55 Graphic Terminal. Filters serve to reduce excessive glare from overhead lighting. Filters are available in three color choices.

VT55 COPIER PAPER

Sensitized paper for use with DIGITAL's electrolytic copier. Each roll of white paper is 8½″W by 100′L. A new anode is supplied with each roll of paper. Paper is supplied by the box. Note that the shelf life of the paper is six months. Copier paper remains usable for one month once it is in the copier unit.

LSI-11 AND PDP-11/03

Large Scale Integration technology, implemented by MOS circuitry, has made it possible to dramatically reduce the size, cost, and weight of computer-based systems. Reliability and maintainability are greatly improved over non-LSI systems.

LSI allowed DIGITAL to package on a single 8.5 by 10″ (quad height) pc board an entire central processor, 4K of dynamic RAM memory and their related input/output control features. Expanded to a complete system which can be supplied as a PDP-11/03 (with options), LSI allows the CPU function plus a memory of 32K by 16-bit words, plus two systems-oriented input/output functions such as a serial line unit or an instrument bus — and a power supply — to be mounted in an enclosure no bigger than 19 by 3.5 by 13″. LSI technology opens up new avenues for imaginative system development. Take advantage of them. . . .

BASIC PROCESSOR-MEMORY CONFIGURATIONS

There are four combinations of RAM memory and LSI central processor functions designated as basic configurations. These are cataloged as KD11-F, KD11-R, PDP-11/03-EA and PDP-11/03-KA. All have the following features:

- 16-bit MOS, LSI central processor
- Parallel I/O bus port
- PDP 11/40 instruction set
- DMA transfer rate of 833K words per sec.
- Power-fail/auto restart
- Vectored interrupt
- Real-time clock input
- Octal debugging routine in microcode
- ASCII console routines in microde
- Microcode bootstrap routine
- Expandable arithmetic capabilities
- Word or byte processing

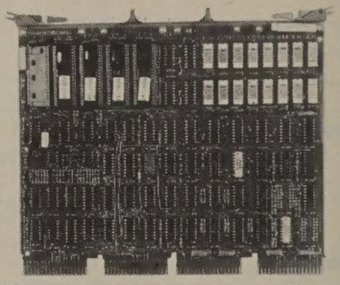
A variety of optional interface modules, expansion memory modules, mounting hardware, power supplies etc. can be ordered to complement the basic configurations. Not all options apply to all configurations and options for one basic configuration may be standard on another. Following are the details of each basic configuration.

KD11-F BASIC PROCESSOR WITH 4K RAM MEMORY

The KD11-F is contained entirely on one 8.5 by 10″ (Quad-height) pc board. The 4K RAM memory is 4096 words by 16 bits implemented by dynamic MOS LSI. A memory register addresses all onboard memory plus expansion memory up to 32K words or 64K bytes.

Memory refresh is executed by microcode. However, where interrupt latency, due to the microcode refresh functions, cannot be tolerated, refresh option REV11-A, or -C should be ordered. This option is described in detail elsewhere in this section.

Power requirements for KD11-F are +5V dc ±5% at 1.8A (2.4A max.) and +12V dc ±3% at 0.8A (1.1A max.). The H780-H supply described elsewhere in this section can provide the necessary power and control functions. Note if H780-H is **not** used, a KPV11 Power Failure/Line Time Clock module (or equivalent) must be used for correct power control for the KD11-F. Temperature Range: 5°C to 50°C (41°F to 122°F). Relative Humidity: 10% to 95% (no condensation). Maximum Air Temperature Rise Across Module: 7°C (12.5°F).



KD11-F

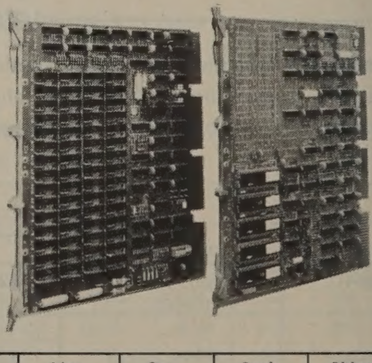
Cat. No.	List	Cat.	Cash	Shipping Weight
KD11-F*	$990	$941	$901	15 lbs.

*Prices shown include a ZJV01-RB literature and diagnostic package.

KD11-R BASIC PROCESSOR WITH 16K RAM MEMORY

The KD11-R has two 8.5 by 10″ (quad-height) pc boards to contain the central processor functions and the MOS LSI dynamic memory chips. Memory size is 16K words by 16-bits. A memory register addresses the KD11-R's internal memory plus expansion memory up to 32K words or 64K bytes. The memory refresh function is not by microcode from the central processor but is an independent function. Thus the refresh capability of Option REV11-A or -C is not applicable to this configuration. Note illustration shows the two boards of this configuration with optional arithmetic expansion IC package KEV11 installed (lower left corner of right-hand board).

Power requirements are +5V dc ±5% at 2.7A (4.1A max.) and +12V dc ±3% at 0.8A (1.2A max.). The H780-H power supply described elsewhere in this section can provide the necessary power and control functions. Note if H780-H is **not** used, a KPV11 Power Fail/Line Time Clock Module (or equivalent) must be used for correct power control for the KD11-R. Temperature Range: 5°C to 50°C (41°F to 122°F). Relative Humidity: 10% to 95% (no condensation). Max. Air Temperature Rise Across Module: 7°C (12.5°F).



Cat. No.	List	Cat.	Cash	Shipping Weight
KD11-R*	$2490	$2366	$2266	16 lbs.

*Prices shown include a ZJV01-RB literature and diagnostic package.

LSI-11 AND PDP-11/03

PDP-11/03 PACKAGED MICROCOMPUTER

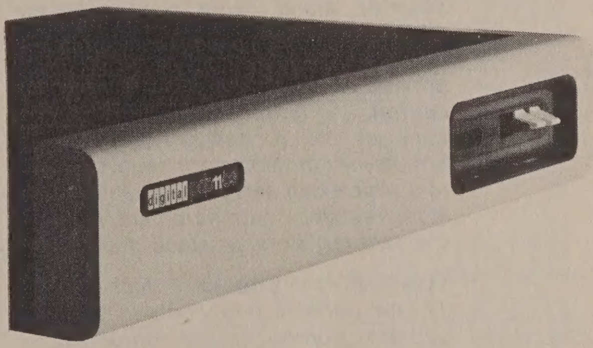
- *PDP-11/03-EA with 4K RAM Memory*
- *PDP-11/03-KA with 16K RAM Memory*

The PDP-11/03 is an enclosed combination of the LSI-11 modules and accessories. It comprises a 19″-rack mountable enclosure measuring 3½ by 19 by 13″, an H9270 backplane and card-guide assembly, plus a central processor and RAM memory. An H780-H power supply, which includes indicators, switches and a dual-fan assembly, is incorporated in the enclosure. Input voltage required is 90-132V ac (47-63 Hz). Max. Power Consumption: 210 watts at full load.

The enclosure has a removable front panel (pop panel). It can be easily removed to allow front access to the modules. The power supply indicator/switch panel (at right) does not detach with the front panel so remains functional during servicing. Temperature Range: 5°C to 50°C (41°F to 122°F). Humidity: 10% to 90% (no condensation).

Two basic congurations of PDP-11/03 can be ordered: **PDP-11/03-EA** which has a 4K RAM memory and the central processor function on one quad-height board. This leaves room in the enclosure for up to six double-height modules. Where interrupt latency cannot be tolerated, an external refresh option REV11-A or -C should be specified (one double-height board).

PDP-11/03-KA which has a 16K RAM memory. The central processor and memory are on two quad-height boards. The enclosure can, therefore, contain up to four more double-height modules. No external refresh option is required with this configuration unless other optional memory requires refresh.



Cat. No.	RAM	List	Cat.	Cash	Shipping Weight
PDP-11/03-EA*	4K	$1995	$1895	$1815	42 lbs.
PDP-11/03-KA*	16K	3495	3320	3180	45 lbs.

*Prices shown include a ZJV01-RB literature and diagnostic package.

MICROCOMPUTER HANDBOOK

The Microcomputer Handbook is our answer to the question, "Where can I find the answers to everything I've always wanted to know about the LSI-11, but didn't know where to look." Included are detailed chapters on the processor, options, installation, software, operating systems, peripheral devices, programming, maintenance and much, much more. The text covers the full range of LSI-11 systems from the LSI-11 board set to the PDP-11/03 microcomputer to the PDP-11V03 disk based microcomputer system. Truly, everything you want **and need** to know about the LSI-11 microcomputer is found between the two covers of this handbook!

LSI-11 AND PDP-11/03

TECHNICAL DESCRIPTION

BASIC PROCESSOR-MEMORY CONFIGURATIONS

The 16-bit central processor functions are contained in four silicon gate, N-channel, metal oxide semiconductor (MOS), large-scale integration (LSI), integrated circuit chips. These chips provide all instructions, decoding, bus control, and arithmetic/logic unit functions of the processor. The central processor contains eight general registers which can serve as accumulators, index registers, autoincrement/autodecrement registers, or stack pointers.

The LSI-11 bus *is a high-speed, 38-line parallel bus containing data, address, control and synchronization lines. Sixteen lines are used for time multiplexing of data and addresses. All data and control lines are bidirectional, asynchronous, open-collector lines capable of providing a maximum parallel data transfer rate of 833K words per second under direct memory access operation.*

The basic instruction set *has more than 400 powerful PDP-11/40 instructions. There are no separate memory, I/O, or accumulator instructions. Thus the user can manipulate data in peripheral device registers as flexibly as in memory registers.*

Extended instruction and floating-point instruction *options provide fixed-point multiplication, division, and multiple shifting in single-precision arithmetic as well as floating-point addition, subtraction, multiplication and division. Order option KEV11, a plug-in chip.*

Single-level, vectored, automatic priority interrupt *provides for user-implementation of a priority-structured I/O interrupt system. Devices electrically closest to the microcomputer module receive highest priority, for either DMA or programmed I/O transfers. (DMA devices have a higher priority than programmed I/O devices). This structure allows nesting of interrupts to as many levels as there are devices connected to the LSI-11 bus. Upon receipt of an interrupt grant, the device directs the processor to an interrupt vector location which contains the starting address of the device interrupt service routine and the new processor status word.*

Real-time clock input signal line *functions as an external interrupt line. When connected to a frequency source, it can serve as a real-time processor. interrupt. A jumper on the microcomputer module enables or disables this highest priority interrupt function.*

Asynchronous operation *of all system modules permits each to function at its highest possible speed.*

Power fail/autostart *provides jumper-selective restart through a power-up vector, a defined location, or an octal debugging technique (ODT) microcode.*

ODT/ASCII console routine/bootstrap *all are resident in microcode to provide automatic entry into the debugging mode, replacement of conventional programmers' panel lights and switches with any terminal device generating standard ASCII codes, and the ability to automatically commence operation through resident bootstrap routines.*

Word or byte processing *provides very efficient handling of 8-bit characters without the need to rotate, swap, or mask.*

RAM semiconductor memories *are dynamic MOS LSI implemented. They require little operating power, allow a fast access time and are refreshed automatically in a manner which is transparent to the system. A core memory option (MMV11-A) is available but is recommended only as an expansion element for existing core-based systems.*

OPERATIONAL OPTIONS — REV11-A, REV11-C

- *Refresh*
- *Diagnostic*
- *Bus Termination*

This external refresh module is used when the dynamic RAM memory refresh implemented in the KD11-F basic microcomputer module or PDP-11/03-KA microcomputer microcode is disabled. This option eliminates an interrupt latency which can exist when operating with the microcode refresh functions. Also included are bootstraps for the resident paper tape absolute loader, and CPU and memory diagnostics. A 120-ohm bus termination is included with Option REV11-A only. REV11-A must not be used in systems where other DMA devices are on the I/O bus. Use REV11-C with TEV11 120-ohm terminator module in these applications.

Option is a double-height (8.5 by 5″) pc board.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight
REV11-A	120-ohm Termination	$320	$304	$291	2 lbs.
REV11-C	No Termination	320	304	291	2 lbs.

ARITHMETIC FUNCTION PACKAGE — KEV11

Extended instruction and floating point instruction Option KEV11 provides fixed-point multiplication, division, and multiple shifting in single-precision arithmetic, as well as floating-point addition, subtraction, multiplication, and division. Furnished as an IC package, it plugs into a socket in the basic microcomputer modules and PDP-11/03 microcomputers.

Cat. No.	List	Cat.	Cash	Shipping Weight
KEV11	$190	$181	$173	1 lb.

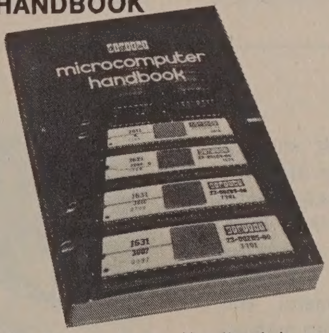
LOGIC HANDBOOK

logic handbook
20

The Logic Handbook, known as the computer industry's "Bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

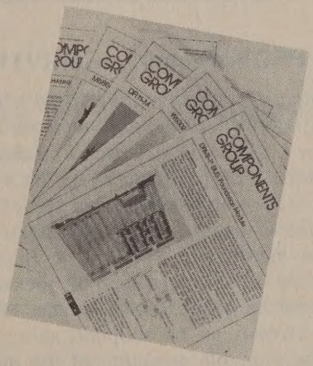
For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook!

MICROCOMPUTER HANDBOOK



The Microcomputer Handbook is our answer to the question, "Where can I find the answers to everything I've always wanted to know about the LSI-11, but didn't know where to look." Included are detailed chapters on the processor, options, installation, software, operating systems, peripheral devices, programming, maintenance and much more. The text covers the full range of LSI-11 systems from the LSI-11 board set to the PDP-11/03 microcomputer to the PDP-11V/03 disk based microcomputer system. Truly, everything you want and need to know of the LSI-11 microcomputer is found between the two covers of this handbook!

DIRECT SALES CATALOG APPLICATION NOTES AND PRODUCT BULLETINS



For the user who requires more complex and technical information on specific products or application ideas, the D.S.C. has a complete line of detailed product bulletins and application notes. These publications will tell you everything you should need to know about the particular product involved.

Over 50 different application notes and product bulletins are available for the asking.

LSI-11 AND PDP-11/03

EXTENSION MEMORY MODULES*

4K RAM MOS Memory Module — MSV11-B

A double-height (8.5 by 5") read/write memory module utilizing dynamic MOS semiconductor memory devices, the module capacity is 4096 words of 16-bits, with memory-select circuitry for operation on 4K address boundaries. Dynamic memory refresh is performed automatically every 1.67 milliseconds by microcode on the basic microcomputer module. If the interrupt latency associated with CPU microcode refresh cycling is undersirable an external refresh option (Cat. No. REV11-A or -C) implemented on an 8.5 by 5" (double-height) board can be ordered. The basic microcomputer module KD11-F or the PDP-11/03-EA micorcomputer can handle up to seven of these MSV11-B memory modules (32K words). The basic microcomputer module KD11-R or the PDP-11/03-KA microcomputer can handle up to four of these memory modules. Power requirements for MSV11-B are +5V ±5% at 0.56A (1.12A max.) and +12V ±3% at 0.26A (0.58A max.). Voltage levels are identical to those for the basic microcomputer modules.

Cat. No.	List	Cat.	Cash	Shipping Weight
MSV11-B	**$625**	**$594**	**$569**	2 lbs.

16K RAM MOS Memory Module — MSV11-CD

A quad-height (8.5 by 10") read/write memory module utilizing dynamic MOS semiconductor memory devices, the module capacity is 16K words of 16 bits with memory-select circuitry for operation on 4K address boundaries. Dynamic memory refresh is performed automatically every 25 microseconds (approximately) by circuitry on the memory module. If the memory is accessed during this refresh cycle, the cycle continues and a delay of 750 nanoseconds (max.) may be encountered before the I/O transaction is completed. Power requirements are +5V ±5% at 1A (2A max.) and +12V ±5% at 0.54A (0.56A max.). Voltage levels are the same as those required by the basic microcomputer modules. Basic processor-memory KD11-F or KD11-R and microcomputers PDP-11/03-EA or -KA can handle only one additional MSV11-CD module to reach the limit of 32K maximum capacity.

Cat. No.	List	Cat.	Cash	Shipping Weight
MSV11-CD	**$1800**	**$1710**	**$1638**	5 lbs.

4K PROM Memory — MRV11-AA

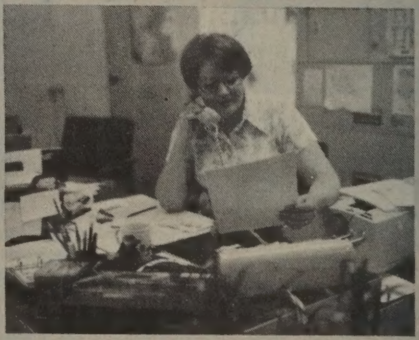
Having a double-height (8.5 by 5") module size, this user programmable, read-only memory utilizes either 256 by 4-bit or 512 by 4-bit fusible-link semiconductor devices (which must be ordered separately). The module's maximum capacity is 2048 or 4096 words of 16-bits (depending upon which device is used), and is expandable in 256 or 512 16-bit word increments (requires 4 chips per increment). This module is configured with 32 sockets for mounting memory IC devices of the user's choice. PROM chips (MRV11-AC, see below) can be supplied as an option. Board-mounted jumpers enable selection of the module's address. Power requirements are +5, ±5% at either 0.2A (0.4A max.) with no memory devices installed or 2.8A (4.1A max.) with 4K implemented.

Cat. No.	List	Cat.	Cash	Shipping Weight
MRV11-AA	**$175**	**$166**	**$159**	2 lbs.

PROM Chip for MRV11-AA Memory

Fusible Link Unprogrammed PROM Chip. 512 by 4-bit array.

Cat. No.	List	Cat.	Cash	Shipping Weight
MRV11-AC	**$40**	**$38**	**$36**	.25 lbs.



?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400 x 6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

*A comprehensive user's manual is provided with each memory option ordered.

DIRECT SALES CATALOG

LSI-11 AND PDP-11/03

4K Core Memory Module — MMV11-A

Included in this catalog to expand existing core-based systems (MOS memories are recommended for new systems), the MMV11-A is a quad-size (8.5 by 10″) double width read/write memory module containing 4096 words of 16-bits, with memory address selection circuitry for starting operation on any 4K boundary. Core memory provides non-volatile read/write storage for applications requiring protection against power losses.

Power requirements are +5V ±5% at 3A (7A max.) and +12V ±3% at 0.2A (0.6A max.). Voltage levels are identical to those required by the basic microcomputer modules.

Cat. No.	List	Cat.	Cash	Shipping Weight
MMV11-A	**$990**	**$941**	**$901**	10 lbs.

PROM-RAM Memory — MRV11-BA

This option is packaged as a double-height (8.5 by 5″) pc board. MRV11-BA comprises a 256-word by 16-bit MOS random access memory (RAM) and a 4K by 16-bit PROM memory implemented via eight sockets designated to hold up to eight 1K by 8-bit PROM chips. The PROM chips can either be industry-standard such as Intel 8708, or DIGITAL MRV11-BC chips (see below) can be ordered. The MRV11-BC chips are erasable by exposure to high intensity ultra-violet light and therefore can be reprogrammed.

The RAM can be used as scratch pad or stack memory by system software. This memory is volatile and is lost when power is removed. The RAM memory is refreshed by local circuitry on the MRV11-BA module. The PROM memory is non-volatile. Both PROM and RAM address space can be independently configured by customer placed jumpers.

Power requirements are +5V dc, ±5% at 0.58A (0.67A max.) and +12V dc ±5% at .34A (0.41A max.) without any PROMs installed. The current values increase to .62A (0.744A max.) and 0.5A (0.6A max.) respectively with eight MRV11-BC PROMs installed. The voltage levels are compatible with the other microcomputer modules. The −5V dc required for the PROMs is derived via a "charge-pump" circuit on the MRV11-BA module.

Software is available to convert absolute loader format programs into listing and paper tapes in PROM content format (see elsewhere in this section).

Cat. No.	List	Cat.	Cash	Shipping Weight
MRV11-BA	**$325**	**$309**	**$296**	3 lbs.

UV PROM Chips — MRV11-BC

These PROM chips plug into sockets on the MRV11-BA memory module. Each MRV11-BC PROM is one IC chip that provides 1024 (1K) words by 8-bits of memory. UV PROM chips are erased by high intensity ultra-violet light focussed through a clear quartz window on each chip. Two chips are required to provide 1K of 16-bit memory, thus eight chips implement a full 4K by 16-bit memory.

Cat. No.	List	Cat.	Cash	Shipping Weight
MRV11-BC	**$100**	**$95**	**$91**	1 lb.

handbook

MICROCOMPUTER HANDBOOK

The Microcomputer Handbook is our answer to the question, "Where can I find the answers to everything I've always wanted to know about the LSI-11, but didn't know where to look." Included are detailed chapters on the processor, options, installation, software, operating systems, peripheral devices, programming, maintenance and much, much more. The text covers the full range of LSI-11 systems from the LSI-11 board set to the PDP-11/03 microcomputer to the PDP-11V03 disk based microcomputer system. Truly, everything you want and need to know about the LSI-11 microcomputer is found between the two covers of this handbook!

LSI-11 AND PDP-11/03

INPUT/OUTPUT INTERFACES

LSI-11 and PDP-11/03 interface options permit interfacing most peripheral devices to the LSI-11 bus with ease. These options include:

- *DRV11 Parallel Line Unit*
- *DRV11-B Direct Memory Access*
- *DRV11-P Interface Foundation Module*
- *DLV11 Serial Line Unit*
- *DLV11-E Serial Line Unit*
- *AAV11-A D/A Converter*
- *ADV11-A A/D Converter*
- *KWV11-A Real-time Clock*
- *IBV11-A Instrument Bus Interface*

Parallel Line Unit — DRV11

This unit is a general-purpose, 16-bit parallel interface between the LSI-11 bus and the user's peripheral device.

Features:

- *16 diode-clamped data input lines.*
- *16 latched output lines.*
- *16-bit word or 8-bit byte data transfers.*
- *Complete device address decoding user-assigned.*
- *LSI-11 bus interface and control logic for interrupt processing and vectored addressing of interrupt service routines.*
- *Interrupt priority determined by electrical position along the LSI-11 bus.*
- *Control/status registers (CSR) compatible with PDP-11 software routines. CSR and receiver data buffer registers directly accessed via processor instructions.*
- *Plug, signal, and program compatible with PDP-11 DR11-C.*
- *Four control lines available to the peripheral device for output data ready, output data accepted, input data ready, and input data accepted logic operations.*
- *Can be used with TTL or DTL logic-compatible devices.*
- *Maximum data transfer rate of 90K words per second under program control.*
- *Maximum drive capability of 25 feet of cable.*
- *Two 40-pin H854 I/O connectors mounted on module.*
- *Board size is double-height (8.5 by 5").*
- *Power requirements are +5V dc ±5% at 0.85A (1.3A max.).*
- *Recommended interface cables are two BC08R, or two BC04Z, or two BC07D. Longest cable permitted is 25 feet.*

Cat. No.	List	Cat.	Cash	Shipping Weight
DRV11	**$210**	**$200**	**$191**	2 lbs.

Serial Line Units — DLV11, DLV11-E

These serial line units are universal asynchronous receiver/transmitter modules. They interface between the LSI-11 bus and serial devices. Two models are available: DLV11, and DLV11-E. DLV11-E differs primarily in that it offers full modem control but is not equipped for 20 mA current loop interfacing.

Common Features, All Models:

- *LSI-11 bus interface and control logic for interrupt processing and vectored addressing of interrupt service routines.*
- *Interrupt priority determined by electrical position along the LSI-11 bus.*
- *Control/status register (CSR) compatible with PDP-11 software routines. CSRs and receiver data buffer registers directly accessed via processor instructions.*
- *Jumper-selectable stop bits and data bits.*
- *A 40-pin H854 I/O connector mounted on module.*
- *Board size is double-height (8.5 by 5").*
- *Power requirements are +5V dc, ±5% at 1A (1.6A max.) and +12V dc ±3% at 150 to 180 mA (250 mA max.).*
- *Recommended interface cable to be used with these modules is BC05M (20 mA) or BC05C (EIA).*

Other Features, DLV11:

- *Either optically isolated 20 mA current loop or EIA interface.*
- *Jumper Selectable Baud Rates: 50, 75, 110, 134.5, 150, 200, 300, 600, 1200, 1800, 2400, 4800, 9600.*
- *Plug, signal, and program compatible with PDP-11 DL11-C.*

Other Features, DLV11-E,

- *Jumper or Program Selectable Crystal-controlled Baud Rates: 50, 75, 110, 134.5, 150, 300, 600, 1200, 1800, 2000, 2400, 3600, 4800, 7200, and 9600.*
- *Provisions for user-supplied external clock inputs for baud rate control.*
- *Receiver active sensing bit.*
- *Self-test mode.*
- *Signal, program and peripheral connector plug compatible with the PDP-11 DL11-E asynchronous line interface option.*
- *Parity error checking function.*
- *Full modem control with EIA interface.*

LSI-11 AND PDP-11/03

Direct Memory Access — DRV11-B

The DRV11-B is a general purpose Direct Memory Access (DMA) interface used to transfer data directly between the LSI-11 or PDP-11/03 system memory and an I/O device. The interface is programmed by the processor to move variable length blocks of 16-bit data words to or from specified locations in memory by means of the LSI-11 bus. Once programmed, no processor intervention is required. The DRV11-B can transfer up to 250K, 16-bit words per second and is capable of operating in burst modes, with byte addressing. The control structure also allows read-modify-restore operations.

The interface consists of five registers: Word Count Register (WCR), Bus Address Register (BAR), Control Status Register (CSR), Input Data Buffer Register (IDBR), and Output Data Buffer Register (ODBR). The module also includes bus transceivers and logic for interrupt requests, address control and protocol, and DMA requests.

The DRV11-B contains one switch bank used to assign an appropriate device address to the DMA interface and one switch bank to select an interrupt vector address in the LSI-11 memory where the DMA routine is stored. Two 40-pin connectors, H854, mounted near the edge of the module, facilitate the connection of the I/O device with the DMA, using any two of several cable assemblies available from DIGITAL. The quad-height (8.5 by 10″) module may be inserted into any available slot of the LSI-11 backplane or backplane extenders according to the rules and restrictions as described in the LSI-11 User's Manual supplied free with each order that calls for a basic processor-memory configuration.

Recommended cables to be used with this module are BC07D, BC08R, or BC04Z. For details of these cables see p. 45.

Power requirements are +5V dc ±5% at 1.9A (nominal).

Cat. No.	List	Cat.	Cash	Shipping Weight
DRV11-B	**$580**	**$551**	**$528**	5 lbs.

Instrument Bus — IBV11-A

The instrument bus is contained on a double-height (8.5 by 5″) pc board, and conforms to the IEEE Standard 488-1975 "Digital Interface for Programmable Instrumentation." IEEE 488 standardizes three primary characteristics associated with interfacing instruments such as DVMs, Programmable Power Supplies, Frequency Generators, etc. to computers. These areas are mechanical (connectors and cables), electrical (driver and receiver circuit parameters), and functional (complete definition of each signal line, exact protocol and timing relationship for message transfer, etc.). The bus may have TALKERS (instruments that transmit data) and LISTENERS (instruments that receive data). The IBV11-A can function as a TALKER or LISTENER and as a CONTROLLER initiating a test system by setting ranges, functions or parameters of instruments. Thus, instruments now conforming to IEEE standards may be purchased "off-the-shelf" and integrated into systems with the IBV11-A. See diagram.

PERIPHERAL INTERFACE MODULES (DLV11, DRV11, ETC)
PRINTERS, ETC
CONSOLE DEVICE INTERFACE (DLV11)
SERIAL LINE INTERFACE
FLOPPY DISK (RXV11)
CONSOLE TERMINAL

Features:

- *PDP-11 software compatible. RT-11, FORTRAN, and BASIC programming.*
- *LSI-11 bus interface.*
- *Instrument bus compatible with the IEEE 488-1975 standard.*
- *Supports instrument bus cable lengths up to 65.6 feet total.*
- *Fifteen devices (max.) can connect to the instrument bus.*
- *System functions such as: System CONTROLLER, LISTENER (receives data from instruments) and TALKER (transmits data to instruments).*

A 12-foot long interface cable is supplied with each IBV11-A ordered. This cable, BN11A-04, connects the instrument bus option to the first user instrument on the bus. When more than one instrument is to be added to the bus, cable BN01A-04 (12 feet) must be ordered for each additional instrument.

For further details on the instrument bus option request a free copy of the Instrument Bus User's Manual by contacting the Direct Catalog Sales Desk.

*Includes one BN11A-04 cable.

INPUT/OUTPUT INTERFACES (Cont'd)

Interface Foundation Module — DRV11-P

The DRV11-P is a versatile wire wrap module that contains the bus interface logic for operation with the LSI-11 or PDP-11/03 system and provides adequate board area for mounting and connecting integrated circuits (IC's) or discrete components. Because the bus interface logic is included, the module can be efficiently configured by the user to satisfy a variety of device interface logic applications.

A 40-pin connector, H854, conveniently mounted at the board edge, facilitates the connection to a device through several cable assembly types available from DIGITAL. See p. 45. Except for the bus interface connections, all signals and voltages are terminated to wire wrap pins for user connections. The bus control logic is provided with wire wrap test points for monitoring the internal signals. The test points are spaced at 0.1 in. between pins to allow a 40-pin connector to be inserted over the wire wrap pins for automated test functions.

Approximately 2/3 of the surface area on the module consists of plated-through holes, each connected to a wire wrap pin. The user can mount three different types of dual-in-line IC's or a variety of discrete components into the holes and connect the proper voltages and signals by wire wrapping leads on the board. The DRV11-P module can be inserted into any one of the available interface option locations of the LSI-11, PDP-11/03 backplane, or PDP-11/03 backplane extender unit. The module is quad-height (8.5 by 10"). Refer to the LSI-11 User's Manual supplied free with each order that calls for a basic processor-memory configuration for detailed installation information.

Recommended cables to be used with this module are BC07D, BC08R, and BC04Z. See p. 45.

Power requirements are +5V dc ±5% at 1A (not including user logic).

Cat. No.	List	Cat.	Cash	Shipping Weight
DRV11-P	**$275**	**$261**	**$250**	3 lbs.

Analog-to-Digital Converter — ADV11-A

The ADV11-A is a 12-bit analog-to-digital converter with built-in multiplexer. A sample-and-hold feature makes available 16 channels of A/D single-ended or 8 quasi-differential inputs that will convert an analog voltage from ±5.12V full-scale bipolar. The ADV11-A features a buffer register that allows data from one conversion to be transferred to the processor after a subsequent conversion begins. This buffering optimizes the throughput rate of the converter, permitting the ADV11-A to run at 25 kHz throughput to memory using an LSI-11 system operating under optimum programming with DMA refresh. The auto-zeroing technique — another feature — uses a patented design that measures the sampled signal with respect to the offset of its own internal circuitry and thus effectively cancels out its own offset error contributions to the measurement. There are also three built-in signals for self-testing. They may be connected through a BC08R-01 maintenance cable (not included) to any channel. A maintenance self-test plug is provided with the option for diagnostic verification. The test signals are two dc levels, and one bipolar triangular waveform. The bipolar triangular wave can be used with diagnostic software to produce a data base for extremely thorough and precise analog linearity testing.

Features:

- *16 single-ended or 8 quasi-differential channels.*
- *Input voltage range is ±5.12V bipolar full scale.*
- *Output resolution is 12-bits (1 part in 4096).*
- *Input impedance is 100 Megohms min.*
- *Input bias current is 40 nA max.*
- *Temperature stability is 5 ppm per °C for gain coefficient and 2 ppm per °C of full scale for offset coefficient.*
- *Power requirements are +5V dc ±5% at 1.75A and +12V dc ±5% at 350 mA.*
- *Quad-height (8.5 by 10") module.*
- *The recommended interface cables are BC04Z, BC08R or BC07D.*

LSI-11 AND PDP-11/03

Digital-to-Analog Converter — AAV11-A

The AAV11-A is a four-channel digital-to-analog converter that allows the user a wide variety of output voltage ranges that are jumper selectable. Each 12-bit D/A converter has its own holding register which can be separately addressed and can be written and read in either word or byte format.

Features:

- *Four mutually exclusive D/A converters.*
- *12-bit digital input per converter.*
- *Input binary-coded for unipolar mode, offset binary for bipolar mode.*
- *Single-buffered, word or byte operable, read/write digital storage.*
- *Bipolar output voltage range is ±2.56V ±5.12V or ±10.24V jumper selectable. Factory set for ±5.12V.*
- *Unipolar output voltage is either 0 to +5.12V or 0 to +10.24V jumper selectable.*
- *Resolution is 12-bits (1 part in 4096).*
- *Gain accuracy is adjustable.*
- *Temperature stability is 10 ppm per °C max. for gain coefficient and 20 ppm per °C max. of full scale for offset coefficient.*
- *Linearity is ±½ LSB.*
- *Output impedance is 1 ohm max.*
- *6 mA per converter drive capability.*
- *5 volts per sec. slew rate.*
- *Power requirements are +5V dc ±5% at 1.5A and +12V dc ±5% at 0.4A.*
- *Quad-height (8.5 by 10") module.*
- *Recommended interface cables are BC04Z, BC08R or BC07D.*

AAV11-A	**$900**	**$855**	**$819**	5 lbs.

Real Time Clock — KWV11-A

The KWV11-A is a programmable real-time clock that offers the user several methods for measuring and counting intervals or events from 1 microsecond to 650 seconds. It can also be used to synchronize external equipment. The KWV11-A is a 16-bit clock that will operate in one of four programmable modes and can be selected to operate at one of five crystal-controlled frequencies.

Features:

- *Programmable function modes are: single interval, repeated interval, external event timing, and external event timing from a zero base.*
- *Crystal controlled frequency of 1 MHz, 100 KHz, 10 KHz, 1 KHz, or 100 Hz.*
- *Timing accuracy is .01%.*
- *Power requirements are +5V dc ±5% at 1.75A.*
- *Quad-height (8.5 by 10") module.*

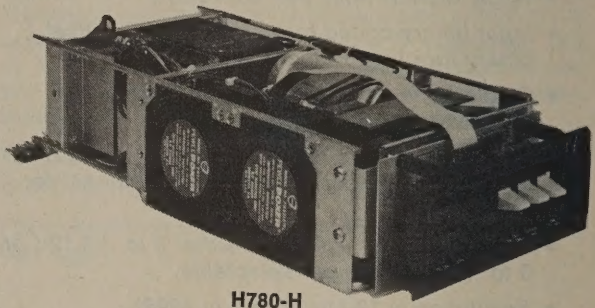
POWER SUPPLIES AND CONTROLLERS

Power Supply — H780-H

The H780-H power supply provides the voltage levels (+5 and +12V dc) required by LSI-11 microcomputer modules. Additionally, control functions such as power fail/restart sequences and line-time clock (LTC) generation are included. These latter functions are essential for the LSI-11 system and if the H780-H power supply is not used then Option KPV11 or equivalent must be incorporated in the system, see p. 47.

The power output of the H780-H is adequate to handle a fully implemented H9270 backplane (or the equivalent). The individual power requirements of each LSI-11 module option included in the system should be totalled to ensure proper operation.

The H780-H includes a 12″ power cable, terminated with a 6-lug connector strip that mates with the H9270 backplane's power terminal block and a 10″ bus signal cable that mates with the backplane's connector pins. A connector block on the rear of the H780-H is provided for connection to a primary power source. A line fuse and On/Off switch on the rear of the option provide overload protection and primary power control, respectively.



H780-H

Features:

- *+5V ±4%, 18A (max.) and +12V ±3%, 3.5A max.); combined dc power must not exceed 120W.*
- *Overcurrent/Short Circuit Protection — Output voltages return to normal after removal of overload or short. Current limited to approximately 1.2 times the required max. rating.*
- *Overvoltage Protection — +5V limited to +6.3V (approximately); +12V limted to +15V (approximately).*
- *Dual Primary Power Configuration — Can be connected for nominal 115V, 60 Hz or 230V, 50 Hz input power.*
- *Line Time Clock — A bus-compatible signal is generated by the power supply for the event (line time clock) interrupt input to the processor. This signal is either 50 or 60 Hz, depending upon primary power line frequency input to the power supply.*
- *Fans — Built-in fans provide cooling for the power supply and LSI-11 modules contained in an adjacent H9270 backplane.*
- *Power Fail/Automatic Restart — Fault detection and status circuits monitor ac and dc voltages and generate bus-compatible BPOK H and BDCOK H signals (respectively) to inform the LSI-11 system modules of power supply status. Automatic power signal sequencing is provided.*
- *Master Console — Console includes three switches (dc ON-OFF, HALT/ENABLE, and LTC ON-OFF) and three indicators (RUN, dc ON, spare).*
- *Backplane signals: BPOK H, BDCOK-H, BEVNT L, BHALT L, SRUN L.*
- *Slave Power Supply Control — H780-H can control a slave power supply.*

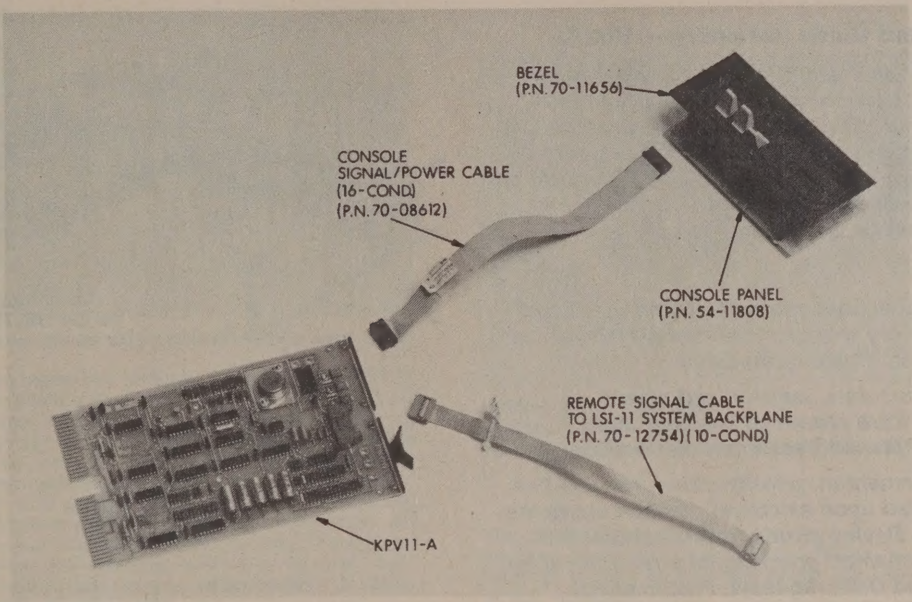
The H780-H measures 5½″ wide by 3½″ high by 14⅝″ long. It can be mounted adjacent to the H9270 backplane card cage assembly.

Cat. No.	List	Cat.	Cash	Shipping Weight
H780-H	$700	$665	$637	15 lbs.

DEALING DIRECT SAVES YOU $$$

The Cat prices are generally about 5% less than List price. Cash prices are about 4% less than Cat. Generally 9% savings in all!! To qualify for these discounts simply follow the rules for dealing direct with DIGITAL's Catalog Sales Desk — See p. 109 for details.

Power Controller/Sequencer — KPV11



Unless an H780-H power supply is used, the KPV11 option (or equivalent) must be incorporated in an LSI-11 system to provide proper power fail/restart sequencing and to provide a Line Time Clock (LTC) generator for the system. There are two cataloged models: KPV11-A, and KPV11-B. They differ in that -A has no termination resistors (so cannot be used as an LSI-11 bus terminator) while -B provides 120-ohm termination. Note that the -B module must be mounted in the backplane immediately following the last option module for the termination function to work.

The KPV11-A module can be mounted remote from the backplane and interconnected by an optional 70-12754 cable that plugs into the module and the backplane. No program control of the LTC function is possible with a remote installation, however.

An optional console can be added to the KPV11 to provide indicators and switches. The switches are dc ON/OFF, HALT/ENABLE, LTC ON/OFF. The indicators are RUN, dc ON, and a spare. The console is ordered by three catalog numbers: 54-11808 pc board assembly (includes switches and LED indicators), 70-11656 bezel, and 70-08612 console signal/power cable. Order by all three numbers.

AC power to this option must be provided via a center-tapped transformer, 24V ac user supplied. This ac input provides the dc power for the option, the 50 Hz or 60 Hz reference for the LTC function and is the power fail monitor signal for the power signal sequence circuit. An external clock frequency can be used as the LTC reference if need be. Note that the KPV11 is **not** a power supply. Suitable dc power (+5V and +12V) for the LSI-11 system must be provided by the system user.

The KPV11 module is a double-height (8.5 by 10″) pc board.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight

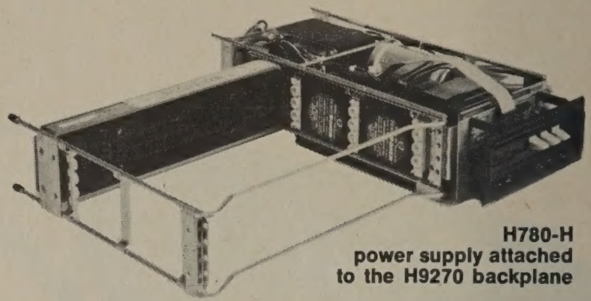
?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400 x 6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

MOUNTING HARDWARE AND ACCESSORIES

Backplane/Card Guide Assembly — H9270

The H9270 backplane/card guide assembly is a prewired LSI-11 structured backplane based on a standard DIGITAL four by four slot configuration. It is designed to be integrated into customer-packaged equipment. For LSI-11 systems that are to be rack mounted, a DDV11-B unit in an H909-C enclosure should be specified — or consider using a PDP-11/03 complete.

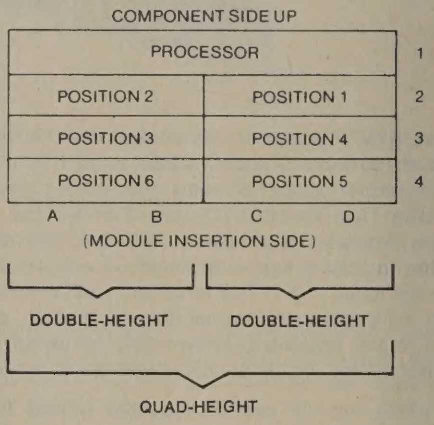


H780-H power supply attached to the H9270 backplane

Features:

- *Designed to accept one KD11-F and up to six I/O or memory modules or one KD11-R and up to four I/O or memory modules.*
- *All LSI-11 bus data, control, and power connections are pre-wired on the printed circuit backplane to each module location.*
- *Easily implemented, priority-structured I/O bus system based upon electrical position along the LSI-11 bus. Device priority levels established by a daisy-chained grant signal arrangement for interrupt and DMA requests. Placement of modules into the backplane automatically passes the bus grant signal to the next lower-priority device.*
- *Backplane integral with card guide assembly.*
- *Mounting capability in all planes for convenient "bolt-in" installation in a variety of customer designed equipment packages.*
- *Backplane size 11.15 by 2.8 by 11.0".*
- *Can be mounted adjacent to H780-H power supply.*

Cat. No.	List	Cat.	Cash	Shipping Weight
H9270	**$190**	**$181**	**$173**	6 lbs.



Module placement in H9270 backplane

Jumper Cable Assemblies

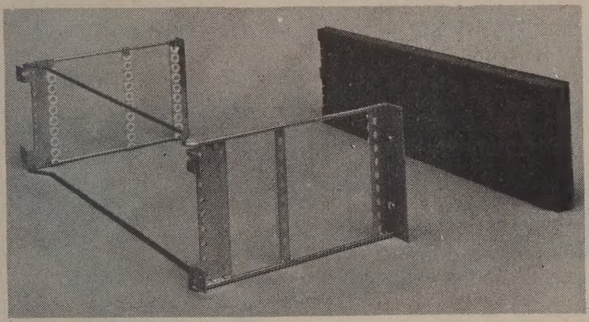
When assembling a two-backplane LSI-11 or PDP-11/03 system, a BCV1B jumper cable assembly and a 120-ohm terminator module TEV11 are necessary. BCV1B comprises two BC05L cables, one M9400-YE, and an M9401 backplane connector. To expand to a third backplane, one BCV1A jumper cable assembly must also be ordered. BCV1A comprises two BC05L cables and two backplane connectors M9400-YD and M9401. At least a 4-foot length difference must be maintained between the BCV1A-XX and BCV1B-XX. Jumper cables are equipped at each end with Berg 40-conductor connectors. Note: If Option REV11-A is part of the system, terminator module TEV11 is not needed.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight
BCV1A-XX*	Cable Assembly — 2′, 4′, 6′, or 10′	**$210**	**$200**	**$191**	2 lbs. (2′ only) 3 lbs. (4′-10′)
BCV1B-XX*	Cable Assembly/Terminator Assembly — 2′, 4′, 6′, or 10′	**290**	**276**	**264**	2 lbs. (2′ only) 3 lbs. (4′-10′)
TEV11	Terminator Module 120-ohm — Double-height (8.5 by 5″)	**110**	**105**	**100**	2 lbs.

*Add Suffix 02, 04, 06, or 10 to specify cable length.

LSI-11 AND PDP-11/03

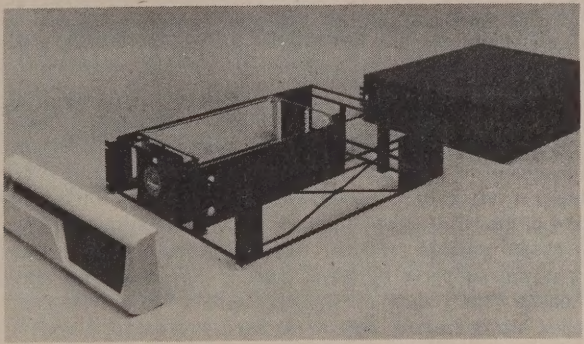
Nine by Six Slot Unit — DDV11-B



DDV11-B backplane shown with optional H0341 card cage.

The DDV11-B is an expanded version of the standard LSI-11 backplane for use when either more dedicated LSI-11 compatible logic space or non-LSI-11 compatible space for various other special purpose logic modules or both is required. A nine by four slot section (36 individual module slots) of this system unit is pre-bused specifically for LSI-11 bus signal, power and ground connections. The remaining nine by two slot section (18 slots) is provided with +5V dc, −12V dc and ground power connections only; this leaves the remaining pins free for use with any special logic modules to be used in conjunction with the LSI-11 family of modules and bus requirements.

An optional card cage, Type H0341, is also available to provide protection against physical damage to modules and to serve as a logic card guide. This card cage completely surrounds the slot side of the system unit and is shown in the photograph.



H909-C general purpose enclosure holds one DDV11-B backplane. For details see p. 94 in this catalog.

The DDV11-B without the card cage will fit into an H909-C module enclosure, see photo. H0341 is provided with H909-C. Details of this enclosure are covered elsewhere in this catalog.

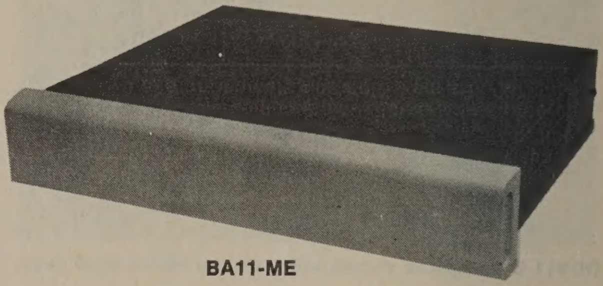
Expansion Boxes — BA11-ME

BA11-ME expansion box provides a most convenient means for expanding existing LSI-11, PDP-11/03, and PDP-11V/03 systems. Each expansion box includes an H9270 backplane, an H780 power supply, (which is capable of supplying sufficient power to all modules contained within the expansion box), and a rack-mountable enclosure. The enclosure is identical in size and design to that of the PDP-11/03. However, the switch/indicator control panel is not included (part of the H780 power supply in PDP-11/03 systems). The BA11-ME requires 115V rms, 50 or 60 Hz input power. Note the power supply is a "slave" unit. The system must have a master supply such as H780-H included. These expansion boxes are, therefore, only to be used to expand a system and not as a primary enclosure.



BA11-ME

LSI-11 AND PDP-11/03

SOFTWARE

Paper Tape Software Package — QJV10-CB

This package of utility software consists of an Editor, which allows the user to create and modify ASCII source files to be used as input to other system programs; an Assembler, which allows the user to translate assembly language programs into executable machine-coded programs; a Loader, which allows the user to input programs and data from various media into the machine; an On-line Debugging Technique (ODT) Package, which allows the user to debug assembled and linked programs; an Input/Output Executive, which allows the user to control the flow of data to and from devices under program control.

This software package requires 8K of memory and may be loaded using any DIGITAL paper tape reading device by interfacing it to the LSI-11. If you choose to load paper tape using a Teletype, purchase the LT33-DC from DIGITAL. The LT33-DC is a specially modified ASR-33 which is compatible with DIGITAL specifications, and is plug-compatible with the DLV11 serial interface.

Cat. No.	List	Cat.	Cash	Shipping Weight
QJV10-CB	**$110**	**$105**	**$100**	10 lbs.

PROM Formatter Program — QJV11-CB

This paper tape software program is used to facilitate the programming of both fusible link (MRV11-AA) and UV-erasable (MRV11-BA) PROM memory options. Before programming these memory options, a thorough understanding of the descriptions contained in Chapter 7 of the Microcomputer Handbook is advised. The reference manuals accompanying these options should also be studied. Free copies of the handbook are available for the asking by calling the Catalog Sales Desk.

Cat. No.	List	Cat.	Cash	Shipping Weight
QJV11-CB	**$30**	**$29**	**$27**	2 lbs.

LSI-11 Documentation/ Diagnostics — ZJV01-RB

One extensive literature package is included (no charge) with each LSI-11 purchase order that includes a processor. This package includes a user's manual, a processor handbook, a configuration and installation guide, a complete set of module schematics, and a set of diagnostics (tapes and program listings).

Additional LSI-11 documentation packages may be purchased if required.

MICROCOMPUTER HANDBOOK

Although a comprehensive user's manual is provided with all options for microcomputers, the Microcomputer Handbook is yours free. Over 900 pages. Call or write to the Catalog Sales Desk.

digital MODULES

DIRECT SALES CATALOG

INTRODUCTION

The industry's most extensive line of logic modules now available at low catalog prices.

These are the same modules used in DIGITAL's products and by hundreds of OEM's for computer interfacing, instrumentation, data gathering, and control. If you're in the business of designing, assembling, or testing logic subsystems, then purchasing the components through this catalog makes sense. You probably know what you need, the specification criteria required, and how to implement the design. In other words, you don't need a sales presentation by DIGITAL. We can pass that cost savings directly to you when you order through this catalog.

Featured are DIGITAL's M Series TTL-integrated circuit modules. The M Series line consists of modules ranging from basic and fundamental logic modules to self-contained computer interfacing modules. The impact of advancing technology can be seen in M Series evolution. From the beginning, M Series was TTL-integrated circuit-oriented; the current trend is toward MSI and LSI. The result is more complexity (and more built-in design solutions) per module. Many of the modules in this catalog amount to full-scale digital subsystems. The microcomputer is the latest result of the continuing technological advancements. As the leading supplier of logic modules, DIGITAL applied this micro concept to a family of modules designated LSI-11. See details starting on p. 36 in this catalog.

Also offered through the Direct Sales Catalog are A-Series analog modules and computer interface modules (for both the PDP-8 and PDP-11), computer systems, mounting hardware, power supplies, and cabling. All these support functions provide a total capability for designing, implementing, and assembling a modular system, small or large, at the lowest cost per function in the industry. P. 71 in this catalog explains the physical aspects of DIGITAL's modules.

LOGIC HANDBOOK

logic handbook
20

The Logic Handbook, known as the computer industry's "bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook!

DIGITAL MODULES—M SERIES

M SERIES MONOLITHIC MODULES

M Series high-speed monolithic integrated circuit logic modules employ TTL (transistor-transistor logic) circuits which provide high speed, high fanout, large capacitance drive capability, and excellent noise margins.

The M Series include a full digital system complement of basic modules which are designed with sufficient margin for reliable system operation at frequencies up to 6 MHz. Specific modules may be operated at frequencies up to 10 MHz. The integrated circuits are dual-in-line packages.

*Use M165 Buffer to convert open-collector output to standard configuration. See below.

†The output of each gate presents 2 unit loads when connected to another output. Thus when the outputs of all the gates on this module are connected together (to form a 16-input gate), the 3 gates present a load of 3 x 2 units to the fourth, totalling 6 units. This leaves 1 unit load capability.

‡BUFFER converts open-collector outputs (see M1131) to inverting and non-inverting standard outputs (10 of each).

§Symbol shown represents typical configuration.

General Characteristics

Power Supply Voltage	+5V dc ±5%
Logic Levels	Input / Output Logical LOW (0): 0.0 to 0.8V / 0.0 to 0.4V Logical HIGH (1): 2.0 to 3.6V / 2.4 to 3.6V Noise Margin — Worst Case: 400 millivolts
Input and Output Loading	The input loading and output drive capability of M Series modules are specified in terms of a specific number of unit loads. Typically, the input loading is one unit; however, certain modules may contain inputs which will present greater than one unit load. The typical M Series module output will supply 10 unit loads of input loading. However, certain module outputs will deviate from a 10-unit-load capability and provide more or less drive. Always refer to the individual module specifications to ascertain actual loading figures.
Unit Load	In the logic 0 state, one unit load requires that the driver be able to sink 1.6 milliamps (maximum) from the load's input circuit while maintaining an output voltage of equal to or less than +0.4V. In the logic 1 state, one unit load requires that the driver supply a leakage current of 40 microamps (maximum) while maintaining an output voltage of equal to or greater than +2.4V.
Timing	M Series pulse sources provide sufficient pulse duration to trigger any M Series flip-flop operating within maximum propagation delay specifications. Detailed timing information appears in the **Logic Handbook.**

DIGITAL MODULES—M SERIES

R/S FLIP-FLOPS

Module M203 is made up of 8 Reset/Set flip-flops. Each flip-flop, see diagram, comprises two 2-input NAND gates with cross-coupled outputs. The load/drive capability is indicated on the diagram.

D-TYPE FLIP-FLOPS

A D-type flip-flop functions to transfer each input (HIGH or LOW) on the D-line to the output when the threshold is reached on the leading (positive-going voltage) edge of the clock pulse (or a level change). Each flip-flop has independently gated data, clock, and dc set inputs. All, except M206, have independent dc resets. M206 has six flip-flops. One group of three has a common jumper-removable dc reset line. The other group has a permanent common dc reset. The load/drive capability is indicated on the diagrams, Fig. 1 or Fig. 2.

J-K FLIP-FLOPS

When both J and K inputs are HIGH, the J-K flip-flop, Fig. 1, complements (outputs change state) on the negative-going threshold of the clock pulse. A common reset (CLEAR) line is present on both M207 and M204, although three of the six flip-flops on M207 can be disconnected from the common line by removable jumpers. M202, see Fig. 3, has a 3-input AND gate on each of the J and K inputs. M204 has 2-input AND gates on both J and K inputs on one of the four flip-flops, Fig. 4, 3-input AND gates on both J and K inputs on another of the flip-flops, Fig. 2, and a 2-input AND gate on the J input of a third flip-flop, Fig. 3. One flip-flop does not have input gates, Fig. 1. The arrangement of these flip-flops permits counters to be formed (up to 16 per module) with simple connector wiring.

Load/drive capabilities are indicated on the diagrams, Fig. 1, 2 and 3.

DIGITAL MODULES—M SERIES

LOGIC AMPLIFIERS

Solenoid Drivers — M040, M060

These modules are designed to drive inductive loads such as relays and solenoids. (Use M050 for incandescent lamp loads.)

The M040, Fig. 1, contains two identical negative high-voltage driver circuits. Each consists of a 4-input positive NAND gate that controls a PNP transistor switch. The switch is capable of sinking up to 600 mA of current to ground from an external power supply of up to —70 volts. One terminal of the load device (relay, etc.) must be connected to the external voltage, the other to the drive output. The positive terminal of the external supply connects to the module ground.

The M060 module, Fig. 2, consists of four identical positive high-current driver circuits. Each circuit contains an inverting gate that controls an NPN transistor switch. A low level, at any input, will turn on the switch which is capable of driving loads up to 1.2 amps to ground with external power supply voltages of up to +75 volts dc.

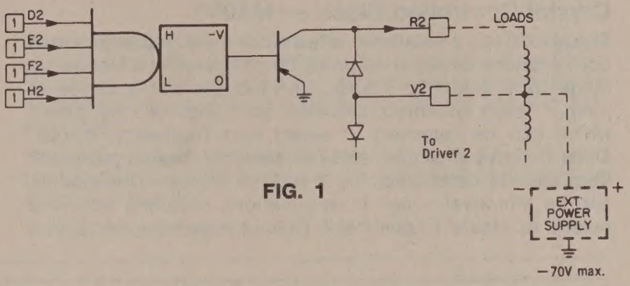

FIG. 1

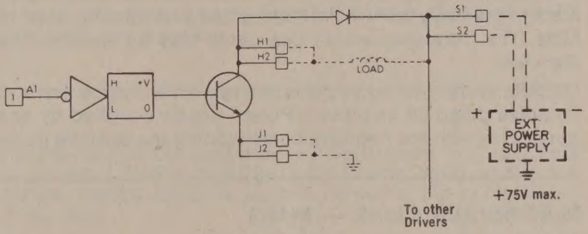

FIG. 2

Incandescent Lamp Driver — M050

The M050 contains twelve transistor inverters that can drive miniature incandescent bulbs such as those on an indicator panel. A LOW level on the input of the driver causes current to flow in the output. Do not use to drive inductive loads (relays, solenoids). Each output is able to drive 50 mA into an external load connected to any voltage up to —30 volts.

*50 mA, —30V max.

Cable Driver, Positive Level — M660

The M660 Cable Driver consists of three NAND gate circuits each of which will drive a 100-ohm terminated cable with M Series levels or pulses of duration greater than 100 ns. The output is not open-collector. It is a discrete transistor totem pole configuration similar to an IC gate providing high current drive in both the high and low directions. Outputs can sink 50 mA at a logic LOW, and can source 50 mA at a logic HIGH.

CLOCK MODULES

Crystal Controlled Clock — M4050

The M4050 is a crystal controlled clock module that provides both positive- or negative-going 80 ns pulses at a frequency range from 5 kHz to 5 MHz. The module has a series of jumper leads mounted between split lugs on the board which can be removed to select four frequency ranges. Once the proper range has been selected, the output clock frequency is determined by a plug-in crystal. The module can be effectively used in applications requiring accurate pulses at stable frequencies. Driving capability is 10 unit loads for the positive going and 9 for the negative going output pulses.

The frequency must be specified by the user and the appropriate jumpers will be removed at DIGITAL for the frequency ranges required.

The M4050 is available in several standard frequencies listed below. Be sure to list the frequency range desired when ordering. Standard frequency ranges available: 1.333 MHz; 2.0 MHz; 5.0 MHz.

Crystal Clock — M405

The M405 employs a crystal oscillator to provide a highly stable, precisely known frequency between 5 kHz and 10 MHz. The frequency within this range may be specified by the user.

Outputs at the two output pins are respectively positive and negative going 50 ns pulses. Pulses are time shifted by one gate delay with the negative pulse leading the positive pulse by a maximum of 20 ns. The output pulse width can be modified by the addition of an external capacitor to increase the output pulse width by approximately 1 ns per 2.5 pF of additional capacitance. Frequency stability is 0.01% of specified value between 0°C and +55°C. Standard stock frequencies are 1.333 MHz, 2 MHz, 5 MHz. Driving capability in unit loads is 10 for the positive going and 9 for the negative going pulses.

Multivibrator Clock — M403

The M403 is an RC Multivibrator Clock which produces standard 10-microsecond timing pulses, positive-going and negative-going, at repetition rates adjustable from 1 kHz to 50 kHz in three ranges. Internal capacitors, selected by jumper pin connection, provide coarse frequency control, while an internal potentiometer provides continuously variable adjustment within each range.

The clock circuit is enabled by a HIGH level at the ENABLE input. If a LOW level is applied, the clock output will time out.

Lower frequencies and wider pulse widths can be derived by adding external capacitance. Driving capability is 10 unit loads and 9 unit loads on positive-going and negative-going, respectively. ENABLE input is one unit load.

Multifrequency Crystal Clock — M404

The M404 clock contains a 2 MHz crystal oscillator and frequency dividers.

A HIGH on the CLEAR input (one unit load) clears the frequency divider and all outputs go LOW except the 2 MHz output, which is not affected. Maximum error from specified output frequency is 0.01% between 0°C and +55°C.

Output frequencies from the divider are 5, 10, 12.5, 50, 100, 125, 250, 500 kHz and 1 and 2 MHz.

Variable Multivibrator Clock — M401

The M401 Variable Clock is a stable RC-coupled multivibrator which produces standard 50 ns (positive or negative going) timing pulses at adjustable repetition rates.

Repetition rate is adjustable from 175 Hz to 10 MHz in five ranges. Internal capacitors, selected by jumper pin connections, provide coarse frequency control. An internal potentiometer provides continuously variable adjustment within each range.

A 0 to 10 volt control voltage will vary the frequency over about 30% of each frequency range.

A two-input OR gating input (each input is one unit load) is provided for start-stop control of the pulse train. A level change from HIGH to LOW with fall time less than 400 ns is required to enable the clock.

Output driving capability is 10 and 9 unit loads for the positive-going and negative-going pulses.

PULSE-SHAPING, DELAYING MODULES

Delay and Stretch — M3020

The M3020 Module contains two independent monostable multivibrators, each of which is activated by the output of its own integral Schmitt Trigger circuit. A low input transition on any one of the three inputs to the Schmitt Trigger circuit produces a positive output pulse after a preset adjustable delay and triggers the multivibrator. Minimum duration of a low pulse is 50 ns. The Schmitt Trigger input provides hysteresis which prevents the multivibrator from being triggered erroneously by noise signals at the input. Each trigger input is three unit loads.

When activated, the multivibrator produces a positive pulse at the output. The width of the pulse is variable from 50 ns to 50 sec and is selected by the external connections to capacitors mounted on the M3020 and by the variable Vcc available.

The delay time is adjustable from 50 ns to 7.5 ms using the internal capacitors and can be extended by adding an external capacitor.

Output drive capability is 10 unit loads.

Pulse Amplifier/Generator — M602

The M602 contains two pulse amplifiers which provide power amplification and transform level changes into pulses. A negative pulse output is produced when the input is triggered by a transition from HIGH to LOW on any one of three (per circuit) inputs to an integral OR gate. Each input is three unit loads. An internal capacitor is brought out to pin connections to permit the standard 50 ns output pulse to be increased to 110 ns (nominal). Drive capability is 30 unit loads per amplifier.

Schmitt Trigger — M501

The M501 is a Schmitt Trigger with variable thresholds and complementary positive logic outputs. Its applications are varied and include use as a: switch filter, pulse shaper, threshold detector.

The input voltage (not to exceed ±20 volts) is compared with the thresholds set on pins UPPER and LOWER, respectively. Output goes to LOW when the input rises above the UPPER THRESHOLD, having been below the LOWER THRESHOLD. Output rises to +3 volts when the input falls below the LOWER THRESHOLD, having been above the UPPER THRESHOLD. A second output is the complement of the first.

An integrator is provided on the input, allowing switches to be connected to the Schmitt Trigger with contact bounce effects eliminated. Two switch time constants are provided: a 7 ms time constant and a 3.5 ms time constant.

Integrating One-shot — M306

The M306 is a zero-recovery-time integrating monostable multivibrator with complementary outputs. The M306 has the ability to respond to an input even while in the active state, so that successive inputs above a preset frequency can postpone the return to the inactive state indefinitely.

An input pulse (2 unit loads) of 30 ns will trigger the M306.

The output pulse width is a minimum of 225 ns with maximum width limited only by capacitor leakage (40 sec is typical max.). Timing is adjusted by externally added capacitors and a multiturn potentiometer as the module. Drive capability is 11, and 12 unit loads on the positive-going and negative-going outputs, respectively.

Delay Line — M310

The M310 consists of a tapped delay line with associated circuitry and two pulse amplifiers. The total delay is 500 ns with taps available at 50 ns intervals. Applications are in timing pulse trains and pulse spacing.

The pulse amplifiers standardize the outputs of the delay line. The output of the pulse amplifier is a positive pulse whose duration is typically 50 to 200 ns. These amplifiers are not intended to be driven by TTL IC logic. Input to the delay line is three unit loads.

Outputs from the delay line must be connected to the input of the pulse amplifiers. Each pulse amplifier can drive 30 unit loads.

MISCELLANEOUS

Logic HIGH Source — M002

To hold unused M Series TTL gate inputs HIGH, the M002 provides 15 outputs at +3 volts (logic HIGH). Up to 10 unused M Series gate inputs may be connected to any one output.

The M002 can also be used as pull-ups for open-collector outputs in a wired-OR situation. If an M002 circuit is driven by a gate, it appears as two TTL unit loads or 3.2 mA at ground.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
M002	SSS	$15	$14	$14	See p. 115

MISCELLANEOUS (Cont'd)

Parity Circuit — M162

The M162 contains two parity detector circuits. Each circuit indicates whether the binary data presented to it contains an ODD or EVEN number of ONES by a HIGH level on specific output pins. Each input data line represents 4 unit loads. The ODD parity HIGH output can drive 6 unit loads. The ODD parity LOW output can drive 10 unit loads.

Cat. No.	Size	Circuits per Module	List	Cat.	Cash	Shipping Weight
M162	SSS	2	**$38**	**$36**	**$35**	See p. 115

MSI Module Board — W960

The W960 MSI Module Board is a single-height, standard length module board that can accommodate either two 14- or 16-pin dual-in-line package (DIP) integrated circuits (ICs) or one 24-pin DIP IC, either with or without sockets. All IC pin plated-through hole locations are identified with their associated board contact finger and are all brought out to the board contact fingers via printed circuit etching.

Cat. No.	List	Cat.	Cash	Shipping Weight
W960	**$9**	**$9**	**$8**	See p. 115

Universal Terminator Board — W964

The W964 Universal Terminator Board is a single-height, standard length module. It is an etched and drilled module that can be used for mounting user-selected and user-supplied discrete components to provide a variety of termination or voltage source circuits for up to 28 signal pins. Each signal pin can have two components connected to ground and one component connected to +5 volts. Any discrete component can be mounted on the W964 if the physical size is approximately the size of a ¼-W resistor or disk capacitor.

W964	**$11**	**$10**	**$10**	See p. 115

DECODERS AND MULTIPLEXERS

Decoders — M155, M161, M163, M230

The M155 Module decodes the binary value on the four input lines into one of sixteen mutually exclusive outputs when both STROBE inputs are LOW. The de-multiplexing function is performed by using the four input lines to address the output line. When either STROBE input is HIGH, all outputs are HIGH. Any output can drive 10 unit loads. All inputs present one unit load each.

The M163 Module consists of two binary-to-decimal decoder circuits, each of which accepts four inputs and provides 10 mutually exclusive outputs. The most significant 2^3 input can be used as an enable function to allow the circuits to be used as a binary-to-octal decoder. Outputs 0 through 7 will remain HIGH as long as input 2^3 is HIGH. Any output can drive 10 unit loads. Each input presents one unit load.

The M161 is a functional decoding module which can be used as a binary-to-octal or binary-coded decimal (8421 or 2421 codes) to decimal decoder. Three ENABLE inputs are provided for selective enabling of modules in decoders of more than one octal or decimal digit. In the octal mode, the bit 2* input should be connected to ground, which automatically inhibits the 8 and 9 outputs. A HIGH and a LOW version of each output is provided. All outputs can drive 10 unit loads each. Code inputs present one unit load each; ENABLE inputs 2 each.

The M230 converts a binary number to its binary coded decimal equivalent or a binary coded decimal number to its binary equivalent.

The maximum number that can be applied to the BCD input is 4095 which will result in all ones at the binary output. The maximum value of all ones applied to the binary input will result in the value 4095 at the BCD output. This converter utilizes a counting technique where the count frequency is typically 5 MHz. Therefore, the conversion time for the maximum number is typically 0.82 millisecond. The M230 is fully cascadable. All outputs can drive 10 unit loads. Each input presents 1 unit load.

Multiplexers — M1713, M1701

The M1713 Module is a 1-of-16 data selector/multiplexer. A 4-bit binary code defines which of the 16 data inputs will be connected to the output when STROBE is LOW. All inputs present one unit load. The output can drive 10 unit loads.

The M1701 Data Selector contains two independent dual 4-line to 1-line multiplexers on a single-height module. Each dual multiplexer has two groups of DATA INPUTS, two STROBES, two OUTPUTS and common SELECT inputs (2-bits). An OUTPUT becomes active for a DATA INPUT when the DATA INPUT is addressed by the SELECT lines and the corresponding STROBE brought LOW. All inputs present one unit load each. Outputs can drive 10 unit loads each.

DIGITAL MODULES—M SERIES

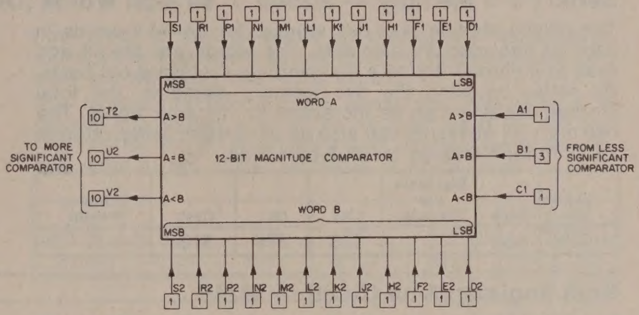
COUNTERS AND ARITHMETIC MODULES

Magnitude Comparator, 12-bit — M168

The M168 12-bit Magnitude Comparator performs magnitude comparison of two 12-bit words. One of the three outputs, A > B, A = B or A < B will be high to indicate the relative magnitude of the two binary input words.

The M168 Comparator may be cascaded to compare longer words. The outputs T2, U2 and V2 should be connected to the corresponding inputs of the next comparator which are A1, B1 and C1 respectively. The inputs of the first comparator must all be made a logical "1."

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
M168	SSS	$50	$48	$46	See p. 115



Up/Down Counters — M236, M237, M238

These three up/down counters are fully programmable; that is, the outputs may be preset to any state by entering the desired data at the DATA inputs while the LOAD input is LOW. The output will change to agree with the DATA inputs independently of the COUNT pulses. This feature allows the counters to be used as modulo-N dividers by simply modifying the count length with the preset inputs. These counters were designed to be cascaded without the need for any external circuitry.

The M238 Module consists of two identical 4-bit binary counters. Synchronous operation is provided by having all flip-flops clocked simultaneously so that the outputs change coincidentally with each other.

The outputs are triggered by a LOW to HIGH level transition of either COUNT input. The direction of the counting is determined by which COUNT input is pulsed while the other COUNT input is HIGH. All outputs can drive 10 unit loads. All inputs present one unit load each.

The M236 is a 12-bit synchronous binary up/down counter. It has a single control input that can switch the counting mode from up to down without disturbing the contents of the counter. Counting occurs on a positive transition of the COUNT IN line. This input must remain LOW for at least 50 ns before the count. Time between pulses can be no less than 50 ns. There is no maximum for pulse width or time between pulses. The maximum count frequency is 10 MHz. The ENABLE input permits counting while it is HIGH, and disables counting while it is LOW. All outputs can drive 10 unit loads. ENABLE and COUNT inputs present one unit load. LOAD and UP/DOWN control present three unit loads each. Data inputs present one load each.

The M237 is a 3-digit synchronous BCD up/down counter. It has a single control input that can switch the counting mode from up to down without disturbing the contents of the counter. Counting and ENABLE action is the same as described above for the M236. So, too, are load/drive capabilities.

Cat. No.	Size	Description	Counters per Module	List	Cat.	Cash	Shipping Weight
M238	SSS	4-bit binary	2	$44	$42	$40	See p. 115
M236	SSS	12-bit binary	1	58	55	53	
M237	SSS	3-digit BCD	1	58	55	53	

Counter/Register, 4-bit — M239

The M239 Module consists of three high-speed, four flip-flop stage elements. It provides 12-bit data storage or a serial counter with 12-BCD outputs. All inputs and outputs are TTL or DTL compatible with a drive capability of 10 unit loads (TTL). All inputs present one unit load each. Each of the 12 flip-flops has a data line input, and data information is entered by a COUNT/LOAD signal associated with each 4-bit stage. The output of the flip-flops assumes the logic state of the data inputs when the COUNT/LOAD input signal is HIGH. When the COUNT/LOAD signal is LOW, the data inputs are disabled, provided the clock inputs are inactive.

The Q_A output of each latch within a 4-stage element is connected to the toggle (T) input of the following latch. This allows the module to be used as a high-speed counter or serial-to-BCD converter.

The counters will accept frequencies of 0-50 MHz at the CLOCK 1 input, and the transfer of information to the outputs occurs at the positive-going edge of this clock pulse.

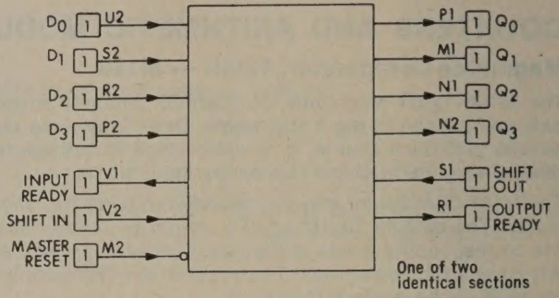
DIGITAL MODULES—M SERIES

MEMORY AND REGISTERS MODULES

Serial FIFO Memory — M2500 / 64 4-bit Words (Dual)

The M2500 Module provides storage for 64 4-bit words in each of two memory elements. The words are stored and read asynchronously on a first-word-in, first-word-out basis. By series coupling the two memory elements, the total storage capacity can be increased to 128 4-bit words. The two memory elements can also be paralleled, using external logic, to form storage for 64 8-bit words.

Cat. No.	Size	Elements per Module	List	Cat.	Cash	Shipping Weight
M2500	SSS	2	**$83**	**$79**	**$76**	See p. 115



One of two identical sections

Shift Register, 4-bit (Dual) — M245

The M245 Module consists of two 4-bit shift registers with both serial and parallel data entry capability. They are shift-right only registers; that is, the output data is shifted from A toward D.

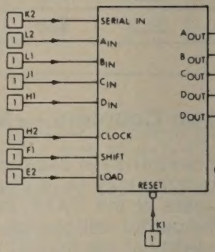
Three control modes are possible: serial shift right, parallel enter mode, and no change or hold mode. These control modes are chosen by inputs at the SHIFT and LOAD lines.

In the serial mode of operation, data present at the SERIAL INput, when the SHIFT input is High, is loaded on the Low-going edge of the CLOCK pulse.

In the parallel entry mode, data present at the data inputs A IN through D IN, when the LOAD line is High, is loaded on the Low-going edge of the CLOCK pulse.

The hold mode is created by holding both the LOAD and SHIFT lines Low. By doing this, the CLOCK pulse will have no effect on the output, regardless of data present at the SERIAL INputs or DATA INputs.

A RESET line has been provided for the registers which will clear the internal flip-flop circuitry.



One of two identical sections

Cat. No.	Size	Registers per Module	List	Cat.	Cash	Shipping Weight
M245	SSS	2	**$31**	**$29**	**$28**	See p. 115

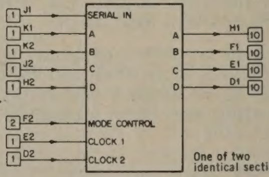
Shift Register, Multipurpose 4-bit (Dual) — M248

The M248 Module consists of two 4-bit Shift registers — multipurpose in the fact that they are capable of either serial or parallel entry, shifting right, or with simple external connections, shifting left.

When a logic LOW is applied to the MODE CONTROL input, a shift right operation is performed by clocking at the CLOCK 1 input. In this mode, serial data is entered at the SERIAL INput. CLOCK 2 and parallel inputs A through D are inhibited.

When a logic HIGH is applied to the MODE CONTROL input, it allows entry of parallel data through inputs A through D and CLOCK 2. This mode permits parallel loading of the register or, with external interconnection, shift left operation. In this mode, shift left can be accomplished by connecting the output of each flip-flop to the parallel input of the previous flip-flop; that is, D output to C input, etc., and serial data is entered at input D.

Two clock inputs are available which permit separate clock sources to be used for the shift right and shift left modes. If both modes can be clocked from the same source, the clock input may be applied to both CLOCK 1 and CLOCK 2. The transfer of information to the output pins occurs when the clock input goes from a logic High to a logic Low.



One of two identical sections

Tri-state Register, 4-bit (Dual) — M2001

The M2001 is a dual, 4-bit register module consisting of D-type flip-flops and input and output gating. It provides a total of eight bits of data storage and outputs to interface directly to system bus. All input and output signals are through edge board connector. Each of the module output contains a tri-state circuit capable of driving low-impedance, high-capacitance loads without the use of pull-up or interface components. The third state of the output is a high-impedance state and is selectable by logic levels to the input of the module. This state effectively disconnects the register outputs from the bus when no information transfer is required. Up to 128 of these outputs can be connected together in a wired-OR configuration. All inputs present one unit load. All outputs can drive 10 unit loads each.

DIGITAL MODULES—M SERIES

COMMUNICATIONS

Asynchronous Transceiver — M7390

The M7390 Asynchronous Transceiver Module is a complete serial-line interface for use with data communications equipment. Full-duplex operation, selectable baud rates, parity selection, and programmable word length features provide this module with considerable flexibility. It contains input/output level converters (for 20 mA current loop or EIA RS-232-C signals), parallel-to-serial and serial-to-parallel converters (for transmitting and receiving asynchronous serial data), and a crystal-controlled clock (for frequency stability) and frequency-divider circuitry (for variable transmission and reception rates) on a single module.

The transmitter section of the module accepts parallel data from either a terminal device or a computer, serializes it, formats it by appending selected control and error-detecting bits, and transmits this word serially.

The receiver section accepts serial data, converts it to parallel information, checks the received word for the correct control and error-detecting bits, and presents the parallel word at the output terminals of the module.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
M7390	EDS	**$218**	**$207**	**$198**	See p. 115

EIA Level Converter — M594

The M594 Module is used to convert the signal voltage levels between DIGITAL data processing terminal equipment such as the DF11 Modem and data communications equipment such as a Bell data set. The M594 provides circuits to convert a maximum of eight EIA or CCITT signal levels to eight DTL or TTL signals that are compatible with DIGITAL logic, and circuits to convert a maximum of seven DIGITAL, TTL, or DTL logic signal outputs to seven signals compatible with EIA or CCITT signal devices. Refer to EIA Standard RS-232-C for description of the selected signals.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
M594	SSS	**$94**	**$89**	**$86**	See p. 115

Optic-coupled 20 mA Loop Interface — M598

The M598 module contains a single-channel transmit and a single-channel receive circuit capable of converting the data signals between a Teletype® or similar current loop device and TTL or DTL compatible logic circuits. The data signals transferred through each of the module circuits are optically-coupled to provide a maximum of 1500V isolation between the current loop and the TTL logic. The transmitter receives serial TTL or DTL compatible levels and controls an output current loop with a maximum current of up to 80 mA.

The M598 module is supplied with jumper leads installed to operate as a passive element providing no current to the current loop device. By rewiring the jumper leads on the transmitter and receiver circuits, the module can be an active element and supply current from a +5V dc or −15V dc source.

Teletype® Transmitter — M707 / Teletype® Receiver — M706

The M707 Teletype® Transmitter is a parallel-to-serial teletype code converter self-contained on a double height module. This module includes all of the parallel-to-serial conversion, buffering, gating and timing (excluding only an external clock) necessary to transfer information in an asynchronous manner between a parallel binary device and a serial data line or teletype device.

The M706 Teletype® Receiver is a serial-to-parallel teletype code converter self-contained on a double height module. This module includes all of the serial-to-parallel conversion, buffering, gating, and timing (excluding only an external clock) necessary to transfer information in an asynchronous manner between a serial data line or Teletype® device and a parallel binary device.

The M707 and M706 Module include the necessary gating so that they can be used in a half-duplex system with each other. Device selector gating is also provided so that these modules can be used on the positive bus of either the PDP8/I or the PDP8/L.

M706	SDS	Receiver	**82**	**78**	**75**	

Optic Isolators Input/Output — M5864/M6865

The M5864 Optic Isolator Input Module and the M6865 Optic Isolator Output Module are used to electrically isolate and/or convert signal levels between peripheral devices and a TTL-compatible interface of a processor or controller system. The M5864 interconnects with the DR11-L Two-Word Input UNIBUS Interface. M6865 interconnects with the DR11-M Two-Word Output UNIBUS Interface.

Each module contains 20 optically-coupled circuits, each of which provides signal isolation between the input and output of the module. The data signals are optically-coupled to provide a maximum of 1500V isolation between the current loop and the TTL logic. The M5864 Input Module has 18 input circuits that accept levels from current-producing devices and convert these signals to TTL-compatible levels. Each TTL can drive 10 unit loads.

Two **output** circuits accept TTL-compatible levels from the interface and control the conduction of two floating transistor outputs whose outputs are capable of switching 8 mA current each.

Conversely, the M6865 Output Module has 18 output circuits that accept TTL-compatible levels from the interface to control the conduction of the 18 floating transistors in the optic couplers. Each TTL input is 10 unit loads while each of the transistor outputs is capable of switching 1.6 mA of current. As with the M5864, the data signals are optically-coupled to provide a maximum of 1500V isolation between the current loop and the TTL logic. Two **input** circuits receive controlling signals from current-producing devices and convert these signals to TTL-compatible levels.

ANALOG MODULES—A SERIES

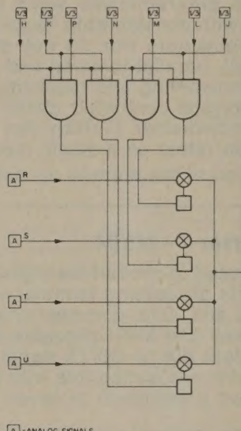
A Series analog modules support the M Series by providing a two-way translation between continually varying real-world voltage measurements and the digital realm of control and computation. The A Series emphasizes 10- and 12-bit performance in a family of mutually compatible functions — multiplexers, operational amplifiers, and A/D converters.

Analog Multiplexer — A123

The A123 Multiplexer provides 4 gated analog switches that are controlled by logic levels of 0V and +3V. The module is equivalent to a single-pole, 4-position switch, since the output terminals of each MOS FET switch are tied together. If all three digital inputs of a gating circuit are at +3V (or not connected), MOS FET switch is "closed." If any digital input is a 0V, the related switch is "open." Two switches should not be on at the same time. The analog switch can handle signals between +10V and −10V, with currents up to 1 mA.

The positive power supply must be between +5V and +15V, and at least equal to or greater than the most positive excursion of the analog signal. The negative power supply must be between −5V and −20V, and at least 10V more negative than the most negative excursion of the analog signal. The voltage difference between the two supplies must not be more than 30V.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
A123	SSS	$68	$65	$62	See p. 115



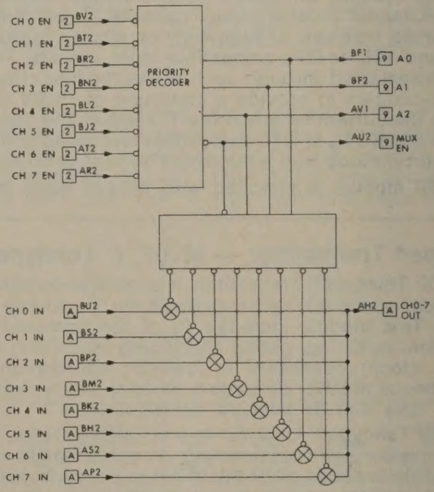
A = ANALOG SIGNALS (DO NOT CONNECT TO LOGIC LEVELS)

Analog Multiplexer, 8-channel — A126

The A126 is an eight-channel, high-impedance multiplexer module with each channel controlled by an associated enable input. The conduction or non-conduction of each channel is controlled by FETs and the channel outputs are connected together to a common terminal. Each channel is capable of switching bipolar (±12V) analog signals and is protected against random switching in the event of over-voltage and power down or loss of power conditions.

The enable inputs, associated with each channel, are priority encoded to ensure that only one channel is connected to the output at a time. Therefore, more than one channel enable input can be asserted at one time. Channel 0 is the highest priority and Channel 7, the lowest priority. The enable signals required are TTL or DTL compatible levels. Three TTL outputs are provided for identifying the selected channel, and one TTL multiplexer enable output indicates that one of the eight channels has been selected. The selected channel number is specified by an octal code on lines A0-A2.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
A126	SDS	$83	$79	$76	See p. 115

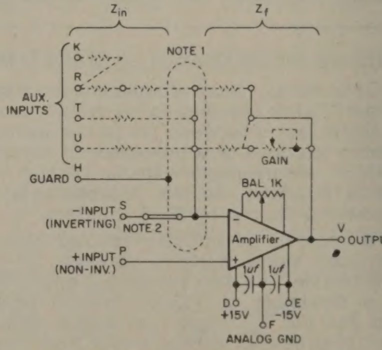


Operational Amplifier — A207

The A207 is an economical Operational Amplifier featuring fast settling time (5 μs to within 10 mV), making it especially suited for use with Analog-to-Digital Converters. The A207 can be used for buffering, scale-changing, offsetting, and other data-conditioning functions required with A/D Converters. All other normal operational amplifier configurations can be achieved with the A207.

The A207 is supplied with a zero balance potentiometer. Provisions are made on the board for the mounting of input and feedback components, including a gain trim potentiometer. The A207 is pin-compatible with the A200 Operational Amplifier. DC open loop gain, 670 ohm load is 15,000 min. and slewing rate is 3.5V μs min. Max. output is ±10V dc at 15 mA. Input voltage range is ±10V dc. Input impedance is 100K ohms min. with an input offset drift vs. temperature of 60 μV/°C. Temperature range is 0°C to 60°C.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
A207	SSS	$57	$54	$52	See p. 115



NOTE 1. Mounting holes are provided on the module so that input and feedback components can be added. Components shown with dashed lines are not included with the module.

NOTE 2. This jumper comes with the module. It may be removed to suit circuit requirements.

ANALOG MODULES—A SERIES

A/D Converter, 10-bit — A811

The A811 is a complete, 10-bit successive approximation, analog to digital converter with a built-in reference supply. Conversion is initiated by raising the Convert input to logic 1 (+4V). The digital result is available at the output within 10 microseconds. An A/D Done Pulse is generated when the result is valid. The A811 uses monolithic integrated circuits for control logic, output register, and comparator.

The input impedance of the A/D converter can be raised to greater than 100 megohms by adding an input amplifier module. A sample and hold amplifier module may also be included. The impedance of the converter with sample and hold is 10,000 ohms. Both options may be included simultaneously if high impedance and narrow aperture are both required.

Output format is parallel binary unipolar and the conversion rate is 100 kHz max. Operating temperature is 0°C to 50°C.

A/D Converter, High Speed, 12-bit Bipolar — A866

The A866 is a 12-bit general purpose analog-to-digital converter module which uses the successive approximation technique. The A866 is designed to accept unipolar or bipolar single-ended analog voltage as input and convert it to a 12-bit TTL-compatible, coded digital output. The coded digital output is parallel data and is available for application to a computer, terminal, display, or other logic device.

The selection of unipolar or bipolar and voltage range of the analog input is determined by jumper leads mounted on the module circuit board. The module has factory-installed jumpers that permit its use with bipolar, 10V full-scale extended-range inputs. By changing the jumper configuration, the user can select bipolar or unipolar, 5V or 10V full scale extended or non-extended input ranges.

The A866 can be used wherever fast, accurate analog-to-digital conversions are required.

The high input impedance (100 megohms) at the analog inputs minimizes the signal source loading, and the fast conversion time permits an encoding rate at the output of 16,000 conversions per second.

The digital output data, the output control and status signals, and the input control signals are all TTL-compatible.

Three outputs are provided to indicate the status of the conversion process. The BUSY output becomes high and remains high while the conversion process is active. The BUSY output becomes low 50 ns after the data is available at the output and remains low until the next command to start the conversion.

The DONE output is the complement of the BUSY level.

LOGIC HANDBOOK

The Logic Handbook, known as the computer industry's "bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook. Over 400 pages.

PDP-8 COMPUTER INTERFACE MODULES

PDP-8 AND PDP-11 / COMPUTER INTERFACE MODULES

Included in this section are some of the many modular interfaces designed to operate with DIGITAL's PDP-8 and PDP-11 computers. Like the other modules in this catalog, these interface modules are fully described in the Logic Handbook which is available to you free of charge. Contact Catalog Sales Desk.

PDP-8/A, 8/E, 8/F, 8/M (OMNIBUS) INPUT/OUTPUT MODULES

One-word Input, 12-bits — M1703

The M1703 provides, on a single quad-height module, a complete, self-contained interface that will input 12 bits of parallel TTL-level data to the PDP-8/A, 8/F, 8/E or 8/M OMNIBUS, under interrupt or programmed I/O control. The M1703 plugs directly into the OMNIBUS connector assembly, and the external device plugs into a 40-pin flat cable connector on the module itself. The module includes a device selector, an operation decoder, flags, and all control logic needed to request interrupt and respond to programmed I/O commands on the OMNIBUS.

Two-word Input, 24-bits — DR8-ED

The DR8-ED is a complete, general purpose input interface used to transfer two independent 12-bit, parallel data words from a user's peripheral device to a PDP-8 computer system. It is directly compatible with the OMNIBUS of a PDP-8/A, 8/E, 8/F or 8/M and is designed for installation in any available OMNIBUS slot except 1, 2 and 3 of a PDP-8/A. See diagram below.

The DR8-ED consists of a device selector and IOT decoder logic, interrupt request and skip control, and two 12-bit Data Buffer Registers (DBRs) — one for each data word, and two independent Control and Status Registers (CSRs). One CSR is assigned to each input data word and provides status and control information during word transfers.

The DR8-ED is designed for user application and requires a minimum of external hardware to implement into a PDP-8 system. Two 40-pin connectors are conveniently mounted near the edge of the board to permit either one or two devices to be easily connected using BC08R, BC07D, or BC04Z flat cable assemblies available from DIGITAL. These cables have mating connectors pre-mounted and can be supplied in any required length.

The interface module occupies one slot in the OMNIBUS or expander and is quad-height, extended-length, single-width board.

PDP-8 COMPUTER INTERFACE MODULES

INPUT/OUTPUT MODULES (Cont'd)

Two-word Output, 24-bits — M1705

The M1705 is an output interface module that allows the PDP-8 computer to transfer data to, and control the operation of, remotely programmable instruments of similar digital devices. The function is to perform parallel transfers, under program or interrupt control, of 12-bit data words from the computer to peripheral devices.

The M1705 consists of duplicate logic sections. Each section includes device selection logic to address an external device, an operations decoder to determine the type of interface operation, a 12-bit storage register to buffer the output data, interrupt control logic, and bus drivers/receivers to allow operation on the OMNIBUS. Connection to the device(s) is made via standard cables that plug into a pair of connectors on the M1705 module board.

M1705 is quad-height, extended length and single width.

Cat. No.	Description	Size	List	Cat.	Cash	Shipping Weight
M1703	12-bit Input	EQS	**$99**	**$94**	**$90**	See p. 115
M1705	13-bit Output	EQS	**200**	**190**	**182**	See p. 115
DR8-ED	24-bit Input	EQS	**325**	**309**	**296**	3 lbs.

Interface Foundation Module — M1709

The M1709 OMNIBUS Interface Foundation module is a generalized OMNIBUS interface card that is constructed to allow the user to build a custom design using integrated circuits (ICs). All required OMNIBUS interface logic, i.e., bus drivers/receivers, device selectors, and interrupt/skip circuitry is provided. IC mounting pads with wire wrappable pins are made available for custom circuitry. Pads accommodate all common types of Dual-In-Line Pack (DIP) ICs with up to 40 pins.

Connection to user-equipment is made via standard cables (BC08R, BC07D, or BC04Z) that plug directly into the M1709 module board. The module cable connector allows several M1709 modules or W966/W967 wire wrappable modules to be strapped together to accommodate more extensive designs.

Cat. No.	Size	List	Cat.	Cash	Shipping Weight
M1709	EQS	**$142**	**$135**	**$129**	See p. 115

Wire Wrappable Boards — W966 and W967

The W966 Wire Wrappable Module is a PDP-8/A, 8/E, 8/F, 8/M general-purpose module that provides for construction of custom interface designs using integrated circuits (ICs) and wire wrapped interconnections. Up to 42 of 14- and/or 16-pin ICs can be easily mounted (with or without 16-pin sockets) onto the etched IC pads. Sockets are not supplied with W966 but are with W967, see below. Each wire wrap pin can accommodate two separate leads of 30-gauge wire. Discrete components may also be directly soldered onto the IC pads. Position E39 features a pad that can be used for mounting a potentiometer.

The W967 Wire Wrappable Module is identical to the W966 except that featured on the board are 42 low-profile IC sockets which easily accommodate 14- and/or 16-pin ICs. Each wire wrap pin can accommodate two separate leads of 30-gauge wire. Discrete components may also be directly inserted into the sockets. Position E39 features a pad that can be used for mounting a potentiometer by removing the socket.

Both modules have 72 etched contact fingers at the handle end, with a wire wrap pin connected to each finger. When a W966 or W967 is located adjacent to another W966 or W967, signals can be bused from one module to the other via these contact fingers by using an H851 edge connector. One H851 can bus 36 signals; therefore, two H851s are required to bus all 72 signals. In addition, the standard 144 contact fingers at the connector end of the module are also connected to wire wrap pins.

An H854 40-pin I/O connector (male) is contained on the module to provide access to the "outside world;" it can accept any cable equipped with an H856 connector. Eighteen of these connector pins are connected to wire wrap pins.

HARDWARE/ACCESSORIES CATALOG

HARDWARE/ACCESSORIES CATALOG

If you have ever been confronted by the need to know detailed dimensional specifications on a system enclosure or wanted to know how to order a cabinet with a left side opening door instead of right, then the Hardware/Accessories Catalog is what you need. Hundreds of detailed charts, diagrams and photographs describe DEC hardware from complete system cabinets down to the last nut and bolt. Information on power supplies, wire wrap modules and tools, cables, system units and connector blocks is also presented in the same graphic manner.

Next time you need the services of a mechanical engineer for catalog hardware, check the Hardware/Accessories Catalog!

INTERFACE CONTROLS

Bus Output Interface — M1502

The M1502 is a versatile buffered output interface for up to 16 data bits, arranged in two 8-bit bytes. The module accepts data from the UNIBUS Data lines and stores it in a 16-bit register. Outputs are supplied both to a 40-pin flat ribbon connector and to the backplane. Open-collector output drivers with pull-up resistors are included on the module. Three flip-flops with Type D as well as Type RS inputs are provided as flags or synchronizing devices.

Although intended for parallel data output, this module may be used to drive indicators or small relays provided the voltage and current limits are not exceeded.

Up to four M1502 modules (64-bits) can be controlled by one M105 Address Selector Module, one M7821 Interrupt Control Module, and one M1500 Bus Gates Module.

Interrupt Control Module — M7821

The M7821 Interrupt Control Module is used with the interface logic of a device in the PDP-11 systems. The M7821 allows one or two devices that request an interrupt to gain access to the UNIBUS and become bus master for one or more data transfers. It also provides a vector control circuit to enable the selection of an address in memory at which the device subroutine is stored.

The module consists of an A Master Control, B Master Control, and Vector Control logic. Either of the two master control circuits can be used to generate a Non-Processor Request (NPR) for direct data transfers to memory (DMA) or a Bus Request (BR) which interrupts the current processor program. The A Master Control, however, is normally used for generating the NPR and the B Master Control for the BR. When used as a DMA Control, the A Master Control has the ability to perform a burst mode block transfer which allows more than one data cycle to be performed each time the device becomes bus master.

The B Master Control contains logic which can be implemented to allow the monitoring of the bus NPR line. This capability permits an NPR initiated by a device to be honored under certain conditions and the device to gain access to the bus even though a BR from another device has occurred prior to the NPR. A jumper lead can be removed from the module to disable this feature if the B half is used for NPR transfers.

The sequence of interrupt control signals between the M7821 and processor is similar for both the NPR and BR; however, an interrupt signal and vector address is generated after the device becomes master during a BR. The interrupt signal halts the operating program in the processor and the vector address specifies a location in memory where the starting address of the interrupt status routine and a status word is stored.

PDP-11 INTERFACE MODULES

INTERFACE CONTROLS (Cont'd)

Address Selector — M105

The M105 is used in PDP-11 device interfaces to decode the UNIBUS Address and Control lines. It provides gating signals for up to four device registers that indicate a register is being referenced and three control signals that indicate the direction for data flow.

Bidirectional Bus Interfacing Gates — M1500

This module provides gating arrangements useful for interfacing to the PDP-11 computer. It is designed specifically to provide additional gating and output drive when using the M1501-M1502 Input/Out modules. Applications are:

General-Purpose Use:

1. Providing general-purpose high fan-out drivers.
2. Providing a stage of inversion with high fan-out capability.

PDP-11 Interfacing:

1. ANDing SELECT signals with direction signals (OUT HIGH, OUT LOW) to load registers.
2. ANDing SELECT signals with direction signals (OUT HIGH, OUT LOW) to form set or reset pulses.
3. Receiving the INIT (initialize) signal from the UNIBUS and distributing it via high-power drivers.

Bus Input Interface — M1501

The M1501 contains 16 bus drivers for interfacing parallel input data to the PDP-11 UNIBUS. The module includes two control flags that can be used for interrupt request and enable. Data inputs from an external device enter a 40-pin flat cable connector mounted on the module itself. All inputs are diode-clamped to ground and +5V. Up to four M1501 Modules (64-bits) can be controlled by one M105 Address Selector Module, one M7821 Interrupt Control Module, and one M1500 Bus Gates Module.

Word Count and Bus Address Module — M795

The M795 Word Count and Bus Address Module can be used to provide two of the essential elements of an interface which connects Direct Memory Access (DMA) devices to the UNIBUS. This module contains two 16-bit counters. One counter is used to count the number of data transfers that occur. The other counter is used to specify sequential bus addresses for the sources and/or destinations of the data to be transferred. This module is used to interface direct memory access (DMA) devices to the UNIBUS.

UNIBUS Master Control — M796

The M796 UNIBUS Master Control Module provides the necessary logic to enable a peripheral device to perform a bus cycle on the UNIBUS to transfer data. In addition to controlling the four transfer operations (DATI, DATIP, DATA, and DATOB), the M796 module generates strobe and gating signals which transfer both address and data to and from the bus; handles de-skewing of data received from the bus; protects against data transfers to nonexistent devices by the use of time-out circuits; and provides a flip-flop and integrating one-shot that can be used by the customer for special control functions.

Any device in the PDP-11 system may have the capability of gaining control of the bus and, as bus master, of transferring data to and from other slave devices on the bus. This operation is performed independently of processor control and is usually referred to as Direct Memory Access (DMA). The logic necessary to gain control of the UNIBUS is provided by the M7821 Interrupt Control Module.

UNIBUS DRIVERS/RECEIVERS

UNIBUS Drivers — M783

The M783 consists of 12 low-leakage bus drivers to be used as an input interface to the UNIBUS of the PDP-11. Each driver is open-collector and is capable of sinking 50 mA with a collector voltage of less than 0.8V. The output high leakage current is 25 microamperes maximum. Pin D2 is a TTL output that allows additional drivers to be controlled by the single enabling gate (inputs H1 and F1). Pin U1 provides +3V as a source of logic HIGH for 10 TTL loads.

UNIBUS Drivers — M798

This module consists of 16 non-inverting UNIBUS drivers with pull-up resistors on the inputs. The module is used in device interfaces to minimize the loading effect caused by attaching several drivers to the same UNIBUS signal line, as in the case of a device containing multiple registers. Loading of signal lines on the UNIBUS is restricted to the equivalent of one UNIBUS receiver input and two UNIBUS driver outputs per device.

In addition, the M798 Module allows the UNIBUS to be driven by standard open-collector TTL gates. The inputs to each M798 driver circuit are pulled up to +5V through a 1-kilohm resistor.

UNIBUS Receivers — M784

The M784 consists of 16 high-impedance inverting bus receivers that are used as an output interface from the UNIBUS of the PDP-11. All inputs present one UNIBUS receiver load. Each output has a fan-out capability of seven standard TTL loads.

PDP-11 INTERFACE MODULES

UNIBUS DRIVERS/RECEIVERS (Cont'd)

UNIBUS Transceiver — M785

The M785 consists of eight drivers and eight receivers for use as a device interface with the PDP-11 UNIBUS. Pin U1 provides +3V and has an output capability of 10 TTL loads. Driver gates have open collectors and are capable of sinking 50 mA with a collector voltage of less than 0.8V. The output high leakage current is 2.5 μA maximum.

UNIBUS IC Receiver — 956

The 956 is a package of ten 14-pin, dual-in-line package (DIP) DEC8640 integrated circuits (ICs). Each IC comprises four 2-input NOR gates. The DEC8640 gates are especially suitable as UNIBUS receivers because of their high impedance characteristics and, hence, minimal loading on the bus.

UNIBUS IC Drivers — 957

The 957 is a package of ten 14-pin, dual-in-line package (DIP) DEC8881-1 integrated circuits (ICs). Each IC comprises four 2-input NAND gates. The DEC8881-1 ICs are especially suitable by UNIBUS drivers because of their capability to sink 70 mA with a collector voltage of less than 0.8V.

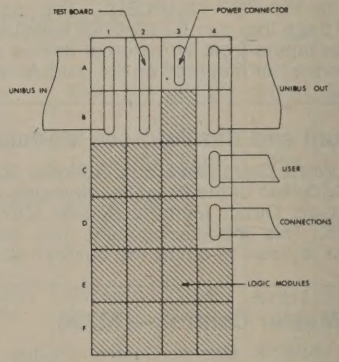
MEMORY INTERFACES

Direct Memory Access Interface — DR11-B

The DR11-B is a general purpose direct memory access (DMA) interface to the UNIBUS. The DR11-B, rather than using program controlled data transfers, operates directly to or from memory, moving data between the UNIBUS and the user device.

The interface consists of four registers: command and status, word count, bus address, and data. Operation is initialized under program control by loading word count with the 2's complement of the number of transfers, specifying the initial memory or bus address where the block transfer is to begin, and by loading the command/status register with function bits. The user device recognizes these function bits and responds by setting up the control inputs. If the user device requests data from memory or a UNIBUS device, the DR11-B performs a UNIBUS Data In transfer (DATI) and loads its data register with the information held at the referenced bus address. The outputs of this register are available to the user device. (This output data is buffered.) If the user device requests data to be written into memory, the DR11-B performs a UNIBUS Data Out transfer (DATO), moving data from the user device to the referenced bus address. (This input data from the user is not buffered.) Transfers normally continue at a user defined rate until the specified number of words are transferred.

The user is given a number of control lines allowing for flexible operation. Burst modes, read-modify-restore operations, and byte addressing are possible with the control structure.



DR11-B SYSTEM UNIT

The DR11-B is packaged in one standard System Unit allowing convenient incorporation into a PDP-11 system. A UNIBUS jumper module (M920) is supplied with the unit.

Connections to the user device are made through two M957 split lug cable boards or one M9760 cable connector board. The two M957's are supplied with the unit. Alternatively, an M920 can be used to jumper all user signals to an adjacent BB11 blank mounting panel, which can be used to hold some or all of the device logic. (Neither the additional M920 nor the BB11 is supplied with the unit.)

DECkit — Direct Memory Access — KIT11-D

A kit is basically a collection of logic modules assembled by the user to a prewired system unit, capable of performing a highly complex computer interface at low cost to the user.

The kits are defined in full or maximum configuration; i.e., the system unit wiring and the recommended complement of modules define the maximum I/O capability. If the user wishes, a lesser capability may be achieved by removing the appropriate modules.

The KIT11-D kit is designed specifically for the PDP-11 owner who requires high I/O data transfer rates. Full 16-bit data words can be transferred between the PDP-11 memory and an external device at UNIBUS speeds. The KIT11-D interface kit is physically and electronically compatible with all PDP-11 Family computers.

Parallel digital data is cabled directly to and from the interface kit; no additional logic or hardware is required to handle TTL-compatible data. External devices, such as lab instruments, mass storage units, display, pre-processors, and other CPUs can communicate conveniently with the PDP-11 memory.

The prewired backplane includes five unused module slots that can be used for custom logic such as level shifters and counters. Even modules for simple processing logic can be utilized in these unused slots.

KIT11-D is valuable to the OEM and the end-user. The predesigned interface concept frees the system designer from the complex problems usually associated with UNIBUS interfacing and the end-user has available the flexibility and speed of the UNIBUS for data transfers.

PDP-11 INTERFACE MODULES

DECkit — Direct Memory Access — KIT11-D (Cont'd)

Hardware/Accessories for DECkit11 Series

If mounting space is available in the existing PDP-11 processor mounting box, the DECkit can be installed there and jumpered to the existing panels by a UNIBUS Connector Module, M920*. Power is supplied from the processor power supply, or from an additional H720-E* Power Supply. If the Interface Kit is installed in a separate mounting rack, the UNIBUS is extended to that rack with a BC11A cable. This cable is available in various standard lengths from 2 ft. to 35 ft.; see elsewhere in this catalog.

Input/Output Cables

Type	Connectors
BC08R-XX[1]	H856 to H856[2]
BC04Z-XX[1]	H856 to open-ended[2]
BC07A-XX[1]	H856 to open-ended[2]
BC07D-XX[1]	H856 to open-ended[2]

Notes: [1]XX is length in feet.
[2]H856 is a female connector.

*Not supplied with option.

PARALLEL I/O INTERFACES

Instrument Remote Control Interface — M1623

The M1623 is a PDP-11 Interface Module containing the bus receivers and control logic needed to remotely program several types of digital voltmeters and programmable power supplies. All outputs to the instrument are through a 40-pin cable connector mounted on the module.

Some of the digital voltmeters and power supplies that can be interfaced by the M1623 are:

Digital Voltmeters

Fluke	Models 8200A, 8400A
Hewlett-Packard	Models 3450A, 3480A
Data Precision	Series 2000
Systron-Donner	Model 7110
Dana	Model 4800

Programmable Power Supplies

Fluke	Models 4210A, 4216A, 4250A, 4265A
Hewlett-Packard	Models 6130B, 6129B, 6131B

The user should first compare the interfacing requirements of his particular instrument with the capabilities of this module. Many instrument manufacturers have various control options which should be chosen carefully for compatibility with the M1623.

DVM Data Input Interface — M1621

The M1621 is a PDP-11 Interface Module containing all the bus drivers and control logic needed to input TTL-level information from several types of digital voltmeters and multimeters. All inputs from the instruments enter a 40-pin cable connector mounted on the module.

Some of the digital voltmeters and multimeters that can be interfaced by the M1621 are:

Fluke	Models 8200A, 8400A
Hewlett-Packard	Models 3450A, 3480A
Data Precision	Series 2000
Systron-Donner	Model 7110
Dana	Model 4800

The user should first compare the interfacing requirements of his particular instrument with the capabilities of this module. Many instrument manufacturers have various control options which should be chosen carefully for compatibility with the M1621.

UNIBUS Interface Foundation Module — M1710

The M1710 UNIBUS Interface Foundation Module is a general-purpose board that provides for the construction of custom interface designs using integrated circuits (ICs). The M1710 lets users build their own interfaces between a wide variety of peripheral equipment and any PDP-11 processor. All essential UNIBUS logic, such as device address selection, interrupt circuitry, and bus receivers and drivers, is provided on the lower portion of the module. The remainder of the board contains IC mounting pads with wire wrappable pins for custom logic designs. These pads accommodate combinations of all common type of DIP (dual-in-line-package) integrated circuits with up to 40 pins.

The M1710 is a versatile module, ideal for any type of application. The end user, such as a university laboratory familiar with ICs, will appreciate both the capabilities and cost-effectiveness of the module; no additional mounting panel or power supply is required. These features, coupled with the fact that the M1710 is capable of automatic wire wrapping, also should prove valuable to the Original Equipment Manufacturer (OEM) who requires many custom interfaces. And, in all cases, the module is easily a adaptable to accommodate any changes in interface design.

The M1710 plugs into any Small Peripheral Controller (SPC) slot, or DD11 Peripheral Mounting Panel. Additionally, it may be used in a system unit such as the BB11. Connection to user equipment is made via a cable connector mounted on the M1710 Module.

16-Bit Relay Output Interface — M1801

The M1801 is a PDP-11 Interface Module containing the bus receivers, relay drivers and control logic needed to program 16 isolated single-pole relay contacts. The relay contact outputs are available at two 40-pin cable connectors mounted on the module.

PDP-11 INTERFACE MODULES

PARALLEL I/O INTERFACES (Cont'd)

UNIBUS INTERFACES

One-word Input / One-word Output — DR11-C

The DR11-C is a general-purpose interface between the PDP-11 UNIBUS and a user's peripheral. The DR11-C provides the logic and buffer register necessary for program-controlled parallel transfers of 16-bit data between a PDP-11 System and an external device.

It is directly compatible with the PDP-11 UNIBUS and is designed for installation into any one of the available Small Peripheral Controller slots (SPC) of a DD11 System Interfacing Unit and PDP-11 processor unit.

The DR11-C interface consists of three functional sections: address selection logic, interrupt control logic and device interface logic.

The DR11-C is designed for user applications and requires a minimum of external hardware to implement into the PDP-11 system. Two 40-pin connectors are conveniently mounted near the edge of the board. These connectors permit the external device to be easily connected using BC07D, BC08R or BC04Z flat cables available from DIGITAL. These cables have the mating connectors premounted and are supplied in any specified length. See elsewhere in catalog.

Two-word Input — DR11-L

Similar in function to DR11-C except DR11-L transfers two independent 16-bit parallel data words from a user's peripheral device into the PDP-11 computer system.

Two-word Output — DR11-M

Similar to DR11-C except DR11-M transfers two independent 16-bit parallel data words from the PDP-11 computer system to a user's peripheral device.

SERIAL I/O INTERFACES

Asynchronous Serial Line Units

20 mA Current Loop — DL11-WA / EIA RS232C — DL11-WB

DL11-WA and -WB serial line units are character-buffered communications interfaces that perform two basic operations. First, receiving and transmitting asynchronous serial data. Second, providing a line frequency clock that is used to measure time. DL11-WA is designed to interface with a 20 mA current loop (teletype for example). DL11-WB is compatible with EIA RS232C.

As a receiver of serial data, the interface converts an asynchronous serial character from an external device into the parallel character required for transfer to the UNIBUS. This parallel character can then be gated through the bus to memory, a processor register, or some other device.

As a transmitter, a parallel character from the bus is converted to a serial character for transmission to an external device. Because the two data transfer units (receiver and transmitter) are independent, they are capable of simultaneous two-way communication. The receiver and transmitter each operates through two related registers; a control and status register for command and monitoring functions, and a data buffer register for storing data prior to transfer to the bus or external device. The line frequency clock uses a signal derived from an ac input voltage by the power supply to generate timed interrupts. The clock portion utilizes a register for command and monitoring functions.

Switch selections on the interface provide the flexibility needed to handle a variety of terminals. The user can, for example, set up switches such that DL11-WA can interface to a teletype or, by resetting switches, to a high speed CRT terminal. The user has a choice of speeds, character size, stop-code length, parity and error checking.

The SLU/RTC option is packaged on a quad height integrated circuit module which can be inserted into either a small peripheral controller slot in a processor or one of the SPC slots in a DD11-A peripheral mounting panel. All users input and output signals are connected to the interface by Berg Connector D. Power of +5V at 2.0A and −15V at 150 mA (EIA level between +9V and +15V at 50 mA) is required. A 70-8360-1 20 mA current loop cable is provided with the DL11-WA whereas a BC05C-25 EIA interface cable is supplied with DL11-WB.

For Programming and Operating Characteristics refer to PDP11 Peripherals Handbook.

ANALOG INTERFACES — AR11

The AR11 is a compact analog real-time module for use with the PDP-11 family of computers. Included on the module are a 10-bit A/D converter, two 10-bit D/A converters, a crystal controlled clock, scope control, a 16-channel multiplexer, and a sample and hold amplifier. Operation and selection of functions is under software control.

The complete AR11 subsystem electronics are contained on one single hex module that can mount in either of the two center slots of a DD11-B, C, or D system unit, or within the CPU mainframe assembly. All external connections are made via a Berg connector (supplied with mating plug) which is mounted on an outside corner of the module.

No external analog supply voltages are required. A unique dc to dc converter without transformer uses the +5V logic power to generate the high-quality positive and negative voltages needed by the AR11.

DIGITAL'S MODULAR SYSTEMS

DIGITAL Modules are single-height, double-height, or quad-height; standard length or extended length; and single-width or double-width. Each DIGITAL Module is a specific, fixed size; the size of each module is stated in the module description. DIGITAL single-height and double-height modules are standard length or extended length. DIGITAL quad-height modules are always extended length. Any DIGITAL Module can be single-width or double-width; most, however, are single-width.

The height and length requirement is determined by the quantity and size of discrete components and integrated circuits located on side 1 of the module, and to some extent, by the amount of etched printed circuitry on sides 1 and 2. The width requirement is determined by the distance the largest component extends from its mounting surface on the module.

All DIGITAL Module connector blocks accommodate any height (standard or double) module. The length of the modules to be used in a logic system must, however, be considered when connector block mounting drawers, system unit mounting drawers, or cabinets are being selected; enough space must be provided to accommodate the longest module. DIGITAL's standard length modules are 5.40/5.60 in. long and extended length modules are 8.84/9.04 in. long from the bottom of the contact fingers to the top of the attached handle(s).

All DIGITAL Module connector blocks accommodate any width (single or double) module. The width of the module must be considered, however, when any connector block module slot is occupied by a double-width module; this is because no module can be inserted into the module slot on the immediate right on the same connector block unless that connector block provides sufficient space between module slots for the mounted components, i.e., an H808 Module Connector Block. Normal module spacing is on half-inch centers.

Some DIGITAL Module connector blocks accommodate only single-height modules and others accept either single-height or double-height modules. No single connector block can accommodate quad-height modules; quad-height modules must be counted in mounting frames, system units, or module drawers comprising module connector blocks with slotted ends so that four module slots are arranged end to end (i.e., at least two H863 or H8030 Module Connector Blocks mounted end to end). Single-height modules are 2.417/2.452 in. high, Double-height modules are 5.167/5.202 in. high, and quad-height modules are 10.437/10.472 in. high.

See Hardware Section of this catalog for descriptions of the connector blocks and mounting frames/enclosures available from the Direct Sales Catalog.

LOGIC HANDBOOK

digital
logic handbook
20

The Logic Handbook, known as the computer industry's "Bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

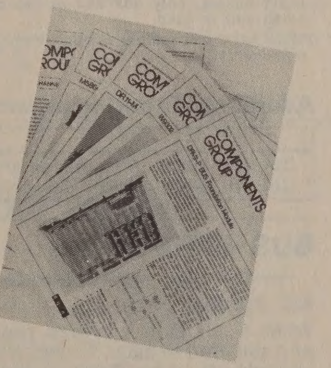
For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook!

MICROCOMPUTER HANDBOOK

digital
microcomputer handbook

The Microcomputer Handbook is our answer to the question, "Where can I find the answers to everything I've always wanted to know about the LSI-11, but didn't know where to look." Included are detailed chapters on the processor, options, installation, software, operating systems, peripheral devices, programming, maintenance and much more. The text covers the full range of LSI-11 systems from the LSI-11 board set to the PDP-11/03 microcomputer to the PDP-11V/03 disk based microcomputer system. Truly, everything you want and need to know of the LSI-11 microcomputer is found between the two covers of this handbook!

DIRECT SALES CATALOG APPLICATION NOTES AND PRODUCT BULLETINS



For the user who requires more complex and technical information on specific products or application ideas, the D.S.C. has a complete line of detailed product bulletins and application notes. These publications will tell you everything you should need to know about the particular product involved.

Over 50 different application notes and product bulletins are available for the asking.

HARDWARE AND ACCESSORIES
CONNECTORS AND MOUNTING HARDWARE

CONNECTOR BLOCKS

At the heart of DIGITAL's mounting systems are these Connector Blocks. Designed to make reliable connection with contact fingers on either one or both sides of pc modules, they can be classified as one-slot, two-slot or four-slot wide. The smallest block accepts one single-height module. The largest accepts eight single- or four double-height modules. Blocks can be mounted end-to-end for quad- or hex-height modules but blocks with slotted ends must be specified. Each slot has 36 contact positions though some blocks have contacts on only one side (for single-sided pc modules). Solder fork and wire wrap terminals are available. See table for details of each block.

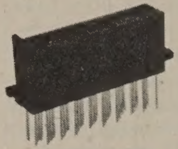


FIG. 1
Single height. Single slot. Wire wrap terminals. Shown is H807. H802 is physically similar.

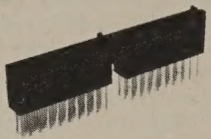

FIG. 2
Double height. Two slots. Wire wrap terminals. Slotted ends. Shown is H8030.

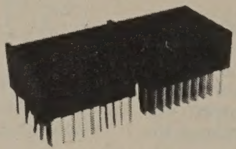

FIG. 3

CONNECTORS AND MOUNTING HARDWARE

19-INCH RACK MOUNTING PANELS

These 19-inch mounting panels mount on racks drilled or punched to standard EIA spacings. Each mounting panel comprises module connector blocks held together in mounting frames. The mounting frames are equipped with end-plates to protect the mounted modules that plug into the connector blocks. Various configurations are available as detailed in the table.

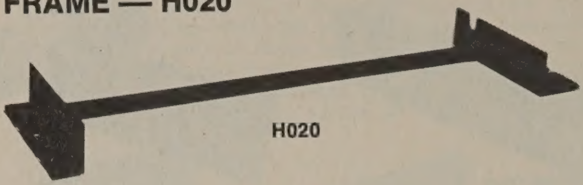
HARDWARE/ACCESSORIES CATALOG

If you have ever been confronted by the need to know detailed dimensional specifications on a system enclosure or wanted to know how to order a cabinet with a left side opening door instead of right, then the Hardware/Accessories Catalog is what you need. Hundreds of detailed charts, diagrams and photographs describe DEC hardware from complete system cabinets down to the last nut and bolt. Information on power supplies, wire wrap modules and tools, cables, system units and connector blocks is also presented in the same graphic manner.

Next time you need the services of a mechanical engineer for catalog hardware, check the Hardware/Accessories Catalog!

CONNECTORS AND MOUNTING HARDWARE

CONNECTOR BLOCK MOUNTING FRAME — H020

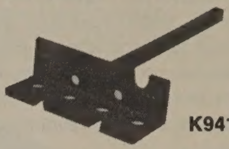


H020

Designed to accommodate a variety of module connector blocks, power supplies, and other components. Up to eight, H863, H800, H803 or H808 blocks can be mounted. Grounding lugs can be attached also. Fits 19″ racks.

Cat. No.	List	Cat.	Cash	Shipping Weight
H020	$17	$16	$15	1 lb.

MOUNTING BRACKET — K941
SUPPORT — K940



K941

K940

Up to four module connector blocks (H800, H803, H8030, H863, H808) can be mounted to any convenient surface with the K941 Mounting Bracket. K940 is a support that attaches to an enclosure to facilitate mounting K941.

Cat. No.	List	Cat.	Cash	Shipping Weight
K940	$9	$9	$8	1 lb.
K941	10	10	9	.3 lb.

STANDOFF END-PLATES (H021, H022) (H024, H025)

These end-plates attach to the ends of the H020 connector block mounting frame to provide strength to the frame, to protect the modules, and to provide a terminal block for dc power connections. Each end-plate occupies 5.25-inch of vertical mounting space. The H021 and H022 comprise a right and a left pair for standard length modules. Conversely H024 and H025 are for extended length module applications. The terminal block is three-section for +5V dc, −15V dc, and ground. It accepts spade and quick-connect terminals. Filtering capacitors (68 μF) are installed on H022 and H025.

H022

H021

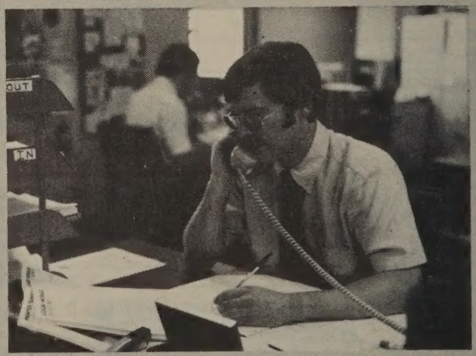
Cat. No.	List	Cat.	Cash	Shipping Weight
H021	$8	$8	$7	1 lb.
H022	22	21	20	1 lb.
H024	8	8	7	1 lb.
H025	22	21	20	1 lb.

HEX-SIZE SPC MOUNTING UNITS

The DD11-CK and -DK SPC (Small Peripheral Controller) mounting units are specifically designed to be mounted in BA11-L and BA11-K system expansion boxes. These mounting units differ from the DD11-A and -B models in that the -CK and -DK models will accept hex-size SPC interface modules unique to certain computer systems. Both come prewired with power cable harnesses compatible with the BA11-L and -K boxes.

Before ordering a DD11-CK or -DK, the user should be thoroughly familiar with the requirements of both the system unit and the computer system involved. Consult with the particular processor handbook for further information, or call the Catalog Sales Desk.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight
DD11-CK	4-slot System Unit	$330	$314	$300	6 lbs.
DD11-DK	9-slot System Unit	660	627	601	10 lbs.



?GOT A QUESTION?

CONNECTORS AND MOUNTING HARDWARE

FOUR-SLOT MOUNTING SYSTEMS

Four-slot Mounting Systems are designed to mount in the various Module System Enclosures available from DIGITAL. These systems comprise a mounting frame and up to three four-slot Module Connector Blocks mounted end-to-end. A fully complemented four-slot system unit provides mounting facilities for 24 single-height, 12 double-height or four quad-height plus eight single- or four double-height modules. See table for details of available units. An H014 Mounting Panel can be ordered to mount the four-slot units in a 19-inch rack.

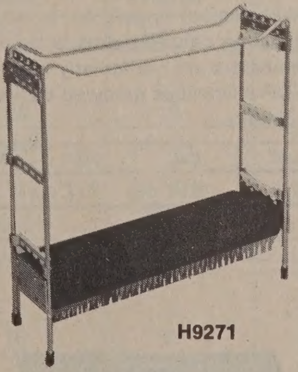
†Each System Unit is 16½″ long by 2¼′ wide by 1.59″ high (not counting terminals).

FOUR-BY-FOUR SLOT SYSTEM UNIT — H9271

The H9271 is a general purpose, four-wide by quad-height system unit mounted within an integral card cage assembly. The H9271 can be used as a general purpose system unit for non-standard LSI-11 configurations or for virtually any other application requiring a compact, easily mountable logic rack. The system unit is manufactured and machined in such a way as to facilitate mounting in any plane or axes.

The H9271 consists of two H863 slotted connector blocks placed end to end for the mounting of four quad-height, eight double-height, or sixteen single-height modules or any combination of the above totaling sixteen single slots. The blocks are mounted within a rectangular steel frame allowing easy access to the pin side of the blocks for wire wrapping, and the card cage surrounds the module insertion side of the logic rack.



H9271

Cat. No.	List	Cat.	Cash	Shipping Weight
H9271	**$94**	**$89**	**$86**	5 lbs.

MOUNTING PANEL — H014

Shown is the H014 panel on to which a four-slot system unit can be mounted. H014 is a flat panel with raised edges and a rectangular central hole to allow the System Unit terminals to be accessed. Mounts in a 19″ rack and occupies 5¼″ vertically. An H726-B power supply (see p. 98) may be used in a rack mountable configuration by using the H014.

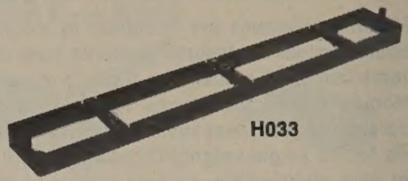
Cat. No.	List	Cat.	Cash	Shipping Weight
H014	**$23**	**$22**	**$21**	2 lbs.

HARDWARE AND ACCESSORIES

CONNECTORS AND MOUNTING HARDWARE

SYSTEM UNIT MOUNTING FRAMES — H033, H034

These are blank mounting frame predrilled to be equipped with Module Connector Blocks (H800-F, H800-W, H803, H808 or H863). Unit H033 can hold up to three blocks. H034 can hold six 4-slot blocks and three 1-slot blocks (H8030). The H034 is designed specifically to fit in a PDP-11 Processor Cabinet or a BA-11 Expansion Box. It provides module mounting space equivalent to two system units (e.g. two BB-11's). Shown is the H033. This unit can be mounted on a H014 Mounting Panel for installation in 19" rack systems — or it can be mounted in other enclosures. H033 is 2¼" wide by 16½" long by 1.59" high. H034 is 4.77" wide by 16.52" long by ¾" high.



H033

Cat. No.	List	Cat.	Cash	Shipping Weight
H033	$11	$10	$10	2 lbs.
H034	17	16	15	3 lbs.

NINE-SLOT SYSTEM UNITS — H934-CB, BB11-B

A nine-slot system unit comprises up to six four-slot wide Module Connector Blocks plus three one-slot wide blocks such as H8030. The blocks are mounted in groups of three: one four-slot wide, one one-slot wide, then one four-slot wide. A fully complemented system unit can hold 54 single-height or 27 double-height, or 9 quad-height plus 16 single-height (or 8 double-height) modules. H934-CB is an unwired unit for general use comprising six H863 eight-slot blocks and three two-slot blocks H8030. Each block has 36 contacts per slot and wire wrap pins. The BB11-B unit is dedicated to general PDP-11 interfacing and is prewired for UNIBUS power only. Both units have dimensions of 4.77" wide by 16.52" long by .75" high (not counting terminals).

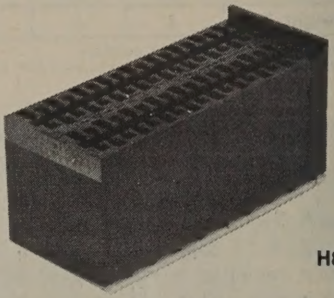
H934-CB

Cat. No.	List	Cat.	Cash	Shipping Weight
H934-CB	$150	$143	$137	8 lbs.
BB11-B	263	250	239	8 lbs.

EDGE CONNECTOR — H851

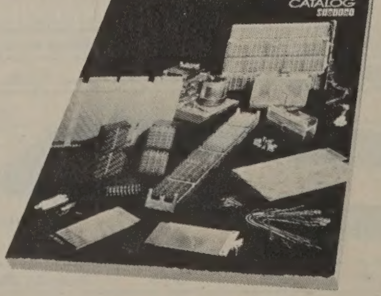
H851 is used to interconnect 36 top (Handle) contact fingers to 36 top (Handle) contact fingers on an adjacent module board. Interconnection between slots is by an in-place PC board. H851 connectors are particularly useful for the interconnection of PDP-8 Omnibus modules equipped with edge type connector fingers.

Cat. No.	List	Cat.	Cash	Shipping Weight
H851	$19	$18	$17	.25 lbs.



H851

HARDWARE/ACCESSORIES CATALOG



If you have ever been confronted by the need to know detailed dimensional specifications on a system enclosure or wanted to know how to order a cabinet with a left side opening door instead of right, then the Hardware/Accessories Catalog is what you need. Hundreds of detailed charts, diagrams and photographs describe DEC hardware from complete system cabinets down to the last nut and bolt. Information on power supplies, wire wrap modules and tools, cables, system units and connector blocks is also presented in the same graphic manner.

Next time you need the services of a mechanical engineer for catalog hardware, check the Hardware/Accessories Catalog!

CONNECTORS AND MOUNTING HARDWARE

BUS INTERCONNECTIONS/TERMINATIONS

These specially developed connectors are dedicated to UNIBUS or OMNIBUS applications. Check table for details.

CONNECTORS AND MOUNTING HARDWARE

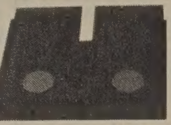
CABLE CONNECTORS

Each of these connectors comprise a unique printed wiring pattern on a PC board and means for connecting a cable to the PC board. The PC board is in fact the male half of a connector. It plugs into the slot of a standard Connector Block. Different cable types including Flat Ribbon, Flat Mylar, Flat Coaxial, Round Twisted Wire Pair, Round Coaxial and Multiconductor Round can be accommodated by specific connectors. Cables are connected by split-lug solder terminals, solderless clamp-type connector housings, or by PC soldering techniques to pads on the boards. Although certain of these connectors have been developed for specific applications, they are applicable to many other systems. Details of each connector are covered in the table. Typical connector configurations are shown pictorially to highlight the features that are available.

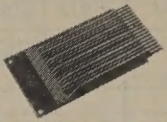
Typical Connector Configurations

Standard length. Single height. Current limiting resistors. Split-lug terminals. **M908**

Short length. Single height. Split-lug cabling terminals. Side entry cable. **M927**



Standard length. Double height. Top entry cabling. **M912**



Standard length. Solderless connector for flat shielded cable. **M953**

Extended length. Single height. E/W handle. Side cable entry. PC pads for cable connection. **M972**

NOTES FOR CONNECTORS

*10 ohm ¼ series resistors.

§3000 ohm ¼W ±5% series resistors.

¶Each signal line has a D664 diode in series.

**M933 is a power distribution board that can contain 20 resistor divider networks plus ground and voltage-in terminals. Space is allowed for 2 dc filter capacitors. All components are supplied by customer.

††35/35 means that there are two mutually exclusive circuits each of which has 35 common paths.

‡‡Including drain wires.

SL — Solder lug (split lug) mounted on board.
Sld — Cable conductors soldered directly to PC board.
Con — Solderless terminals in a connector housing.
TWP — Twisted wire pair. e.g. 36 TWP is 18 individually twisted pairs.

CONNECTORS AND MOUNTING HARDWARE

RECTANGULAR CONNECTORS

Three sets of connectors are offered each of which has a male and female half. The Board-to-Cable connectors, Fig. 1 and Fig. 2 have one half affixed to a PC board while the other terminates a flat cable. The Panel-to-Cable Connectors have one half, generally, mounted on a panel; the other half terminates a round cable. See table for details.

logic handbook
20

The Logic Handbook, known as the computer industry's "bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook!

CABLE ASSEMBLIES

Preassembled cables are available from DIGITAL. A variety of lengths, cable types and terminations can be bought from this catalog. Some have a dedicated application, others are general purpose. The connectors referred to in the table are described in detail elsewhere in this catalog.

GRIP CLIPS — H820, H821 — Make Your Own Patch Cords

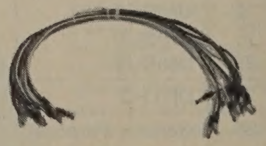
Designed to slip easily on to wire wrap pins, these grip-clip connectors are sold in 1,000 lot quantities. H820 fits wire wrap pins that accept 24 AWG; H821 for 30 AWG-designed pins. Tools H825 and H826 can be used to crimp these connectors to 24 or 30 AWG stranded wire. See tools elsewhere in this hardware section.

Cat. No.	Price per 1000			Shipping Weight
	List	Cat.	Cash	
H820	$53	$50	$48	1 lb.
H821	125	119	114	1 lb.

POWER PATCH CORDS — 914-7, 914-19

Equipped with Faston™ receptacles, Series 250 at each end joined by stranded IPVC wire these patch cords interconnect power supplies and mounting panels equipped with Faston male terminals.

™Faston is a trademark of AMP, INC.

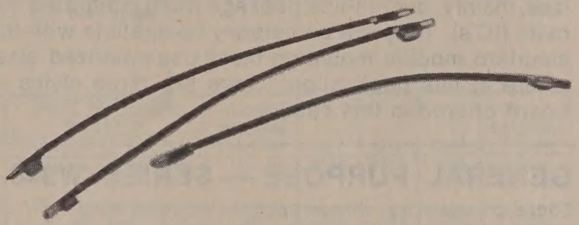


Cat. No.	Length	Qty. per Pkg.	Price per Pkg.			Shipping Weight
			List	Cat.	Cash	
914-7	7″	10	$5	$5	$4	1 lb.
914-19	19″	10	5	5	4	1 lb.

CONNECTORS AND MOUNTING HARDWARE

PATCH CORDS — FOR WIRE WRAP TERMINALS — 913, 915

Equipped with H820 or H821 grip-clip connectors to provide slip-on connections to wire wrap pins, these patch cords are available in assorted lengths and insulation colors. 913 fits wire wrap pins sized for 24 AWG; 915 for 30 AWG-designed pins. IPVC insulated stranded wire (24 AWG for 913, 26 AWG for 915) forms the patch cord.



Ordering Information

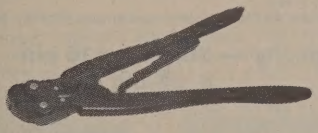
Add appropriate dash number for color/length required according to the following: 2-in Brown (-2); 3-in Brown/White (-3); 4-in Red (-4); 6-in Red/White (-6); 8-in Orange (-8); 12-in Orange/White (-12); 16-in Yellow (-16); 24-in Yellow/White (-24); 32-in Green (-32); 48-in Green/White (-48); 64-in Blue (-64); order dash number (-AF) for a 100 assortment as follows: 30(-3), 25(-6), 25(-8), 10(-24), 5(-32), 5(-64).

Cat. No.	Qty. per Pkg.	List	Cat.	Cash	Shipping Weight
913(-XX)	100	$28	$27	$25	1 lb.
915(-XX)	100	36	34	33	1 lb.

TOOLS

Battery operated wire wrap guns have rechargeable nickel-cadmium batteries. Supplied w/bit and sleeve set, and recharger.

Hand wrap tool is essential for service and repair work. Use for limited production applications, too.



Hand crimping tool to attach H821/H820 grip-clip connectors to 24/30 AWG stranded wire.

Hand unwrapping tool quickly removes wrapped wires.

Ordering Information

*See contact description on p. 80.

DEALING DIRECT Saves You $$$

The Cat prices are generally about 5% less than List Price. Cash prices are about 4% less than Cat. Generally 9% savings — in all!! To qualify for these discounts simply follow the rules for dealing direct with DIGITAL's Catalog Sales Desk — See p. 109 for details.

HARDWARE AND ACCESSORIES

WIRE WRAPPABLE MODULE BOARDS

Wire wrappable modules provide a convenient, low-cost method of producing prototype or limited runs of production modules with special circuitry that utilizes, mainly, dual-in-line package (DIP) integrated circuits (IC's). They are completely compatible with the standard module mounting blocks summarized elsewhere in this publication. There are three styles of board offered in this catalog:

- *Series W940 and W950 — General purpose.*
- *Series W9300 — High density, socket pins.*
- *Series W9500 — LSI-11 and PDP-11 (SPC) compatible.*

Both Series W900 and W9500 can be obtained with or without pre-mounted sockets. Series W9300 has special "socket pins" that allow IC's (or other component leads) to be plugged in without soldering.

GENERAL PURPOSE — SERIES W940 AND W950

These glass epoxy, wire wrappable modules have +5V dc power and ground bused (printed circuit etch tracks) to wire wrap pins at each IC location to facilitate connection of Vcc and ground to the appropriate IC wire wrap pin. The wire wrap pins each accommodate two 30 AWG wire wraps. All of these modules have etched and gold-plated contact fingers and all have handles attached.

NEW

LSI-11 AND SPC(PDP-11) COMPATIBLE W9500 SERIES

The W9500 Series of wire wrappable modules enable a user to easily configure special interface logic for the LSI-11 computer systems and small peripheral controller (SPC) logic for the PDP-11 computer system. In addition, these modules are suitable for any system requirements and consist of double, quad, and hex height sizes. Each module is available with or without premounted Dual-In-Line package (DIP) low profile sockets.

The W9500 Series modules will accept a variety of IC package types and discrete components. The printed circuit on each board connects the appropriate edge connector pins to the Vcc plane on side 1 of the board and the ground plane (GND) on side 2. The remaining edge connector pins terminate to a double row of wire wrap pins for user designated functions. Each of the modules also includes a 40-pin male cable connector to allow an interface cable to be attached to the module logic. The pins of the cable connector are also terminated to a double row of wire wrap pins. The quad and hex height modules are provided with a space where a 40-pin cable connector (labeled J2) can be inserted by the user. When a connector is not required, additional IC packages can be installed. Each board contains insulated standoffs to maintain the required clearance between adjacent modules and prevent shorting of wire wrap pins.

The wire wrap pins and components are mounted on side 1 of each module. Rows of predrilled holes accept IC packages with

WIRE WRAPPABLE MODULE BOARDS

LSI-11 AND SPC(PDP-11) COMPATIBLE W9500 SERIES (Cont'd)

pin spacings of 0.3, 0.4 and 0.6″. Universal areas on the W9500 Series modules are the areas which accept IC packages with standard pin spacings. These areas have four rows of predrilled holes spaced at 0.3, 0.4 and 0.6″. The W9500 hex height module also contains three areas which can accept IC packages with 0.3 and 0.4″ spacing.

SPC Compatible Modules — PDP-11

Cat. No.	Description	Size	Total* IC Capacity No. of Pins 14 or 16	24	40	Sockets Supplied 16-Pin	List	Cat.	Cash	Shipping Weight
W9500	Module with extractor bracket. No DIP sockets included. One 40-pin male cable connector mounted on board and space for additional 40-pin connector provided.	EHS	128 or 114	10	6	None	**$185**	**$176**	**$168**	5 lbs.

W9515	Same as W9512 except with premounted DIP sockets.	EDS	— 25	—	—	25	**120**	**114**	**109**	2 lbs.

*Note that the capacities listed allow one pair of holes between each DIP for mounting additional decoupling capacitors.

HIGH DENSITY, SERIES W9300

The W9301 and W9302 are wire wrappable modules suitable for user designed logic interface applications. The module accepts a variety of dual-in-line (DIP) integrated circuits (IC's) or discrete components which can be mounted to the module without the use of solder. The component or IC leads insert into specially designed socket terminals which have a wire wrap pin on the opposite end. The electrical interconnection of the wire wrap pins can be performed manually or by using automated wire wrapping techniques.

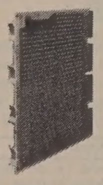
The W9301 board has four rows of 36 gold-plated contacts (18 contacts on each side of each row). Each contact is connected to a wire wrap pin by the board etch. A ground plane is etched on side 1 of the module and power (Vcc) plane is etched on side 2. Contact pin A2 of each of the four rows directly connects to the power plane, and contact pins C2 and T1 directly connect to the ground plane. The module is quad-height, extended length. A total of 68 decoupling capacitors are provided premounted between Vcc and GND at each main IC location. The module occupies 2 slots of a standard DIGITAL system unit. A 40-pin connector is mounted at the edge of the module to facilitate the attachment of a device cable assembly.

The W9302 board has six rows of 36 gold-plated contacts (18 contacts on each side of each row). Each contact is connected to a wire wrap pin by the board etch. A ground plane is etched on side 1 of the module and power (Vcc) plane is etched on side 2. Contact pin A2 of each of the six rows directly connects to the power plane, and contact pins C2 and T1 directly connect to the ground plane. The module is hex height, extended length. A total of 97 decoupling capacitors are provided premounted between Vcc and GND at each main IC location. The module occupies two slots in a standard DIGITAL system unit. Two 40-pin connectors are mounted at the edge of the module to facilitate the attachment of device cable assemblies.

Wire Wrap Terminals

All wire wrap terminals on side 2 of the modules are located on a grid of 0.1″ spacing to facilitate automatic point-to-point wire wrapping equipment. The connections to the pins are made using #30 gauge solid conductor insulated wire.

Total IC Complement



W9301

W9302

TABLE I IC TYPES

IC, Total Pins	Center Spacing (Inch.)
8	0.3
14	0.3
16	0.3
18	0.3
20	0.3
22	0.4
24	0.6
28	0.6
40	0.6

The W9301 module has three pin configuration areas assigned to 16-pin, 24- and 40-pin IC's. The 16-pin area consists of three rows of socket terminals and will accept a total of 47 IC's of the 8-, 14-, or 16-pin type and having a lead spacing of 0.3″. The 24-pin area will accept a total of 10 IC's with up to 24 pins per IC, and having a lead spacing of 0.3, 0.4, or 0.6″. The 40-pin area will accept a total of 11 IC's with up to 40 leads per IC having a lead spacing of 0.6″ or a total of 22 IC's with up to 16 leads per IC and having a lead spacing of 0.3″. Thus up to 79 IC equivalents (14- or 16-pin DIP) can be mounted on the module. Areas are provided on the board for mounting DIP's with a center spacing of 0.3, 0.4, or 0.6″. Table I lists the acceptable IC types and pin spacing.

The W9302 module has three pin configuration areas assigned to 16-, 24-, and 40-pin IC's. The 16-pin area consists of three rows of socket terminals and will accept a total of 65 IC's of the 8-, 14-, or 16-pin type and having lead spacing of 0.3″. The 24-pin area will accept a total of 15 IC's with up to 24-pins per IC, and having a lead spacing of 0.3, 0.4, or 0.6″. The 40-pin area will accept a total of 17 IC's with up to 40 leads per IC and having a lead spacing of 0.6″ or a total of 34 IC's with up to 16 leads per IC and having a lead spacing of 0.3″. Thus up to 114 IC equivalents (14- or 16-pin DIP's) can be mounted on the module. Areas are proprovided on the board for mounting DIP's with a center spacing of 0.3, 0.4 or 0.6″. Table I lists acceptable IC types and pin spacing.

Cat. No.	Size	DIP Capacity 8-, 14- or 16-Pin	24-Pin	40-Pin	List	Cat.	Cash	Shipping Weight

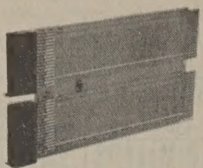
W9302	EHS	65	15	17†	**295**	**280**	**268**	4 lbs.

*Or 22 additional 16-Pin DIP's with 0.3″ lead spacing.
†Or 34 additional 16-Pin DIP's with 0.3″ lead spacing.

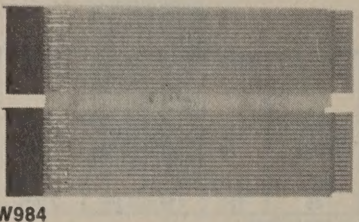
EXTENDER, COLLAGE AND BLANK BOARDS

MODULE EXTENDER BOARDS



W900

Used in systems comprising extended length modules to extend a double-height, 72-pin module with +5V dc power at contact fingers AA2 and BA2 and with ground at contact fingers AC2, BC2, AT1, and BT1, i.e., most double-height M-Series modules. This is a multilayer module: layer 2 is the ground plane and layer 3 is the +5V dc power plane.



W984

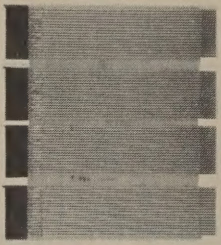
The same as W983 except the W984 is an extended length module extender board and should be used to extend a system module located beside one, or between two, extended length modules.

W980

Used in systems comprising standard length modules to extend a single-height, 18-pin (one side only) module, i.e., most A-, K-, and W-Series modules. None of the contact fingers are interconnected.

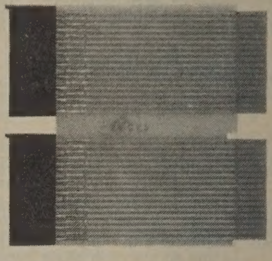
W982

Used in systems comprising standard length modules to extend a single-height, 36-pin module, i.e., single-height M-Series modules. None of the contact fingers are interconnected.



W987

The same as W984 except the W987 is a quad-height module extender board and should be used to extend quad-height (144-pin) modules.



W983

Used in systems comprising standard length modules to extend a double-height, 72-pin module, i.e., double-height M-Series modules. None of the contact fingers are interconnected.

Cat. No.	List	Cat.	Cash	Shipping Weight
W900	$130	$124	$118	2 lbs.
W980	17	16	15	½ lb.
W982	21	20	19	½ lb.
W983	32	30	29	½ lb.
W984	37	35	34	1 lb.
W987	59	56	54	2 lbs.

COLLAGE MODULE BOARDS

Collage module boards provide a convenient, low-cost method of producing prototype or limited runs of production modules with special circuitry that uses 14- or 16-pin dual-in-line package (DIP) integrated circuits (IC's) with or without wire wrap sockets and/or solder sockets. These different configurations are described in the table that follows. Collage module boards are completely compatible with the standard module mounting blocks. These glass epoxy modules have +5V dc power and ground bused (printed circuit etch tracks) to plated-through holes at each IC location to facilitate connection of Vcc and ground to the appropriate IC pin.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight
W968	Accommodates up to seventy-two 14- or 16-pin DIP IC's with or without wire wrap sockets and/or solder sockets.	$74	$70	$67	3 lbs.
W969	Same as W968 except accommodates 36 IC's.	37	35	34	1 lb.
W979	Same as W968 except accommodates 18 IC's.	29	28	26	½ lb.

BLANK MODULE BOARDS

Blank module boards provide a convenient method of breadboarding (mounting) experimental or prototype circuits, and they provide a low-cost method of producing limited runs of production modules with special circuitry. They are completely compatible with the standard module mounting blocks. These glass epoxy, blank module boards have etched and gold-plated contact fingers and all have handles supplied.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight
W930	Bare board wih 36 feed-through eyelets. Printed circuit etching from the eyelets to the contact fingers.	$11	$10	$10	¼ lb.
W970	Bare board with 36 plated-through holes in the printed circuit etching to the contact fingers.	11	10	10	¼ lb.
W971	Same as W970 except double-height and has 72 plated-through holes and two handles.	15	14	14	¼ lb.
W972	Copper-clad on both sides.	10	10	9	¼ lb.
W9720	Same as W972 except extended length.	9	9	8	½ lb.
W9721	Same as W9720 except double-height and has two handles.	17	16	15	½ lb.
W9722	Same as W9720 except quad-height and has four handles.	31	29	28	1 lb.
W973	Same as W972 except double-height.	17	16	15	½ lb.
W974	Perforated board with 36 plated-through holes in the printed circuit etching to the contact fingers.	10	10	9	¼ lb.
W975	Same as W974 except double-height and has 72 plated-through holes and two handles.	21	20	19	¼ lb.
W990	Bare board with 18 split-lug terminals. Printed circuit etching from the split-lugs to the contact fingers. This board has contact fingers on one side only.	8	8	7	¼ lb.
W991	Same as W990 except double-height and has 36 split-lug terminals and two handles.	13	12	12	½ lb.
W992	Same as W972 except copper-clad on one side only and has contact fingers on one side only.	6	6	5	¼ lb.
W993	Same as W973 except copper-clad on one side only and has contact fingers on one side only.	9	9	8	½ lb.
W998	Same as W974 except has 18 plated-through holes and has contact fingers on one side only.	6	6	5	¼ lb.
W999	Same as W975 except has 36 plated-through holes and has contact fingers on one side only.	10	10	9	¼ lb.

MISCELLANEOUS

MODULE HANDLE — 937

The 937 (90-08337-08) is a package containing 25 blank, gray module handles and the eyelets to attach them to modules. These blank handles are generally user-attached to prototype or limited-production run modules that utilize blank copper-clad or wire wrappable modules. The handles are compatible with the handles of all DIGITAL's standard A-, K-, M-, and W-Series modules. They have two 0.128″ diameter mounting holes spaced 2.00″ center-to-center.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight (per pkg.)
937	Package of 25 Blank Module Handles	$8	$8	$7	¼ lb.

MODULE HANDLE EXTENDER — H850

The H850 Module Handle Extender mounts over the handle of a single-height, single-length module and physically extends the length to make a single-length module congruous with extended length modules.

The H850 is manufactured from durable, U.L. Standard No. 94 recognized material and is sized to fit over DIGITAL's standard module handle. It is sold in lots of ten.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight (per pkg.)
H850	Package of 10 Module Handle Extenders	$15	$14	$14	¼ lb.

MODULE HOLDER CLIPS — H852, M853

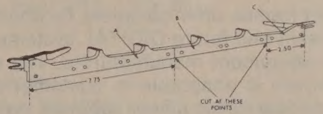
The H852 and H853 Module Holder Clips are used to maintain rigidity of the modules in a system. Each module holder clip fits over the top (handle end) of modules of the same length in adjacent slots of a system unit. The H852, a ribbed type, fits between handles of modules in the same connector block; the H853, a nonribbed type, fits between handles of modules in adjacent (end-to-end) connector blocks.

The H852 and H853 are manufactured from durable, plastic material that is nonconductive. Sold in lots of 25 each.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight (per 25 lot)
H852	Package of 25 Module Holder Clips (ribbed type)	$9	$9	$8	¼ lb.
H853	Package of 25 Module Holder Clips (nonribbed type)	9	9	8	¼ lb.

HOLD-DOWN BRACKET — 12-10711-02

The 12-10711-02 module hold-down bracket serves as a mechanical combination handle and hold-down bracket for Hex-size modules when used with appropriate card guides such as an H0341. This bracket can also be used as a hold-down bracket for LSI-11 compatible modules (quad-size) but must be modified as shown in the accompanying drawing.



Cat. No.	List	Cat.	Cash	Shipping Weight
12-10711-02	$4	$4	$3	1 lb.

IC SOCKETS — 954, 961, 962

These integrated circuit (IC) sockets provide low-cost, reliable production packaging of 14- or 16-, 24-, and 40-pin dual-in-line package (DIP) integrated circuits (ICs). These low-profile IC sockets are especially useful for limited-production runs of special, user-designed circuitry using blank or wire wrappable module boards (described in this section), which are available without factory-installed IC sockets. The 954 accepts 14- or 16-pin ICs; 10 sockets/package.

The 961 accepts 24-pin ICs; 5 sockets/package.

The 962 accepts 40-pin ICs; 5 sockets/package.

Cat. No.	Description	List	Cat.	Cash	Shipping Weight (per pkg.)
954	Package of 10 Sockets 14- or 16-pin IC's	$8	$8	$7	¼ lb.
961	Package of 5 Sockets for 24-pin IC's	8	8	7	¼ lb.
962	Package of 5 Sockets for 40-pin IC's	25	24	23	¼ lb.

DAISY CHAIN — 917-2.5

The 917 Daisy Chain is a continuous length of stranded insulated wire on a reel with 250 gold-plated and insulated terminals crimped at 2.5″ intervals. A prototype system is easily and quickly hand patched when the 917 Daisy Chain is used.

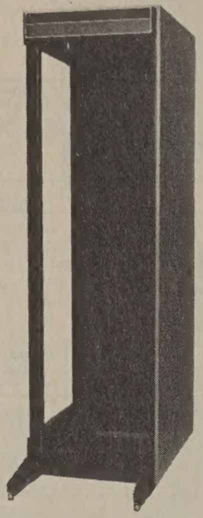
The terminals are designed to fit on module connector blocks that have wire wrap pins sized for wrapping with 30 AWG wire (0.025/0.026″ square) e.g., module connector blocks H803, H8030, H807, and H863.

The 917-2.5 Daisy Chain has 250 terminals at 2.5″ intervals.

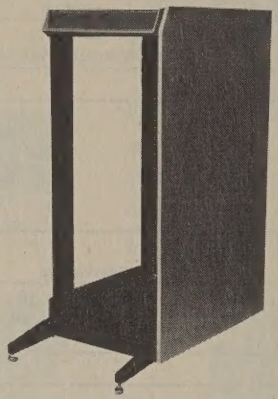
Cat. No.	List	Cat.	Cash	Shipping Weight
917-2.5	$61	$58	$56	2 lbs.

CABINETS AND ENCLOSURES

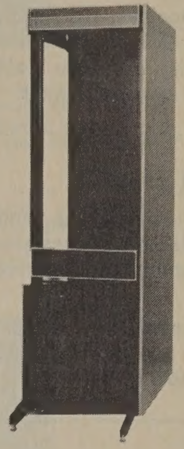
CABINETS — STANDARD AND SHORT



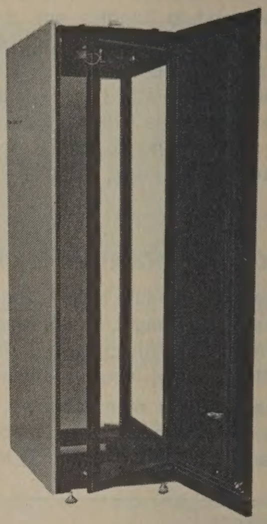
Standard height cabinet has 63″ of vertical mounting space



Short height cabinet has 42″ of vertical mounting space



Standard height equipped with short door and 5¼″ Bezel Cover Panel



Rear view of standard cabinet showing mounting panel door frame and full door

DIGITAL offers two basic cabinet frames: standard size and short size; plus a complete line of cabinet accessories and hardware. Both sizes accept panels or equipment designed to mount in standard 19″ electronics cabinets or racks. The cabinet frames are rigidly constructed of 12 and 13 gauge steel, either riveted or welded together.

Basic color of the cabinet is black. Gray is used for end panels and the bezel of the cover panels.

These cabinet frames offer complete flexibility and expandability to present and future DIGITAL systems for end users, and original equipment manufacturers. The enclosure area in these cabinets is adaptable to customer-designed hardware, logic module racks, power supplies, computer systems and peripherals.

All cabinets are configured around the basic H950-AA or H957-AA Cabinet Frame. These cabinet frames are drilled with 0.25″ diameter holes at standard EIA spacings to accommodate equipment, panels, or devices which are designed to mount in standard 19″ electronics cabinets or racks. Some cabinets contain a Power Controller for distribution and control of the main power to the equipment installed. The five basic configurations shown later include a rear mounting panel door frame, which is also drilled with 0.25″ diameter holes at standard EIA spacings; this mounting panel door frame allows the equipment and devices mounted on it to be swung out for maintenance or adjustment. Optional accessories as specified by the customer can be added to any of the basic configurations. The parts and accessories included with each of the basic cabinet configurations are listed on page 89. The optional accessories that are available for use with these cabinets are listed opposite. All cabinets are completely assembled before shipment.

The cabinets can be placed individually or attached to form a multi bay configuration. The accessories and hardware available include front and rear doors, panel mounting door frames and door skins, end panels, bezel and logo panels, blower fans, and power controllers.

Standard Size Cabinets

Four basic cabinet configurations (H960-BC, H960-CA, H961-A, H961-AA) are available in the standard size cabinet series. The H961-A, -AA are intended primarily for add-on configurations. The standard size cabinet is 71.5″ high and provides 63.0″ of vertical mounting space at the front; an additional 63.0″ of mounting space is available at the rear of the cabinet. These cabinets are configured to meet the requirements of most customer applications.

Short Size Cabinet

The short size cabinet (H967-BA) is 50.0″ tall and provides 42.0″ of vertical mounting space at the front; an additional 42.0″ of mounting space is available at the rear of the cabinet.

How to Order A Basic Cabinet Assembly

Determine if one of the basic cabinet assembly configurations will fulfill your requirements by referring to page 89. and comparing the items that comprise each configuration.

If one of these basic configurations will satisfy your requirements, you can order the completely assembled cabinet by specifying that cabinet assembly number; e.g. H960-BC. In addition to the accessories included in the five configurations, optional accessories are available, e.g. short doors, a cabinet table, and drawer mounting slides.

If one of the basic configurations will not fulfill your requirements, you can "build up" and order a cabinet that will suit your specific requirements by ordering an H950-AA standard size frame or an H957-AA short frame and the accessories (by specific part numbers) that you require. The frame and the accessories that you select will be shipped completely assembled.

CABINETS AND ENCLOSURES

CABINETS: GENERAL PURPOSE, LOW PROFILE

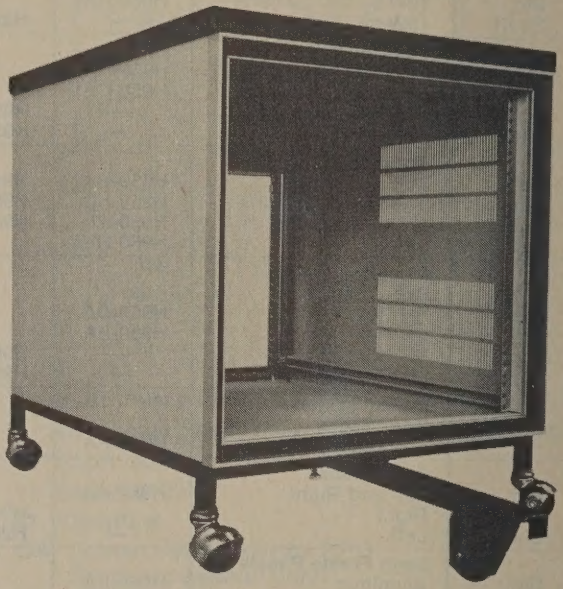
H984 SERIES

The H984-BA (115V ac) and the H984-BB (230V ac) are low profile cabinets equipped with a walnut-grained, plastic laminate top surface, and four ball-type casters mounted on a supporting frame for ease of positioning on solid or carpeted surfaces. The cabinets are a beige steel enclosure trimmed in flat black to make them compatible with the decor of the modern office or laboratory.

Each H984 provides mounting space for standard 19″ panels or racks at both the front and rear of the unit. Two vertical angles at the front and rear opening of the enclosure contain pre-drilled holes at EIA spacing. The angles can be laterally positioned within the cabinet to adjust for mounting units with varying depths. The right side of the steel enclosure contain ventilation ports to allow adequate cooling of the internal components.

A service leg with caster is located beneath the center of the unit and can be easily extended and retracted. The service leg provides stability to the cabinet when slide mounted chassis are withdrawn from the front of the cabinet. When not in use, the leg retracts into the channel.

A 115V ac or 230V ac power control panel is supplied with the cabinet and is mounted at the top of the rear opening of the cabinet. The panel can be easily repositioned to accommodate internal chassis when required.



OPTIONAL EQUIPMENT

Fan Panel Assembly

A fan panel assembly with two enclosed rotary fans is available as an option and provides additional cooling for the electrical components in the cabinet. The assembly is pre-wired with a cord and male connector which can be inserted into one of the outlets on the power connector panel. The fan assembly is available for 115V ac or 230V ac. The panel is supplied with hardware for mounting.

Black Plastic Front Cover

A flat black, plastic louvered cover panel 1.75″ in height can be used to complete the covering at the front of the H984. The panel slots allow increased air flow through cabinet.

Blank Connector Panel

The blank connector panel is designed to completely enclose the rear opening of the H984 when the blower fan assembly option is included. This provides a surface for mounting interface cable connectors or cable openings. The panel is supplied with hardware for mounting.

Blank Metal Panel

A light gray blank metal cover panel, 3.5″ in height can be ordered to complete the covering at the front of the cabinet. The color is the same as PDP-11/03 front panel and H984 cabinet.

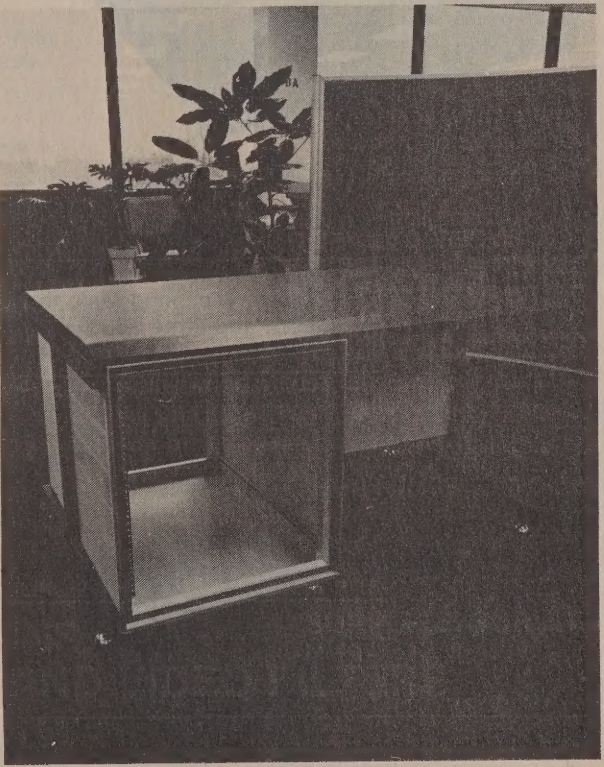
GENERAL PURPOSE SYSTEMS DESK — H9800-A

The H9800-A is a low-profile systems desk equipped with a walnut grained plastic laminate top and color coordinated to fit into the modern office decor. The unit is equipped with six ball casters as standard equipment for easy positioning on carpeted surfaces. Included also is a 115V ac power distribution panel.

The H9800-A is constructed of quality materials including a top constructed of 55 lb. particle board with a dark-walnut plastic laminate. The "module" itself is constructed of 11 and 18 gauge steel with a maximum loading capacity of 400 lbs.

The H9800-A consists of a left-mounted rack enclosure offering 21″ of usable height and 29″ of usable depth in a standard 19″ EIA mount format. The right side offers knee space, a modesty panel, and a convenient work surface ideal for using terminals or typewriters.



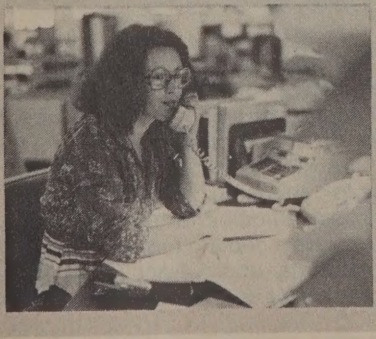
Cat. No.	List	Cat.	Cash	Shipping Weight
H9800-A	$750	$713	$683	100 lbs.

SPECIFICATIONS

Dimensions (overall)
Width: 48″
Depth: 32″
Height: 27.6″

Module Enclosure Mounting Space
Standard 19″ EIA width
21″ Usable height
29″ Usable depth (adjustable)

Color
Walnut grained top surface, beige side panels, chrome trim



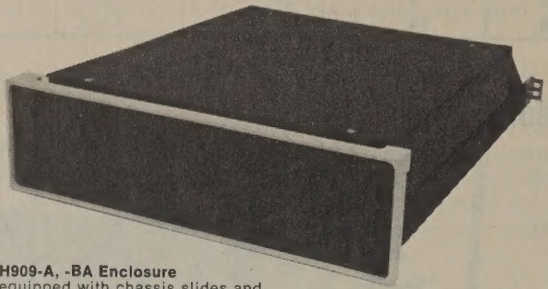
?GOT A QUESTION?

Need something clarified? Don't understand a spec? Call our Catalog Sales Desk toll free 800-225-9480 (Mass. residents (617) 481-7400 x 6608) between 8:30 am and 5 pm EST. Catalog Sales saves you time and money.

MODULE ENCLOSURES — H909 SERIES

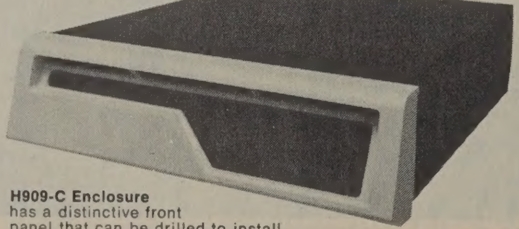
For Four-Slot or Nine-Slot System Units

The H909 Series of Module Enclosures—Logic Boxes—are designed to provide compact attractive enclosures for DIGITAL's single-height through hex-height module boards. Maximum capacity is the equivalent of nine hex-height boards (i.e. 54 single-height). Both standard length and extended length boards can be accommodated. Room is available to incorporate a power supply in H909-A and H909-C while H909-BA comes equipped with an H755 power supply. The H755 Power Supply provides ±15V dc at 2A and +5V dc at 13A. A line cord and circuit breaker are also included.



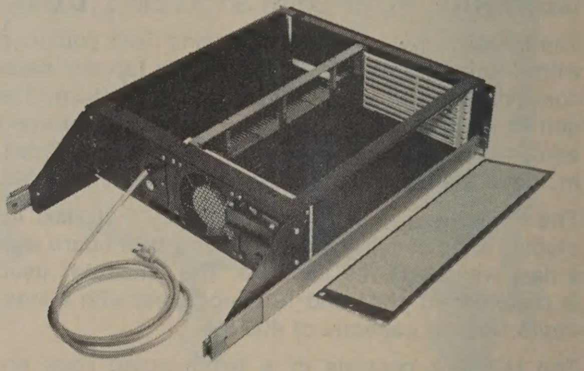
H909-A, -BA Enclosure
equipped with chassis slides and bracket for mounting in 19" rack. Note front Bezel Panel matches 5¼" Cover Panels on DIGITAL's Cabinets.

H909-A Enclosure is primarily designed to accommodate nine-slot System Mounting Units and can optionally be equipped with either an H034 nine-slot mounting frame, or H934-CB System Mounting Unit that itself is equipped with six H863 and three H8030 Connector Blocks, or the UNIBUS nine-slot unit BB11-B. Note the LSI-11 System Unit DDV11-B *does not* fit into this enclosure. A +5V dc at 7A power supply H726-B can also be ordered. This supply mounts on an H034 mounting frame which must be ordered separately specifically for the power supply.



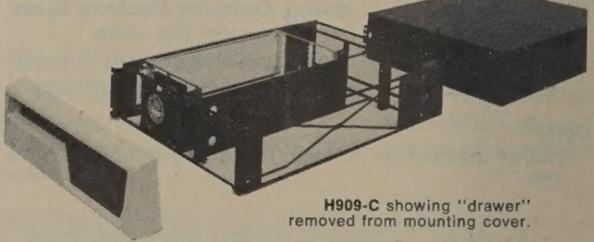
H909-C Enclosure
has a distinctive front panel that can be drilled to install lights or switches. Table top or 19" rack mounting.

H909-C Enclosure is more versatile than the H909-A or H909-BA units. It can accommodate both four-slot and nine-slot System Mounting Units. Or it can house other non-standard mounting arrangements if compatible mounting frames (H033 and H034) with Connector Blocks (such as H803) are employed. One or two four-slot System Mounting Units or one nine-slot unit can be accommodated. Additionally the LSI-11 System Unit DDV11-B *does* fit in this enclosure. The front panel can be drilled for customer installed lights and switches. This enclosure can directly mount without additional hardware the following system units and mounting frames: DDV11-B, H934, H933 Series, BB11 Series, DD11 Series, any DECkit 11, and mounting frames H033 and H034.



H909-A showing optional equipment installed.

H909-BA Enclosure is the same as the H909-A with the exception that the H755 Power Supply is included. All other options must be ordered separately.



H909-C showing "drawer" removed from mounting cover.

All the H909 Series can be mounted on 19" racks or can be used as stand-alone table-top enclosures. H909-C mounts directly on the 19" rack by attaching the ears on the enclosure cover to the rack. The inside "drawer" then can be pulled out to a "stop" position for servicing. H909-A and -BA require optional chassis slides and brackets. Included with all enclosures are a cooling fan, card guides (card cage), cable restraints, and a front bezel. H909-A and -BA have a top cover and removable side cover.

CABINETS AND ENCLOSURES

EXPANSION MOUNTING BOX — BA11-ES

The BA11-ES Expansion Mounting Box is a steel enclosure that is designed to house up to six four-slot or three nine-slot system units and an H720-E Power Supply. The BA11-ES enclosure consists of a chassis with brackets for mounting the system units and power supply; four side-mounted fans for forced air cooling; a removable top cover; two 12-09703 Tilting Chassis Slides; and an H950-QA Cover Panel. Included with the mounting box is an 8.5-ft. external I/O UNIBUS flat cable (BC11A-8F) used with PDP-11 Systems. An internal power cable is contained within the box; the power cable distributes dc power and power signals from the power supply to each of the BB11 System Units installed. An access hole at the rear of the box provides clearance for the receptacles and controls on the H720-E Power Supply. The BA11-ES is 16.75W by 23.25D by 10.50″H, excluding the cover panel and slides.

The BA11-ES can be installed in any electronics cabinet or rack equipped with 19″ mounting rails (front and rear) drilled at standard EIA spacings. The BA11-ES attaches to the cabinet frame by the two tilt slides mounted on each side of the unit. The tilt slides enable the unit to be pulled from the cabinet and tilted to facilitate servicing the system units or power supply.

Cat. No.	List	Cat.	Cash	Shipping Weight
BA11-ES	**$1050**	**$998**	**$956**	55 lbs.

EXPANSION MOUNTING CHASSIS — BA11-KE

Description

BA11-KE is a general purpose PDP-11 expansion mounting chassis (10½H by 17W by 25″D) and mounts in standard cabinets. It includes the H765 power system for 115V operation and it supplies multiple voltages which deliver 660 watts of dc power. The expansion mounting chassis also includes mounting hardware, UNIBUS cable and a pop panel. BA11-KE is Underwriter Laboratories (UL) listed.

It accommodates any mix of modules including both quad and hex modules and has mounting space for up to 22 hex size modules. For example 2 nine by six slot system unit and 1 four by six slot system unit. A tilting chassis slide allows three positions: horizontal, 45° and 90°. Multiple dc voltages are available within BA11-KE as follows:

Multiple Voltages

(2) H744 Regulators	+ 5V @ 25A (each)
(1) H745 Regulator	−15V @ 10A
(1) H754 Regulator	+20V @ 8A − 5V @ 1.1A*
(1) 54-11086 Regulator	+15V @ 4A

*Maximum −5V current is dependent upon +20V current. It is equal to 1A plus the current of the +20V supply, up to a total of 8A.

Input power required is 90-132V ac (47-63 Hz) single phase at 12A.

Cat. No.	List	Cat.	Cash	Shipping Weight
BA11-KE	**$2420**	**$2299**	**$2202**	100 lbs. unloaded

CABINETS AND ENCLOSURES

CHASSIS SLIDES

Three types of chassis slide are offered. Shown is a tilting version of 12-09703. A chassis mounted on this slide can be extended out of a cabinet 22.28″ and tilted 90° either up or down. The 12-09154 extends the chassis 22″ but is not tiltable. The 12-10945 extends the chassis 19″. It features a two-part construction whereby part of the left member can be removed to allow the left side cover plate of the H909-A or H909-BA drawer to be removed to access the enclosed modules. All slides mount in cabinets with front and rear rails drilled or punch to standard EIA spacings.

Cat. No.	List	Cat.	Cash	Shipping Weight
12-09154	$28	$27	$25	6 lbs.
12-09703	68	65	62	8 lbs.

LITERATURE AVAILABLE

Need more detailed information on a particular product? Would one of our application notes make your task easier? These publications are designed to complement the product descriptions offered in the Direct Sales Catalog. In most cases they will answer all of the product questions you have.

Here is a brief description of what you can expect:

LOGIC HANDBOOK

The Logic Handbook, known as the computer industry's "bible" on logic design, gives you the technical story on general purpose computer interfacing, various cable configurations, system boxes and enclosures, special purpose interfaces and a host of other compatible equipment.

For almost twenty years, the Logic Handbook has been regarded as the one reference book for customers for the world of interfacing and DEC products. Have your own resident DEC sales and technical consultant — the Logic Handbook!

logic handbook
20

MICROCOMPUTER HANDBOOK

The Microcomputer Handbook is our answer to the question, "Where can I find the answers to everything I've always wanted to know about the LSI-11, but didn't know where to look." Included are detailed chapters on the processor, options, installation, software, operating systems, peripheral devices, programming, maintenance and much, much more. The text covers the full range of LSI-11 systems from the LSI-11 board set to the PDP-11/03 microcomputer to the PDP-11V03 disk based microcomputer system. Truly, everything you want **and need** to know about the LSI-11 microcomputer is found between the two covers of this handbook!

microcomputer handbook

DIRECT SALES CATALOG APPLICATION NOTES AND PRODUCT BULLETINS

COMPONENTS GROUP

For the user who requires more complex and technical information on specific products or application ideas, the D.S.C. has a complete line of detailed product bulletins and application notes. These publications will tell you everything you should need to know about the particular product involved. Over 50 different application notes and product bulletins are available for the asking. Check catalog product index.

HARDWARE/ACCESSORIES CATALOG

If you have ever been confronted by the need to know detailed dimensional specifications on a system enclosure or want to know how to order a cabinet with a left side opening door instead of right, then the Hardware/Accessories Catalog is what you need. Hundreds of detailed charts, diagrams and photographs describe DEC hardware from complete system cabinets down to the last nut and bolt. Information on power supplies, wire wrap modules and tools, cables, system units and connector blocks is also presented in the same graphic manner. Next time you need services of a mechanical engineer for catalog hardware, check the Hardware/Accessories Catalog!

POWER SUPPLIES

POWER CONTROLLERS AC VOLTAGE

These power controllers control and distribute ac voltage to power supplies, fans and other ac-operated devices in a system. Ac receptacles on the front panel are used to connect to system points requiring ac power. Four switched dual receptacles and two unswitched duals are provided. The switched receptacles are activated either remotely or locally by panel switch selection. Power to the controller inputs is via a line cord. Controllers mount in a 19″ rack. 861-A requires an input of 90-130V ac, 2 phase, 16A per pole to output 90-130V ac at 12A for each ac outlet. 861-C is a single-phase input device (24A per pole) with a 12A output at each outlet. Input/output voltage is 90-130V ac. The 861-D requires an input of 90-130V ac, 3-phase, 24A per pole to output 90-130V ac at 12A for each outlet.

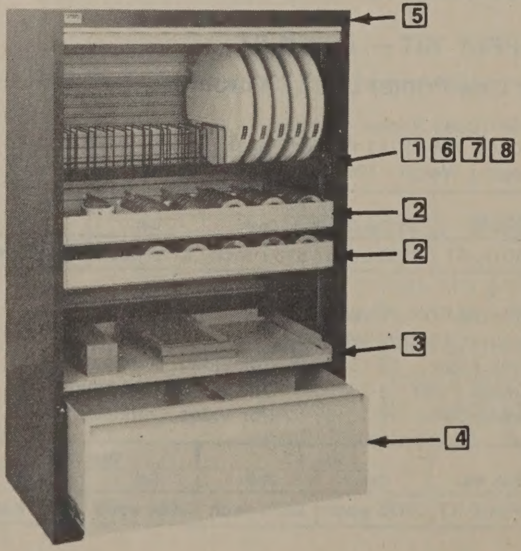
H980-AA	$699 each	$671 each	$664 each	$636 each

Complete Large Cabinet

The H980-AA measures 71⅜H by 36W by 18½″D. The unit contains:

1. Two H980-CC Disk Cartridge storage unit handling 28 RK05K Disk Cartridges.
2. One H980-CD roll-out-drawer with one H980-CH divider set for storing 72 DECtapes.
3. One H980-CG fixed shelf for storage of forms, punched cards, etc.
4. One H980-CF storage drawer for utility purposes.

Shipping Weight: 245 lbs.



Complete Small Cabinet

The H980-AB measures 58⅜H by 36W by 18½″D. The unit contains:

1. One H980-CC Disk Cartridge storage unit, handling 14 RK05K disk cartridges.
2. Two H980-CD roll-out-drawers, one with the H980-CH divider set, and one providing a work surface.
3. One H980-CG fixed shelf for storage of forms, etc.
4. One H980-CF storage drawer for utility purposes.

Shipping Weight: 225 lbs.

Cat. No.	Qty. 1		Qty. 2	
	Cat.	Cash	Cat.	Cash
H980-AB	$649 each	$623 each	$616 each	$591 each

MEDIA STORAGE CABINET

1 Disk Cartridge Storage Rack

The H980-CC storage rack provides slots for 14 RK05K disk cartridges per level. The unit requires 17″ inside mounting space. Shipping Weight: 7 lbs.

Cat. No.	Qty. 1		Qty. 2	
	Cat.	Cash	Cat.	Cash
H980-CC	$35 each	$34 each	$33 each	$32 each

2 Roll-out Drawer — H980-CD

The H980-CD roll-out drawer provides either a work surface, a shelf for RP02-P disk packs, RP03-P disk packs, or forms the basis of the DECtape storage drawer (see H980-CH). The unit requires 4¾″ inside mounting space for DECtapes or 7″ inside mounting space for RP02-P, RP03-P, RP04-P, RP06-P packs. Shipping Wt.: 18 lbs.

Divider Kit — H980-CH

The H980-CH divider kit provides partitions within the H980-CD roll-out drawer, so that DECtape, cassettes, or any other small items may be divided into logical units, and stored economically. Shipping Weight: 15 lbs.

DECtape Wire Frame — H980-CK

The H980-CK DECtape wire frame provides slots so that up to 77 reels of DECtape in canisters may be stored conveniently and systematically. The wire frame fits easily within the H980-CD roll-out drawer. No screws or attachments necessary. Unit requires 4¾″ inside vertical mounting space for DECtape. Shipping Wt.: 5 lbs.

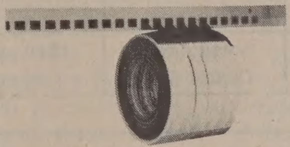
Shipping Weight: 135 lbs.

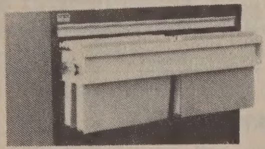
6 Magtape (tape seal) Hanger Bar — H980-CA



The H980-CA tape seal hanger bar provides space for reels of ½″ industry compatible magnetic tape. Either 600 ft., 1200 ft., or 2400 ft. reels of tape (tape seal style only) may be stored in any combination. Access to a given reel of tape is accomplished by pressing the reel inward allowing the spring loaded stabilizer to swing the reel outward where it can be grasped. The unit requires 14¾″ inside mounting space for 2400 ft. reels. Shipping Weight: 5 lbs.

Cat. No.	Qty. 1		Qty. 2	
	Cat.	Cash	Cat.	Cash
H980-CA	$35 each	$34 each	$33 each	$32 each

7 Hanging Binder Frame — H980-CE



The H980-CE hanging binder frame provides two sections of 12″ each for storage of print-out binders. These binders must have tabs or "ears" that hook onto the binder frame so that rapid access is available. Unit requires 13″ inside mounting space. Shipping Wt.: 18 lbs.

H980-CB	$35 each	$34 each	$33 each	$32 each

digital FURNITURE

DIRECT SALES CATALOG

Tables

This table provides a convenient work surface. The surface is walnut finish. The table is wide enough so that terminals such as DECscope, as well as papers, print-outs, etc., may be placed on the surface. The shroud in the rear is ideal for holding a data set, or other items. The two sides have cable openings so that a complete unit appears neat and attractive. Shipping Weight: 50 lbs.

The H970-EB measures 27H by 36W by 30″D (keyboard height). A set of casters, 12-11526, can be ordered for the table. Installed, they increase table height by 2″.

Cat. No.	Description	Qty. 1-2		Qty. 3-Up		Shipping Weight

Free Standing Table — H970-HB

The H970-HB serves as a support table for peripheral devices such as the VT52 DECscope in office environments. The table consists of a walnut wood-grained, scratch-resistant top, medium grey side rails, and an off-white modesty panel. The leading edge of the top is beveled for additional comfort. The H970-HB includes four adjustable leveling feet for firm positioning. Dimensions are 27H by 24W by 30″D.

Cat. No.	List	Cat.	Cash	Shipping Weight
H970-HB	$170	$162	$155	65 lbs.

Terminal Stand

DIGITAL's unique Terminal Stand features a rounded black steel center pole that attaches to five pedestal legs. Casters attach to each leg to facilitate unit mobility. The following terminals are supported on a base plate that is securely mounted to the center pole: VT50, VT52, VT55, VT71, and VT71/t.

Terminal Stand combines functional design with contemporary elegance. It measures 26″ in height and requires minimal floor space when fully assembled. Each stand is shipped unassembled for ease of storage and to reduce shipping costs. Instructions and necessary tools for easy and quick unit assembly are included. Please use Part No. VT71-ST for Terminal Stand to be used with the VT71 and VT71/t terminals.

digital
DIRECT SALES CATALOG

HOW TO ORDER

Catalog Sales Desk
800-225-9480
(Mass. residents (617) 481-7400 x 6608).
From 8:30 am to 5 pm EST.

To ensure prompt delivery and accurate charges you must use one of the four methods outlined below. Choose whichever best suits your company's internal operations.

1. **Preprinted Order Form**
A sample of this form — and detailed instructions for filling it in — are shown on page 112. We prefer you use this form. DIGITAL's Terms and Conditions for Catalog 1-77 (Note B) are printed on the reverse side. The submittal of your order on this form acknowledges your acceptance of these Terms and Conditions. For your review, the Terms and Conditions pertaining to Catalog 1-77 (Note B) are reproduced on page 113. See Note A.

2. **Purchase Order and Preprinted Form**
If you submit your own Purchase Order you can simply attach a **signed** copy of DIGITAL's Preprinted Order Form (Note A) to signify your acceptance of the Terms and Conditions pertaining to Catalog 1-77 (Note B) as documented on page 113. Be sure to provide us with all the required information as detailed under **Ordering Information.**

3. **Purchase Order Only**
If you submit a Purchase Order and do not include DIGITAL's Preprinted Order Form you must incorporate this statement "Terms and Conditions of DIGITAL's Direct Sales Catalog 1-77 govern this order." These Terms and Conditions (Note B) are documented on page 113. Be sure to provide us with all the required information as detailed under **Ordering Information.**

4. **Phone Orders**
If you have a current approved Catalog Open Account (see definition page 110) call the Catalog Sales Desk to enter your order. Your order will be processed and scheduled but not shipped until we receive a confirming, acceptable written catalog order as described in 1 through 3 above. We can handle your call more quickly if you have the following information ready: catalog part number, quantity, description, billing address, and shipping address.

ORDERING INFORMATION

We must have the following information to process your order:

(a) Company Name, and Complete Address including ZIP Code.

(b) A Ship To address, if different from the company address.

(c) Name, Title, and Phone Number of an Authorized Customer Contact.

(d) Tax Exemption Number if applicable. A copy of your Exemption Certificate is also required if not submitted with a previous catalog order. See **Sales Tax Information,** page 110.

(e) Purchase Order Number (for billing purposes only and for Catalog Open Accounts).

(f) State if you are subject to the Renegotiation Act.

(g) State if Transportation Insurance is required. See **Transportation Insurance,** page 110.

(h) Indicate which shipping method you require. Note that size and weight considerations sometimes limit your choice. See **Shipping and Delivery Information,** page 110.

(i) Give Quantity, Catalog Part Number, Description and Appropriate Price (Catalog or Cash) for each item. You can refer to the Product Index for a summary of all items and their prices. Include any special specifications (color, style, etc.) with the item description.

(j) Give the Shipping Weight for each item. For Modules you must check the Module Weight Chart on page 115 to compute the combined shipping weight of the Modules.

(k) Compute all taxes, shipping charges, and insurance costs in accordance with the instructions under **Sales Tax Information, Shipping and Delivery Information, Transportation Insurance.**

(l) Add costs in Items i and k. This is the Total Order Cost.

(m) When paying cash, remit the amount computed in (l) above. Pay by check or postal money order. Do NOT send currency or stamps. If the actual charges are less than you computed, DIGITAL will refund the difference provided it exceeds $2.

(n) **If your order is less than $100.00 you must pay cash.**

ADDRESS AND MAIL ORDERS TO:
Digital Equipment Corporation
Direct Sales Catalog, Dept. EM
P.O. Box 4202, Boston, MA 02107

Note A: We will send you a supply of the Order Forms at no charge. Call the Catalog Sales Desk to request them.

Note B: Expiration date of Catalog 1-77 is June 30, 1978. If you are using this catalog after this date you must check with the Catalog Sales Desk for any changes affecting Terms, Conditions, Products or Prices. Although we expect most prices to remain unchanged for the life of Catalog 1-77, some may change. You will be informed of any change when we process your order.

digital HOW TO ORDER

DIRECT SALES CATALOG

SHIPPING AND DELIVERY INFORMATION

DIGITAL will utilize the fastest service to your area by surface transportation unless indicated otherwise. Cash customers requesting UPS delivery and meeting weight and size limits of UPS may use the following charts to figure shipping and handling charges. Customers on the West Coast should indicate UPS Blue Label Service over regular UPS for faster delivery.

Use the Zip Code Chart for the continental U.S. and find the *first* three digits of your Zip Code to determine your zone. Then refer to the shipping rate chart for the charges appropriate to your zone according to the shipping weight of each item ordered. Figure UPS charges for each catalog item separately using the indicated shipping weight times the quantity. Then total the individual charges figured and remit the total amount. Unless otherwise stated, shipping weights are calculated to the nearest pound. Excess payments of transportation charges over two dollars will be refunded by check.

To calculate shipping charges for a module(s), first refer to the physical descriptions included with each module description. Modules are either standard-length or extended-length; single-height, double-height, or quad-height; and single-width, double-width, or triple-width. Then check the Logic Module Weight Chart on page 115 to determine shipping weight for each module size.

Some catalog products may exceed weight and/or size limitations (either individually or collectively) for shipment via UPS. These items will be shipped with freight charges collect (you will be billed by carrier), as will all cash orders when requesting shipment by air (except Blue Label Service).

All approved current Catalog Open Account customers should only indicate appropriate (by weight) and desired (surface or air) transportation mode. All shipping charges for open accounts will be prepaid by DIGITAL and added to the customer's invoice.

SALES TAX INFORMATION

Unless an *exemption certificate* which is valid for the state into which your order is being shipped has been submitted with this, or a previous catalog order DIGITAL must by law collect state sales tax for the following states at the rates shown below.

We are also required by law to collect any city, county, parish, or rapid transit taxes within these states. If your order is being shipped to an area which has a local tax of this type, please include such additional tax with your payment.

CATALOG OPEN ACCOUNTS

Catalog Open Accounts (net 30 days) will be granted to customers approved by the Catalog Sales Credit Department. To apply for Open Account Payment terms (net 30 days), call toll free 800-225-9480 (Mass. (617) 481-7400) and ask for the credit desk.

10-DAY FREE TRIAL RETURNS

Before sending material back to DIGITAL for credit, call our Catalog Order Desk and ask for a Return Authorization Number and shipping instructions. Material shipped to us without an Authorization Number will NOT be credited to you.

TRANSPORTATION INSURANCE

UPS charges include a $100 value for insurance. Insurance rates for UPS orders over $100 can be calculated by adding 25¢ for each additional $100 value or fraction thereof.

All cash customers requiring non-UPS delivery and approved current Catalog Open Account customers clearly indicating "yes, in-transit insurance is desired" will be provided insurance on their orders while in-transit, and a charge of 50¢ per $100 of catalog price, or fraction thereof, will be made. Cash customers should include these charges in their payment.

CURRENT STATE SALES TAX TABLE

Taxes subject to adjustment without notice in event of Legislative change.

State	Percent	State	Percent	State	Percent	State	Percent	State	Percent
Alabama*	4	Hawaii	4	Massachusetts	5	North Carolina*	3	Texas*	4
Arkansas*	3	Illinois	4	Michigan	4	Ohio*	4	Utah*	4
Arizona*	4	Indiana	4	Minnesota	4	Oklahoma*	2	Vermont	3
California*	4.75	Iowa	3	Mississippi	5	Pennsylvania	6	Virginia*	3
Colorado*	3	Kansas*	3	Missouri*	3	Rhode Island	6	Washington*	4.6

☐ ADDITIONAL ORDER FORMS & ENVELOPES

1. Put your company name and complete address, including Zip Code for **Bill To** information. If you want your order shipped to a different address, write this in the **Ship To** space.
2. Name, title, and phone number of **Authorized Customer Contact.**
3. Purchase order number (for Catalog Open Accounts and for invoicing purposes only).
4. Check off whether this order is taxable and include tax exemption number, if applicable (see notes under **Sales Tax Information). A copy of the exemption certificate must be attached if not submitted with a previous Catalog Order.**
5. Check if transportation insurance is desired. UPS or DIGITAL.
6. Check method of shipment (UPS, air, van). Verify that method selected will accept your shipment based on size and/or weight restrictions.
7. Check if you are subject to the Renegotiation Act.
8. Give the quantity, catalog part number, description, appropriate price (depending on the discount taken), total price, and shipping weight for each part ordered, plus any special product specifications required, in the description. Compute Module weight as shown on page 115.
9. Add up amounts in the **Total Price** column and enter total in the **Total for Goods** block.
10. Add state and local taxes, if applicable (see notes under **Sales Tax Information).**
11. Add shipping charges only if paying cash and shipping via UPS. All other shipping methods will be prepaid by DIGITAL and added to the customer's invoice or billed by the carrier. (See instructions under **Shipping and Delivery Information.)**
12. Add insurance charges only if paying cash. (See instructions under **Transportation Insurance** to calculate UPS or DIGITAL insurance charges.) All Open Account customers requesting DIGITAL insurance will be billed these charges.
13. Total all of the above items. Cash customers should remit this total with their order, including shipping charges, insurance, and taxes. All cash orders should be paid by check or postal money order. Do NOT send currency or stamps. If the charge for equipment and transportation is less than the amount you send us, we will refund the difference. **Cash is required on all orders totaling less than $100.**
14. Be sure and sign the order form. Orders cannot be processed without an authorized signature.

Address and mail orders to:
Digital Equipment Corporation, Direct Sales Catalog, Dept. EM, P.O. Box 4202, Boston, MA 02107.

*We will send you, at no charge, copies of these Preprinted Order Forms. Call the Catalog Sales Desk.

DIGITAL EQUIPMENT CORP. / Catalog Sales / Dept. EM / One Iron Way / Marlborough, MA 01752

TERMS AND CONDITIONS OF SALE FOR CATALOG 1-77

1. PRICE/PAYMENT:

A. All orders submitted on DIGITAL's Catalog Order Form and accompanied by a check in the amount of the catalog price plus transportation (if shipped UPS), insurance, charge, and sales tax shall be accepted and processed unless Customer is otherwise notified by DIGITAL within ten (10) days of receipt of order. If Customer has an approved current Catalog Open Account, a check need not accompany the Order Form, but rather, at Customer's option, full payment shall be due within thirty (30) days from date of delivery. Notwithstanding the above, cash is required for all orders of less than $100.

B. All catalog prices are exclusive of transportation charges and sales, use, and other similar tax. All such charges and taxes shall be added to the Catalog price and paid by Customer to DIGITAL. To qualify for tax exemption, Customer must submit a copy of a valid Tax Exemption Certificate with each order.

2. DELIVERY:

All deliveries shall be F.O.B. DIGITAL's Factory. Risk of loss shall pass to Customer upon delivery by DIGITAL to carrier. For all shipments, except via UPS, insurance will be provided on the products while in transit and a charge of $.50 per $100 of Catalog price will be made if Customer clearly indicates in the block marked "YES, IN-TRANSIT INSURANCE IS DESIRED" on the Catalog Order Form. UPS shipping charges include insurance of $100. Additional UPS insurance coverage can be obtained by Customer at the rates specified in the *How to Order* Section. DIGITAL shall not be liable for any damages or penalty for delivery delays when due to causes beyond its reasonable control.

3. ACCEPTANCE:

Should the Customer, upon receipt of the Product, find it unsatisfactory for any reason, DIGITAL will refund Customer the Catalog price, provided Customer returns the Product to DIGITAL, transportation prepaid and insured, in the same condition as delivered and in the same DIGITAL or equally suitable shipping container within ten (10) days of receipt. Before returning the product, Customer must call DIGITAL for a return authorization number.

4. WARRANTY:

A. All Products (except Software) purchased from this Catalog are warranted as stated below for a period of ninety (90) days from date of initial delivery, except that the warranty period for W, M, and A Series modules is one (1) year.

B. All Products (except Software) are warranted against defects in material and workmanship under normal and proper use and in their original unmodified condition for the period set forth in Clause 4A above. If found defective by DIGITAL within the terms of this warranty, DIGITAL's sole obligation shall be to repair or replace (at its option) the defective Product. If DIGITAL determines that the Product is not defective within the terms of this warranty, Customer shall pay all costs of handling and return transportation. All replaced Products become the property of DIGITAL. As a condition of this warranty, Customer must obtain a DIGITAL Return Authorization Number, and must return all Products, transportation prepaid and insured, to the appropriate location, as specified in the *Service* Section of this Catalog.

C. Transportation charges for the return to Customer shall be paid by DIGITAL within the contiguous United States only. These warranties outside the contiguous United States are limited to repair or replacement only and exclude all costs of shipping, Customs clearance, and other related charges.

D. All Software Products with a DIGITAL Support Category of A or B are warranted to conform to the DIGITAL Software Product Description (SPD) applicable at the time of order. DIGITAL's sole obligation hereunder shall be to remedy any nonconformance of the software to the SPD. Such remedy shall be provided as specified in the Software Support Categories Addendum to the SPD for nonconformances reported to DIGITAL during the one (1) year period following delivery. Software with a designated Support Category of C is furnished on an "as is" basis.

E. EXCEPT FOR THE EXPRESS WARRANTIES STATED ABOVE, DIGITAL DISCLAIMS ALL WARRANTIES ON PRODUCTS, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS; and the stated express warranties are in lieu of all obligations or liabilities on the part of DIGITAL for damages, including but not limited to special, indirect, or consequential damages arising out of or in connection with the use or performance of the Products.

5. SOFTWARE PRODUCT LICENSE:

Licensed software provided hereunder, including any subsequent improvements or updates, is furnished to Customer under a license for use on a single Unit and may only be copied in whole or in part (with the proper inclusion of copyright notice on the software) for use on such Unit. Customer shall not provide or otherwise make available the software, or any part thereof or any copies thereof, in any form to any third party. However, Customer may provide the software to a third party who agrees with Customer or DIGITAL to limit the use of the software to a single Unit transferred by Customer to the third party, to only copy the software, in whole or in part (with the proper inclusion of copyright notice on the software) for use on such Unit and not to provide or otherwise make available the software to any other party. For each copy of the software made by Customer and so provided to a third party, Customer shall pay DIGITAL its then current license fee for such software within thirty (30) days after transfer of the software to such third party. No title to or ownership of the software or any of its parts is hereby transferred to Customer. Notwithstanding the above, use of source software requires execution of a separate Source License Agreement.

6. PATENTS:

If notified promptly in writing of any action (and all prior claims relating to such action) brought against the customer, based on a claim that the customer's use or sale of the product(s) (including software) infringes a United States patent or copyright, DIGITAL will defend such action at its expense and will pay the costs and damages awarded in any such action, provided that DIGITAL shall have sole control of the defense of any such action and all negotiations for its settlement or compromise. In the event that a final injunction shall be obtained against the customer's use of the product(s) by reason of infringement of a United States patent or copyright, or if in DIGITAL's opinion the product(s) is likely to become the subject of a claim or infringement of a United States patent or copyright, DIGITAL will, at its option and at its expense, either procure for the customer the right to continue using the product(s), replace or modify the same so that it becomes noninfringing, or grant the customer a credit for such product(s) as depreciated and accept its return. The depreciation shall be an equal amount per year over the lifetime of the product(s) as established by DIGITAL. DIGITAL shall not have any liability to the customer under any provision of this clause if the infringement, or claim thereof, is based upon (i) the use or sale of the product(s) in combination with other products or devices which are not made by DIGITAL, or (ii) the use of the product(s) in practicing any process, or (iii) the furnishing to the customer of any information, service, or applications assistance. The customer shall hold DIGITAL harmless against any expense, judgement, or loss for infringement of any patents, copyrights, or trademarks which results from DIGITAL's compliance with the customer's designs, specifications, or instructions. No costs or expenses shall be incurred for the account of DIGITAL without the written consent of DIGITAL. In no event shall DIGITAL's total liability to the customer under or as a result of compliance with the provisions of this clause exceed the aggregate sum paid to DIGITAL by the customer for the allegedly infringing product(s).
The foregoing states the entire liability of DIGITAL with respect to infringement of patents and copyrights by the product(s) or any part thereof or by its operation.

7. SUBSTITUTION AND MODIFICATIONS OF SPECIFICATION:

DIGITAL reserves the right, without prior approval from or notice to customer, to make changes to the products (i) which do not effect physical or functional interchangeability or performance at a higher level of assembly or (ii) when required for purposes of safety or (iii) to meet product specifications.

8. GENERAL:

A valid contract binding upon the parties will come into being only as of the time a properly completed and executed Catalog Order Form or written customer acceptance of the catalog Terms and Conditions (such as "Terms and Conditions of Digital's Direct Sales Catalog govern this order," written or typed on the purchase order) together with full payment (except for approved current Catalog Open Account Customers), is received by DIGITAL, unless Customer is otherwise notified by DIGITAL within ten (10) days of receipt. The laws of the Commonwealth of Massachusetts shall apply and govern all Catalog Orders. The terms and conditions set forth in Clause 1 through 8 hereof and those set forth on the face of the Catalog Order Form shall apply to all Catalog Orders, notwithstanding any deviations and/or additions by Customer. In no event will DIGITAL be liable for special, indirect, or consequential damages.

digital SUPPORT SERVICES

DIRECT SALES CATALOG

A wide range of maintenance and customer services are available from DIGITAL to support your DIGITAL hardware. Depending on the type of equipment ordered, you can select an alternative which meets your service needs; from complete DIGITAL maintenance to complete self-maintenance.

There are six service groups which are dedicated to satisfying the post sales service needs of DIGITAL customers. Consult your local yellow pages or call Catalog Sales Desk for nearest location. Support services available through these organizations are:

FIELD SERVICE

This organization provides DIGITAL customers with both on-site and off-site maintenance service through a variety of service products. There are over 300 service locations worldwide with over 5000 service personnel dedicated to servicing DIGITAL equipment.

EDUCATIONAL SERVICES

Through the Educational Services Group, DIGITAL customers can be trained from computer novice to advanced proficiency in software, hardware, and system management. Courses are offered at worldwide locations and at the customer's site.

SOFTWARE SERVICES

Software Services is an organization dedicated to supporting DIGITAL Software by providing software consulting, software maintenance, and software components to DIGITAL customers. Presently there are over 700 Software Specialists located worldwide to assist the customer with his software needs.

CUSTOMER SPARES

Customer Spares is in the business of selling spare parts to customers who wish to perform any level of self-maintenance. Customers in remote locations or with high uptime requirements who use the Field Service organization also benefit from the services offered by this organization. Services offered by Customer Spares, plus educational courses (see above), make it possible for the customer to be successful at self-maintenance.

ON-SITE SERVICE

There are a variety of contractual on-site service programs for terminals and computer systems. Per call service is also provided in which maintenance is provided on a non-contractual time and material basis.

OFF-SITE SERVICE

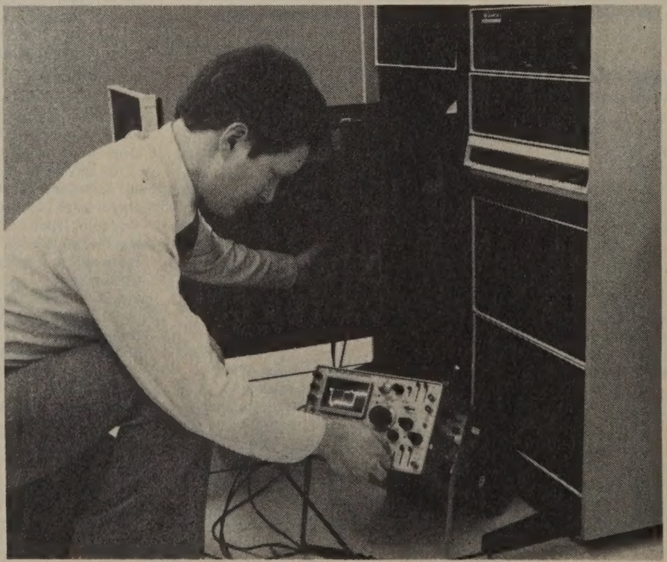
For the customer not desiring or qualified to receive on-site service, various programs are available for securing factory level repair off-site.

PRODUCT REPAIR CENTERS (PRC)

Centers are established through which a customer may receive fast, low-cost repairs for many off-site service needs. The PRC's offer factory equivalent repairs on a growing list of CPU's, peripherals, and module boards. There are presently 17 PRC's located worldwide. Services presently offered by the Product Repair Centers are:

1. **Major Repair Work** on electro-mechanical devices and CPU's. Customer sends his equipment to a PRC and DIGITAL will repair.
2. **Fixed Quote Repair** — Upon receipt, DIGITAL will inspect equipment, then contact customer with a fixed price for repair. Customer has the option to cancel order for a $50 fee.
3. **Repair of Modules** — Customer can send his modules to the PRC for repair. (This service is available in domestic U.S. via Customer Returns Area (617) 933-8710 x 2280.)

For further information, the customer should contact his local Field Service office for information concerning the repair charges and capabilities of the PRC in his area. See page 115 for locations.



SUPPORT SERVICES/ MODULE WEIGHT CHART

SERVICE

If your catalog product malfunctions for any reason, simply check the appropriate description below for your servicing needs.

Catalog Product	Under 90-Day Warranty	Over 90-Day Warranty
LA Series VT Series	Return to nearest Product Repair Center (listed below) for no-charge repair.	A variety of procedures for obtaining service is available including complete repair at a regional Product Repair Center, and/or a contract with DIGITAL's Field Service Group. Refer to description opposite, then contact your local Field Service office for complete details.
LSI-11, PDP-11/03 Microcomputer	LSI-11 and PDP-11/03 modules are to be returned for no-charge repair to the following address: Digital Equipment Corp. Customer Returns Area 36 Cabot Rd. Woburn, MA 01801 Before mailing, call (617) 933-8710, ext. 2280 for return procedures.	Fixed rate module repair. For quote and procedure, call (617) 933-8710, ext. 2280.
All other catalog items	Call 800-225-9480 for warranty and post-warranty information.	

AUTHORIZED FACTORY RETURN WARRANTY PRODUCT REPAIR CENTERS (NORTH AMERICA)

SANTA ANA
Digital Equipment Corporation
2110 South Anne Street
P.O. Box 4257
Santa Ana, California 92704
Tel. No.: (714) 979-1660

LOGIC MODULE WEIGHT CHART

	MODULE SIZE CODE									
	SSS	SDS	SDD	ESD	EDD	EQS	EQD	ESS	SDT	EDS
Net Weight	3 oz.	6 oz.	4 oz.	8 oz.	8 oz.	12 oz.	16 oz.	6 oz.	20 oz.	9 oz.

Size Code Description (L by H by W)
Length: Standard (S), Extended (E)
Height: Single (S), Double (D), Quad (Q), Hex (H)
Width: Single (S), Double (D), Triple (T)

To calculate the gross shipping weight of your logic module order, locate the module size in the Logic Modules section of this catalog for each of the modules required. Using the Logic Module Weight Chart above, determine the total net weight of the modules. Add 25% (of total net weight) to the net weight to determine the gross weight and round off to the next whole pound. All shipping charges are based on the calculated gross weight. See the following example.

EXAMPLE:

No. Ordered	Cat. No.	Module Size	Net Weight
2	M3020	SSS	6 oz. (3 oz. ea.)
1	M1500	ESS	6 oz.
4	A811	SDD	16 oz. (4 oz. ea.)
			28 oz. (total net weight)

Calculate 25% of total net weight	28 oz. by .25 = 7 oz.
Add to net weight	28 oz. + 7 oz. = 35 oz. (gross weight)
Convert to lbs., 16 oz. = 1 lb.	35 oz. ÷ 16 = 2.19 lbs.
Next whole lb.	2.19 lbs. = 3.0 lbs. shipping weight

DIGITAL'S OTHER PRODUCTS AND SERVICES

Only a portion of DIGITAL's products and services are sold through this Direct Sales Catalog. Your local sales office can provide you with information on our complete product line, which is built around five computer series: The PDP-8, the DECsystem-10 and -20, the PDP-11 and the PDP-15. See listing of sales offices in yellow pages under DIGITAL Corporate Listing.

If you're looking for anything from a small dedicated controller to a large-scale, general-purpose computer, you will find the right system among them.

The PDP-8, introduced in 1965, was first used as a laboratory tool. Today it handles a wide variety of real-time monitoring and control applications. Six central processor models, three minicomputer and four microcomputers, make up the PDP-8 family.

All PDP-8's have as their central element a patented, synchronous data path, the Omnibus, to handle bidirectional communication between system elements. Since each element plugs into the bus through an electrically identical connector, the customer can upgrade the system by simply plugging new devices in. No wiring changes are needed. Many popular interface modules are available through the Direct Sales Catalog.

The PDP-8 customer can choose from more than 600 software programs. These include powerful program development systems like OS/8 and the real-time operating system RTS-8.

The DECsystem-10, introduced in 1967, is a family of large-scale computer systems designed for interactive timesharing, real-time processing, and multiprogramming tasks. A DECsystem-10 can serve multiple users simultaneously under one operating system, with a common user and operating command language.

Any DECsystem-10 can be made more powerful simply by adding more processors, memories, communications systems, and input/output devices. No user software changes are required to expand from the smallest DECsystem-10 to the largest.

All DECsystem-10 central processors can run under the same TOPS-10 operating system, execute the same programs, and utilize most of the same peripherals.

More than 500 DECsystem-10's are now handling a wide range of user applications, including accounting, communications, design and development, education, inventory management, management information, payroll, production control, research, simulation, transaction processing, and typesetting. More service bureaus use DECsystem-10's for timesharing than any other system.

The DECsystem-20 is the bridge machine between the DECsystem-10 and the PDP-8, -11, and -15 Series. Like the DECsystem-10, the DECsystem-20 offers highly reliable virtual memory, a multi-mode operating system (TOPS-20) and a complete range of programming languages and supporting utilities. The end result is an easy-to-learn, easy-to-use interactive system that can still offer all the throughput needed for traditional batch applications.

The PDP-11, introduced in 1970, has brought new technological advances to small, 16-bit computers. The innovations included the UNIBUS, a single, high-speed, bidirectional data bus through which all system elements communicate asynchronously; a hardware stacking capability for rapid processing of structured data; a vectored priority interrupt system for fast, real-time response; and a completely modular organization.

The PDP-11 family shares a common architecture, range of peripherals, and software. The family extends from the LSI-11 microcomputer on the low end to the high-end PDP-11/70, which offers data base management, COBOL programming, and up to four million bytes of main memory.

PDP-11 processors, memories, and peripherals are all designed as plug-in building blocks, simplifying expansion and access for maintenance. New options plug in, without the need for new interfaces. Many popular interface modules are available through the Direct Sales Catalog.

The PDP-15, introduced in 1972, is a family of 18-bit medium-scale computers used in computer-aided design, land use planning, architecture, cartography, stress analysis, construction, medical data bases, shipping, data acquisition and production control.

Hardware features include asynchronous processor operation, a memory processor, single and dual processor configurations and use of programs as large as 128K words.

PDP-15 software includes three operating systems: XVM/DOS for high volume interactive computation, including graphics and dedicated real time applications; XVM/RSX, combining graphics, batch and interactive processing and output spooling with many simultaneous users; and XVM/MUMPS, for timeshared data base management systems with up to 48 on-line users.

DIGITAL tailors these computers and their supporting hardware and software to meet many specific application requirements.

The principal marketing groups are listed below, with summaries of their primary interests.

Business Products — Multiuser/multitask interactive systems that can stand alone or serve as parts of a distributed processing network.

Data Communication — Products for message switching, front-end processing, transaction processing, networks, intercomputer communication, reservation file processing, and data concentrating.

Education Systems — CLASSIC and other interactive student systems, computer-assisted and computer-managed teaching, data reduction, business education, and computer science education.

Industrial Products — Systems for programmable control, power management, process control, equipment monitoring, order picking, and inventory control and billing.

Origial Equipment Manufacturing — Special packaging and design of computer elements and systems for system builders who resell to end users.

Telephone Data Management — Systems for traffic administration and planning, call addressing analysis, traffic pattern analysis, automatic interception, service order entry, directory assistance, extended testing, revenue collection, maintenance monitoring, billing, message unit recording, and time reporting.

Typesetting — Systems that aid in newswriting, composition, electronic editing and proofreading, automatic justification and hyphenation, classified advertising, accounting, payroll, and circulation.

Laboratory Data Products — Equipment for scientific research, clinical research, pollution monitoring, hospital information systems, radio-isotope study, data acquisition, apparatus control, and data analysis.

Traditional Products — Add-on equipment for current users of DIGITAL products no longer being actively manufactured, and recycled used equipment manufactured by DIGITAL.

digital PRODUCT INDEX

DIRECT SALES CATALOG

Listed here are the more than 600 products available from the Direct Sales Catalog. The computer-related Supplies items are listed in a separate section following the main index. Catalog part no.'s are listed numerically within each section. For your convenience, Catalog and Cash Prices are included.

Catalog No.	Description	Page No.	Cat. Price	Cash Price
861-A	Power Controller, Two-Phase	99	$314	$300
861-C	Power Controller, Single-Phase	99	366	350
861-D	Power Controller, Three-Phase	99	755	723
913- (all dash items)	24 AWG Patch Cords	83	27	25
914-7	7″ Power Patch Cord	82	5	4
914-19	19″ Power Patch Cord	82	5	4
915- (all dash items)	26 AWG Patch Cords	83	34	33
917-2.5	Daisy Chain	87	58	56

Model 264A-02 Remote Operation Badge Reader

STATIC CARD READERS

- ***22-column Badge and 80-column Tab Card Readers***
- ***Choice of Wiring and Reset Configurations***
- ***Interface Electronic Packages***

264-Bit Output Badge Reader, Model 264A, will read column 1 through 22 of a standard tab card (Media I) or a standard size CR60 plastic badge with Media I punching.

960-Bit Output Card Reader, Model 960A, will read 80 columns of a standard 80-column tab card (Media I).

Choice of output bussing combinations with diode isolation matrices is available for both the badge and card readers to reduce external wiring.

BRIEF SPECIFICATIONS, MODELS 264A, 960A READERS

CONTACTS: Form "A"; hole in card makes contact. Spacing per EIA-RS-292, Media I.
264A: 264 contacts. 12 rows x 22 columns.
960A: 960 contacts. 12 rows x 80 columns.
BADGE SIZE: 2.328 in. x 3.250 in. Thickness: 0.007 in to 0.035 in.
CARD SIZE: Standard Media I tab card. Thickness: 0.007 in to 0.015 in.
PRICES (single quantity):

264A Badge Reader	**$250**
960A Card Reader	**$895**

INDUSTRIAL CARD READERS

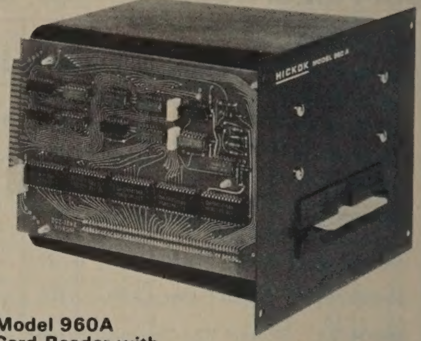
- ***Reliable Performance in Rugged Environments***
- ***Interposer Contacts for Error-Free Readings***

Proven success in industrial environments: applications include programmed control of batching and blending processes, automatic storage/retrival and conveyor systems, and automated test equipment, using high current contact closures.

Little maintenance is needed; the self-wiping interposer contact design eliminates periodic dissassembly or cleaning.

Sure, accurate readings result from using the interposer techniques. An interposer (switching mechanism post) slips through a hole in the card when the reader is actuated. Contacts are remote from the card, avoiding misreadings due to contaminants on the card often found in heavy industrial environments.

Additional choices are offered for manual and motor operation, and for form A (switch normally open) and form B (switch normally closed) switching. Blank and preprinted durable vinyl and mylar cards and card punches are available from Hickok.



Model 960A Card Reader with Model 80 Scanner

Set/reject options offer electrical actuation for remote control or manual actuation for economy.

TTL-compatible electronic scanners provide all circuitry for 12-row output in parallel, column serial. The Model 22 Scanner, for the 264A Reader, and the Model 80 Scanner, for the 960A Reader, translate the punched card data into TTL-compatible interfaces. The Scanners have two operating modes: sequential and addressable (random column selection).

BRIEF SPECIFICATIONS, MODELS 22, 80 SCANNERS

OPERATING MODES: Sequential scan or addressable modes.

LOGIC LEVELS: TTL/DTL levels.

OUTPUTS: 12 data lines; ready; column control; deck position; address; overflow; enable.

INPUTS: 12 row lines; mode selection; inhibit; address; enable; advance; reset; eject (optional 5-volt control).

POWER REQUIREMENTS: 5 volts at 500 milliamperes.

PRICES:

Model 22 Scanner for 22-column 264A Badge Reader	**$225**
Model 80 Scanner for 80-column 960A Card Reader	**$335**

- **COMPACT DESIGN** — Up to 400 Channels in a Half Rack
- **DTL/TTL COMPATIBLE** — Computer Controllable
- **REMOTE CONTROL** — Wired for Remote Start and Advance
- **FIELD EXPANDABLE** — Up to 1000 Channels with Plug-in Cards
- **RANDOM ACCESS** — From Front Panel Controls or Computer Program
- **FIELD REPAIRABLE** — Replaceable Cards Eliminate Down Time
- **VARIETY OF SWITCHES** — Choose Switch Characteristics for Signal to be Switched
- **VARIABLE SCAN RATE** — From .3 to 200 Channels per Second
- **PROVEN RELIABILITY** — Over Six Years of Field History
- **TIME SAVING** — Channel By-pass Available when Computer Controlled

DDC PUTS IT ALL TOGETHER...

with the most complete line of high-performance data conversion products.

DDC makes some of the most advanced data conversion products available. Virtually every interface requirement can be satisfied by some DDC device, instrument or system, designed and tested to highest industrial standards or applicable MIL specifications. For the solution to your data conversion problems . . . come to DDC.

SYNCHRO CONVERSION PRODUCTS

MODULAR COMPONENTS

SINGLE CHANNEL SYNCHRO OR RESOLVER INPUT

Synchro/Resolver-To-Digital
- Resolution to 21 bits
- ± 1 minute accuracy (single-speed)
- 100 RPS tracking rate
- Multi-speed converters

Synchro/DC and DC/Synchro
- 0.1° accuracy, 0.2 min/°C Tempco
- Choice of linear or non-
- variant sin θ, cos θ output
- Rate correction for continuous smooth output to 720°/sec

MULTIPLEXED SYNCHRO OR RESOLVER INPUT

Multiplexed Synchro Converters
- 14-bit binary resolution
- ± 6′ binary accuracy
- 55μsec/channel conversion time
- Simultaneous sampling of all channels

DIGITAL INPUT (D/S and D/R)

Digital-to-Synchro Resolver
- Resolution to 16 bits
- Accuracy ± 1 minute
- High Output; to 50VA

SYNCHRO INSTRUMENTS

ANGLE INDICATORS

Synchro/Resolver Angle Indicators
- 5-digit LED display and BCD output
- Accurate to ±0.005°
- Wideband: 47-1000Hz
- Auto selection of input gain
- Half-rack Wide
- No velocity error tracking to 100 RPS
- Accepts synchro or resolver input

ANGLE SIMULATORS

- Remotely Programmable
- 01° Resolution
- Broad Band 60-1000Hz

INDUSTRIAL PRODUCTS

INDUCTOSYN CONVERTER

- Interfaces directly with a Farrand Inductosyn® or standard resolver
- Presents a parallel or serial absolute digital word
- Resolution of 4096 or 4000 (BCD) counts

ABSOLUTE ENCODER

- Modular converter which includes size 11 transducer
- Self-contained AC excitation
- Requires only +15VDC
- Resolutions of 0.1° and .3°

ELECTRONIC LIMIT SWITCH

- Solid-state equivalent of mechanical cams and switches
- Eliminates wear and maintenance
- Dwell angles set by thumbwheel switches

DATA CONVERSION PRODUCTS

ANALOG-TO-DIGITAL CONVERTERS

Analog-to-Digital

- Resolution to 15 binary bits
- Accuracies to 0.003%
- Rates to 100nS/bit
- High performance differential input Sample-and-Hold modules

Video Analog-to-Digital

- Accuracy and resolution to 8 bits
- Word rates to 15MHz
- 60pSec aperture time
- 10MΩ input impedance

DIGITAL-TO-ANALOG CONVERTERS

Digital-to-Analog

- Resolution to 15 bits
- Accuracies to ±0.0031%
- Settling time to 30nsec
- Output currents to 100mA

SAMPLE/HOLD and TRACK/HOLD AMPLIFIERS

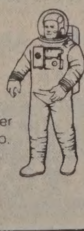
- 10nsec acquisition time
- 40MHz word rate
- 60pS aperture time
- 0.0125% linearity

SEM QUALIFIED MODULES

DDC is a qualified supplier on the SEM (Standard Electronic Module) program of the U.S. Navy. This level of quality reliability and manufacturing have been achieved for an entire series of our data converter product line.

SYSTEMS

DDC's broad standard product base in high reliability/high performance military electronic products enables DDC to be especially competitive in systems and subsystems falling into the categories of Signal Data Converters (SDC's) or "Interface Systems". This systems hardware capability is fully complemented by expertise in all the major systems supporting disciplines such as overall program management; R & M ability design, analysis and testing; Product Assurance; Configuration and Data management and ILS.
The above capabilities have been utilized in the complete design and production of hardware for both shipboard and airborne equipment.



ILC DOVER is the sole designer
and manufacturer of the Apollo.
Skylab and Shuttle space suits

PANEL DISPLAYS

MAINFRAME SUBSYSTEMS

MAINFRAMES are integrated modular subsystems optimized by the selection of functions, resolutions, and speeds for the specifics of each application. Typical groups are outlined below. Contact IEI for additional information.

ANGLE DISPLAYS: The DD135 series accepts, converts, displays, and delivers angles in a variety of forms including binary, BCD, synchro resolver, dual speed, mils, degrees, arc-minutes and seconds and distance in any unit of linear measure at resolutions to 21 bits and accuracies to ±.0003°. Options include bipolar operation and programmable offsets and scaling factors.

SYNCHRO INTERFACES: Multichannel synchro to digital and digital to synchro interfaces accommodating mix of channels, synchro levels, references, and speed ratios, various display and BITE options.

PRECISION COORDINATE CONVERTERS: Polar, spherical, and rectangular coordinate conversion and translation units employing non-volatile hardware math and trig and providing angle and vector resolutions to 18 bits.

STABILIZATION COMPUTERS: ROM programmed microcomputer controllers which accept vehicle, object, and inertial position data, compute true pointing angle, and generate the command signals required to maintain true pointing. Units feature signed 16 bit floating point precision, computing speed, and dynamic accuracy.

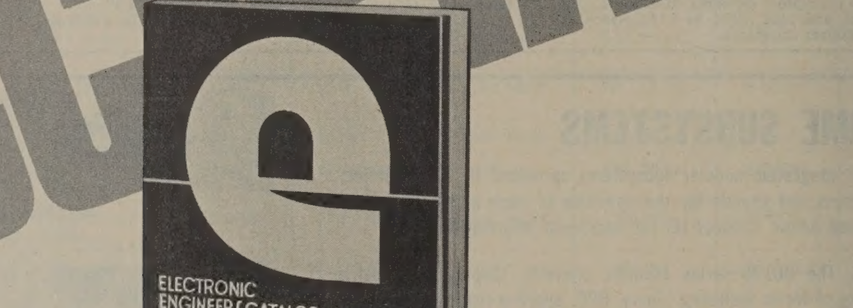
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKATALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

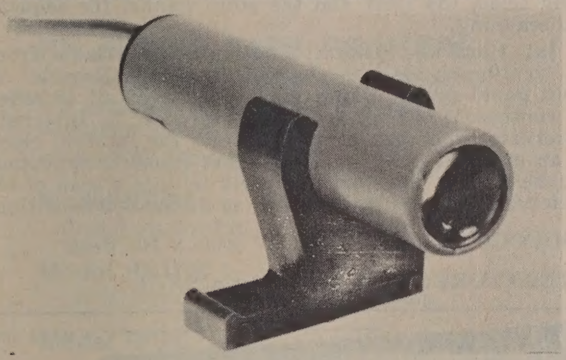
RETRO REFLECTIVE INFRA-RED PHOTOELECTRICS



MRL-C-15 7/8 dia. Infra-red modulated beam. Used for distances to 12 ft. and beyond.

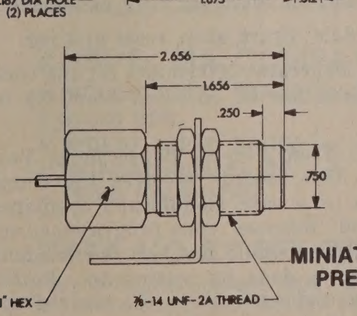
RL-A-15 7/7 dia. unmodulated Infra-red beam. Up to 5 ft.

These photo electric eyes use a solid state infra red LED light source to eliminate interference from ambient light and provide virtually unlimited light source life. The LED (light emitting diode) replaces the usual incandescent bulb which is fragile and of limited life.

The light beam is aimed across the path of the item to be counted to a reflector which directs the beam back to a sensor built into the photo head. The count is triggered when the beam is broken. Many variations are available.

These photo heads may be directly connected to any KEP counter.

TOTALLY SOLID STATE PROXIMITY SENSOR



Non-Contact Integral Sensor/Control

Detects All Metals — Features Extremely Compact Size For Dense Packaging Applications

All Solid State Design and Sealed Construction Insures Improved Reliability — Greater Stability — Longer Life

Two Models Available — 12VDC with Digital Output and 24VDC for Solid State Switching of Relays and Counters

Typical Sensing Range of 0.250"

Broad Frequency Response of 0-10K HZ for Wide Variety of Applications

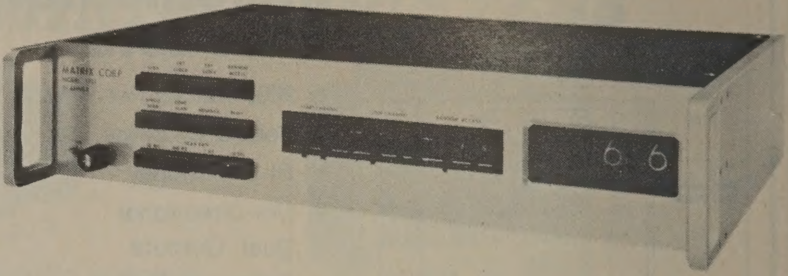
Thermocouple and General Instrumentation Scanners

General Instrumentation MODEL 1701 SCANNER

- **Random access. Channels controlled by a BCD input to allow programming by external source such as computer.**
- **Sequential scanning with end point selection by front panel digital switches.**



GENERAL: The BCD input is compatible with standard TTL logic. The unit contains BCD output for use on auxiliary equipment. Switches are available in multiples of 10 up to 100 channels in a 3½″ cabinet.

CAPACITY: 10 to 100 channels are available in the 3½″ master. Slave units with 10 to 200 channels in 3½″ cabinets allow expansion to 1000 channels.

SCAN RATE: The scan rate may be as fast as 5 msecs.

INPUT: 1. Level — Standard BCD TTL logic. True equals +5 volts and false equals 0 to +0.5 volts. Unused inputs must have a false level or be terminated in 500 ohms max. 2. BCD enable — A false signal must be applied to enable the input data.

CHANNEL READOUT: Neon numerical indicator lights are provided for a visual indication of the channel selected.

CONTACT RATINGS: 500 volts maximum between conductor and chassis, 350 volts maximum between conductors. Current should not exceed 100 ma for maximum life.

OPTIONS:

A. Manual Digital Switch — The switch can manually select any desired channel from the front panel.

B. Sequential Scan — 1. Advance: Application of a true level will cause the scanner to advance one channel. 2. Reset: Application of a true level will hold the scanner in reset (000) position until true level is removed. Short or open circuit is "false." Positive 5V is true. Input impedance is 10K ohms. 3. Stop or Ctr. Disable: Application of a true level will disenable the advance input or stop any external clock inputs. A false level is required to allow sequential scanning.

C. Sequential Scan with End Point Selection — Two digital switches are provided on the front panel to manually select the start and the stop channel for sequential scanning.

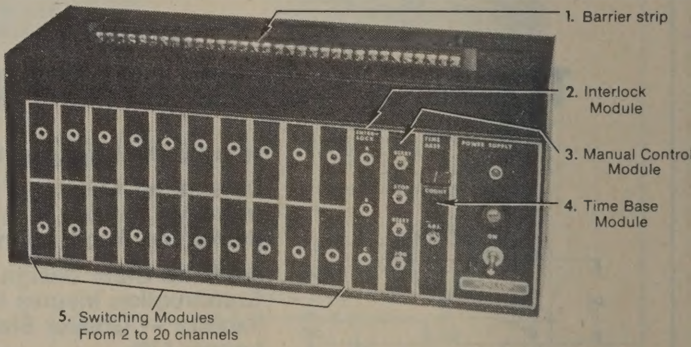
D. Int. Clock — 1. Rate: Continuously variable from .01 to 10 seconds per channel. 2. Single/Recycle: A front panel switch allows a single scan of all switches or continuous scanning of all switches. 3. Internal/External: Front panel switch selects the internal clock or an external clock input. 4. Start Input: Application of true level at the start input will initiate a scan of all switches only when the scanner is in the 000 condition.

DIMENSIONS: 3½″ high x 17″ wide x 10″ deep.

LITERATURE: Write for Bulletin RS-71.

Quantachron V Timer-Programmer

A solid state "cam" timer-programmer with plug-in modules for easier maintenance and less down time.



Field proven • All solid state high level logic • Triac output switching • Up to 20 channels per unit • Programmed by digital switches • Easy to maintain • Plug-in modules • Select only the number of channels and functions needed • Rack mounted, bench mount or enclosure mount • Digital display of count • Manual or remote control • Dimensions 16″ wide x 6¾″ high x 6″ deep.

1. Barrier Strip: All input, output and control functions connect to easily accessible barrier strip. All connections electrically isolated from digital logic.

2. Interlock Module: This module is optional. It allows four independent external contacts normally open to interrupt the count sequence and prevent an actuation of four ouput channels until the interlock is re-established.

3. Manual Control Module: Start, stop, reset and jog.

4. Time Base Module: Generates 100 counts for the time base selected. Time base can be adjusted from 0.5 to 1000 seconds.

5. Switching Modules: From two to 20 channels. Two channels per module. This module receives the count code generated by the time base module and compares it to the "Activate" and "Release" code programmed by the digital switches. Each module has two independent channels. Programming is done by setting the digital switches (by thumb or screwdriver) to the desired actuate and release times.

BUILD YOUR OWN DIGITAL TAPE OR TICKET PRINTERS AT OUR PLANT AND SAVE!

MFE has the proven electro-mechanical design and components to assure our ability to build and supply 100 or 1000 printer assemblies to your specifications at costs below your own. Tell us your needs and we will respond with quantity prices on mechanicals, or complete electronics:

TK SERIES TICKET PRINTERS

- TAB CARD PLUS 2 COPIES
- ACCEPTS PRE-PRINTED TICKETS
- ACCURATE LINE REGISTRATION
- INDEXING OF 28 LINES BY 11 COLUMNS
- ADJUSTABLE TICKET INSERTION DEPTH

Model TK11M

Ticket printer mechanism.

Model TK5E

Ticket Printer with interface and drive electronics • Up to 5 active columns, 11 possible column locations • 6″ wide P.C. board.

Model TK11E

Ticket Printer with interface and drive electronics • Up to 11 active columns • 8¼″ wide P.C. board.

RP SERIES TAPE PRINTERS

- IMPACT PRINTER CHARACTER QUALITY
- 6 COLUMN OR 12 COLUMN FRAMES
- SIMPLE PAPER LOADING
- NARROW FRAME

Model RP6M

Printer Mechanism • Up to 6 columns.

Model RP12M

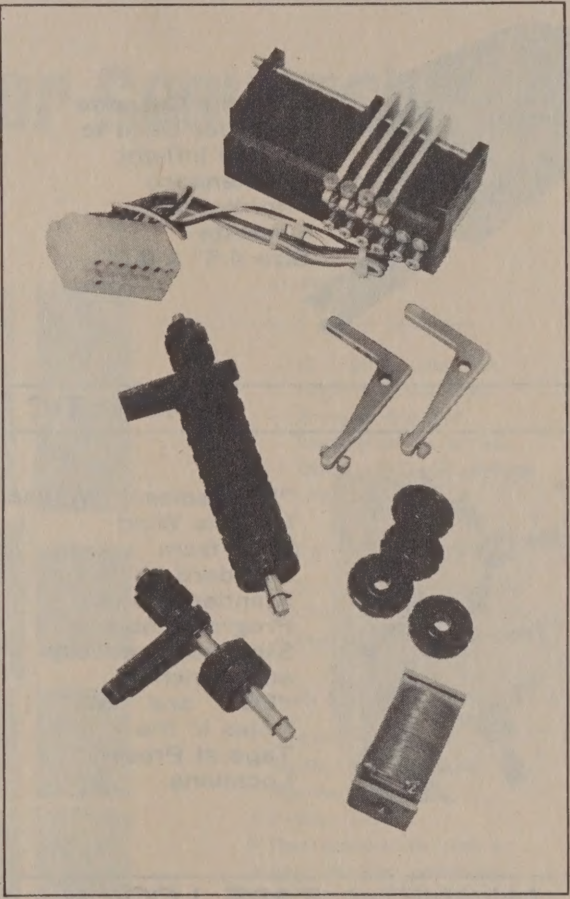
Printer Mechanism • Up to 12 columns.

Model RP6E

Printer with interface and drive electronics • Up to 6 columns • 6″ wide P.C. board.

Model RP12E

Printer with interface and drive electronics • Up to 12 columns • 8¼″ P.C. board.



DIGITAL CASSETTE TAPE TRANSPORTS

Model 250B

Standard Environment 0°C to +55°C

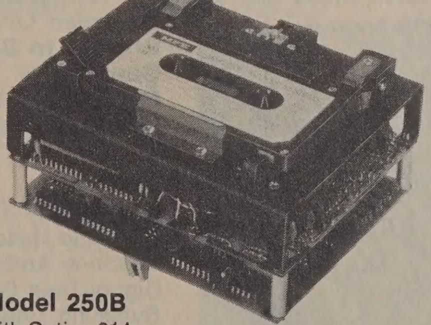
Model 250BH*

Hostile Environment −40°C to +70°C

* Mechanically qualified to MIL-E-5400R (helicopter)

ANSI/ECMA COMPATIBLE

- HIGHEST DATA TRANSFER RATE
- 32,000 BPS
- WIDEST SPEED RANGE
- HIGHEST RELIABILITY
- 15,000 HOUR MTBF



Model 250B
with Option 214
PAR 8 BIT PARALLEL OPTION

DATA I/O BY BIT OR BYTE

The MFE 250B cassette tape transport is ideal for program loading, communications terminals and data acquisition systems. It's ⅓ the size of a minifloppy, has a $1/10^8$ error rate, 366 Kilobyte storage and a 32 Kilobit transfer rate. Just 2 moving parts and no mechanical adjustments assure its constant speed, accuracy, speed range and reliability.

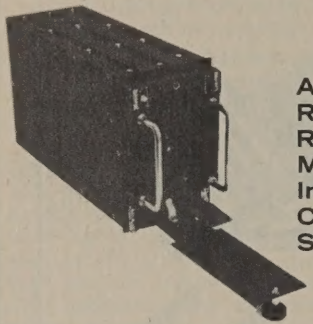
Computer and communications interfacing is simplified by your choice of 8 bit parallel or 8 bit serial option boards — which include Bi ϕ level — The ANSI/ECMA Standard.

The MFE 250 BH (Hostile Environment) tape transport incorporates MIL type components and a MIL connector. In addition, special high temperature heads and motors are used to provide operating ambient from −40°C to +70°C.

MPH
ELECTRONICS

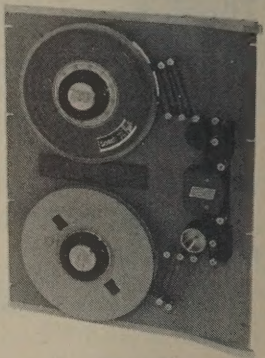
- ★ RUGGEDIZED MAGNETIC TAPE RECORDERS
- ★ MAGNETIC TAPE WINDERS AND TAPE LOOPS
- ★ PHOTOTYPESETTING AND COM CAMERAS
- ★ SPECIAL ELECTROMECHANICAL DEVICES TO CUSTOMER SPECIFICATIONS
- ★ COMPETITIVE PRICES AND FAST DELIVERY

MAGNETIC TAPE RECORDERS

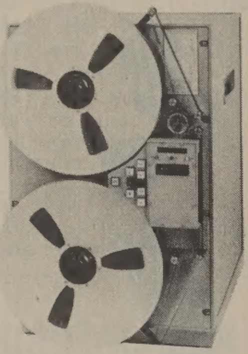


Airborne Cassette Recorder Used to Record Inflight Maintenance Information. Cassette Size 4.5" x 8.0".

"Ruggedized" Computer Peripheral Recorder Uses 8½" or 10½" IBM Reels. Medium Start/Stop Times.

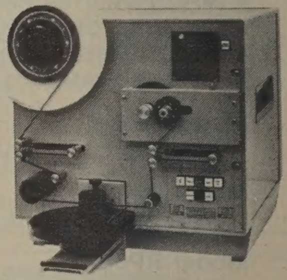


MAGNETIC TAPE WINDERS



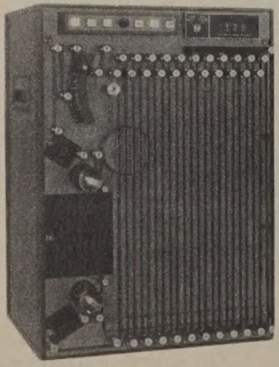
"Ruggedized" Winder Used to Wind Tape from Standard to Non Standard Reels. Programmable to Stop Automatically and Punch "EOT" and "BOT" Holes in the Tape at Preset Locations.

Automatic Tape Winder for Winding Magnetic Tape on Flangeless Tape Reels Used in Some Flight Recorders. Unit is Equipped with a Tape Preparation Platform.



MAGNETIC TAPE LOOPS

A Continuous Loop Recorder Available in Several Sizes and Styles. From Bench Mounted Units as Shown, to Self Standing 6 Foot Cabinet Mounted Units.



Typical Applications:

Magnetic Head Testing
Vibration Analysis
Digital Data Storage
Summing Units
Spectrum Analysis

SPECIAL PRODUCTS

5 Axis Gimbal Assembly

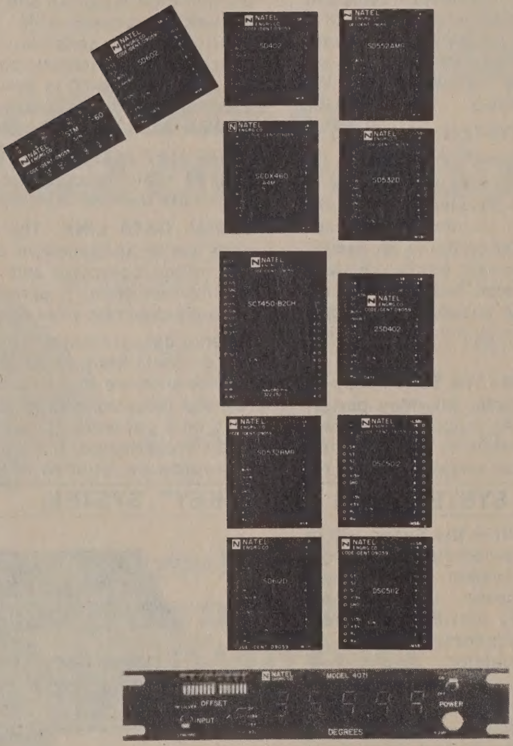
The Innovators In Synchro/Resolver Conversion

1st to OFFER

- Dual speed S/D in ONE standard module; non-binary ratios [2SD402/16 bit resolution]
- Low Profile, low cost, S/D requires only +5VDC supply. [SD402/10 or 12 bit resolution]
- Transformer isolated, 60 to 400 Hz S/D, ONE standard module. [SD630/10 to 16 bit resolution]
- Slim S/D occupies a single 0.5" card slot. [SD552/14 or 16 bit resolution]
- 0.1% transformation ratio, (constant gain), D/S [DSC5112/14 bit input]



#1 TECHNICALLY

- S/D or R/D Converters
  - — 10 to 20 bit resolution
  - — Single and dual speed
  - — Accuracy to 0.003°
  - — Tracking to 43,200°/sec.
  - — CMOS, LPTTL, TTL options
  - — Low Profile
- D/S or D/R Converters
  - — 0.1% transformation ratio
  - — CMOS, LPTTL, TTL options
  - — High power output

OTHER STANDARD PRODUCTS

- Synchro to Linear D.C.
- Synchro to Sine/Cosine (non-variant)
- Synchro Drivers
- Demodulators/Modulators
- Angle Position Indicators
- Solid State Control Transformers
- Solid State Differential Transmitters
- Code Converters
- 2-Speed Processors

With innovation, your custom or non-standard applications often can be fulfilled with minor modifications to our standard products.

Call or write Natel 1st for our latest catalog and literature describing our complete line of industry standard analog/digital synchro conversion modules and systems. Modules are available in hi-rel (MIL-STD-883), military and commercial versions.

Instrument Corporation

- **DATA ACQUISITION SYSTEMS**
- **COMPUTER INTERFACES**
- **SYSTEM 620/H-P CALCULATOR TURN-KEY SYSTEM**
- **INSTRUMENTATION AMPLIFIERS**

DATA ACQUISITION SYSTEMS

System 620 is a complete line of field-proven computer controlled data acquisition products — providing all functions from signal conditioning to computer interface. Each product reflects Neff's high standards of accuracy, versatility and reliability...

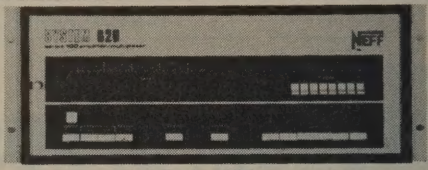
SERIES 100 AMPLIFIER PER CHANNEL SYSTEM. The top of the System 620 family of data acquisition products, the amplifier-per-channel Series 100 offers performance unmatched by any other data acquisition technique. High signal source isolation plus a differential amplifier with guard shield, high-level active filter and FET multiplexer switches **for each channel** provide low noise, 50 kHz throughput rate, 0.01% accuracy and 120dB common mode rejection.

Series 100 offers a choice of four types of differential input amplifiers with plug-in modules for gain and bandwidth selection on each channel. A programmable gain amplifier with gain of 1 through 40 increases the dynamic range of the system under program control. The system is available with a 12-, 14- or 15-bit ADC. Up to 64 channels mount in a single 7 x 19-inch (H x W) enclosure; it is expandable up to 256 channels.

SERIES 200 AMPLIFIER PER CHANNEL SYSTEM. Series 200 is identical to the Series 100 system, but is expandable to 2048 channels.

SERIES 300 SIGNAL CONDITIONER. A subsystem that conditions the output of signal transducers to be compatible with analog measuring systems, the System 300 contains an excitation power supply for each channel providing either constant voltage or constant current excitation. It also has bridge completion circuits and calibration for up to 64 channels per enclosure. Plug-in mode cards configure each channel for operation with a particular type of transducer.

SERIES 400 DIFFERENTIAL MULTIPLEXER. The Series 400, by virtue of its fully guarded differential inputs, provides performance unmatched by systems of its type. An input guard shield, surrounding sensitive input circuits, is driven by the common mode component of the input signal. This achieves 120dB rejection without switching individual guard shields and allows the system to operate from either grounded or floating inputs without degradation.



Series 100

An input filter on each channel rejects superimposed noise and unwanted signal frequencies. CMOS/FET multiplexer switches provide high isolation and allow throughput rates to 10kHz. The system's programmable gain amplifier provides program-controlled input sensitivity from 5mv to 10 volts. Accuracy is enhanced by an automatic zero circuit that compensates for internal drift. Series 400 is available with a 12- or 14-bit ADC. Up to 256 channels are accommodated in one enclosure; the system is expandable to 2048 channels.

COMPUTER INTERFACE. Standard interfaces to most commonly used minicomputers are available. Both Programmed I/O and DMA data transfer are offered.

SERIAL DATA LINK. The Serial Data Link provides asynchronous serial transmission over two coaxial cables between the controlling computer and up to eight System 620's located at remote test sites. It permits data acquisition and encoding at the individual test sites — reducing analog cabling requirements.

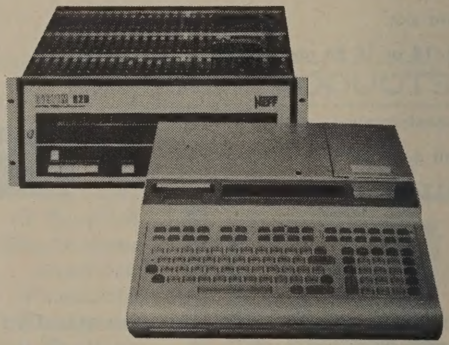
A serial data transmitter accepts 16-bit parallel computer words and converts them to serial form. Transmissions to and from the remote sites are in the form of a 20-bit pulse train. All transmitted and received data is checked for parity and pulse count — both on a per-word and data block basis. An error flag is set if errors are detected. Separate 16-bit parallel data output and status words are returned to the computer.

SYSTEM 620S "TURN-KEY" SYSTEM

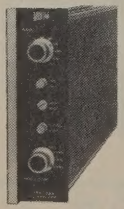
The "Turn-Key" System 620S consists of either the Series 100 or Series 400 system interfaced to the Hewlett-Packard Model 9825A Desk Top Calculator, used for system control, data storage and processing. The 9825A's speed, computational capability and fast semiconductor memory provide the system control and data processing power of a minicomputer while retaining the operating convenience of a calculator.

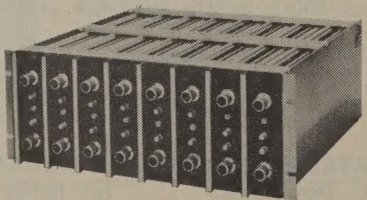
The system is supplied with standard data acquisition programs. A built-in, two-track tape cassette drive is used to load programs and record data. Its easy-to-learn high-level programming language was designed especially for technical personnel having little or no programming experience.

A variety of high-speed I/O techniques including DMA, buffered I/O and fast read/write with vectored interrupt capability can be utilized. A 16-bit parallel hardware interface provides data transfer rates to 43,000 samples per second in DMA mode with the Series 100 system and up to 9800 samples per second with Series 400.



INSTRUMENTATION AMPLIFIERS





Neff offers a complete line of differential instrumentation amplifiers for laboratory, industrial and aerospace applications. Neff amplifiers feature gains of 1 to 2500, accuracy of 0.01%, 120dB CMR, switch selectable filter, simultaneous narrowband and wideband outputs, integral power supplies and separate input and output zero controls.

Models are available with 300V common mode, programmable gain, galvanometer output and fullscale zero offset capability. A single-channel case is available as well as 8-channel or 16-channel rack mounting enclosures.

LSI-enhanced data conversion!

If you're into AC Instrumentation or ATE, then you've probably worked with our high-accuracy, high-reliability instrumentation . . . or wanted to! We are the innovators of equipment and modules based on an industry-first usage of LSI that resulted in performance parameters unmatched by competitive products.

All North Atlantic equipment reflects the highest state-of-the-art technology. Each product we produce goes through extensive testing including burn-in at a 100% level.

NORTH ATLANTIC
Synchro Data Module
Synchro-To-Digital Converter

Now! LSI in Synchro Converter modules!

Founded on our leadership in AC Instrumentation is our innovative line of data conversion modules. Making use of advanced LSI technology, all receive the same, intensive quality-control tests as our instruments including burn-in. If you're into data conversion, your logical next step should be to learn about our LSI-enhanced modules.

LSI/85 and LSI/90 SYNCHRO TO DIGITAL
LSI-enhanced reliability
10, 12, or 14 bits
3-minute accuracy at 1440°/second
All standard Synchros and Resolvers
Type II Tracking—no velocity lag.

785 DIGITAL TO SYNCHRO
Full 1.25 VA output at 60 and 400Hz
10, 12, or 14 bits
Slew speed 4000°/second
4-minute accuracy under full load
All standard Synchros and Resolvers

MODEL 8300 ANGLE POSITION INDICATOR
.01° Resolution
High reliability with LSI
LAZY EIGHT AMBIGUITY INDICATOR
Programmable for Synchro or Resolver and Line-Line Voltage
2 channel

MODEL 8800 ANGLE POSITION INDICATOR
0.005° accuracy, 5½ digits
High reliability with LSI
Small-size, remotely programmable
Synchro and/or resolver—auto line/line select
2 channel
IEEE Interface (optional) for ATE

MODEL 225 DIGITAL PHASE ANGLE VOLTMETER
High phase and voltage accuracy
Direct and automatic phase angle display
AC ratiometer capability
Autoranging and reference AGC
Remote control and digital output capability
IEEE Interface (optional) for ATE.

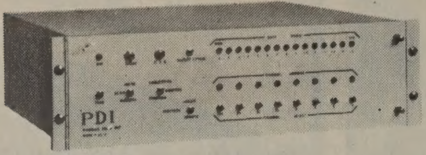
PDI® Analog Data Acquisition Subsystems

6000 SERIES High Level Analog Data Acquisition Systems



Units in the 6000 Series are highly flexible instruments, with many options, that can be matched exactly to the capabilities and characteristics of the control unit or data storage device. Within the 6000 Series there are three subgroups. The subgroups feature high speed, high temperature stability, and low cost. All three groups offer resolution from 8 to 15 binary bits and will accommodate up to 256 single ended or 128 differential inputs in a single chassis. These features combined with single channel, random and sequential address capabilities make the 6000 Series easily adaptable to your system requirements without the need for costly custom engineering. The system comes complete with all necessary power supplies for its operation and requires only 110V AC line power.

FEATURES:

- Multiplexed Thruput Rates to 1MHz
- Temperature Compensation to 10 ppm
- Versatile optional Manual Controls and Indicators
- Choice of Standard Input Voltage Range Options
- Field Expandable to 256 Channels (S.E.)
- Differential or Single Ended Input
- Resolution to 15 Bits
- Input Overvoltage Protection to ±30 Volts
- System Accuracies to 0.01%

3 SUB-SERIES

6900 - Highest Speed

The 6900 group provides the highest thruput rate in the 6000 Series. Resolution of 8 to 15 binary bits is available with multiplexing rates to 1 MHz for an 8 bit model, 400 KHz for a 12 bit model and 220 KHz for a 15 bit model. The 6900 system was designed primarily for applications where the analog input bandwidths are high. Base price: $3,155.00.

Model No.	6908	6910	6912	6913	6914	6915	Notes
No. of Bits (Binary)	8	10	12	13	14	15	
Resolution (1 Part in)	255	1,023	4,095	8,191	16,383	32,767	
Thruput Rate (KHz)	1000	800	400	250	220	220	(1)
Thruput Error (% FSR @ 25°C)	0.4	0.15	0.05	0.03	0.02	0.01	(2)
Input Ranges (STD)	A,B	A,B	A,B,C,D,E	A,B,C,D,E	B,C,D,E	B,C,D,E	(3)

General 6900 Specifications

System T.C.: 0.003% FSR/°C
Aperture Delay: 10 nanoseconds
Aperture Uncertainty: 1 nanosecond

Notes:

(1) Thruput rate for sequential mode or random mode when address is supplied one channel ahead.
(2) Accuracy specification includes all error sources and the quantizing error of ±½ LSB.
(3) Input ranges: A=0 to +5V; B=±5V; C=0 to 10V; D=±10V; E=±10.24V

6700 - Highest Stability

The 6700 group provides the highest thermal stability of the 6000 Series. The overall system temperature coefficient is less than 0.001% FSR/°C or 10PPM. This system was designed specifically for applications where wide temperature variations might be encountered and high accuracy must be maintained. Base price: $2,398.00.

Model No.	6708	6710	6712	6713	6714	6715	Notes
No. of Bits (Binary)	8	10	12	13	14	15	
Resolution (1 part in)	255	1,023	4,095	8,191	16,383	32,767	
Thruput Rate (KHz)	110	90	65	60	20	20	(1)
Thruput Error (% FSR @ 25°C)	0.4	0.1	0.025	0.015	0.01	0.01	(2)
Input Ranges (STD)			A,B,C,D,E			B,C,D,E	(3)

General 6700 Specifications

System T.C.: 0.001% FSR/°C
Aperture Delay: 10 nanoseconds
Aperture Uncertainty: 1 nanosecond

Notes:

(1) Thruput rate for sequential or random mode
(2) Accuracy specification includes all error sources and the quantizing error of ±½ LSB
(3) Input ranges: A=0 to +5V; B=±5V; C=0 to 10V; D=±10V; E=±10.24V

6400 - Lowest Cost

The 6400 offers an attractive compromise between thruput rate, temperature stability, and cost. While the lowest priced group in the 6000 Series, it offers moderate thruput rates and thermal stability. The 6400 group was designed for applications where low cost is a major consideration along with reasonably high performance. Base price: $1,973.00.

Model No.	6408	6410	6412	6413	6414	6415	Notes
Number of Bits (Binary)	8	10	12	13	14	15	
Resolution (1 part in)	255	1,023	4,095	8,191	16,383	32,767	
Thruput rate (KHz)	70	65	50	25	10	4	(1)
Thruput Error (% FSR @ 25°C)	0.4	0.1	0.025	0.015	0.01	0.01	(2)
Input Ranges (STD)			A,B,C,D,E			B,C,D,E	(3)

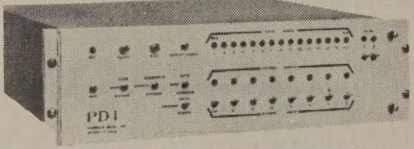
General 6400 Specifications

System T.C.: 0.002% FSR/°C
Aperture Delay: 50 nanoseconds
Aperture Uncertainty: 10 nanoseconds

Notes:

(1) Thruput rate for sequential or random mode
(2) Accuracy specification includes all error sources and the quantizing error of ±½ LSB
(3) Input Ranges: A=0 to +5V; B=±5V; C=0 to 10V; D=±10V; E=±10.24V

7000 SERIES • Automatic/Programmable Gain Ranging



The 7000 Series offers a unique solution to high speed analog to digital conversion where the input amplitude cannot be predicted in advance of the conversion. Utilizing a high speed, fast settling multi-range amplifier the 7000 Series can switch channels, determine the gain range, and perform a 14 bit A to D conversion in less than 20 microseconds. Five models with thruput rates from 10 KHz to 50 KHz are available. In the Autoranging mode a 14 bit data word is combined with 2 bits of range data for a 16 bit output word. A single chassis will accommodate from 8 to 128 differential channels. Base price: $6,007.00.

Model No.		7115	7215	7315	7415	7515	Notes
Thruput Rate (KHz)		10	20	30	40	50	
Thruput Error (% FSR @ 25°C)							(1)
Full Scale	±10.0	0.01	0.01	0.01	0.01	0.01	
Input	±1.0	0.015	0.02	0.025	0.03	0.035	
Range (Volts)	±0.1	0.02	0.025	0.03	0.04	0.05	

Features:

- Resolution to 15 bits
- Thruput Accuracy to .01%
- Auto or Programmable Gain Ranging
- Four Customer Selected Gain Ranges from 0.1 to 10.0 Volts
- Multiplexed Thruput Rates to 50 KHz

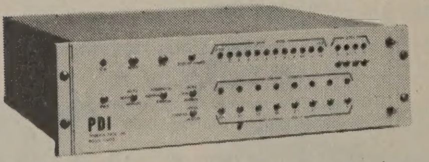
General 7000 Specifications

Input Ranges (Customer Selectable): Any four from ±0.1 to ±10.0 Volts
Input Impedance: 100 megohms (ON or OFF)
CMRR (DC to 60 Hz with 350 ohms source unbalance)
Gain Level: 1 = 80 db; 10 = 100 db; 100 = 120 db
Common Mode and Normal Mode Voltage: ±11 Volts.
Cross Talk Rejection (DC to 1 KHz with 350 ohms source unbalance)
Thruput Rate (KHz): 10 = 110 db; 20 = 104 db; 30 = 98 db; 40 = 92 db; 50 = 86 db
Gain Range Change: 90% of full scale
Thruput T.C.: 0.002% FSR±3 μ volts RTI/°C

Notes:

(1) Thruput error includes all error sources and ±½ LSB in automatic mode. Error is slightly less in programmed mode.

8000 SERIES • Automatic/Programmable Gains to 1024



The 8000 Series features adaptability to almost any input signal currently in use. The system offers automatic or programmed gain selection with 11 binary ranges from ±10 millivolts to ±10.24 volts full scale. In the automatic ranging mode the gain ranges effectively provide the system with a binary floating point capability. The data word (12 binary bits) is combined with the range data (4 binary bits) for a 16 bit output word. The 8000 System will resolve input changes at 5 microvolts on the ±10 millivolt range for an overall analog dynamic range of 132 db. Base price: $4,187.00.

Gain Ranges: 1, 2, 4, 8, 16, 32, 64, 128, 256, 512, 1024
Input Ranges: ±10.24, 5.12, 2.56, 1.28, 0.64, 0.32, 0.16, 0.08, 0.04, 0.02, 0.01 Volts
Thruput Error: Less than .05% of the reading on any input over 5 millivolts @ 25°C
Differential CMRR (DC to 60 Hz): 80 db at unity gain and increasing to 120 db at a gain of 1024 with 350 ohms source unbalance
Common Mode and Normal Mode Voltage: ±11 Volts.

* Prices subject to change without notice.

Aperture Time: 50 nanoseconds
System T.C.: 0.001% FSR±1 μ volt RTI/°C
Crosstalk Rejection: Minimum of 100 db, DC to 60 Hz
Input Impedance: 100 megohms (ON or OFF)
Thruput Rates:

Automatic Gain Ranging Mode

Single Channel	2.5 KHz
Multiplexed Input	1.0 KHz

Programmed Gain Mode

Fixed Gain, Single Channel	20 KHz
Gain and Channel Switching	1.8 KHz

Features

- Resolution of 12 Bits
- 11 Binary Gain Ranges
- ±10 mv to ±10.24V Input Ranges
- Thruput Rates to 20 KHz
- Auto or Programmable Gains
- System Accuracy of 0.05% of Reading

Subsystem computer interfaces available. Contact factory for quotation.

NOTES:
1. Lower resolution units available on request.
2. Conversion time includes settling time to rated accuracy for a full-range step (worse case). See Conversion Timing Diagram.
3. Accuracy figures include all error parameters.
4. Standard operating temperature range is 0°C to 70°C. Extended temperature ranges are available. Also, on special order, units available to 2.5 ppm/°C.
5. For Model Number Coding, see Ordering information.
6. For special configurations or applications, contact your local Phoenix Data, Inc. representative or the factory.
7. The temperature coefficient includes all gain, offset, reference and differential linearity related temperature effects over 0 to 70°C. For extended operating temperature ranges the T.C. degrades by a factor of 2 from +70°C to +90°C and from 0°C to —55°C.

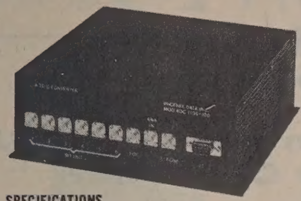
PDI® High Speed Analog to Digital Converters



MODEL ADC1106-100
A/D CONVERTER COMBINES

High Speed with
(100 million conversions per second)

Exceptional Accuracy
(±0.75%±½LSB)

SPEEDS to 100 MHz

Phoenix Data's new very-high-speed (100 million conversions per second) analog to digital converter is designed to digitize ultra-high-speed analog input signals — including high-speed display and radar signal digitized input — with accuracy of ±0.75%±½LSB.

The new ADC1106-100 also has a resolution of 6-bit binary or 2's complement with a ±2 volt input range. A "system-ready" module only 8"x.8"x 3", it is totally self-contained and incorporates all of the functions necessary to perform 6-bit binary conversions at 100 million per second except for power supply. Model ADC1106-60 is identical with Model ADC1106-100 except that conversions are performed at a rate of 60 million per second.

SPECIFICATIONS

ANALOG INPUT SIGNAL

Accuracy	±0.75%±½LSB
Full Range	±2 volts
Connection	Coaxial, Single Ended
Input Impedance	50 Ohms
Bandwidth, 1dB	50 MHz

CTC (Command to Convert) STROBE

Logic Type	ECL
Input Impedance	50 Ohms
Conversion	Initiated on negative going transition
Pulse Repetition Rate (PRR)	100,000,000/Second
Pulse Duration	Square wave

END OF CONVERSION (EOC)

Pulse	ECL level, rising edge signifies EOC
Delay	Occurs approx. 30 nanoseconds after CTC Strobe

DATA OUTPUTS

Code	6-bit Binary and 2's complement with monotonicity
Logic Type	ECL compatible
Drive	50 Ohm lines
Parallel Data Out	Sustained 1 cycle
Output Skew	±1.0 nanosecond (typical)

POWER REQUIREMENT
+5.2Vdc ± 5% @ 2.0 ampere
—5.2Vdc ± 5% @ 4.0 ampere

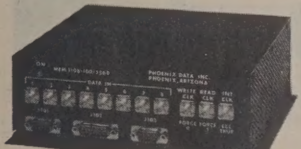
PACKAGE	Approx. 8.0"x8.0"x3'

ENVIRONMENTAL
Temperature

Operating	0°C to +50°C
Storage	—55°C to +125°C
Humidity	0 to 99% relative, no condensation

Base price: 1106-60 $ 6,459. 1106-100 $12,944.

HIGH SPEED BUFFER MEMORY for A/D converter, high speed data buffering



GENERAL DESCRIPTION

The Model MEM 1108-100/2560 Buffer Memory has been specifically designed for use with Phoenix Data's Ultra High Speed D/A Converters — Models 1105-60/100 1106-60/100, where standard analog conversion rates range as high as 100 MHz for high speed communication and other data acquisition applications. The MEM 1108-100/2560 is also ideally suited for use with other A/D converter systems employing up to 8-bit resolution and ECL interface logic. When used with Phoenix Data A/D Converters, the buffer memory accepts the 6-bit converter output, and in addition, two external CPU supplied control or identifier bits as a part of each 8-bit data word. All memory write operations are synchronized (strobed) by the converter End-Of-Conversion (EOC) pulse. Phoenix Data's Model MEM 1108-100/2560 High Speed Buffer Memory represents the latest in memory design technology and data acquisition modules — allowing the user to buffer ultra-high speed analog data conversions for greater efficiency and more effective use of computer interfacing. Data blocks of 2560 A/D converted data words can be accumulated and stored in memory at rates of up to 100 megawords per second, while memory readout is accomplished at a 4 megaword rate when using the internal buffer clock, or at any other selected rate up to 4 megawords per second when using an externally supplied clock.

FEATURES

- 2560 Word Storage Capacity
- 8-bit Word, Parallel Input/Output
- Up to 100 MHz Word Input Rate
- Up to 4 MHz Word Output Rate
- Load Synchronized With End-Of-Conversion Pulse (EOC)
- Internal/External Buffer Read Clock Selection
- ECL Logic (Converter Interface)
- TTL Logic (CPU Interface)
- Output & Recirculate Mode
- Output & Clear Mode
- Fill & Continue Mode
- Fill & Stop Mode

SPECIFICATIONS

- General

Memory Capacity	2560 words
Word Length	8 bits
Input Word Rate	Up to 100 megawords per second
Output Word Rate	4 Megawords per second with internal clock — 0 to 4 Megawords per second with external clock

• Input Data Format	Bit parallel, word serial
Output Data Format	Bit parallel, word serial (sequential . . . first in, first out)

- Input Control Signals

Write Clock (EOC Pulse)	Falling edge of ADC End of Conversion (EOC) pulse (ECL logic)
External Read Clock	0 to 4 MHz buffer read clock from CPU
Output And Recirculate	Output and Recirculate enable from CPU (TTL logic)
Output And Clear	Output and Clear enable from CPU (TTL logic)
Fill And Continue	Continuous Fill enable from CPU (TTL logic)
Fill And Stop	Fill and Stop enable from CPU (TTL logic)
External Stop	External Stop signal from CPU (TTL logic)

- Output Control Signals

Buffer Full	Logic level from memory (TTL logic). Occurs on first occurrence of location 2560 write (load), in Fill And Stop mode only.
Buffer Empty	Logic level from memory (TTL logic). Occurs on location 2560 read (empty), in Output And Stop mode only.
Output Strobe	One data word outputted for each strobe (TTL logic)

- Operating Modes

Write Memory	1. Fill and Stop — normal sequencial write and terminate on Buffer Full signal (2560 words stored) 2. Fill and Continue — sequential over-write until terminated by External Stop signal from CPU
Read Memory	1. Output and Clear — normal sequential read and clear, terminating on Buffer Empty signal (2560 words outputted) 2. Output and Recirculate — sequential read and circulate until terminated by External Stop signal from CPU

Base price: MEM 1108-100/2560: $9978.00

NEW AND EXCLUSIVE A/D CONVERTER features:
High Speed: 4 μsec. High Resolution: 15 Bits. High Accuracy: ±0.0065% of FSR

Phoenix Data's new Model ADC1215F A/D converter is a high-performance design with a total conversion time of 4 microseconds (250,000 conversions per second), a resolution of 15 binary bits (1 part in 32,767), and guaranteed accuracy of ±0.0065% of FSR in addition to complete monotonicity. Analog dynamic range is in excess of 86 db. Model ADC1215F is available in two basic models: single-ended and differential. The ADC1215F utilizes a single fold-back technique in conjunction with successive approximation conversions to achieve an equivalent conversion rate of 267 nanoseconds per bit.

Model ADC1215 is identical with the ADC1215F except that conversion time is 10 microseconds.

ADC1215F SPECIFICATIONS

ENCODING (Digital Quantizing)

Number of Bits	15 binary bits
Accuracy (% of Full Range)	0.0065%
Temperature Coefficient	±10 PPM/°C
Resolution	1 part in 32,767
Conversion Time (Total)	4.0 microseconds

ANALOG INPUT SIGNAL

Standard Full Range	±10V
Connection	Single Ended or Diff. Opt.
Input Impedance	100 Megohm
Overvoltage	±15V, Maximum

CONTROLS, INPUTS AND OUTPUTS

Output Codes	2's Complement and Offset Binary
Logic Levels	TTL/DTL
Data Output Drive	Full TTL capability
Output Data	Stored until updated at end of conversion
Command to Convert	Conversion is initiated on leading edge of positive going pulse.
Busy Output	Goes true at CTC and False at End of Conversion
End of Conversion	Pulse goes true at End of Conversion 100 nanoseconds duration
Overrange	Output goes full scale and overrange bit goes true

ENVIRONMENTAL

Temperature/Operating	0°C to +70°C
Temperature/Storage	—55°C to +100°C
Humidity	0 to 99% Relative, non-condensing

POWER REQUIREMENTS
+15V, ±5% @ 150 MA • —15V, ±5% @ 75 MA • +5V, ±5% @ 900 MA

Base price:
1215 $1,208.00
1215F $1,813.00

This new addition to our DMTP-6 series printers provides a built-in microprocessor controller. Designed with the OEM user in mind, the printer provides a medium speed, matrix impact print head and controller for one low price.

Add up the advantages: 80-96 columns at 110 CPS of both data and text on standard 8½″ roll paper — that prints 1-4 copies at a clip — that can print fan-fold forms and labels — and that combines easily replaceable ink rollers with a self reversing 10 million character life ribbon.

Equally remarkable, where else can you find a budget printer with an integral microprocessor that not only provides a choice of such interface functions as parallel ASCII, RS-232C/I-Loop and switch selectable baud rates from 110 to 1200, but includes all needle drivers and required diagnostic routines as well. Where else, but at Practical Automation! For more details request bulletin #922.

The Practical Automation printer family includes ticket printers, text or data printers, print heads and printer sub-assemblies, all designed for the OEM who demands high quality and low prices. For more details call or write today.

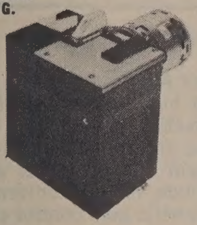
PRECISION TAPE PERFORATORS

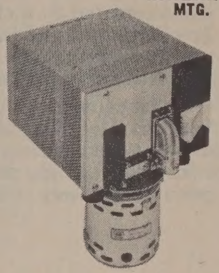
TAPE PERFORATORS

75 OR 120 CHARACTERS PER SECOND

VERTICAL MTG.



HORIZONTAL MTG.



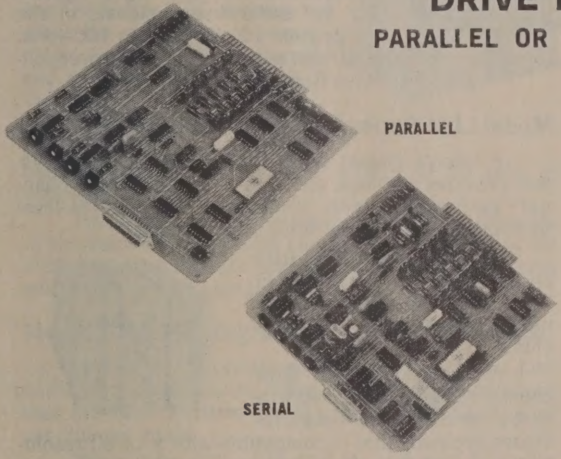
120 CHAR/SEC with QUIET COVER

PMC synchronous tape perforator mechanisms for front or behind panel applications punch 1, 7/8 and 11/16 inch wide mylar or paper tapes interchangeably in 5, 6, 7 or 8 level codes.

- Model P7501 for 75 char/sec, P1201 for 120 char/sec.
- Positive motor driven punching, punch retraction, and sprocket tape drive for highest reliability.
- Punch head assembly replaceable in minutes for effortless long term maintenance.
- All models complete, ready to be mounted, punch on application of 115 V, 60 Hz motor power and timed DC pulses.
- Sound absorbing cover for office environment front panel 120 char/sec punching.

DRIVE ELECTRONICS

PARALLEL OR RS232-C SERIAL INPUTS



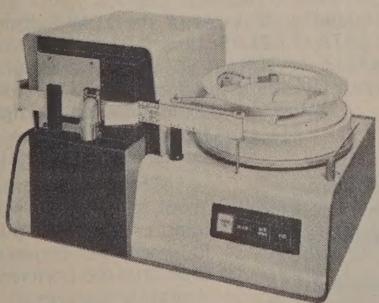
PARALLEL

SERIAL

For driving PMC tape perforator mechanisms from synchronous or asynchronous logic level inputs. Perforator starts up automatically on arrival of first character, data buffering for true asynchronous operation, automatic shut down.

- Part numbers PPE7501 and PPE1201 for parallel inputs and SPE7501 and SPE1201 for serial inputs match PMC 75 and 120 char/sec perforators.
- Boards interchangeable for choice of serial or parallel inputs.
- Punch inhibit circuits for tape out, loading and back space.
- Serial boards provide even or odd parity, parity error signal, and LED driver outputs for receive data, carrier detection, and data ready lines.

TAPE PERFORATOR SYSTEMS



PMC desk or panel mounted tape perforator systems combine PMC 75 or 120 char/sec perforators with PMC plug-in parallel or serial drive electronics and tape handling, roll or fan fold.

- Basic Model TPS-2000.
- Quiescent on-line operation with automatic start-up on first input datum.
- Data buffering for true asynchronous operation, zero to maximum punch speed.
- Interchangeable plug-in electronics for serial or parallel input data.
- Jumper selection of 115 V, 60 Hz or 230 V, 50 Hz power.

ANALOG-TO-DIGITAL

For the Highest Accuracy

GMAD Series Analog-to-Digital Converters

Here are the world's most reliable Analog-to-Digital Conversion Systems with speed and resolution to meet the needs of every instrumentation and data conversion system.

From the 'world's fastest high resolution ADC'—the GMAD-01 — to the new 'low cost' GMAD-4 that can be easily expanded to over 1000 analog input channels at less than $25 per channel, Preston's GM Series of ADCs are delivered with exactly the right amplifiers, multiplexers, controls, indicators and interface features to give your system the ultimate in accuracy, flexibility and efficiency!

And every model in the GM Series comes complete with integral power supplies and interface connectors — ready to install in a standard 19 inch wide rack.

With the GM Series of ADCs, you have a complete selection of low-level and high-level analog amplifiers and multiplexers. This versatile input system is further complemented by a choice of several Sample-and-Hold Amplifiers and special gain scaling buffer amplifiers whose configurations include manual or remote programmed address and automatic gain control capability.

For complete information including detailed specifications, block diagrams, timing charts and examples of overall system performance, call or write Preston Scientific. We'll send you our "Specifying Guide" and include price and delivery information, too!

Preston's ADCs interface with all types of analog input signals —

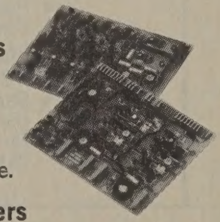
Model GMM Multiplexers

Available with both single-ended and differential inputs, GMM Multiplexers provide a common output line isolated from all other signals by 2000 Megohms.

Expandable to over 1000 channels as system requirements grow, Model GMM Multiplexers specifications include —

Input Impedance	Greater than 50 Megohms
Switching Time	Less than 1 microsecond
Input Offset Current	Less than 10 nanoamps
Input Voltage	Up to ±10 volts
Crosstalk	Less than ±0.01% for 100 channels
Linearity	±0.01% of Full Scale
Zero Drift	Less than ±0.01% of F.S.

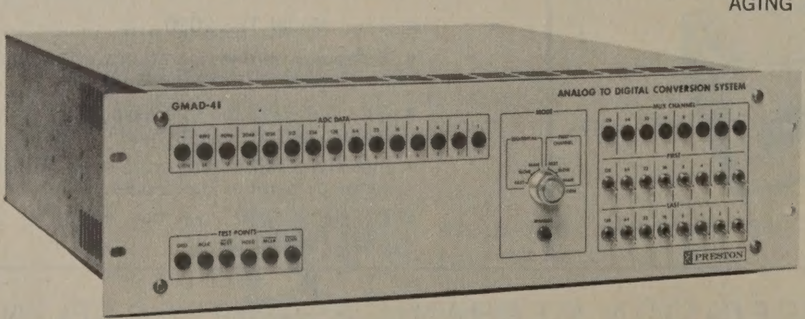
Model GMD-PG and GMD-ADC Programmable Gain Amplifiers



These gain scaling amplifiers are specifically designed for Analog-to-Digital Conversion applications where the full scale amplitude of the input signals vary over a wide range.

Model 8300 XWB Series Amplifiers

For the ultimate in accuracy, reliability and system flexibility, the exclusive "Balanced Precision" performance of the 8300 XWB Series Amplifier is unsurpassed. Models are available with both manual and remotely programmed gain and filter selection on a per-channel basis for use in ADC systems.

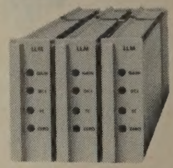


Model GMD Amplifier-Multiplexers

This card-mounted amplifier-multiplexer provides a low-cost amplifier-per-channel input signal system for full scale analog signals in the range from 10 millivolts to 100 volts. Optional output filters cover frequencies from 1 Hz to 60 kHz.

Model LLM Series Low Level Multiplexers

Preston's newest multi-channel analog input system provides the high accuracy of "amplifier-per-channel" performance with transformer isolated low-level multiplexing at channel rates up to 50 kHz.



Gain accuracy, stability and linearity are all within ±0.01% of full scale, and the input impedance is 100 Megohms.

As many as 2048 data channels can be combined in a single system. Performance includes accuracy that is compatible with a 14 bit resolution ADC and provides a CMR of 130 db at 60 Hz with a 350 volt CMV. Stability specifications include a Zero TC of less than 0.1 uV/°C RTI and 0.1 MV/°C RTO, resulting in the same "Balanced Precision" specifications that are the hallmark of Preston's famous instrumentation amplifiers.

Outstanding features of the LLM System include INPUT DATA FILTERS from 10 Hz to 30 kHz, PROGRAMMABLE GAIN from 1X to 1000X on a per-channel basis (gain memory optional), and DIGITAL AVERAGING using the ADC as a digital filter (programmable on a per-channel basis with optional memory).

There's a lot more to tell about how Preston's LLM Systems provide the ultimate in low-level A-D conversion with sophisticated performance and operating features at moderate cost, so please request our comprehensive 12-page brochure for the complete LLM System story.

CONVERSION SYSTEMS
in Data Acquisition Systems

PRESTON

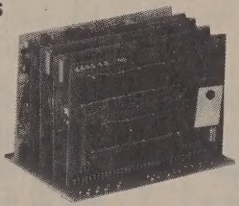
Five Models Are Included In the GMAD Series To Provide An Exceptionally Wide Range of Speeds and Resolutions.

Resolution	Accuracy (% of F.S. ±½ L.S.B.)	Conversion Time				
		GMAD-01	GMAD-1	GMAD-2	GMAD-3	GMAD-4
14 binary bits + sign	0.010%	*	1.5 μsec	5.0 μsec	10 μsec	20 μsec
13 binary bits + sign	0.015%	*	1.4 μsec	4.5 μsec	9 μsec	19 μsec
12 binary bits + sign	0.025%	0.5 μsec	1.2 μsec	4.0 μsec	8 μsec	18 μsec
11 binary bits + sign	0.05%	0.4 μsec	1.0 μsec	3.5 μsec	7 μsec	17 μsec
10 binary bits + sign	0.1%	0.3 μsec	0.3 μsec	3.0 μsec	*	16 μsec
9 binary bits + sign	0.2%	0.2 μsec	0.2 μsec	2.5 μsec	*	*
8 binary bits + sign	0.4%	0.1 μsec	0.1 μsec	2.0 μsec	*	*
7 binary bits + sign	0.8%	*	0.1 μsec	1.5 μsec	*	*
4-digit BCD and sign	0.01%	*	*	10 μsec	40 μsec	*
3-digit BCD and sign	0.1%	*	*	8 μsec	32 μsec	*

*These configurations not available

and all types of digital output, control and computer signals, too.

Digital-to-Analog Converters



Module-mounted multichannel digital-to-analog converters are also available in the GM Series ADC systems to make the generation of analog data simulation as accurate and reliable as the basic A-D converter.

Specifications include 15 bit resolution and accuracy, update rates to 500 kHz and outputs of 10 volts or 100 volts full scale.

These modules are designed to be installed within the standard GM Series chassis, and the outputs are available on rear-panel connectors for easy interfacing with other system components.

Model GMDSRC Digitally Programmable Clock

This optional crystal-based scan rate clock permits selection of a wide range of multiplexing rates so that the ADC system's speed can be optomized on a per-channel basis.

The multiplexing rate can be reduced from the maximum clock rate in a series of binary steps that are controlled from either a remote 15 binary address or from a series of front-panel switches.

The GMAD-1 ADC System shown here is equipped with these clock address controls, a series of lights that indicate the binary clock address being used to control the scan rate clock, controls for multiplexer first- and last-channel limits (GMC Logic System) and address switches to enter gain address for GMD-PG/AGC Gain Scaling Amplifiers.

Front panel indicators also provide ADC Data and Currently Addressed Channel as a LED binary display.

Logic Interface To Your Computer

Direct interfacing with your computer or controller can now be made an integral part of every GMAD Series A/D Conversion System. Preston can include plug-in logic and control modules that provide the right sequencing and logic levels to match your particular computer system.

Just let us know the type of computer you plan to interface with our ADC, and we'll provide all the 'hand-shaking' signals you need.

If you're using a DEC PDP-11, HP 2100, Varian V-73, Data General NOVA or other similar computers, we already have the interface system ready to install, and we'll even provide the interconnecting cables!

Save yourself time, trouble and expense. Call or write Preston Scientific for details. We'll make certain you get a complete GMAD ADC System — ready to operate the first day it arrives!

OPTICAL ENCODERS

INCREMENTAL ENCODERS

MODEL 25HD

- A heavy duty industrial type encoder.
- .375'' stainless steel shaft running in Class 7 bearings.
- Shaft seal available.
- Heavy steel cover sealed against dust, oil and moisture.
- Optional conduit adapter for cabling directly to OEM Equipment.
- Available with direction sensing X1, X2, X4.

MODEL 25XH

- Available in single channel or dual selectable channel.
- Frequently used for machine tool applications where selection between English and Metric scale readout is required.
- Basic disc count is available multiplied by 1, 2 or 5 to achieve high resolutions to 12,700.
- Addition of direction sensing X4 provides resolution to 50,800.
- .375'' stainless shaft or integral pinion shaft mounted in Class 7 bearings.

Supply Voltage: +5VDC ±5%
Current Requirements (Typical): 125 ma (Sinewave), 200 ma (TTL)
Output Format: 2 channels in quadrature, ± 27° electrical at 10KHz.
Output Options 25T, S, L and HD:
- Complement and index available
- Back to Back Sinewave (Figure 5)
- Differential Sinewave (Figure 6)
- TTL Options include: SN7406, SN7433 and SN74128

Output Options 25XH:
- Complement available (No index)
- TTL Output from SN7406

Frequency Response: TTL Output: 50KHz typical; Sinewave: See Figure 7.
Lamp: 40,000 hour incandescent
Operating Temperature: 0 to +70° standard.
Storage temperature: -40 to +90°C.
Humidity: 98% RH
Vibration: 5 to 2000 Hz at 20 G's
Shock: 50 G's for 11 MS

ABSOLUTE ENCODERS

Renco's absolute encoders are designed for universal application...covering industrial, military and aerospace applications. Most Renco absolute encoders are low cost, high precision. Outputs are furnished in parallel form in Cyclic Gray Codes, Natural Binary, or any of the XS or 8421 BCD codes. Other non-linear codes are available and serial outputs can be offered as an option. Encoders can be provided with or without electronics, internally or externally. Most encoders operate from a single +5VDC input and provide a TTL interface.

DETAILED SPECIFICATIONS:

For 9 to 13 bit Gray Code and Natural Binary ask for A72365 or A72174 (HD). For 1 to 8 bit Gray Code and Natural Binary ask for A72640. For XS3/XS14 Cyclic Gray Code or BCD 8421, TTL Output ask for A71049 or A72421 (HD).

New, low cost size 25 8-bit absolute position optical encoder. 1 to 8 bits Gray Code or Natural Binary with latch. Available in HD Model.

BCD
2500 XS3/XS14, 8421 BCD, 99, 359, 999, 1999, 3599. Also available in HD Model.

GC/NB
2500 Series Gray Code or Natural Binary up to 13 bits TTL Output or Photocell Output, available in HD Model.

OPTIONS

MODULAR ENCODERS

Renco's KT series Modular Optical Encoder/Tachometer kits are aligned and preadjusted at the factory for peak output and quadrature phasing. Installation can be accomplished using only a screwdriver and allen wrench. This is made possible with Renco's exclusive (pat. pending) alignment plate mounted in its proper relationship to the shaft.

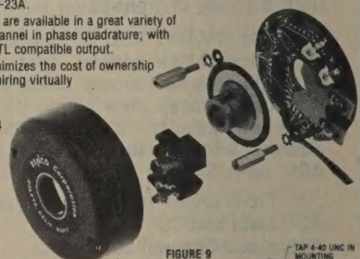
Renco's illumination system with its high efficiency optical components provides nearly ten times the output over a greater frequency range than found in other motor-tach kits.

Renco's low profile design provides the same outline size with or without TTL compatible electronics. 2.25'' diameter by .75'' high for the KT-23A.

Renco Modular Optical Encoder/Tachometer kits are available in a great variety of resolutions and output options: single or dual channel in phase quadrature; with or without zero index output; sensor output or TTL compatible output.

The ease with which Renco kits are installed minimizes the cost of ownership by permitting the use of unskilled labor and requiring virtually no capital equipment for installation purposes.

Ask for Specification A71945, A71955TTL, A72424 Differential Push-Pull Sinewave, A72624 Back to Back Push-Pull Sinewave.



Renco Corporation

DETAILED SPECIFICATIONS:

Hub Bores: .025, .031, .037, .05 diameter
Resolution: Up to 1000 cycles
Output: TTL or Sinewave
Supply Voltage: +5VDC ±5%
Current: 125 ma Sinewave, 200 ma TTL
Operating Temperature: 0 to +70°C standard
Illumination Source: 40,000 hour incandescent lamp
Sensors: Silicon Photovoltaic

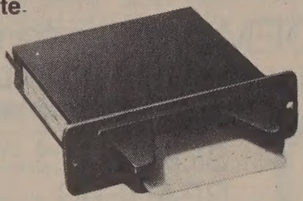
CARD AND BADGE READERS

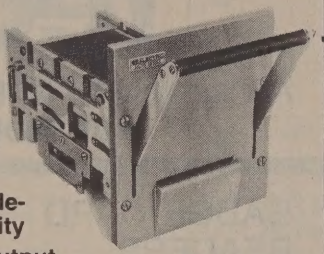
SOLID STATE BADGE READERS



- Completely solid state. One moving part
- Reads up to 22 Columns, 12 rows, Alpha-Numeric
- Absolute validation of readings
- Compact, low-cost

An ultra-reliable badge reader for time-clock, production floor data collection, security systems and other data station requirements. Reads complete Hollerith information. Provides column strobe for every column regardless of punched data. Cannot be "teased," misoriented, or otherwise fooled. Serial data output.

STATIC CARD READERS

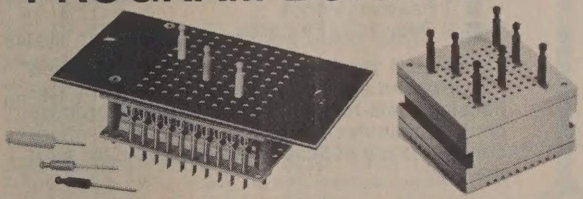


- 80 or 51 column x 12 row models
- Static. Data remains in "read" mode until card is removed
- Redundant contact designs assure reliability
- Discreet input and output at every data position

The best for heavy industrial use. Single transaction readers, manually operated with heavy duty mechanisms for long life. Buss bars available for rows or columns or both. Complete interlock systems to eliminate misinformation from incorrectly positioned documents.

PROGRAMMING DEVICES

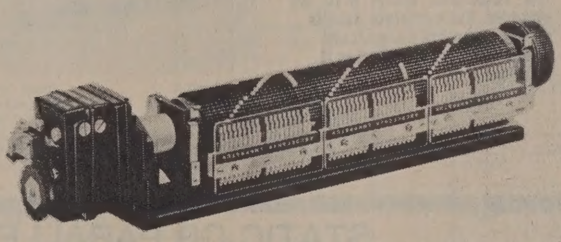
PROGRAM BOARDS



- Individual contacts for each position. No interaction
- Complete range of accessories for every type of programming
- Available in .250", 4mm, or .100" c-c spacing, in any number of holes

The economical, simple way to program, switch, or test any signals. Simple electrical matrix that can be interconnected by shorting or diode pins. Ideal for process control, machine control, sequential testing and dozens of other applications. Direct readout or program at all times.

PROGRAM SWITCHES



- 60 programs on drum. Up to 60 circuit control
- Manual, time based, or stepper drives
- 1 Amp, 7 Amp or 15 Amp carrying capacity

Extra compact programming capability at reasonable cost with high reliability. Simply set programs with inserts on each line of 60 position drum. Programs will run sequentially either on real time base, manually, or upon command from process feedback.

TAURUS punched card readers STATIC/PARALLEL... SERIAL... SERIAL/PARALLEL

A complete line of readers for OEM and system applications

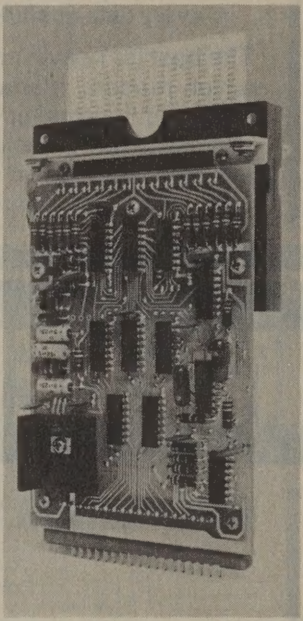
FOR INDUSTRIAL, COMMERCIAL, INSTITUTIONAL USES

BADGE/CARD READERS

New Series H . . .
4 standard models

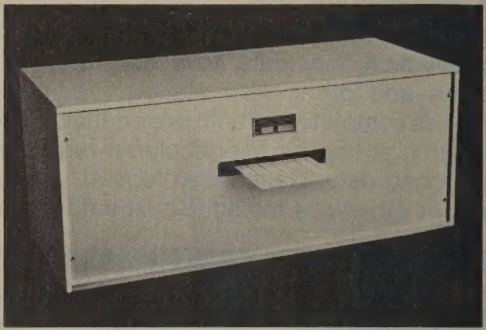
Read cards/badges of up to 12 rows and 10, 20, 30, or 68 columns. Optical reading with no moving parts, ensuring error-free readout, long life, minimum maintenance. Completely self-contained. To operate, merely insert badge or card fully and withdraw. Readout is character (column) serial, bit (row) parallel.

Particularly suitable for security and access-control applications. Can easily replace less satisfactory readers in existing installations. Designed for OEM and system applications. Custom-feature models can be supplied.



The 10-column Model H-10 is pictured. For complete details on our complete badge/card reader line, request Series H Catalog.

SERIAL READERS



Read cards one column at a time. Photo-electric hole sensing. Solid-state logic or relay output. With or without hopper feed. Free-standing or panel-mount. Various output formatting . . . bit parallel, ASCII, teletype, etc. In use since 1967.

- 168 standard options. Custom options also available.
- 6 Card-Handling Modes
- 7 Readout Modes
- 3 Data-Valid Features

These card readers are specifically designed for OEM and systems applications in the warehousing, data-handling, industrial and process control, manufacturing and other fields where conditions are not especially favorable for card readers.

STATIC OR PARALLEL READERS . . . 3 MODELS

Read all or part of an IBM card in parallel. Put card in, push handle. HOLE . . . closed switch. NO HOLE . . . open switch. (Opposite can also be provided.) Contacts not through the card. Reliable indirect switching. All switching at one time. Thousands in use since 1956.

SOLID STATE S/D, D/S CONVERTERS—MUX SYSTEMS

	Input Availability	Output	Static Accuracy	Size
TRACKING SYNCHRO/RESOLVER TO DIGITAL. Series 1651: Miniaturized, fully isolated unit tracks 16 RPS Jitter Free. Full autoranging available.	Freq.: 50Hz to 10KHz L-L V_{RMS}: 5 to 90 Ref. V_{RMS}: 10 to 115	14 bits binary parallel TTL, DTL compatible.	±4′	3.125″ x 2.625″ x 0.82″
14 BIT SYNCHRO OR SIN/COS TO DIGITAL. Series 1623F: Includes ±5° offset capability. Miniaturized, solid state unit that converts synchro or resolver inputs into binary or BCD data. Can accept FLUX VALVE inputs.	Freq.: 50Hz to 10KHz L-L V_{RMS}: 5 to 90 Ref. V_{RMS}: 10 to 115	14 bit parallel binary 4 decade BCD, or **Both.** TTL, DTL compatible.	±4′	3.125″ x 2.625″ x 0.82″
TWO SPEED SYNCHRO-TO-DIGITAL. Series 1510: Accepts either binary or nonbinary gear Ratios from a two speed synchro system.	36:1, 18:1, 9:1, 16:1	Up to 19 bits binary parallel.	±0.08′	3.125″ x 2.625″ x 0.82″
MULTIPLEXED SYNCHRO-TO-DIGITAL. Series MUX: Simple, noise immune, small and inexpensive Modular system, up to to 128 channels.	Any combination of Synchros and Resolvers.	14 bits binary parallel 75 μs conversion.	±4′	3.125″ x 2.65″ x 0.82″ + 1.85″ x 0.85″ x 0.82″ per channel
ANGLE POSITION INDICATOR, SOLID STATE. Series 2623: Includes ±5° offset capability. Rugged, compact, accurate and economical. With or without built-in power supplies. Internal reference available.	Freq.: 50Hz to 10KHz L-L V_{RMS}: 5 to 90 Ref. V_{RMS}: 10 to 115	Readout: 3599, ±179.9 or 9999. Others available.	±0.1°	5.5″ x 1.75″ x 5.5″ deep
SYNCHRO OR SIN/COS TO LINEAR DC. Series E678-1637: Converts all standard synchro or resolver inputs to linear DC output proportional to the angle. Switching point is non-ambiguous. All models are short circuit proof. Various output formats available.	Freq.: 50Hz to 10KHz L-L V_{RMS}: 5 to 90 Ref. V_{RMS}: 10 to 115	**E678:** ±10VDC for angles −180° to +180°. **1637:** ±10VDC for angles −89.5° to +89.5°.	6′, 15′, 30′ or 1°	**E678:** 3.625″ x 3.06″ x 0.82″ **1637:** 2.53″ x 3.22″ x 0.82″
SYNCHRO/RESOLVER TO SINE-COSINE DC. Series 655/697: Generates sine and cosine DC outputs proportional to the angle.	Freq.: 60 or 400Hz L-L V_{RMS}: 11.8 or 90 Ref. V_{RMS}: 26 or 115	−10 volts to +10VDC, representing the sine and cosine of the input angle.	±6′	**400Hz:** 1.85″ x .85″ x .82″ **60Hz:** 3.1″ x 15″ x .98″
SYNCHRO TO SINE-COSINE DC (non-variant). Series 655NV: Generates sine and cosine DC outputs proportional to the input angle. Insensitive to synchro reference and line voltage. Ideal for displays.	Freq.: 60 or 400Hz L-L V_{RMS}: 11.8 or 90 Ref. V_{RMS}: 26 or 115	−10 volts to +10VDC representing the sine and cosine of the input angle.	±6′	3.44″ x 3.19″ x 0.82″
SYNCHRO TO SINE/COSINE DIGITAL. Series 655 NVD:	Freq.: 60 or 400Hz L-L V_{RMS}: 11.8 or 90	14 lines sine and cosine plus quadrant signs.	±5′	PC: 4.5 x 8″ x 1″
DIGITAL-TO-SYNCHRO/RESOLVER. Series 1673: Miniaturized, 2 watts, short circuit proof output. 1% Max. amplitude variation.	14 bits parallel, positive Logic, TTL levels binary coded angle.	Freq.: 50Hz to 10KHz L-L V_{RMS}: 5 to 90 Ref. V_{RMS}: 10 to 115	±4′	3.125″ x 2.625″ x 0.82″
DIGITAL-TO-SYNCHRO/RESOLVER, Series A1670: High power, solid state device converts a 14 bit input into either a 3 wire synchro or 4 wire resolver output. Overload and short circuit protected.	14 lines representing angles 0 to 360°.	L-L V_{RMS}: 11.8 or 90 Ref. V_{RMS}: 26 or 115 Freq.: 60Hz or 400Hz	±4′	PC: 4.5″ x 8″ x 1.0″
ACP TO SINE/COSINE DC (non-variant). Series 1502:	4096 ACP & 1 ARP	±10VDC, representing the sine and cosine.	±5′	PC: 4.5″ x 4.5″ x .82″
ACP TO SYNCHRO. Series 1502-1:	4096 ACP & 1 ARP	See Model 1673.	±5′	PC: 4.5″ x 4.5″ x .82″
DIGITAL TO SINE COSINE DIGITAL. Series 1500:	14 lines representing angles 0 to 360°.	12 bits sine and cosine, also quadrant signs.	±2′	3.0″ x 4″ x 0.4″
DIGITAL TO SINE COSINE DC (non-variant). Series 1501: 1% max. amplitude variation.	14 lines representing angles 0 to 360°.	±10VDC, representing the sine and cosine of the input angle.	±4′ or ±15′	3.125″ x 2.625″ x 0.82″
DIGITAL-TO-RESOLVER. Series 1503: 1% max. amplitude variation.	14 bit input representing angles from 0 to 360°.	2 AC voltages, 20V P.P, representing the sine and cosine of the input angle.	±4′	3.125″ x 2.625″ x 0.82″
CONTROL TRANSFORMER, SOLID STATE. Series 1682: Fully transformer isolated unit. 1% max. amplitude variation.	Synchro and 14 bits Natural parallel binary.	±5 V_{RMS} representing ±12.5°.	±4′	3.125″ x 2.626″ x 0.82″
CONTROL DIFFERENTIAL TRANSMITTER, SOLID STATE. Series 1681: 1% max. amplitude variation.	Synchro and 14 bit Natural parallel binary.	6.5 V_{RMS}, sine/cosine.	±4′	3.125″ x 2.625″ x 0.82″
SINE-COSINE TO SYNCHRO DRIVERS. Series B676: Solid state device designed to handle large current surges of TR's. Will drive three 11TR4s to a low null. Overload and short circuit protected.	±10VDC, representing the sine and cosine of the required angle.	L-L V_{RMS}: 11.8 or 90 Ref. V_{RMS}: 26 or 115 Freq.: 60Hz or 400Hz	±10′	PC: 4.5″ x 8.0″ x 1″
LINEAR DC TO SINE-COSINE DC. Series C670: Converts a D.C. voltage, representing an angle, into two output voltages that are proportional to the sine and cosine of that angle.	±10VDC representing angles from −180° to +180°	$K \sin\theta$ and $K \cos\theta$ K = 10VDC	±10′	3.44″ x 3.19″ x 0.82″
COORDINATE ROTATOR. Series A689: Accepts rectangular inputs (X and Y) and rotates these coordinates through an angle that is proportional to a linear DC input.	$X = R \cos\theta$ $Y = R \sin\theta$ R = ±20MV to ±10VDC	$R \sin(\theta + \beta)$ $R \cos(\theta + \beta)$	±10′	3.19″ x 3.44″ x 0.82″
POLAR TO RECTANGULAR. Series A1618: Converts polar coordinates (R, θ) into rectangular (X, Y).	R: ±10VDC θ: ±10VDC	$X = R \cos\theta$, $Y = R \sin\theta$, R = ±20MV to ±10VDC	±10′	3.19″ x 3.44″ x 0.82″
RECTANGULAR TO POLAR. Series 695: Converts rectangular coordinates (X, Y) into polar (R, θ). Switching point is non-ambiguous.	$X = R \cos\theta$ $Y = R \sin\theta$	$R = \sqrt{X2 + Y2}$ $\theta = \tan^{-1} Y/X$	±10′	3.19″ x 3.44″ x 1.78″
COMPUTING DEMODULATORS. Series 840, 854: Fully isolated. Proportional phase sensitive bipolar output.	840: 0 to 5 V_{RMS} 854: 0 to 20 V_{RMS}	0 to ±4.3VDC 0 to ±10VDC	0.1% 0.1%	**840:** 1.63″ x 1.0″ x 1.0″ **854:** 1.63 x 1.0″ x 1.0″
COMPUTING MODULATORS. Series 1102MP4: Converts DC to proportional Sine wave AC.	±10VDC	0 to 6 V_{RMS}	0.1%	2.28″ x 2.03″ x 0.78″
BINARY ANGLE TO SCALED BCD ANGLE. Series 1505:	Up to 16 bits	5 decade BCD.	±0.008°	4.0″ x 2.0″ x 0.4″
SCALED BCD ANGLE TO BINARY ANGLE. Series 1619:	4 or 5 decade BCD	13 or 16 bits	0.1° or 0.01°	4.0 x 3.0 x 0.4″

Other frequencies and voltages available. Units available for either 0 to +70°C or −55°C to +85°C operation. Most units are hermetically sealed for extra protection.

TIMING EQUIPMENT

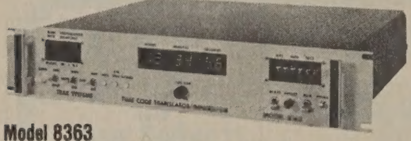
8363

Time Code Translator/Generator

SPECIFICATIONS

TIME BASE

EXTERNAL FREQUENCY STANDARD: 1 MHz (5 MHz Optional). **OPTIONAL INTERNAL FREQUENCY STANDARD: Frequency:** 1 MHz. **Temperature Stability:** $\pm 3 \times 10^{-9}$/°C. **Aging Rate:** $\pm 5 \times 10^{-9}$/day. **Retrace:** $\pm 1 \times 10^{-8}$ after 24 hours off.



Model 8363
Specify Model 8362 if days are desired

SYNCHRONIZATION

Automatic WWV Synchronization: WWV tick. **External Start:** Pulse. **Slew:** 1 μs/s through 100 ms/s in decade steps. **Propagation Delay:** Compensates for delays of 0 to 99.9 ms (18.6K miles) in 0.1 ms increments. **Translate Mode Synchronization:** Unit locks onto and remains fully synchronized to incoming code. Thumbwheel switches may be used to compensate for transmission delays of 0 to 99.9 ms.

TIME DISPLAY

Six 0.6-inch planar indicators display time-of-day.

CODE INPUT

Format: Available formats include IRIG A, IRIG B, IRIG G, NASA 36 Bit, XR3, and 2137. **Level:** 0.5 to 8 volts peak-to-peak (wide range options available).

CODE OUTPUTS

Formats: IRIG, NASA, XR3, and 2137 in modulated and DC level-shift forms. **Level-Shift Codes:** Standard TTL; adjustable outputs (0 to 10V peak into 300 ohms) optionally available. **Modulated Codes:** Mark/space ratio 3.3:1; coherence to "on-time" less than $\pm 1°$ of the carrier cycle; crossover discontinuities less than 1 percent; amplitude adjustable from 0 to 7 volts peak-to-peak; IRIG A, B, G, NASA 36 Bit, and 2137 will drive 50 ohms; others will drive 500 ohms.

OUTPUT OPTIONS

Parallel: BCD time-of-day plus 1 pps strobe, straight-binary time-of-day plus 1 pps strobe, or group-binary time-of-day plus 1 pps strobe. **Sinewave:** Consult factory for available frequencies and levels. **Millisecond and Rate:** BCD milliseconds plus 1 ppm through 10K pps, phase-coherent to within 10 ns.

OPTIONAL COMPUTER INTERFACE

Addressable storage of output formats and remote control of generator functions.

POWER

95 to 135 VAC, 48 to 440 Hz, RFI filtered. **Battery Backup Provision:** 11 to 14 VDC (display not on).

PHYSICAL

Weight: 12 pounds. **Mounting:** Standard 19-inch rack (slides optional). **Size:** 19 inches wide x 3.47 inches high x 15 inches deep. **Temperature:** 0°C to +60°C.

8365

Universal IRIG Time Code Generator

SPECIFICATIONS

TIME BASE

EXTERNAL FREQUENCY STANDARD: 1 MHz (5 MHz optional). **OPTIONAL INTERNAL FREQUENCY STANDARD: Frequency:** 1 MHz. **Temperature Stability:** $\pm 3 \times 10^{-9}$/°C. **Aging Rate:** $\pm 5 \times 10^{-9}$/day. **Retrace:** $\pm 1 \times 10^{-8}$ after 24 hours off.

SYNCHRONIZATION

Automatic WWV Synchronization: WWV tick. **External Start:** Pulse. **Slew:** 1 μs/s through 100 ms/s in decade steps. **Propagation Delay:** Compensates for delays of 0 to 99.9 ms (18.6K miles) in 0.1 ms increments.

LEAP YEAR RESET

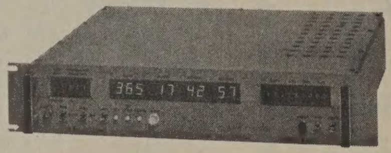
Day 001 after day 365 or 366.

TIME DISPLAY

Nine 0.6-inch planar indicators display time-of-year.

CODE OUTPUTS

Formats: IRIG A, IRIG B, IRIG D, IRIG E, IRIG G, and IRIG H in DC level-shift form. **Level:** Standard TTL; adjustable outputs (0 to 10V peak into 300 ohms) optionally available. **Optional Modulated Codes:** Mark/space ratio 3.3:1; coherence to "on-time" less than $\pm 1°$ of the carrier cycle; crossover discontinuities less than 1 percent; amplitude adjustable from zero to 7V peak-to-peak; IRIG A, B, G will drive 50 ohms, others will drive 500 ohms.



OUTPUT OPTIONS

Parallel: BCD time-of-year plus 1 pps strobe, straight-binary time-of-day plus 1 pps strobe, and group-binary time-of-day plus 1 pps strobe. **Sinewave:** Consult factory for selection of frequencies and levels. **Millisecond and Rate:** BCD milliseconds plus 1 ppm through 10K pps, phase-coherent to within 100 ns.

OPTIONAL COMPUTER INTERFACE

Addressable storage of output formats and remote control of generator functions.

POWER

95 to 135 VAC, 48 to 440 Hz, RFI filtered. **Battery Backup Provision:** 11 to 14 VDC (display not on).

PHYSICAL

Weight: 12 pounds. **Mounting:** Standard 19-inch rack (slides optional). **Size:** 19 inches wide x 3.47 inches high x 15 inches deep. **Temperature:** 0°C to +60°C.

8366

Time Code Generator

SPECIFICATIONS

TIME BASE

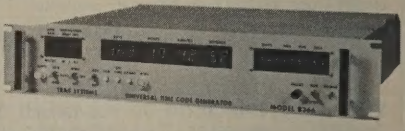
EXTERNAL FREQUENCY STANDARD: 1 MHz (5 MHz optional). **OPTIONAL INTERNAL FREQUENCY STANDARD: Frequency:** 1 MHz. **Temperature Stability:** $\pm 3 \times 10^{-9}$/°C. **Aging Rate:** $\pm 5 \times 10^{-9}$/day. **Retrace:** $\pm 1 \times 10^{-8}$ after 24 hours off.

SYNCHRONIZATION

Automatic WWV Synchronization: WWV tick. **External Start:** Pulse. **Slew:** 1 μs/s through 100 ms/s in decade steps. **Propagation Delay:** Compensates for delays of 0 to 99.9 ms (18.6K miles) in 0.1 ms increments.

LEAP YEAR RESET

Day 001 after day 365 or 366.



Model 8366
Specify Model 8361 if days not desired

TIME DISPLAY

Nine 0.6-inch planar indicators display time-of-year.

CODE OUTPUTS

Formats: IRIG, NASA, XR3, and 2137 in modulated and DC level-shift forms. **Level-Shift Codes:** Standard TTL; adjustable outputs (0 to 10V peak into 300 ohms) optionally available. **Optional Modulated Codes:** Mark/space ratio 3.3:1; coherence to "on-time" less than $\pm 1°$ of the carrier cycle; crossover discontinuities less than 1 percent; amplitude adjustable from zero to 7 volts peak-to-peak; IRIG A, B, G, NASA 36 Bit, and 2137 will drive 50 ohms; others will drive 500 ohms.

OUTPUT OPTIONS

Parallel: BCD time-of-year plus 1 pps strobe, straight-binary time-of-day plus 1 pps strobe, and group-binary time-of-day plus 1 pps strobe. **Sinewave:** Consult factory for selection of frequencies and levels. **Millisecond and Rate:** BCD milliseconds plus 1 ppm through 10K pps, phase-coherent to within 100 ns.

OPTIONAL COMPUTER INTERFACE

Addressable storage of output formats and remote control of generator functions.

POWER

95 to 135 VAC, 48 to 440 Hz, RFI filtered. **Battery Backup Provision:** 11 to 14 VDC (display not on).

PHYSICAL

Weight: 12 pounds. **Mounting:** Standard 19-inch rack (slides optional). **Size:** 19 inches wide x 3.47 inches high x 15 inches deep. **Temperature:** 0°C to +60°C.

8368
Time Code Generator

SPECIFICATIONS

TIME BASE

OPTIONAL EXTERNAL FREQUENCY STANDARD: 1 or 5 MHz. **INTERNAL FREQUENCY STANDARD: Frequency:** 1 MHz. **Temperature Stability:** $\pm 3 \times 10^{-9}$/°C. **Aging Rate:** $\pm 5 \times 10^{-9}$/day. **Retrace:** $\pm 1 \times 10^{-8}$ after 24 hours off.

LEAP YEAR RESET

Day 001 after day 365 or 366.

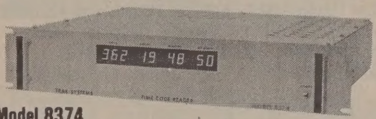
8374
Time Code Reader

SPECIFICATIONS

INPUTS

Code Options: IRIG A, IRIG B, NASA 36 Bit (and XR3 and 2137 in Model 8373). **Impedance:** 100K ohms. **Level:** 30 mVpp space to 25 Vpp mark. **Modulation Ratio:** 2:1 to 6:1. **Frequency:** 100 Hz to 40 kHz with filter supplied; to 150 kHz with optional plug-in filter. **Filter:** 40 kHz, 12 dB/octave low pass filter supplied; other frequencies from 250 Hz through 150 kHz optionally available. **Optional Switchable Filter:** 250 Hz, 1000 Hz, 20 kHz, 60 kHz, 80 kHz.



Model 8374
Specify Model 8373 if days not desired

SYNCHRONIZATION

Major scaler is updated when two consecutive frames agree to within one second and continue to count at 1 pps rate derived from incoming code. All code errors are bypassed. Error bypass is active in reverse mode on IRIG and NASA code readers having reverse code reading options.

TIME DISPLAY

Nine 0.6-inch planar indicators display time-of-year.

OUTPUTS

Serial Code: Buffered input code capable of driving a minimum of 200 feet of unterminated coaxial cable or twisted pair. **Parallel (Optional):** BCD hours, minutes, and seconds, DTL and TTL compatible. **Isolation:** All outputs separately buffered and short-circuit proof.

INPUT POWER

95 to 135 VAC, 48 to 440 Hz, RFI filtered, 25 watts (nominal).

PHYSICAL

Weight: 12 pounds. **Mounting:** Standard 19-inch rack (slides optional). **Size:** 19 inches wide x 3.47 inches high x 15 inches deep. **Temperature:** 0°C to +60°C.

For further information, contact TRAK Systems, Division of TRAK Microwave Corporation, 4722 E Eisenhower Boulevard, Tampa, Florida 33614. Telephone 813-884-1411. Telex 52-827.

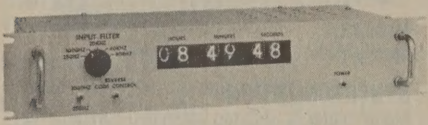
TIMING EQUIPMENT

8251 (V1) & (V2)
Time Code Reader

SPECIFICATIONS

INPUTS

Code Options: IRIG A, IRIG B, XR3, 2137, NASA 36 Bit. **Impedance:** 100K ohms. **Level:** 30 mVpp space to 25 Vpp mark. **Modulation Ratio:** 2:1 to 6:1. **Frequency:** 100 Hz to 40 kHz with filter supplied; to 150 kHz with optional plug-in filter. **Filter:** 40 kHz, 12 dB/octave low pass filter supplied; other frequencies from 250 Hz through 150 kHz optionally available. **Optional Switchable Filter—8251 (V1) only:** 250 Hz, 1000 Hz, 20 kHz, 60 kHz, 80 kHz.

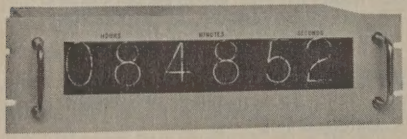


SYNCHRONIZATION

Major scaler is updated when two consecutive frames agree to within one second and continue to count at 1 pps rate derived from incoming code. All code errors are bypassed. These features are not provided in the reverse mode (where errors can be tolerated).

DISPLAY

Six NIXIES® display hours, minutes, and seconds. Numeral height is 0.6 inches on Model 8151 (V2) and 2 inches on Model 8151 (V2).



OUTPUTS

Serial Code: Buffered input code capable of driving a minimum of 200 feet of unterminated coaxial cable or twisted pair. **Parallel:** BCD hours, minutes, and seconds, DTL and TTL compatible. **Isolation:** All outputs separately buffered and short-circuit proof.

INPUT POWER

95 to 135 VAC, 48 to 400 Hz, RFI filtered, 25 watts nominal.

PHYSICAL

Weight: 10 lbs. **Mounting:** Standard 19-inch rack. **Size:** 19 inches wide x 9 inches deep x 3.47 inches high (V1) and 5.22 inches high (V2). **Finish:** FED-STD-595 (specify color). **Temperature:** 0°C to +60°C.

8270
Tape Control Unit

SPECIFICATIONS

LOGIC INPUTS

20-line parallel BCD time-of-day and 1 pps (TTL logic levels).

POWER INPUT

11 VAC from Reader.

LOGIC OUTPUTS

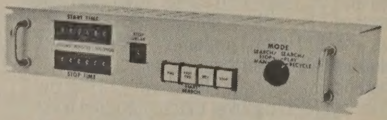
Same as inputs. All lines buffered and short-circuit proof.

CONTROL OUTPUTS

Each control output consists of all three contacts of a form C relay rated for 3 amps at 130 VAC. Four relays provide the following functions: Forward (Playback), Fast Forward, Reverse, Stop.

CONTROLS

Start Time: Preselects desired start time on the tape. **Stop Time:** Preselects desired stop time on the tape. **Stop Delay:** Allows selection of one to ten-second delay between stop command and playback command (required for some tape transports to prevent tape breakage). **Forward:** Causes tape transport to go into forward (playback) mode of operation. **Fast Forward:** Causes tape transport to go into its fast forward mode of operation. Also used to start search in automatic modes of operation. **Reverse:** Causes tape transport to go into its reverse or rewind mode of operation. **Stop:** Causes transport to stop. **Mode:** Selects one of four search modes: Manual—Provides for manual remote control of transport. Search/Stop—Causes tape reproducer to search for and stop just prior to selected start time. Search/Play—Same as search/stop except that reproducer goes into playback mode after stopping. Reproducer stops at preselected stop time. Recycle—Same as search/play except that reproducer recycles to start time after reaching stop time. Recycling continues until stop switch is actuated.



INDICATORS

Lights within the four control pushbuttons indicate which mode the tape transport is in.

PHYSICAL CHARACTERISTICS

Weight: 5 pounds. **Size:** 3.47 inches high x 19 inches wide x 7.6 inches deep.

ENVIRONMENTAL CHARACTERISTICS

Operating Temperature: 0°C to +60°C. **Storage Temperature:** −55°C to +100°C. **Humidity:** 95 percent RH.

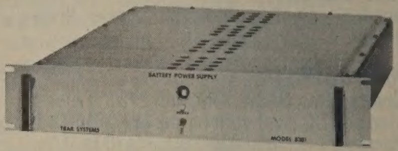
CABLES SUPPLIED

Signal Input Cable: W1, 12 inches. **Power Input Cable:** W2, 12 inches.

8381 & 8317
Battery Power Supply

MODEL 8381

Designed to smoothly and instantaneously supply all of the necessary DC voltages to TRAK Timing Equipment in the event of loss of primary AC power. The unit has the capacity to power the Timing Equipment for up to 36 hours, depending on the number of options in the equipment being operated.



SPECIFICATIONS

SWITCHES/INDICATORS

ON/OFF toggle switch; charging lamp indicator; analog voltmeter.

PHYSICAL

Weight: 55 pounds. **Mounting:** Standard 19-inch rack. **Size:** 19 inches wide x 3.47 inches high x 22 inches deep. **Panel Finish:** Light Gray. **Temperature:** 0°C to +60°C.

RECHARGE TIME

20 hours to recharge after a complete discharge cycle.

MODEL 8317

SPECIFICATION

Same as 8381 except:

POWER CAPACITY

Six to eight hours.

PHYSICAL

Weight: 23 pounds. **Size:** 19 inches wide x 3.47 inches high x 12 inches deep.

RECHARGE TIME

8 hours to recharge after a complete discharge cycle.

8156

Airborne Time Code Generator

SPECIFICATIONS

CLOCK SYNCHRONIZATION

Data Input: 20-line parallel BCD time-of-day. **Sync Enable:** External ground signal. **Minor Scaler Sync:** Minor scaler is reset to zero by negative-going transition of USA input when sync enable is activated.

INPUT POWER

Voltage: 16-32 VDC, 1.5 volts ripple. **Transients, Operating:** Limit 1; MIL-STD-704. **Transients, Non-Operating:** Limit 2; MIL-STD-704. **Current:** 0.5 Amp nominal. **Indicator:** Green indicator on front panel.

BACKUP BATTERY

Type: Nickel-cadmium. **Rating:** Provides full backup with no loss of data for dropouts lasting up to 30 seconds under all operating environments. **Number of Dropouts:** Five per hour or 15 in eight hours, whichever is greater. **Indicators:** Red indicator on front panel. **Automatic Cutout:** System is automatically shut down a minimum of 35 seconds after loss of external power or when power connector is removed. **Trickle-Charge:** Internal circuit provides 16 mA trickle-charge. **Normal Charge:** Power connector pin is provided for charging battery. **Available Option:** Full battery backup for several hours.

PHYSICAL CHARACTERISTICS

Weight: 3.2 pounds. **Size:** 5.6 inches wide x 3.5 inches high x 6.6 inches deep. **Primary Power:** 28 VDC. **Indicators:** Power on (Green); Battery on (Red).

TIME CODE GENERATOR
MODEL 8156
GEO SPACE SYSTEMS
CODE OUT
SYNC IN
OUTPUT
PWR

ELECTRICAL CHARACTERISTICS

Internal Standard: **Type:** Temperature-compensated crystal oscillator. **Frequency:** 1 MHz; 960 KHz optional. **Stability:** 1 x 10^{-6} over temperature range: 2 x 10^{-8} per week drift. Modulated Code Output: **Format:** Modified IRIG B (no days of SBTOD). **Carrier:** 1000 Hz. **Modulation:** 50 percent. **Level:** 1.0 VAC. **Output Impedance:** 1000 ohms. Parallel Time Output: **Format:** BCD time-of-day (20 line). Logic Levels: **Zero:** 0V; One: 5V. Output Resistance: **One:** 5000 ohms; **Zero:** Saturated NPN transistor. **Short-Circuit Protection:** Output circuits are not damaged and time accumulator is not affected by sustained shorts to ground.

ENVIRONMENTAL CHARACTERISTICS

Temperature Operating: −54°C to +60°C with maximum time above 40°C of six hours and maximum time below 0°C of one hour. **Temperature Non-Operating:** −54°C to +71°C. Battery requires recharge if temperature is held at 71°C for more than 30 minutes. **Altitude:** 50,000 feet. **Humidity:** 100 percent plus condensation. **Shock:** 15 G half sinewave for 11 milliseconds. **Acceleration:** 10 G. **Vibration:** Curve four, MIL-E-5400. **RFI:** MIL-I-6181.

8371 & 8395

Time Code Readers

SPECIFICATIONS

INPUTS

Code input: IRIG B, IRIG E, NASA 36 BIT, XR3, 2137. **Impedance:** 150K ohms level: 0.5 to 10.0Vpp without adjustments. **Modulation Ratio:** 2:1 to 6:1. **Carrier Frequency:** 100Hz (IRIG E), 250Hz (XR3) 1000Hz (others)

SYNCHRONIZATION

Display updates within ±5ms of "on-time" (once per second)

DISPLAY

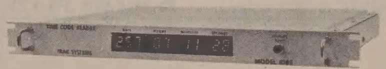
Seven-segment red LED's. Numeral height is 0.5 inches with reading distance of 30 feet.

INPUT POWER

110 or 220 VAC ±10%, 50 to 400 Hz, 15 watts nominal.

PHYSICAL

Weight: 4 pounds. **Height:** 3 inches. **Width:** 14 inches. **Depth:** 5 inches (excluding ¾" heat sink), mounting bracket supplied.



MODEL 8395

SPECIFICATIONS

INPUTS

Code input: IRIG A or B, NASA 36 BIT, XR3, 2137. **Impedance:** 4 ohms. **Level:** 50 mv to 10 Vpp (wider range option available). **Modulation ratio:** 2:1 to 6:1. **Carrier Frequency:** 100Hz to 25K Hz. **Input filtering:** Optionally available.

DISPLAY

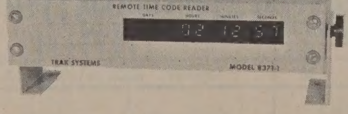
Red LED's. Numeral height is 0.5 inches. Display test optional.

INPUT POWER

115 VAC 10%, 60 to 400Hz.

OUPUTS

Serial code: Buffered input code capable of driving a minimum of 200 feet of unterminated coaxial cable or twisted pair (optional). **Parallel:** BCD days, hours, minutes and seconds, DTL and TTL compatible (optional). **Isolation:** All outputs separately buffered and short-circuit proof.



PHYSICAL

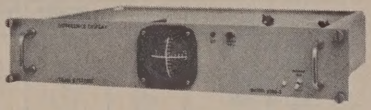
Weight: 8 pounds. **Height:** 1.72 inches. **Width:** 19 inches. **Depth:** 13.25 inches. **Mounting:** Standard 19 inch rack. **Temperature:** 0°C to +60°C.

6500-3

Difference Display

Model 6500-3 provides visual indication of the differences between true antenna position and designated antenna position.

Two pointers display azimuth and elevation differences from zero to ±10°. The variable sensitivity of the Model 6500-3 automatically transfers deflection sensitivity to the axis of greater difference while providing a logarithmic increase in deflection sensitivity of the selected axis toward smaller angular difference.



In addition to calling the operator's attention to the axis of greater difference, correction of the angular error is enhanced. An on-target indicator displays the status of an on-target input line to alert the operator of any antenna position error.

The Model 6500-3 is easily maintained because it uses plug-in digital and analog circuits and nearly 100 percent of the intraconnections are wire-wrapped.

A self-contained power supply system has overvoltage protection, short-circuit protection, and RFI line filtering.

PHYSICAL

Weight: 10 pounds. **Size:** 19 inches wide x 3.47 inches high x 12 inches deep. **Operating Temperature:** 50°F to 110°F.

For further information, contact TRAK Systems, Division of TRAK Microwave Corporation, 4722 E Eisenhower Boulevard, Tampa, Florida 33614. Telephone 813-884-1411. Telex 52-827.

1. D/S output drive capability to 20 V.A. available

FEATURES
PC board compatible
High reliability
Low cost
Operating temperature: 0°C to +70°C

Angle Position Indicator

Model Number	Input	Hz
VNS-104-401	11.8V Synchro	400
VNS-104-409	90V L-L Synchro	400
VNS-104-609	90V L-L Synchro	60

The VNS-104 Angle Position Indicator is a Synchro-to-Digital Converter with a DTL/TTL compatible BCD ouput. These units are self contained including an integral power supply and a high intensity digital display. The VNS Series units are economically priced and feature variable range scale settings to allow for the display of physical units of measurement such as temperature, weight, and distance. The readout displays either zero to full scale or ± full scale.
Package size: 3¾ x 2$\frac{5}{32}$ x 6$\frac{1}{16}$.

Special Converters

Synchro-to-BCD and Resolver-to-BCD Converters

Sampling Type

Model	Hz	Synchro Input (V)	Reference Voltage	BCD Output	4-Digit Accuracy	3-Digit Accuracy	Sample Rate
VSD-401-SM-D-002	400	11.8	26	359.9 (4)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec
VSD-409-SM-D-002	400	90	115	359.9 (4)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec
VSD-609-SM-D-002	50-60	90	115	359.9 (4)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec
VRD-401-SM-D-002	400	11.8	26	359 (3)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec
VRD-409-SM-D-002	400	90	115	359 (3)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec
VRD-609-SM-D-002	50-60	90	115	359 (3)	±6′ ±1 LSB	±30′ ±1 LSB	40/sec

FEATURES
±6 minutes of arc accuracy
4 decade BCD or 6 minute resolution
Standard DC power requirements +5V & ±15V
Variable scale converter
PC board compatible
No field adjustments required

Tracking Type

Model	Hz	Synchro Input (V)	Reference Voltage	Output	Resolution (Arc-Minutes)	Accuracy (Arc-Minutes)	Tracking Speed (°/Sec-Min)
VSD-609-SM-D	50-60	90	115	0-359.9 BCD	6 (.1°)	±6′	180
VSD-401-SM-D	400	11.8	26	0-359.9 BCD	6 (.1°)	±6′	360
VSD-409-SM-D	400	90	115	0-359.9 BCD	6 (.1°)	±6′	360

Synchro-to-Linear DC

Model	Hz	Synchro Input (V)	Balanced Load	Input Rates
VSDC-401-SM	400	11.8	15k	720°/sec
VSDC-409-SM	400	90	750k	720°/sec
VSDC-609-SM	60	90	200k	100°/sec

FEATURES
±6 minutes accuracy
Infinite resolution
High stability - minimum drift
PC board compatible
Low cost
CMOS circuitry

Synchro-to-Sin-Cosine DC

Model	Hz	Synchro Input (V)	Balanced Load	Reference Input	Input Rates
VSSC-401-SM	400	11.8	10k	26V @ 5mA	360°/sec
VSSC-409-SM	400	90	100k	115V @ 3mA	360°/sec
VSSC-609-SM	60	90	100k	115V @ 3mA	60°/sec

FEATURES
Non-variant output
Very low drift
Output filtered and smoothed
No field adjustments required
CMOS circuitry

14 Bit Miniature Control Differential Transmitter

Model	Hz	Synchro Input (V)	Balanced Load
VDCDX-401-SM	400	11.8	10k
VDCDX-409-SM	400	90	600k

FEATURES
±4.5 minutes accuracy
14 Bit resolution
PC board compatible
Low cost
Short circuit proof| output
Synchro & Digital angle inputs

14 Bit Miniature Control Transformer

Model	Hz	Synchro Input (V)	Balanced Load	Output Signal	Output Range
VDCT-401-SB	400	11.8	10k	0.4V RMS/0	±7° Off Null
VDCT-409-SB	400	90	600k	1.0V RMS/0	±7° Off Null

FEATURES
±4 minutes accuracy
14 Bit resolution
PC board compatible
Low cost

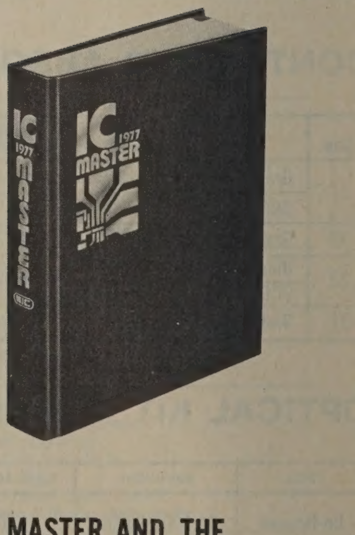
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS



IC 1977 MASTER

eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE —

The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

THE ELECTRONIC DISTRIBUTORS
MASTER CATALOG
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS
'78 THE MASTER CATALOG

electronic products
A/D and D/A converters; RAMs and ROMs

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

(Formerly O-T-S Catalog) The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

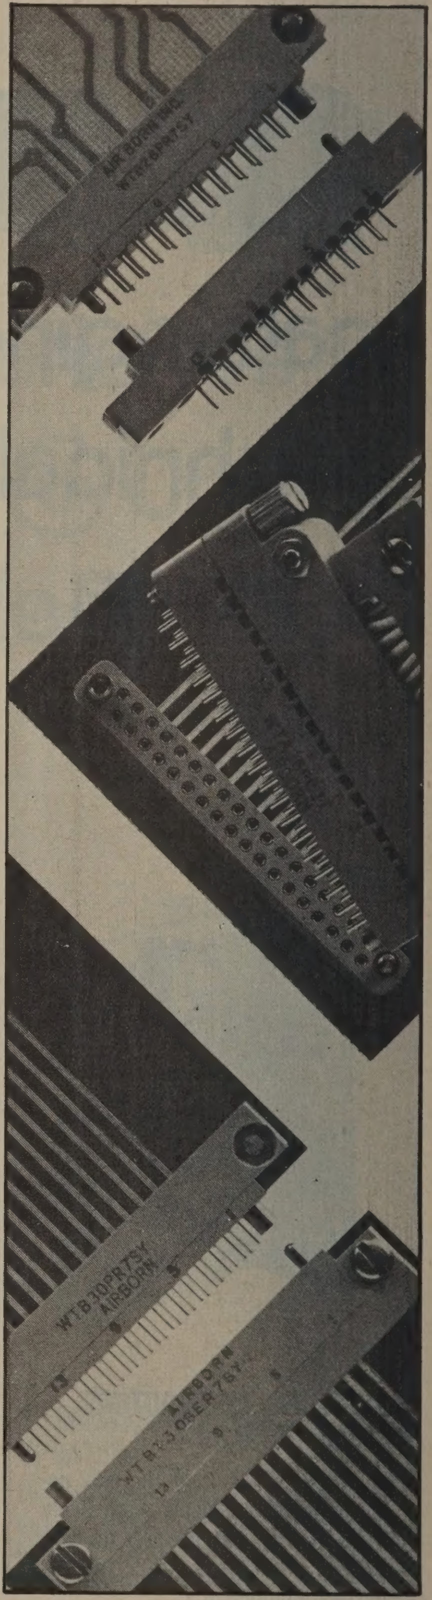
AirBorn connectors



AirBorn Connectors for PC Card to Chassis or Mother Board Connections

Two series of subminiature, right-angle .030″ dia. BeCu pin to socket connectors.

Series WT: Single-row connectors on .100″ centers.

Series WTB: Double-row connectors on .100″ centers, offset .050″. Three or six 50-ohm Coax available with 20-contact connectors.

Terminations: Soldercup, wave solder, Wire-Wrap*, and crimp insertable.

BOARD

New flexibility in electronic design is possible with AirBorn's new WTE series of right angle connectors. Use any combination — right angle to right angle, perpendicular, parallel, or extended boards. Two sizes: 10 and 20 contacts. Spacing: .100″; 2 rows; offset .050.

NOTES:

1. Molded bodies: glass filled nylon per Fed Spec. LP-395
2. Contacts: beryllium copper per QQ-C-530, gold plate per MIL-G-45204

For safety's sake, AMP high

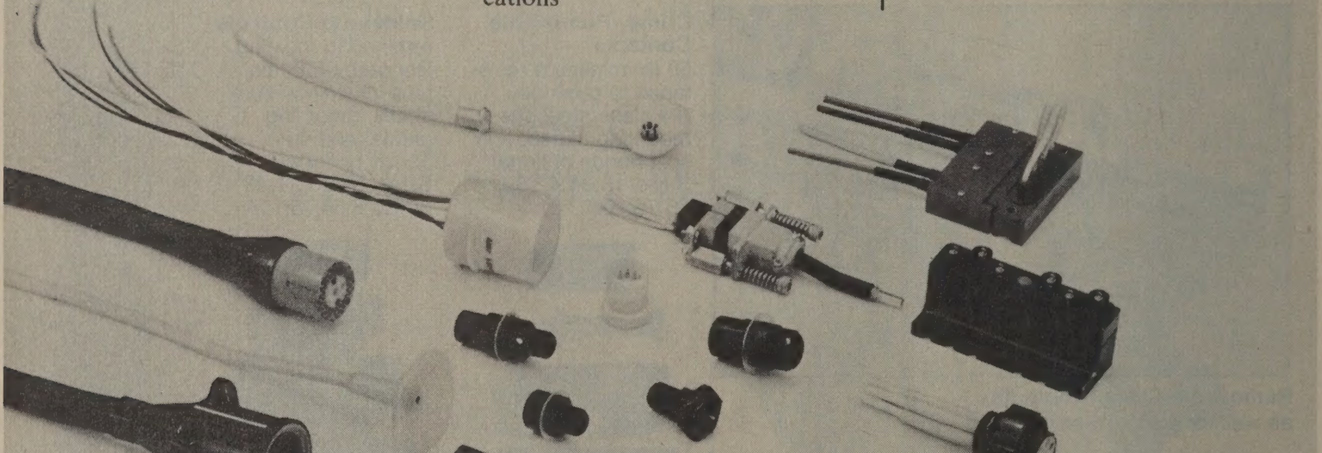
Military interconnections

- Hermetically sealed and corona-resistant
- Space saving — maximum performance from the minimum size and weight
- Wide temperature range: −55°C to +125°C (−67°F to −257°F)
- Voltage ratings: to 150,000 volts DC
- High altitude operation — up to 70,000 feet without voltage derating
- Insulation: extruded silicone rubber
- Lead wire remains flexible from −62°C to +250°C
- Receptacles: glass epoxy
- High reliability — operate under extreme environmental conditions
- Color coded for easy identification
- Excellent mechanical strength — resistant to vibration and shock
- High dielectric strength
- Fungus, moisture, oil and chemical resistant
- Radiation resistant
- Positive mating of lead into receptacle
- RFI shielding — optional
- Preassembled — no tools required
- Versatile — top access, splice or bulkhead application
- Meet applicable military specifications

No exposed high voltage, the contacts are deeply recessed. And we've designed corona right out. With our LGH interconnection devices, in fact, it's safety all the way.

Safety — with many pluses. Such as compactness, light weight, quick connect/disconnect, great reliability.

Which is exactly what you'd expect from the people with the broadest line of high-voltage connectors, lead assemblies and receptacles. The specialists in custom design to a system. The company with the most experience — the



-voltage interconnections.

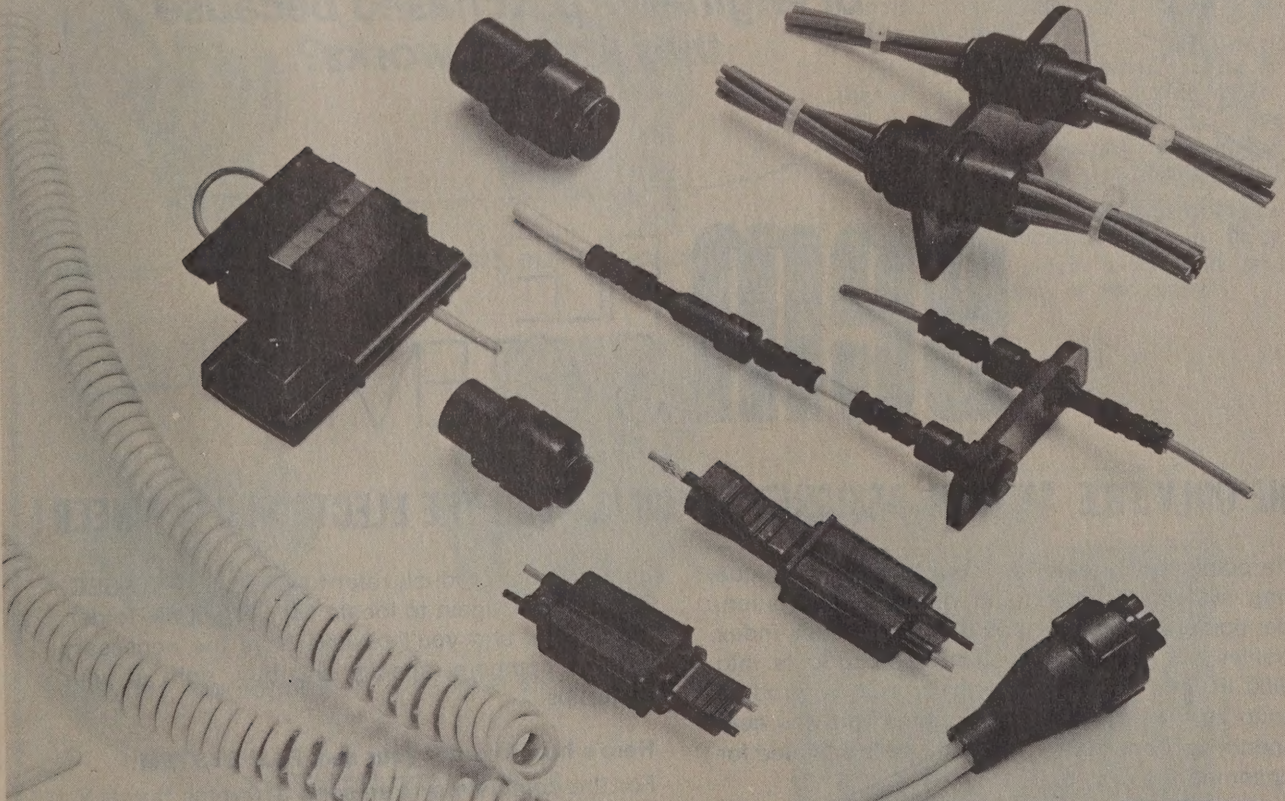
only one that covers both military and commercial markets with specialized designs for each.

Take a good look at these key product features. They add up to a lot of reasons why a lot of people rely on AMP for their interconnection needs. And why you should, too.

For all the reasons,
call 717-367-1105.
Or write AMP Incorporated,
Capitron Division,
Elizabethtown, Pa. 17022.

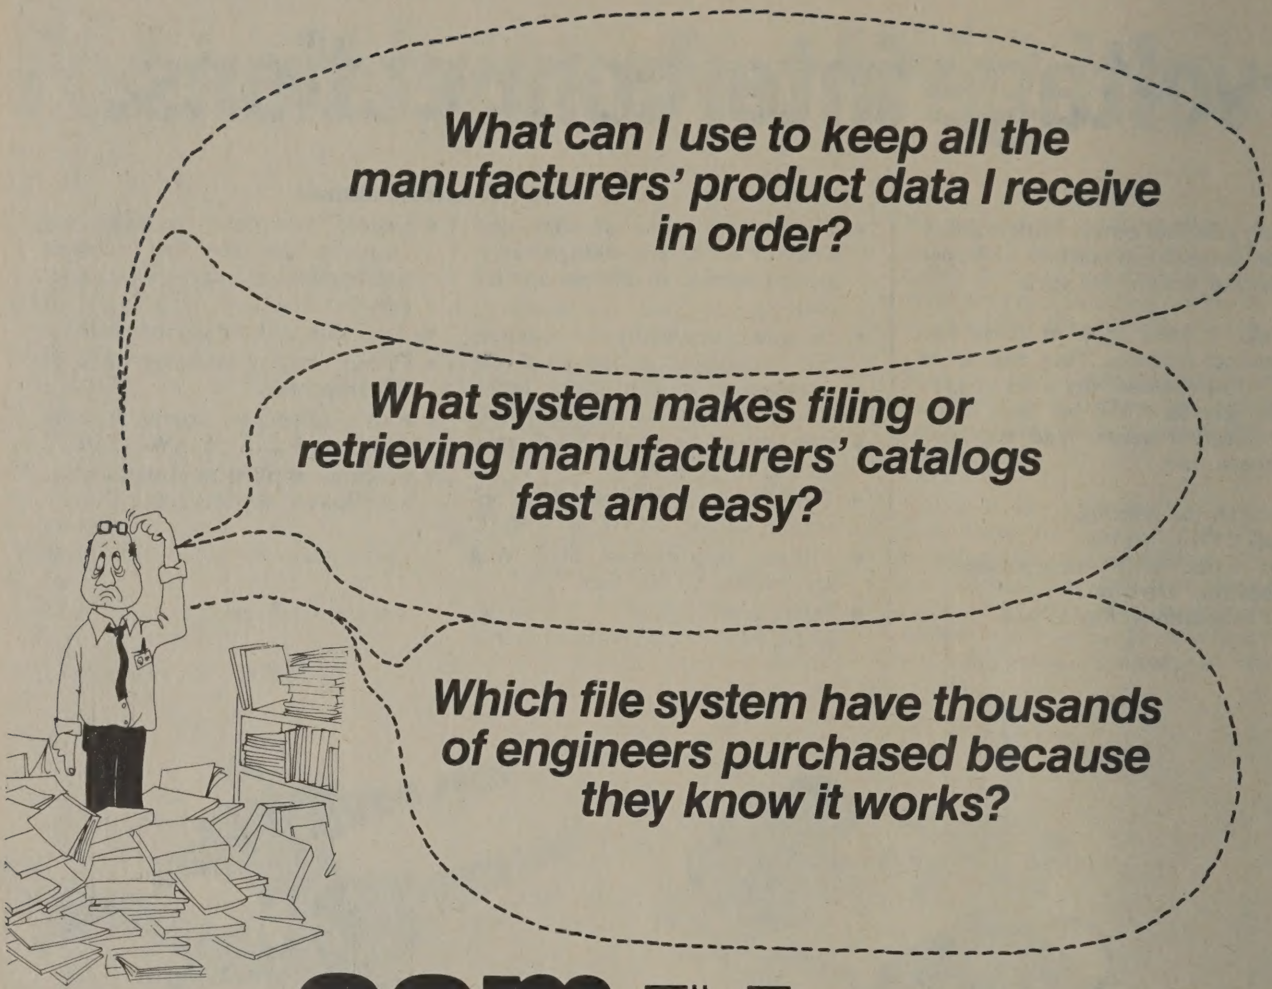
Commercial interconnections

- The right balance of characteristics to solve high-voltage carrying problems at lowest applied cost
- Designed specifically for commercial application in industrial environments, and to meet large-volume production requirements
- Voltage ratings: to 8 KVAC, rms, 60 Hz; to 20 KVDC
- Temperature range: rated for operation within −15°C to +85°C
- Altitude operation — rated from sea level to 10,000 feet
- Safety construction — UL recognized, 94V-0 rated plastic material
- Exceed minimum creepage and clearance for specified voltages per applicable International Specifications
- Available with or without leads
- Crimp, snap-in contacts rated at 7.5 amperes
- Pins and sockets accept #22-20 AWG and #18-16 AWG wire
- Machine applied terminations assure lowest applied cost



AMP
INCORPORATED

AMP is a trademark of AMP Incorporated.
Data subject to change without notice.



What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530

ALLIED SYSTEMS CORPORATION

Patchboard Programming Systems

Allied Systems now offers two complete lines of patchcord programming systems, with more than twenty-one sizes available. Allied also supplies associated patch cords and hardware for both lines.

Catalog 567 covers IBM style systems which normally have a contact spacing of .250 X .281 or .281 X .281. These systems use larger taper pins for rear panel wiring.

Catalog 667 covers hook type systems which have a contact spacing of .250 X .250. These systems are available for taper pin, wire wrap or locking latch type rear panel wiring.

Patch cords are available in a variety of types: single conductor, coax, two conductor shielded, etc., to fit any programming requirement.

Thirteen sizes of *fixed* programming systems are available in both types of systems, ranging in size from 200 to 3264 contacts.

The extremely competitive pricing of the Allied Systems lines, plus the unexcelled quality of their products, gives you, the user, a competitive edge in the design and pricing of your system.

Call your nearest Allied Rep. or Home Office for application help in using Allied Systems patch panels and programming systems, or for prices.

THE ELECTRONIC DISTRIBUTORS
MASTER CATALOG
'78
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.

YESTERDAY'S RADIO MASTER IS TODAY'S

ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

AMPHENOL®

BUNKER RAMO®

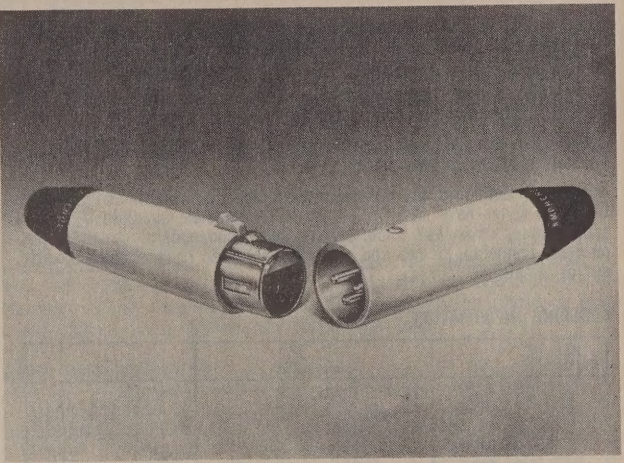
CONNECTORS FOR AUDIO/ELECTRONIC APPLICATIONS

NEW AMPHENOL 91-Q SERIES

The originator of the quick-disconnect microphone connector now brings you a new generation of connectors for audio/electronics that are intermateable and interchangeable with standard latch-lock type audio connectors.

The QWIK 91 Series is completely re-designed with rugged, high-strength zinc die-cast construction to withstand most severe uses without breakage. The non-reflective satin-nickel finish enhances the appearance of virtually any studio or test equipment.

The new 91-Q Series cable connectors also feature a "Twist-Lock" cable grip that uses no screws and needs no tools to assemble. The grip accommodates a wide range of cable diameters. This feature, plus unitized inserts, means the new 91-Q Series connectors give increased savings on connector assembly and termination.



Quality Features

Construction — Zinc die-cast connector shells and pushbutton latch.

Shell-to-Shell Ground Terminal — Separate and positive ground-to-shell terminals provided on all assemblies.

"Twist-Lock" Cable Grip — An internal, positive cable clamp activated by twisting the threaded back nut. No tools needed. No disassembly/assembly required. Quick and firm grip on 3/16" to 5/16" O.D. cables.

Anti-Vibration Springs — Place tension on mated connectors to dampen vibration and reduce hum and noise.

Latchlock — Pushbutton latching mechanism provides fast, positive lock and release. New die-cast construction for maximum service.

Shell Styles — Select from round or rectangular receptacle shells.

Contacts — Precision made from a copper alloy for optimum service life.

MICROPHONE CONNECTORS
91 SERIES THREADED COUPLING CONNECTORS

These are 3, 4, and 6-contact connectors designed primarily for audio equipment but used extensively on all types of portable equipment.

Positive screw-type coupling ring connection eliminates accidental disconnects. Squeeze type clamp grips cable securely after assembly and prevents pulling and twisting strain on soldered contacts.

Dielectric is molded from black phenolic cable. Shells are of brass, finished in bright chrome plating.

Cord protector springs on a 3-contact style have .281″ I.D.; 4 and 6-contact styles have .385″ I.D. Chassis receptacles mount in 27/32″ dia. chassis holes up to ⅛″ thick. Service end accommodates coupling ring on cable connector or cap and chain to seal open chassis units against dirt or tampering.

91-T Series

These miniature audio/electronic cable to panel connectors are available with up to 12 contacts in straight or right angle plug styles. They are ideal for use with microphones, recorders, two-way radios, test instruments, industrial controls and data processing. Approximately 33% smaller than Amphenol's standard 91 Series coupling ring connectors, these miniatures are intermateable with some types of imported European electronic equipment. They provide high density, low cost, top quality interconnections for many modern equipment requirements.

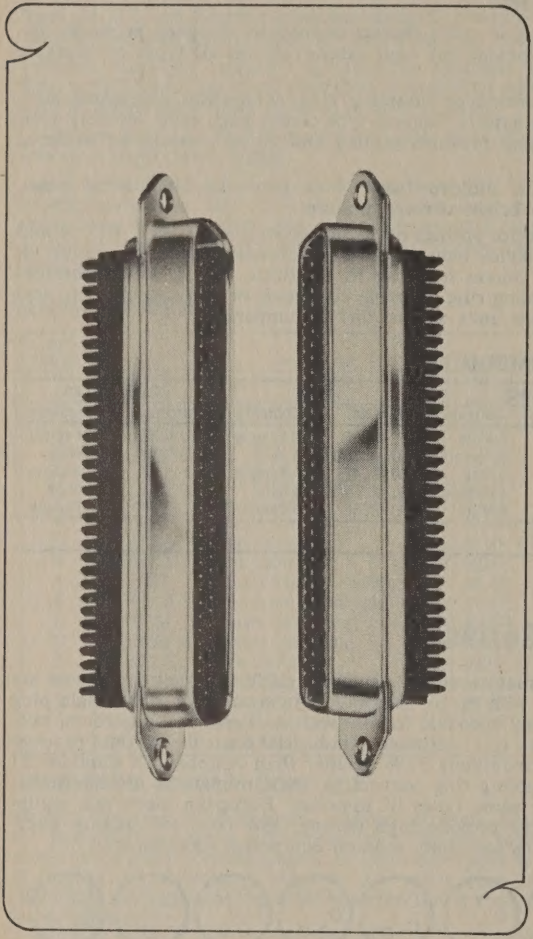
157 SERIES MICRO-PIERCE™ CONNECTORS



Note: All rack and panel receptacle connectors have a float-bushing mount that permits .018″ min. radial float for ease of mounting and connection. Connectors may be mounted above or below panels (see panel cut-out drawing below). Use #3 mounting screws.

SPECIFICATIONS — ALL MICRO-PIERCE CONNECTORS

Current Capacity: 5 amp per contact

Voltage Rating: 700 VDC at sea level — 200 VDC at 70,000 ft.

Operating Temperature: −67°F to 257°F

Wire Sizes: 24 and 26 AWG, solid conductor

Contacts: .000030″ gold plate over copper flash on cadmium-copper base

Dielectric: Fiberglass-filled polyester

Shells: Zinc-plated steel with clear chromate coating. Trapezoidal shape assures positive polarization

LOW PROFILE HOOD

All of the advantages of ribbon contacts apply to Micro Ribbon Connectors. This includes the self-cleaning, self-wiping action of the contacts and extremely low insertion and withdrawal forces. Dielectric is improved diallyl phthalate with high impact strength and low moisture absorbency characteristics. Trapezoidal shells provide polarization, and are made of zinc plated brass with a clear chromate conversion seal. Small size makes the Amphenol Micro Ribbon Connector ideal for high density miniature modules as well as rack and panel applications. Connectors may be top or bottom mounted. Rated 700V DC at sea level; 200 VDC at 70,000 feet.

Rack and Panel and Module Applications. Receptacle mounting plate includes float bushings to allow a float of .020 in each direction. This facilitates blind mating and minimizes the need for critical mounting dimensions.

Cable-To-Panel Application. Panel receptacles are equipped with sturdy spring latches which are guided and retained by cutouts in the plug's flanges. Receptacles must be top mounted. Cable entry at top side, as desired.

SPECIFICATIONS

(Meets requirements of SCL-6020A)

Current Capacity — 5 amps per contact.

Voltage Rating — 700 volts D.C. at sea level.
200 volts D.C. at 70,000 ft.

Operating Temperature — −55°C to +105°C
−67°F to +221°F

Wire Sizes — Solid — 22 gauge max.
Stranded — 24 gauge max.

Contacts — .000030″ gold plated over copper flash on cadmium copper base.

Dielectric — Diallyl phthalate per Mil-M-14F Type MDG

Shells — Zinc plated Steel with clear chromate coating, trapezoidal shape for polarization. Gold iridescent chromate finish also available.

Poke Home | Encapsulated & Rear Release | Fixed Contact | Power & Coax | Solderless Wrap

A complete line of versatile connectors offering 9 to 50 contacts in a choice of arrangements and dielectrics. Cable housings are available for cable-to-panel or cable-to-cable applications, and several locking devices are offered. These lightweight, miniature connectors are ideal for computers, telecommunications, instrumentation and avionics systems not requiring environmental capability. Meets EIA Standard RS-232C for data communications input output connectors.

Specifications

ORIGINAL POKE HOME & ENCAPSULATED CONTACT

Temperature Range: −55°C to +125°C.
Current Rating: 7.5 Amps.
Voltage Rating: 500 VAC (RMS) at sea level. 150 VAC (RMS) at 90,000 ft.
Dielectric: Zytel 101 nylon per Mil-P-20693.
Shells: Cadmium-plated cold-rolled steel with clear chromate finish.

Contacts: Crimp Type — .00002″ min. gold over copper plated silnic bronze. Solder type — .00002″ min. gold over copper plated brass.
Wire Size: Solder: Up to #20; crimp #20, #22 and #24 AWG.

FIXED CONTACTS and POWER & COAX.

Temperature Range: −55°C to +125°C.
Current Rating: 7.5 Amps.
Voltage Rating: 500 VAC (RMS) at sea level. 150 VAC (RMS) at 70,000 ft.
Dielectric: Glass-filled nylon.
Shells: Same as above.
Contacts: Power; Screw machine type — .00002″ min. gold over copper plated brass. Punch press type — Stamped from phosphor bronze and plated .00002″ gold over copper flash. Wire wrap type — .00002″ min. gold over copper plated brass. .500″ Lg. x .025″ Sq. Coax.; #1 Shielded contacts are gold plated.
Wire Size: Up to #20 wire.

Rear Removable Contacts

Temperature Range: −55°C to +125°C.
Current Rating: 7.5 amps.
Voltage Rating: 500 VAC at sea level. 125 VAC at 70,000 ft.
Dielectric: Glass-filled nylon.
Shells: Same as above.
Contact Type: Crimp Poke-Home, rear insertion, rear release.
Contact Material: Machined contacts — silnic bronze. Strip formed contacts — beryllium copper.
Contact Finish: .000030″ gold over copper plating
Contact Wire Sizes: Machined contacts — 20 to 24 AWG. Strip formed contacts — 22 to 26 AWG.

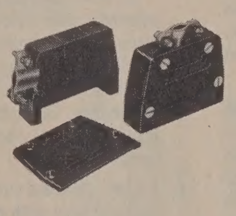
17 Series Min Rac Accessories

Plastic Backshell

A versatile accessory for all Min Rac connectors. Protects connector terminations and provides cable strain relief. Unique removable side panel allows attachment even after cable has been terminated. Can easily be removed for servicing in field. Deep recess accepts all connector styles, even encapsulated and power and coax lines. Interchangeable insert and cable clamp allows choice of top or side cable entry. Made of glass-filled nylon with cadmium plated steel clamp.



Metal Cable Housing

Used to adapt connector for cable to panel or cable to cable applications. Easily attached to connector by two screws. Available in clear chromate or gold iridite finish to match connector shells.

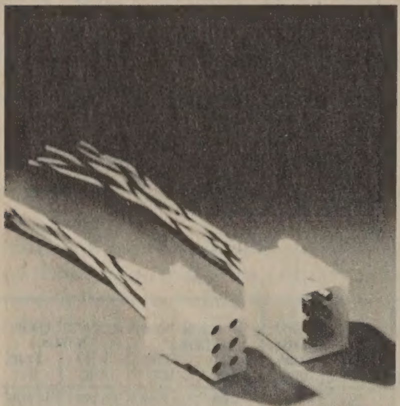
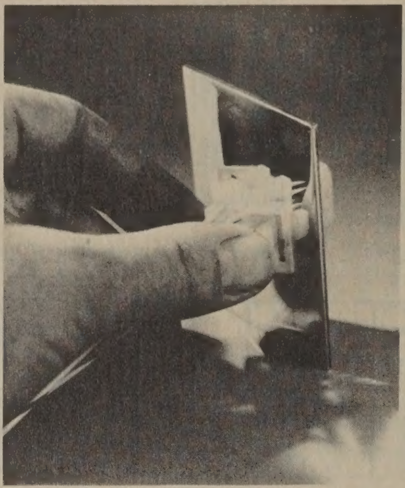
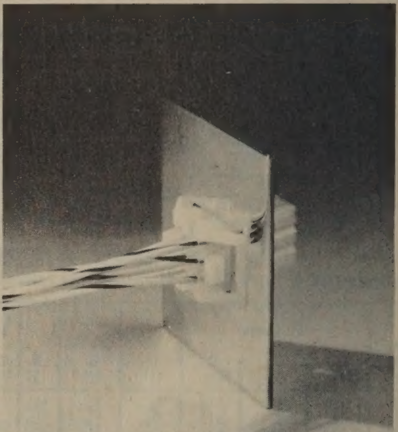
32 SERIES FIRE-PLUG™ and ECONO-PLUG™ CONNECTORS







- **Flame Retardant Material**
- **Low Cost**
- **Rugged and Reliable**
- **2-3-6-9-12-15 contact sizes**
- **Intermateable and interchangeable with competitive connectors**
- **Panel mount and cable connector styles**

Amphenol's Commercial Electronics Connector provides reliable interconnections with real cost saving potential. Low initial procurement cost; automatic crimp contact termination: fast, easy assembly into panels; and quick, simple removal and replacement for field servicing, if necessary. They are ideal for appliances, home entertainment equipment, coin operated machines, business machines . . . anywhere.

The FIRE-PLUG connector housings are the stalwart of the industry, CSA approved, and carry U.L. flame retardant rating of 94V-0. The ECONO-PLUG housing are molded from 94V-2 rated material for less critical applications and are available in six different colors for coding. Both housings are rugged single piece molded. They are polarized to prevent mismating. Contact wire pockets are recessed to prevent exposed wires and possible electrical failure or shock hazard. Available in 2, 3, 6, 9, 12, and 15 contact sizes. Fully intermateable and intermountable with many competitive types.

Panel mounted connectors have a unique locking feature that provides simple, secure mounting in panels from .032″ to .093″ thick. A simple push sets the connector automatically, no tools, no struggle. The locking wings hold it firmly in place. If necessary to remove the connector, simple press the locking tab from the rear and the connector slips out. The sturdy wings do not break off or come loose, even after repeated mounting cycles.

To conserve space and improve appearance, cable to cable connectors do not have panel mounting wings. Fully mated connectors lock together to prevent loosening under vibration.

32 Series contacts are furnished on reels for use with high volume semi-automatic production crimping presses, or individually in small quantities for manual wire termination. The contacts can be crimped to 14 through 30 gauge insulated wire. There are three wire barrel sizes to assure the correct combination of wire and contact for the strongest and most reliable crimp termination. Contacts are easilv inserted into the housing and locked in place with a hand tool. This same inexpensive hand tool is used to remove the contacts.

The standard-size .093″ diameter contacts are completely interchangeable with other contacts. Pin and socket contacts can be assembled in either the plug or the receptacle for quick "hot side" changes or for additional polarization. Normally the pin contacts are used in the plug and socket contacts are used in the mating receptacle.

PERFORMANCE SPECIFICATIONS

Maximum recommended operating voltage:	250 volts
Dielectric withstanding voltage:	1800 volts
Operating temperature range:	−55°C to+105°C

Material: U.L. rated 94V-0 nylon-base material (Fire-Plug)
or 94V-2 nylon (Econo-Plug)

BLUE RIBBON™ CONNECTORS

26 Series Cable to Panel and Cable to Cable Types

- **Low Withdrawal Force**
- **Low Insertion Force**
- **Provisions for Safety Wiring**
- **Secure Spring Latch**
- **Alternate Positions**

Cable-to-Panel Blue Ribbon Connectors include a straight plug, right angle plug, and panel receptacle. The plug is equipped with a spring tension swivel latch to insure mating, even in vibration applications. Provision for safety wiring provides additional reliability.

The nickel plated brass shells are notched to provide keying for alternate positions. The large number of alternate positions available is effectively doubled since the plug and receptacles are available with either a male or a female insert. Add P to the catalog number for a male insert; S for a female insert.

Tapered design of plug body provides pre-alignment of mating contacts. Dielectric barriers between contacts vary in thickness by minute dimensions to provide polarization. Float bushings allow a float of up to .02 in each direction, facilitating the blind mating common in rack and panel applications. Requires simple rectangular panel cutout.

The eight contact size is also available with a molded key and keyway for polarization. Catalog numbers, 26-182 plug and 26-183 receptacle.

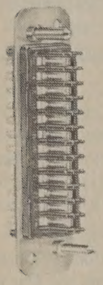
SPECIFICATIONS (Exceed requirements of SCL-6020A)

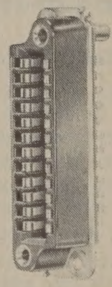
Current Capacity — 5 Amps per contact
Voltage Rating — 750 volts D.C. at sea level.
300 volts D.C. at 60,000 feet
Operating Temperature — −55°C to +125°C
−67°F to +257°F
Contact Plating — .00002″ gold over copper base
Maximum Wire Size — 16 gauge

Plugs and receptacles are molded of high impact diallyl phthalate dielectric with molded-in mounting plates of corrosion resistant passivated stainless steel.

Pin Polarization



26-159-24



26-190-24

Sturdy guide pins pre-align connectors before contact engagement. Pins are of dissimilar size to avoid reverse mating. Float bushings on receptacle allow a float in all directions of .02″ to minimize the need for close mounting dimensions and to assist in blind matings. Rated 5 amperes, 750V DC at sea level; 300V DC at 60,000 feet.

The right idea at the right time / **AMPHENOL®** / **BUNKER RAMO®**

126 Series Miniature Rack and Panel Connectors

Heavy duty, reliable, time proven connectors. Dielectric is of melamine. Contacts are gold over silver plated. Voltage rating of types 1 and 2 is 700V RMS between contacts and 600V RMS between contacts and ground with a current rating of 17 amperes. Voltage rating of types 3 and 4 is 600V RMS with a current rating of 7½ amperes.

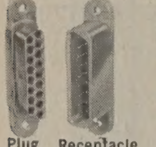
POLY CARBONATE OR NYLON CONSTRUCTION



Plug Receptacle
(Relia-Tac Contacts
Illustrated)

Exceptional interconnections for circuit modules, either potted-in or surface mounted, and can also be used as micro-miniature rack-and-panel, cable-to-cable, and cable-to-panel connectors.

The positive mating is the result of the snap latch engagement locking device molded into the connector body. Contact identification numbers are also molded in.

Trapezoidal mating faces are used for polarization. Guide pins provide keying. Contact spacing is .100" on centers on each row.

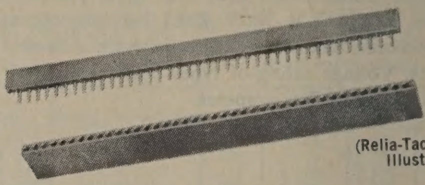
221 Series Strip Connectors

ADAPTABLE TO ANY SHAPE: STACK, CUT, CUT AND STACK, USE AS IS... HIGH CONTACT DENSITY,

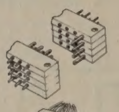


(Relia-Tac Contacts Illustrated)

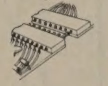
AMPHENOL Strip Connectors are highly reliable, low cost micro-miniatures with great application versatility. They are furnished in 4" and 6" lengths, but you can cut and stack them to whatever configuration you need to satisfy your various application requirements.

Strip connectors use Poke-Home contacts and perform superbly. Where keying is desired, guide pins are inserted in two or more plug strip contact holes.

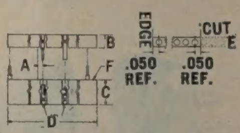
Because Strip connectors are injection molded, special configurations can be produced quickly and inexpensively.



Strips can be used in stacked arrangement. Should be stacked parallel only.



PC board application using strip connectors.



CUSTOM LENGTH
Number of holes multiplied by contact center dimension equals approximate length of strip.

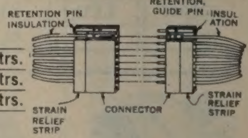
Use Relia-Tac pin contacts for receptacles; socket contacts for plugs.

Strain Relief Strips Protect Wire

AMPHENOL has a solution to the problem of excessive flexing that breaks wire strands in cable-terminated applications. Strain relief strips are available to encase and protect the wire in the crimp area at the rear of the strips. Molded in black Nylon 6/6 material, the strips can be ordered to match any Amphenol strip connector. Held in place by retention pins, which can also be used as a guide pin.

Ordering Information

221-9160—for use with strip connectors on .100 ctrs.
221-9253—for use with strip connectors on .075 ctrs.
221-9380—for use with strip connectors on .050 ctrs.



Poke-Home® Guide Pins

Poke-Home guide pins when seated in plug inserts serve functions of polarizing, keying or connector alignment. They can be used in conjunction with Relia-Tac contacts. Contact factory for information.

Superior Performance at Low Cost

AMPHENOL Mighty-Mite connectors are low cost, highly reliable micro-miniature connectors designed to serve an exceptionally wide range of cable-to-cable and cable-to-chassis applications.

Mighty-Mite connectors are available as straight plugs, single hole mounting, square flange, and cable receptacles. Standard connectors are molded of one-piece, rugged polycarbonate.

ARRANGEMENTS

Ordering Information

222- 1 1 N 61

Series Designation 222

Method of Mounting
1—Flangeless
2—4 hole mount receptacle
3—Single hole mount Receptacle (includes retaining ring)

Number of Contacts 07, 19, 31, 61

Connector Class: N—Non-environmental

Insert Style
1—Plug (Polycarbonate)
2—Receptacle (Polycarbonate)

NOTE: Order Contacts Separately.
Use Relia-Tac pin contacts for receptacles, socket contacts for plugs.

220 Series Contacts for 220, 221, 222, 223 Series Connectors

Ultra-Tac Contacts

Top quality micro-miniature contacts. The socket contacts are hooded to resist test prod damage.

Relia-Tac Contacts

Durable, customer-proven contacts.

Part Number	Description
220-P02 (Pin) 220-S02 (Socket)	Standard, See specifications below
220-844-02 (Pin) 220-845-02 (Socket)	Same as above, except heavy gold plating and inspection hole in crimp area

Pin Tail Contacts

Pin Tail Relia-Tac contacts may be used for mounting connectors directly to printed circuit boards. Can be provided with right angle bend.

Solder Cup Contacts

Can be soldered to leads before insertion or, with proper heat sink, after contacts are assembled.

* Constant to a minimum of 100 cycles of insertion and withdrawal.

Ordering Information

Minimum order quantity is 100 pieces. Contacts can be supplied on reels for use in semi-automatic crimp machines. Consult factory.

NOTE: All socket contacts are completely shrouded within the plug inserts for optimum protection against damage. Pin contacts are normally exposed when assembled into receptacle inserts.

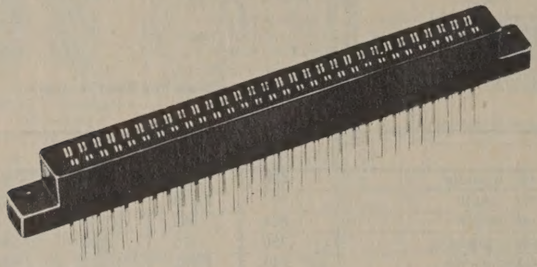
COMMERCIAL CONNECTORS

225 Series

Wire-Wrappable Terminations
Bifurcated Bellows Contacts



AMPHENOL 225 Series Printed Circuit Commercial Connectors with wire-wrappable terminations provide an economical and reliable connector for either automatic or hand-wire-wrapping applications.

Contacts are on a .100 x .200 (2,54 mm x 5,08 mm) or .125 x .250 (3,18 mm x 6,35 mm) grid spacing. Connectors are available in 22-, 30-, 40-, 43- and 50-position models with either grid spacing. The .025 (0,64 mm) square posts will accept a minimum of 3 wraps of #26 AWG wire.

SPECIFICATIONS

Operating Voltage:	600 VAC (RMS) at sea level 150 VAC (RMS) at 70,000 ft.
Current Rating:	5 amps
Dielectric Material:	Electrical Grade Phenolic, Black
Insulation Resistance:	5,000 megohms minimum
Contact Material:	Phosphor bronze plated .000020 (0,000508) min. gold over copper
Contact Resistance:	30 millivolts maximum at rated current
Board Thickness:	.054 (1,37) to .071 (1,80)

POLARIZING KEYS

225-645

Over contact key can be used with 225 Series wire-wrappable connectors on .100 (2,54) and .125 (3,18) centers.

225-594

Between contact key may be used with .125 (3,18) center wire-wrappable connectors.

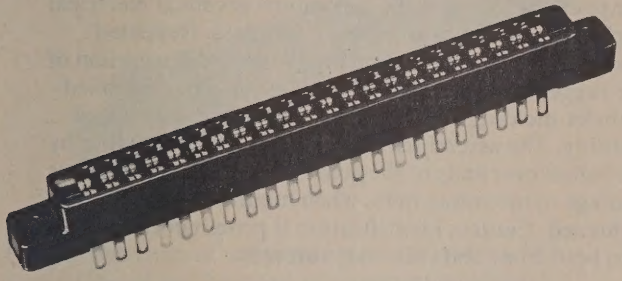
NOTE: For 4-40 NC Threaded Hole Mounting use Deviation (122). Example: 225-8XX-XX(122).

COMMERCIAL CONNECTORS

225 Series
Solder Terminations



225 Series Printed Circuit Commercial Connectors with solder terminations are intended for flush installation on printed circuit boards with pads and spacer barriers that permit thorough flux washing.

Four different tail styles provide unusual termination flexibility—one eyelet and three straight tails. The eyelet accepts up to three #20 AWG wires at each terminal; the others are for dip or flow soldering. With 2-tail bridged or common contacts, you can connect 6 wires to one point on a printed circuit board. You can also obtain two 2-tail configurations—one with bridged terminals for single or common-contact (redundant) boards; the other with dual contact terminals for independent opposing circuits.

All dip-solder terminals are designed for .043 (1,09 mm) min. diameter holes.

SPECIFICATIONS

Operating Voltage:	600 VAC (RMS) at sea level 150 VAC (RMS) at 70,000 ft.
Current Rating:	5 amps
Dielectric Material:	Electrical Grade Phenolic, Black

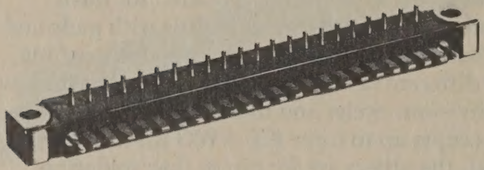
PLUGS

133 Series



Amphenol 133 Series Plugs combine excellent electrical performance with mechanical sturdiness. Repeated matings, even at an angle, will not cause deformation of the rugged contacts. Amphenol's process of controlled-transfer molding assures uniformity and dimensional stability. The assembled body is rigidly held together by the rolled-over ends of the guide pins. End caps prevent damage to mounting holes when mounting screws are tightened. Contact identification is prominently molded into both front and rear body surfaces.

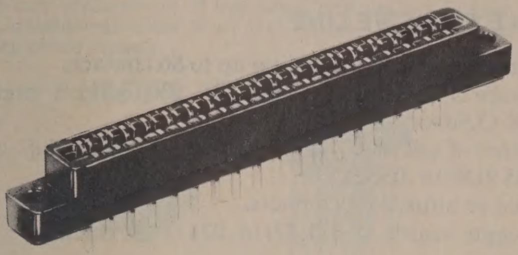
RECEPTACLES

143 Series



Even at extremes of temperature and vibration, 143 Series Connectors keep voltage losses at an absolute minimum through the strong, firm action of their tuning-fork-type contacts. With their connector-body design and contact "float", 143 Series Connectors prevent board rocking. In addition, the design assures that warped boards will not affect performance.

Extra-strong contact faces slide readily over the mating surfaces of the PC board and conductivity remains virtually unaffected for at least 500 cycles of insertion and withdrawal. Where more cycling is anticipated, a 133 Series Plug can be attached to the board and mated with a 143 Series Connector.

The molded connector body in either mineral-filled diallyl phthalate or phenolic (117 deviation) is dimensionally stable. It is designed for flush mounting and can be mounted either on the front or rear of the panel. Contact identification letters are molded in both the top face and terminal surface.

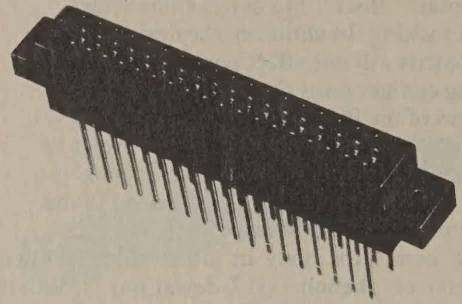
PRINTED CIRCUIT EDGE CARD CONNECTORS
261 SERIES



AN EXTENSIVE LINE

- ☐ 15 to 43 positions providing up to 86 contacts
- ☐ Choice of .100 (2,54), .125 (3,18), .150 (3,81), .156 (3,96) or .200 (5,08) spacing
- ☐ Choice of tail sizes: .025 (0,64) sq., .035 (0,89) sq., or .035 (0,89) x .050 (1,27)
- ☐ Solid or bifurcated contacts.
- ☐ Accepts boards .054 (1,37) to .071 (1,80) thick

SPECIFICATIONS

Dielectric Material:	Electrical grade phenolic, medium impact, black.
Contact Materials:	.100 (2,54) and .125 (3,18) centers utilize phosphor-bronze base metal with tin tintalate plate and a Precious Metal Tip (PMT) on the contacting surface. .150 (3,81), .156 (3,96) and .200 (5,08) centers use phosphor-bronze base with copper flash and .000030 (0,00076) min. gold plate overall.
Tail Length:	Sufficient for three wire wraps, plus space for bussing or PC board next to block Tails may be cut as short as .100 (2,54) at the factory for wave-solder applications.
Polarization:	Polarizing key (P/N 261-70005) may be used on all 261 Series. Fits between contacts on .150 (3,81), .156 (3,96) and .200 (5,08) centers; replaces one pair of contacts on .100 (2,54) and .125 (3,18) centers.

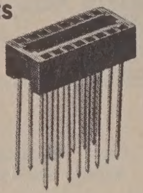
Dual-In-Line IC Production Sockets

The 821-25, 821-20 and 821-40 Series are high reliability production mounting sockets for Dual-In-Line I.C. devices. They are most useful in production applications where it is desirable to provide easy replacement of individual DIP devices without the risk of unsoldering them from P.C. boards or the expense of replacing entire boards.

Standard Profile DIP Sockets



Standard profile sockets have replaceable, one piece contacts with dual-wiping action for round or flat I.C. leads. Removable lid provides closed entry and chamfered lead-in. Available in anti-wicking solder tab or solid square post for solderless wrap termination.

SPECIFICATIONS

Contact Material: 30 micro inch gold over 50 micro inch nickel over phosphor bronze

Contact Resistance: 5 milliohms

Contact Rating: 1 amp

Voltage Breakdown: 1800 volts

Terminations: Choice of solderless wrap with up to 3 complete wraps of 30 AWG wire, short solderless wrap for 2 wraps, or solder tab.

Body Material: Molded glass filled nylon

Temperature Rating: —55° to +125°C

Mounting: Press fit, hex nut and screw, direct solder, or epoxy

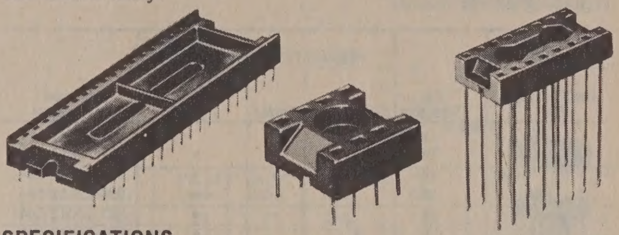
Low Profile DIP Sockets

Designed for low cost, reliable, high density connections. Overall height is only .160″ above board, allowing closer stacking. Also permits side-by-side mounting on .100″ x .300″ and with no wasted space between sockets. Large sockets include lead guides and closed entry.



SPECIFICATIONS

Contact Material: 30 micro inch gold over 50 micro inch nickel over phosphor bronze, or beryllium copper

Contact Resistance: .005 ohms

Contact Rating: 1 amp max.

Voltage Breakdown: 1800 volts

Terminations: Choice of solderless wrap with up to 3 complete wraps of 30 AWG wire, or solder tab

Body Material: Molded glass filled nylon

Temperature Rating: —55° to +125°C

Mounting: Press fit, hex nut and screw, direct solder, or epoxy

Mating Leads: Contacts accept standard IC leads up to .024″ square, rectangular or .024″ diameter

Dual-In-Line Production Sockets

The 821-25, 821-20 and 821-40 Series are high reliability production mounting sockets for Dual-In-Line I.C. devices. They are most useful in production applications where it is desirable to provide easy replacement of individual DIP devices without the risk of unsoldering them from P.C. boards or the expense of replacing entire boards.

Flat Pack Test Sockets

AMPHENOL flat pack sockets meet the needs of production and will withstand repeated temperature cycles.

Sockets are available to fit all standard configurations and sizes of flat integrated circuit packages with peripheral leads, micro-mesa transistors and other similar components. Suitable for test, aging, and breadboard.

The new sockets feature wiping, gold plated contacts. Molded barriers between leads provide positive lead separation and increase speed and ease of loading. Loading is simple — the hinged latch is snapped forward and the hinged lip raised, opening the cavity for easy insertion or removal of the component. Ample tweezer clearance is provided. The component is dropped into place and positioned by the cavity. No stress of force is exerted on the body, leads, or seal. The socket is closed and latched — bosses on the cover depress the leads against the wiping contacts.

Dual-In-Line Test Sockets

The Amphenol DIP test sockets are rugged and molded.

For greatest reliability, contacts are one-piece, precision-formed of beryllium copper, nickel/gold plated, and provide a gentle wiping action on device leads to insure low, uniform contact resistance. Contacts are designed for minimal insertion and withdrawal forces consistent with reliable electrical contact.

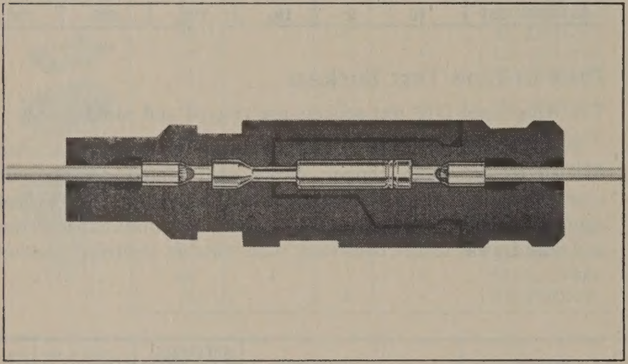
LOW COST WATERPROOF CONNECTORS

44 SERIES

BREAKTHROUGH IN DESIGN

Amphenol® 44 Series is an all resilient, one piece, waterproof connector. Our design has incorporated crimp Poke-Home® contacts in six insert configurations. These 44 Series connectors offer high performance along with low cost, making this connector ideally suited for those applications where an environmentally sealed yet inexpensive connector is needed.



USER BENEFITS

- **Environmentally Sealed.** Waterproof seals prevent liquids from entering the connector to cause electrical or electronic circuit failures. Not intended for submergible applications.
- **Longer Service Life.** The unique one-piece shell and insert construction minimize the number of parts and failure modes for predictably longer service life.
- **Durable.** The resilient connector body is abrasion resistant and is impervious to water, lubricants, fuel, ozone, and road salts.
- **Lower Installed Cost.** Punch-press contacts enable the use of automated stripping and crimping equipment resulting in lower on-line production and installed assembly cost.
- **High Reliability.** The use of hooded female contacts in addition to the molded-in polarizing flat assures proper contact/connector alignment and eliminates the possibility of lost or cross-wired circuits.
- **Low Maintenance Cost.** Should the need arise, the connectors can be easily serviced in the field with the use of inexpensive hand crimp and insertion tools. This minimizes equipment down-time and required maintenance time.
- **Easy Mating.** Simple, positive, push-pull coupling and disconnect of connectors requires no special assembly instructions. Obvious visual and mechanical mating indicators help avoid damage to components resulting in lost or intermittent circuits.

NEW MATERIALS

A resilient material in the 44 Series allows the insulator to be molded as one complete unit. This material proved to be the most successful under such conditions as salt spraying, vibration and shock. Added to this are our Poke-Home® contacts made of a copper alloy with electrotin plating. This combination makes the 44 Series not only highly reliable but less costly to use.

OPERATIONAL CHARACTERISTICS

Voltage Rating: Limiting operating voltage at sea level — AC 250 Volts RMS.

Current Rating: 8 amps continuous.

Temperature Range: Continuous operation from −40°C to +105°C.

TERMINATION

- Punch-press contacts utilize semi-automatic or hand crimping equipment.
- Contacts accept wire sizes of 14 AWG, 16 AWG, and 18 AWG with an overall wire insulation diameter range of .080 to .130 inches.
- Standard contact packaging: 5,000 unit reels for semi-automatic machine crimping.
- Contacts available individually packaged in bags of 100, 500, or 1000 pieces for hand tool crimping applications, order deviation (101).

TYPICAL APPLICATIONS

- 44 Series connectors can be used as truck accessory disconnects under the hood or frame, on axles or near the engine, or in the driver's compartment.
- Automotive applications could call for the 44 Series in systems such as ignition, anti-skid, brake warning, pressure warning or speed indication.
- Periphery equipment like toll booths, traffic signals or highway safety and lighting equipment also could have a need fulfilled by the 44 Series.
- Marine industry applications such as ignition systems, starter motors, instrumentation and lighting, batteries, controls and even fuel injection systems are fulfilled by 44 Series.
- Amphenol 44 Series connectors have excellent opportunities in the recreational vehicle where manufacturers are continually looking for better means of inter-connecting cars to trailer/campers.

AVAILABILITY

Amphenol's 44 Series connector family is available now. The 44 Series family now includes 1, 2, 3, 4, 5, and 6 contact configurations.

® Registered trademark of Bunker Ramo Corporation.

STANDARD CIRCULAR CONNECTORS

97 SERIES CONNECTORS

- **PROVEN**
- **LOW COST**
- **RELIABLE**

FASTER, EASIER TERMINATIONS

Amphenol 97 Series connector contacts do not rotate within the insert. They're factory-aligned to uniformly position the solder cups for easy soldering. Why waste valuable assembly time positioning contacts? — Amphenol non-rotating contact design simplifies soldering and lowers termination costs.

DEPENDABLE, LONG-LASTING TERMINATIONS

- Our blue diallyl-phthalate inserts provide high insulating resistance and dimensional stability in the presence of **both** high humidity and high temperature . . . performance unmatched by melamine or neoprene materials.
- Only Amphenol 97 Series inserts feature molded barriers between each contact. The barriers increase the surface distance between contacts, thus increasing the insert's voltage rating.
- For added strength, Amphenol pin inserts in sizes 20 and larger have additional dielectric thickness.
- Amphenol coupling rings are machined from solid bar stock. This exclusive feature provides extra strength.

A cure for the connector part number problem.

1 How many wires are you going to connect? What gauge?

These two questions are important, because they indicate which insert you need. There are literally hundreds to choose from.

The insert chart illustrates the 203 inserts with 43 inserts most often used are bracketed. Chances are the one you need is there.

Here's an example of how to use the chart. Say you want to connect eight 16-ga. wires. Just find the section of the chart marked 8 contacts. Insert number 20-7 is the one you want because it contains eight 16-ga. contacts and is one of the most often used. The one you choose might depend on your space or voltage requirements. The voltage capacity of each insert is listed under its diagram.

If you have more than one wire size to connect, the method is essentially the same. Actually, the insert configurations for multiple-size wires are a lot more flexible than they appear. That's because you can always solder a smaller wire to a larger contact. However, soldering a large wire to a small contact isn't recommended because of size and current requirements.

2 What if several identical connectors have different functions?

Here's a situation to watch out for. You have four identical receptacles on a panel. One carries high current loads. The others have low current functions. A plug mated with the wrong receptacle (cross-mating) could ruin your valuable equipment.

To avoid cross-mating, you can order identical inserts positioned in both the plugs and receptacles at various angles from standard. These variations from standard position are called Alternate Insert Positions.

The right idea
at the right time
AMPHENOL®
BUNKER RAMO®

STANDARD CIRCULAR CONNECTORS

3 What kind of receptacle do you need?

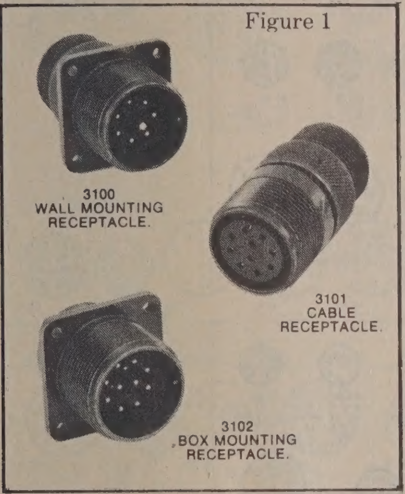

Figure 1

For wall mounting. Figure 1 shows a Wall Receptacle, type 3100. The elongated back of this receptacle extends through thick wall material. It is threaded to accept standard hardware fittings.

For unmounted applications. Use the Cable Receptacle, type 3101, shown in Figure 1.

For box or panel mounting. Use the Box Receptacle, type 3102. This receptacle's back is short to conserve space. It is not threaded on the back end and is used when no accessories such as clamps are needed.

4 What kind of plug do you need?

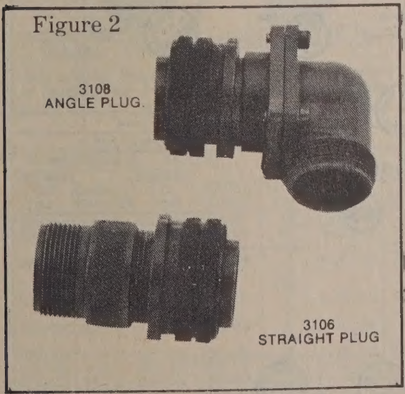

Figure 2

For ordinary situations. The Straight Plug, type 3106 (Figure 2), meets most connector requirements. However . . .

When space is critical. You may want to consider using an Angle Plug, type 3108. This type plug, shown in Figure 2, lets the cable enter your equipment at a right angle.

5 Do you need a plug with Solid or Split Back Shell?

SPLIT BACK SHELL.
SOLID SHELL.

You can get both straight and angle plugs in solid or split back shell designs. With the solid shell, you have greater strength. You save space, too. On the other hand, the split shell design lets you quickly inspect the solder terminals when you need to. This feature could be pretty important if you'll be subjecting the connector to rough handling and heavy use.

The type identification for solid shell construction is the letter A immediately after the main shell type number: i.e. 3106A or 3108A. Likewise, the type identification for split back shell construction is B: i.e. 3106B or 3108B. Because of application, receptacles are made in solid back shell construction only. Their type identification is 3100A, 3101A and 3102A.

6 Which connector gets the socket? The receptacle or the plug?

You're at the point where you designate which inserts are used with which shells. Since either pin or socket inserts can be used with plugs or receptacles, now's the time to make your choice.

Here's a good rule of thumb. Order the sockets for the connector at the "hot" side of the circuit. By having sockets at the power source, there's little chance that a wayward finger or screwdriver will short the circuit or cause personal injury.

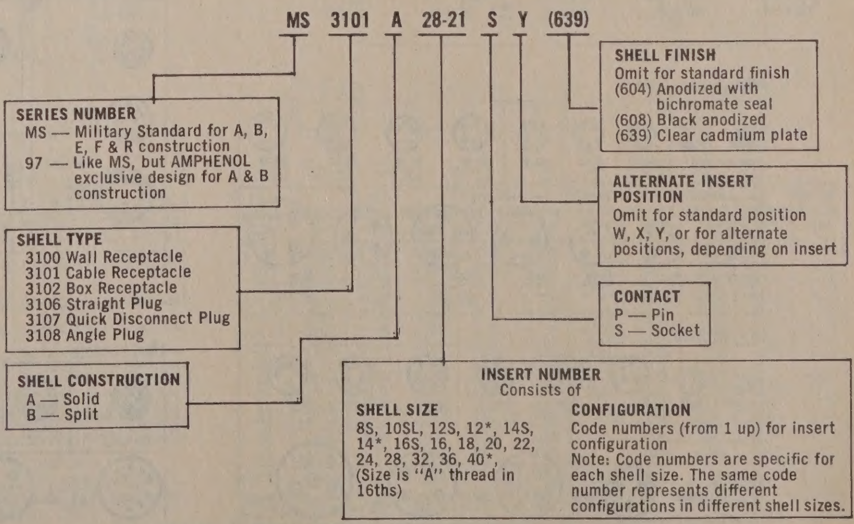
The code for Sockets is simply S following the insert code number. For Pins, it is P. Therefore, 20-7P insert would have pin contacts while a 20-7S insert would have socket contacts.

7 Do you need a non-reflective finish or a shiny finish?

If you prefer the standard dull-olive cadmium plate finish, which is non-reflective, then no suffix number is needed. If you would rather have the shiny, clear cadmium plate finish, just add the suffix (639) at the end of your part number.

Both finishes give you the same high conductivity and resistance to corrosion.

HOW TO ASSEMBLE MS CONNECTOR PART NUMBERS



MS 3101 A 28-21 S Y (639)

SERIES NUMBER
MS — Military Standard for A, B, E, F & R construction
97 — Like MS, but AMPHENOL exclusive design for A & B construction

SHELL TYPE
3100 Wall Receptacle
3101 Cable Receptacle
3102 Box Receptacle
3106 Straight Plug
3107 Quick Disconnect Plug
3108 Angle Plug

SHELL CONSTRUCTION
A — Solid
B — Split

SHELL FINISH
Omit for standard finish
(604) Anodized with bichromate seal
(608) Black anodized
(639) Clear cadmium plate

ALTERNATE INSERT POSITION
Omit for standard position
W, X, Y, or for alternate positions, depending on insert

CONTACT
P — Pin
S — Socket

INSERT NUMBER
Consists of

SHELL SIZE
8S, 10SL, 12S, 12*, 14S, 14*, 16S, 16, 18, 20, 22, 24, 28, 32, 36, 40*, (Size is "A" thread in 16ths)

CONFIGURATION
Code numbers (from 1 up) for insert configuration
Note: Code numbers are specific for each shell size. The same code number represents different configurations in different shell sizes.

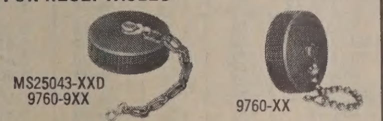
CAP AND CHAIN ASSEMBLIES

Ordering Information and Dimensions

Fit 97 type receptacles and plugs. Provide protection against live circuits and keep out dirt and dust when connector is not in use.

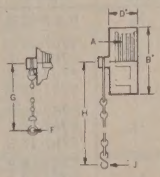
Two styles are available: the MS type with a stainless steel link chain, and the Amphenol standard type with a beaded chain. Both use the same caps and both have a cadmium olive drab finish.

FOR RECEPTACLES

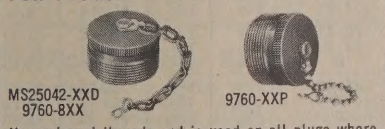


MS25043-XXD
9760-9XX
9760-XX

Has internal threads and is used on all receptacles (MS3102, MS3101 and MS3100). A soft rubber disc seats on the connector shell forming a watertight joint.



FOR PLUGS



MS25042-XXD
9760-8XX
9760-XXP

Has external threads and is used on all plugs where a coupling nut is provided (MS3106 and MS3108).

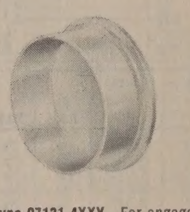
* B dimension 1/16" less and D dimension 1/64" less for screw machine parts.

† Caps less chains are available. To order, add G to the part number; for example, 9760-8G.

‡ Complete the MS part number by substituting the shell size for XX. For example, to get a MS type cap for a size 10 receptacle, order MS25043-10D.

97 CONNECTOR ACCESSORIES

Protective Caps for MS Connectors — 97121



MS90376 Expendable polyethylene dust caps provide added protection for precision-built MS connectors during storage and handling, in assembling with other equipment, and after complete assembly into a finished apparatus. Protective caps cover threaded sections of plugs and receptacles; assure against damage to thread from any cause; permit low-cost, attractive coverings which protect contacts and the insulation from dust, dirt and handling damage.

Type 97121-4XXY—For engagement with internal threads of coupling rings.

Type 97121-4XXR—For engagement with external threads; for coupling and fitting threads

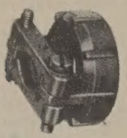
NOTE: A complete part number consists of type number 97121 and the size indicated by a dash number such as -408R, or 440Y. Examples of complete part numbers: 97121-408R, 97121-440Y, etc.

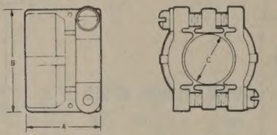
STANDARD CIRCULAR CONNECTORS

97 Connector Accessories

Cable Clamp

For jacketed cable or wires protected by tubing. On MS3057A Cable Clamp, both clamping halves float, so that cable is always centered, affording maximum strain relief. With unjacketed cable or wire bundles without tubing, use corresponding MS3420 bushing. To order clamp with bushing, add -1 to the Amphenol part number. With shell sizes 16 and larger, two telescoping bushings are furnished.





MS Number	Part Number	Shell Size	Max. O.D. Cable	Dimensions — Inches A	B	C	Threads

Bushing

Rubber bushing specifically designed for MS3057A Cable Clamp. Protects wire bundles and unjacketed cables from possible damage by cable clamp. Can also be used as reducing bushing.

Cable Clamp

For jacketed cable or wires protected by tubing. To provide for the most firm grip, the cable or wires should be centered in the jaws of the clamp. A vinyl or rubber bushing or sleeve may be used for this purpose. In applications where the cable is subject to considerable flexing, the resilient sleeve should project for several inches along the wire. This reinforcement lengthens the life of the cable. For centering and sealing, one resilient washer and two fiber washers are included with each clamp.

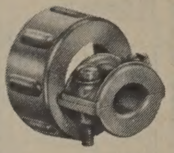
† Clamps for connectors size 12 are the same as for sizes 10SL and 12S.

Step Down Cable Clamp — 97-3057



Like the AN3057 except for the step down feature that accommodates smaller cable than that for which AN3057 was designed.

Part Number	Fits Shell Size	Fits AN Fitting Size	Max. O.D. Cable	Dimensions — Inches A	B	E	F	Threads	Weight Lbs. per 100
97-3057-10-6	18	10	1/2	1 3/16	1 1/8	7/16	3/16	1 -20	3.94
97-3057-12-6	20, 22	12	1/2	1 3/8	1 3/16	7/16	3/16	1 3/16-18	4.40

NOTE: The selection of fittings for connection to MS connectors is based on the connector size AND the cable or conduit size. For other connections, such as terminations and couplings, fitting sizes correspond to the size of the cable or conduit used.

Waterproof Cable Clamps

The complete waterproof cable clamp assembly No. 9767 (for use with MS connectors) consists of an AN3057 Cable Clamp, a rubber bushing, washer and an AN3055 Adapter. It is available for all sizes MS and 97 plugs. The sectional view of Amphenol 9767 Waterproof Cable Clamp shows the parts of the clamp.

To assure the watertight integrity of this clamp when assembled to an MS plug, the plug must be ordered with deviation (417) which supplies a W washer cemented to the shoulder of the plug shell.

For AN Fittings

When selecting a cable clamp for a connection with fittings, the 9767 Waterproof Cable Clamp without the adapter may be used. AN fittings have the required inside tapered surface for seating the special rubber bushing.

The right idea at the right time / AMPHENOL® / BUNKER RAMO®

STANDARD CIRCULAR CONNECTORS

97 Series — Special Purpose Connectors

Box Type Plugs — (97-5105 Construction)

Square flange for mounting directly on box or housing. Provides a means of directly connecting two pieces of equipment without interconnecting wires. Available in all sizes with either male or female inserts. To order, complete the part number (97-5105) by adding the proper insert number. (See other pages for insert information.) Example: 97-510528-20S. To prevent connectors from rotating, order deviation 205 (a single stake, with swivel ring pinned) or 206 (double staking, with both swivel plate and swivel ring pinned); for example: 97-510528-20S(205) or 97-510528-20S(206).

Junction Shells — 9784

These junction shells may be used as panel terminations to hold cable harnesses when not in use or as right-angle feed-throughs similar to the AN3064. Adding the AN3057 cable clamps provides strain relief.

229 SERIES POWER-DISTRIBUTION INTERCONNECT

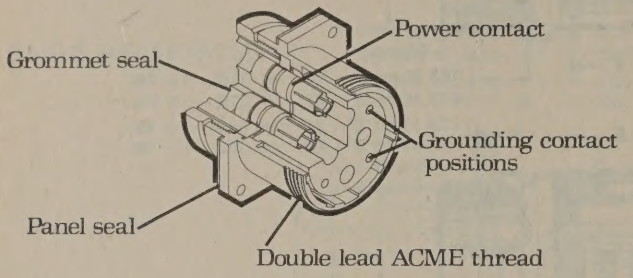
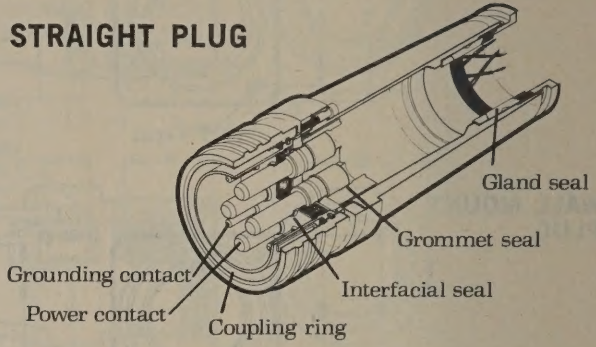
CUTAWAY: AMPHENOL 229 SERIES WALL MOUNT RECEPTACLE AND STRAIGHT PLUG CONNECTORS

WALL MOUNT RECEPTACLE



STRAIGHT PLUG



FEATURES

- **SAFETY**—Complete protection for personnel and using equipment whether connectors are mated or unmated under rated load.
- **ARC QUENCHING**—Socket contacts are recessed within the socket insert to provide an arc-suppressing chamber within the connector. This assures positive safety for the user.
- **ENVIRONMENT RESISTANT**—Connector design and materials withstand the most severe operating conditions. See specifics under Performance Characteristics.
- **CRIMP CONTACTS**—Connector design permits cable termination to contacts by solder or crimp method. Contacts are removable for repair or maintenance.
- **ACME-THREAD COUPLING**—Modified Acme thread will not clog under adverse conditions such as ice, snow, sand or mud. Quick coupling is an additional feature.
- **COMPLETELY WATERPROOF**—These connectors are completely waterproof assemblies regardless whether mated, or unmated, capped or uncapped. Sealing is accomplished by:

Main-Joint Gasket	Interfacial Seal
"O"-Ring Seal	Cable-Gland Seal
Grommet Seal for Individual Conductors	

- **NO CROSS MATING**—Connector design is foolproof, with mating polarization detailed for specific voltage, current, frequency, phase and grounding requirements. Five-key shell polarizing prevents mating with a connector of different power characteristics.
- **RUGGED**—All metal parts are high-strength aluminum. Molded parts are of high-strength materials designed to withstand heavy and severe usage.

HOW TO ORDER 229 SERIES CONNECTORS

MIL-C-22992 Class L connectors can be ordered by the Military part numbers. The connector part number is put together as per the following example:

MS90558 C 44 4 12 P W

SHELL STYLE
MS90555 — Wall Mount Receptacle Available Only with Socket Contacts
+MS90556 — Cable Plug — Available Only With Pin Contacts
MS90557 — Cable Receptacle — Available Only With Socket Contacts
+MS90558 — Wall Mount Plug — Available Only With Pin Contacts
+Coupling Ring Is On These Connectors

SHELL FINISHES
C — Conductive
N — Non-conductive

SHELL SIZE
28 32 44 52

SHELL KEY POSITION
1 Thru 6, N = Normal Positions As Per Table On Page 1739

INSERT ARRANGEMENT
12 13

CONTACT STYLE
P — Pin S — Socket

ALTERNATE KEY POSITION
No Letter Required For Normal. Positions As Per Table On Page 1739

NOTE: Each connector comes complete with protective cap and chain. In addition, the cable plug and cable receptacle come with the cable gland and cable grip sized for the cable on which they will be used. This sizing is controlled by the insert arrangement number.

To get the specific 229 Series connector you want, put together the part number as per the following example:

229 - 558 0 4 - 44 12 P W

SERIES DESIGNATION

SHELL STYLE
555 — Wall Mount Receptacle — Available Only With Socket Contacts
+556 — Cable Plug — Available Only With Pin Contacts
557 — Cable Receptacle — Available Only With Socket Contacts
+558 — Wall Mount Plug — Available Only With Pin Contacts
+Coupling Ring Is On These Connectors

SHELL FINISHES
0 — Cadmium OD
1 — Cadmium — Clear
2 — Black Hard Coat Anodize

SHELL KEY POSITION
1 Thru 6, N = Normal Positions As Per Table On Page 1739

SHELL SIZE

STANDARD CIRCULAR CONNECTORS

165 Series Miniature MS-Type Connectors

COMPACT AND CONVENIENT

Connectors in the 165 Series are only about one-third the size and weight of standard MS connectors with the same number of contacts.

Bayonet coupling provides quick disconnect.

WIDELY APPLICABLE

Eight different insert configurations and five different shell styles in two sizes — large and small — provide enough variations for a wide range of applications.

Plugs and cable receptacles are available with either a built-in cable clamp to provide positive strain relief or with provision for potting. On all connectors, alternate insert positions are available for gang mounting.

WEATHERPROOF AND PRESSURE PROOF

When mated, 165 Series connectors are pressure proof and completely waterproof. The connectors using female inserts feature a sandwich construction with the insert spun into a cartridge; the connectors are factory sealed to prevent leakage. O-ring seals are used in both plugs and receptacles. They meet the exacting pressure seal requirements of MIL-C-5015, Class C construction.

Connectors with Shielded Contact and Ground Shield

- Important in aircraft and instrumentation applications, for example, fuel gaging.
- Shield continuity was recently upgraded by addition of heat treated beryllium copper finger pressure members to the socket shield.
- Available in a number of shell styles, including potting construction plug and cable receptacle, plugs with spring-loaded coupling ring, and square flange receptacle.
- Available also in combination of environmentally sealed and cable clamp construction.
- Two different insert configurations.

CIRCULAR ENVIRONMENTAL CONNECTORS

Design Features

① **Molded One-Piece Polymer Contact Retention Disc**—Fewer connector parts—Greater reliability

② **Fluorosilicone Fluid Resistant Seal Material**—Allows one connector to meet stringent fluid requirements of various specifications.

③ **Closed Entry Socket Insert and Contacts**—Eliminates mis-mating due to bent pins—System reliability

④ **Bayonet Coupling System**—Quick mating of connectors—Lowers operating costs

⑤ **5 Key Shell Polarization**—Assures positive contact alignment prior to mating

⑥ **Interfacial Mating Seal**—Maintains system integrity

⑦ **Static Peripheral Shell Seal**—Maintains system integrity

⑧ **Monoblock Construction—Inserts Bonded to Shells**—Helps to assure complete connector reliability

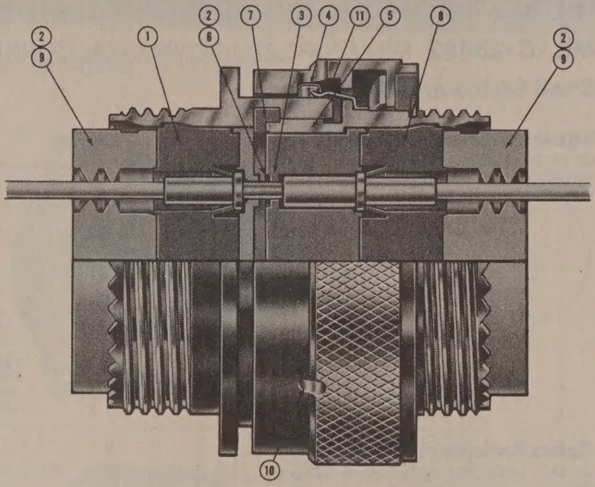
⑨ **Self-Sealing Rear Grommets**—Assures environmental sealing with or without rear hardware

⑩ **Visual Mating Indicators**—Quick indication that connector is fully mated

11 **Shell to Shell Grounding Fingers**

12 **Accepts standard MIL-C-38999 hardware**

13 **Durable Conductive Shell Finish**

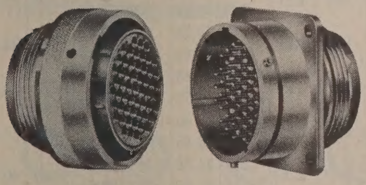


418 Series (Series II, Low Silhouette shown here.)

User Benefits

- 62% increased dielectric separation.
- Reduced number of connector parts, up to 128 decreases failure modes while increasing reliability.
- Resistant to fuels, oils, and cleaning solutions for longer life.
- Mis-mating due to bent pins eliminated by hard front closed entry socket insert with a hooded tined, prod-proof socket contact.
- Intermateable and intermountable with existing circuitry reducing replacement and upgrading costs.

MIL-C-26482/Series 2
118 Series



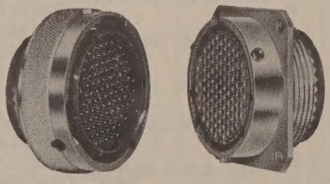
The Amphenol Connector 118 Series is manufactured in accordance with and fully qualified to MIL-C-83723 Series I, MIL-C-0026482 Series 2 and MIL-C-26482 Series 2.

This Series is manufactured to the highest Connector Class within these military specifications and can be supplied in accordance with the following classes:

- MIL-C-83723 Series I
  Class R-200°C fluid resistant, conductive finish, superseded by MIL-C-26482 Series 2.
- MIL-C-26482
  Class E-200°C non-fluid resistant, conductive finish has been superseded by Class L.
  Class L-200°C fluid resistant, conductive finish

The 118 Series Connectors are marked with both the MIL-C-83723 and MIL-C-26482 military part numbers to avoid logistic problems and simplify your stocking procedures.

MIL-C-38999/Series I and II
418 Series



The Amphenol Connector 418 Series is manufactured in accordance with and fully qualified to MIL-C-38999 Series I and Series II.

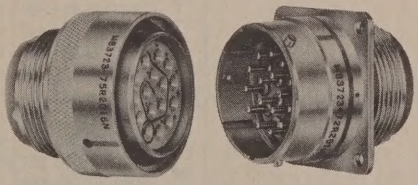
This Series is manufactured to the highest Connector Class within this military specification and can be supplied in accordance with the following classes:

- Class E—Environment Resisting
- Class T—Environment Resisting without Rear Accessories

They are available in the following finishes:

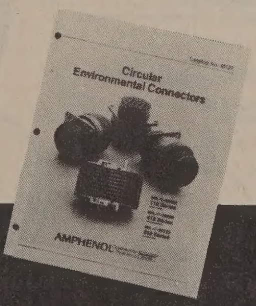
- Finish F—Electroless Nickel (-65°C to +200°C)
- Finish B—Olive Drab Cadmium over Nickel (-65°C to +150°C)

MIL-C-83723/Series III
518 Series



The Amphenol Connector 518 Series is manufactured in accordance with and fully qualified to MIL-C-83723 Series III.

This Series is manufactured to the highest Connector Class within this military specification and can be supplied in Class R. Class R is fluid resistant with conductive shell operates in the temperature range of -65°C to +200°C. Available with bayonet or threaded coupling systems.



For complete information ask for Circular Environmental Connectors Catalog M-123

Ordering Information

Military Standard Part Number for MIL-C-26482 Connectors

MIL-C-26482 connectors can be ordered by the Military part numbers. The connector part number is per the example.

MS3470 L22-55PN

SPECIFICATION NUMBER
- MS3470—Receptacle, narrow flange mount
- MS3471—Receptacle Cable Connecting
- MS3474—Receptacle, rear mounting jam nut
- MS3475—RFI Plug
- MS3476—Plug, straight

CONNECTOR CLASS
- E—Order Class L
- L—Fluid Resistant, 200°C, conductive finish

Amphenol Class L Connector meets or exceeds all Requirements of Class E.

SHELL SIZE
8 10 12 14 16 18 20 22 24

INSERT ARRANGEMENT
See configuration and specification for every insert number.

CONTACT TYPE

Accessory Information

Mounting

Two receptacle shell styles are available for panel mounting. See the applicable MS drawings for mounting hole dimensions. The square flange receptacle, sizes 8 thru 22, is fastened to the panel with four size #4-40 machine screws. The 24 size shell is fastened with #6-32 machine screws. The jam nut receptacle mounts into a "D" hole panel cutout and is fastened to the panel with a jam nut.

Ordering Information

Military Standard Part Number For MIL-C-38999 Connectors

SERIES I (SCOOP-PROOF)

MIL-C-38999, Series I connectors can be ordered by the military part number. The connector part number is per the example:

MS 27466 T 15 F 18 P A

SPECIFICATION NUMBER
MS 27466 Wall Mounting Receptacle
MS 27467 Plug, Grounded
MS 27468 Jam Nut Receptacle
MS 27496 Box Mounting Receptacle
MS 27505 Box Mounting Receptacle (Back)
MS 27656 Wall Mounting Receptacle (Back)

CONNECTOR CLASS
E Environment Resisting
T Environment Resisting (Less Rear Accessory)

SHELL SIZE
9 11 13 15 17 19 21 23 25

ALTERNATE POSITION
A, B, C, D. (No Suffix for Normal)

CONTACT TYPE
P-Pin Contact
S-Socket Contact

INSERT ARRANGEMENT
See configuration and specification for every insert number

SHELL FINISH
F-Electroless Nickel
B-Olive Drab Cadmium over Nickel

SERIES II (LOW SILHOUETTE)

MIL-C-38999, Series II connectors can be ordered by the military part number. The connector part number is per the example:

MS 27472 T 24 F 61 P A

SPECIFICATION NUMBER
MS 27472 Wall Mounting Receptacle
MS 27473 Plug, Straight
MS 27474 Jam Nut Receptacle
MS 27484 Plug, Grounded
MS 27497 Wall Mounting Receptacle (Back)
MS 27499 Box Mounting Receptacle
MS 27508 Box Mounting Receptacle (Back)
MS 27513 Box Mounting Receptacle (with full Grommet)

CONNECTOR CLASS
E Environment Resisting
T Environment Resisting (Less Rear Accessory)

ALTERNATE POSITION
A, B, C, D. (No Suffix for Normal)

CONTACT TYPE
P-Pin Contact
S-Socket Contact

INSERT ARRANGEMENT
See configuration and specification for every insert number

SHELL FINISH
F-Electroless Nickel
B-Olive Drab Cadmium over Nickel

SHELL SIZE
8 10 12 14 16 18 20 22 24

How to Order 418 Series Connectors

To order the specific 418 Series Connectors you want, the connector part number is per the example:

418 - 1 0 T 15 - 18 P A (101)

SERIES DESIGNATION

CONNECTOR SERIES
1-Series I (Long/Scoop-Proof)
2-Series II (Short/Low Silhouette)

SHELL STYLE
0-Wall Mounting Receptacle
2-Box Mounting Receptacle
3-Jam Nut Receptacle
5-Box Mounting Receptacle) (Back Panel)
6- Plug Straight
7-Wall Mounting Receptacle (Back Panel)
8-Plug Grounded

CONNECTOR CLASS
E-Environmental Resisting
T-Environment Resisting (Less Rear Accessory)
R-Environment Resisting with Full Grommet Seal (Box Mounting Receptacle Only)

DEVIATIONS:
(101) Connector Less Contacts
(110) Olive Drab Cadmium Over Nickel Finish

ALTERNATE POSITION
A, B, C, D. (No Suffix for Normal)

CONTACT TYPE
P-Pin Contacts
S-Socket Contacts

INSERT ARRANGEMENTS
See Configuration and Specification for Every Insert Number

SHELL SIZE
SERIES I
9 11 13 15 17 19 21 23 25
SERIES II
8 10 12 14 16 18 20 22 24

Accessory Information (SEE 118 SERIES FOR BACK SHELLS AND RELIEF CLAMPS)

Mounting

Two receptacle shell styles are available for panel mounting. See the applicable MS drawings for mounting hole dimensions. The square flange receptacle, sizes 8 thru 22, is fastened to the panel with four size #4-40 machine screws. The 24 size shell is fastened to the panel with #6-32 machine screws. The jam nut receptacle mounts into a "D" hole panel cutout and is fastened to the panel with a jam nut.

48 Series

High Reliability, Miniature Connector

Available in 30 insert arrangements — size 8 thru 24: 48 Series are available in square flange and jam nut type receptacles and straight plug in both bayonet and threaded type coupling power and shielded contacts are available. The 48 Series is an environmental connector fully qualified to Military specification MIL-C-26500 Revision "E".

69 Series

Poke-Home®, Environmental Connectors

This line offers 32 insert configurations, and shell styles, are square flange, cable receptacle and straight plug. 69 Series utilize poke-home crimp type contacts and are interchangeable and intermatable with standard "MS" types.

"MS" Environmental Connectors

Available in 43 insert arrangements with solder type contacts — shell sizes 8S thru 36: This series comes in square flange and cable receptacles and straight plug type shell styles. Connectors in this series are qualified to Military specification MIL-C-5015 Revision "F".

89 Series

Submersion-proof Connectors

General purpose, heavy duty connectors: A total of 70 insert arrangements are available for shell sizes 22, 28 and 32. 89 Series are available in panel and cable receptacles and straight plug type shell styles. Whenever the application requires the connector to be submerged in mud, ice or water, the 89 Series is specified because of its rugged and reliable waterproof capability.

115 Series

Subminiature Connectors

Includes three types of connectors: One group consists of rugged lightweight blade type pin connectors which allow easy mating of the 50 or 100 contact size arrangements. The second group consists of a vibration resistant line of shear type missile connectors which disengage upon firing. The third comes with fuel resistant face seals and is available with stainless steel shells capable of meeting temperatures up to 1000°F. They can also be hermetically sealed and are vibration and corrosion resistant.

164 Series

Waterproof Audio Connectors

Available in 5 and 10 contact configurations in panel and plug type shell styles: The 5 and 10 contact configurations conform to the latest revision of MIL-C-55116 (EL) and MIL-C-10544 respectively. The 164 Series is used on military communications equipment and commercial applications where a completely waterproof audio type connector is required.

182 Series

Hermetic Miniature "MS" Type

Available in 18 insert configurations: These connectors are available in a solder flange and threaded backshell receptacle only. 182 Series can be specified where a highly reliable miniature hermetic connector is required. These recptacles mate with the standard 165 Series plugs.

217 Series

Miniature Environment Resistant

A series of rectangular connectors that are qualified to MIL-C-26518: They fulfill the need for an environmentally protected high performance line of connectors without sacrificing weight and area. The resilient inserts used are resistant to fluid and high temperatures. 48 Series Poke-Home contacts are used in the nine insert arrangements.

246 Series

Environment Resistant Connectors

MIL-C-5015 type low temperature environmental connectors: These are available in 36 insert configurations and shell styles, square flange receptacle and straight plug. These connectors utilize a damage resistant contact retention system and employ Poke-Home contacts. The 246 Series connectors are interchangeable and intermountable with all other MIL-C-5015 type connectors.

348 Series

High Density Connector

Available in 28 insert arrangements, size 8 thru 24: This product is offered in the square flange, straight plug, cable receptacle and jam nut type shell styles. Power and shielded contacts are available. The 348 Series is an environmental type connector and is qualified to Military specification MIL-C-81511 Revision "C."

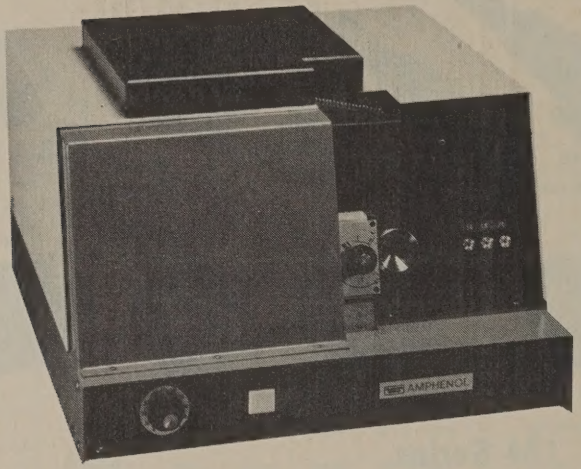
SEMI-AUTOMATIC CRIMPING MACHINES



Amphenol® Vibratory-Feed Crimping Machine for various machined contacts

The fast, easy way to get up to 900 eight-indent crimped terminations per hour.

Amphenol vibratory-feed crimping machines are designed for crimping loose screw-machine contacts used in Amphenol 17/220/221/223 rack-and-panel connectors and Amphenol 118/418/518 circular environmental connectors. Machine handles wire in the 12-30 AWG ranges.

Vibratory-feed mechanism automatically arranges contacts in correct position and feeds them to built-in crimper. Dial knob controls contact flow for delivery at desired production rate. Operator depresses foot pedal to actuate pneumatic crimper.

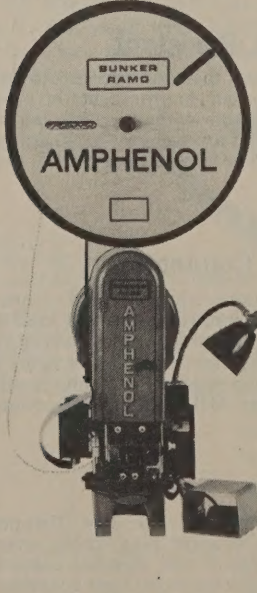
Optional front-end wire stripper accommodates various wire gauges.

Amphenol vibratory-feed crimping machines can be leased or purchased outright. Amphenol field service engineers will supervise installations and train operators.

SPECIFICATIONS

Dimensions: 16 in. W x 10½ in. H x 16 in. L.
Weight: 51 lbs.
Electrical Requirements: 117 VAC.
Air Pressure Requirements: 80-100 psi.
Production Rate: 630 to 900 terminations per hour (depending on operator speed).
Contact Capacity: 500.

Semi-Automatic Reel-Fed Crimping Machine



For various contacts, this crimping machine is similar to those used to crimp wire terminals. It comes with an applicator designed to crimp stamped and formed contacts on a carrier strip. Capable of operating at 1000-1500 terminations per hour, the press firmly attaches contacts onto pre-stripped wire. Use of the reel-fed press and applicator permits even greater economy from low cost stamped and formed contacts.

STRIPPER/CRIMPER MACHINE

Same basic crimping machine can also be provided with stripper attachment to strip and crimp contacts at same speed.

SPECIFICATIONS

Crimping (Stripping) Speed: 1000-1500 termination per hour depending on contact and operator.
Contacts: Stamped and formed contacts of the 17-, 32-, 44-, 220-, and 225- Series.
Wire Sizes: Depending on contacts used, 12-30 AWG.
Connections Required: 110 VAC standard 3 wire grounded supply.
Dimensions: 18″ wide x 24″ deep x 30″ high (with reel 54″ high).
Weight: Approximately 200 lbs.

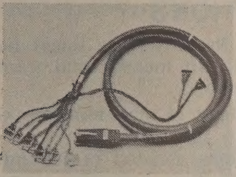
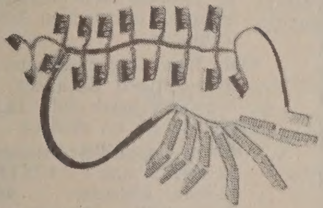
INTERCONNECTION SYSTEMS

Multi-Conductor Cables Commercial/Military



These Amphenol multiconductor cables meet rigidly controlled quality standards at every stage of production. Just before shipment, each cable is again completely tested on custom-modified automatic inspection equipment.

Harness Assembly



We have years of experience in harness manufacturing. One result has been a large accumulation of harness know-how. Many customers come to us for redesign of point-to-point wiring in engineering prototypes; others for high volume production of complex harness systems.

When advanced programs require optimum-reliability intra-unit connections, many defense contractors turn to us for high environmental harness systems.

Electromechanical Assemblies

We can help keep you on schedule and your costs in line. Temporary plant overloads not only delay shipments but also tie up valuable time and material in progress. Extended overtime and decreased efficiency rapidly begin to cut into profits. One way to avoid these problems and stay on schedule is by subcontracting the over-capacity production.

We can quickly absorb short-term plant overloads usually at a price less than in-house cost.

Working closely with a customer's engineering laboratory, our production design people can competently turn engineering models into practical production realities.

Our design recommendations on chassis and printed circuit board layout, harness and cable configurations, molded plastic alternates for costly hardware, and connector and termination approaches have saved many manufacturers expensive trial and error prototype production and redesign.

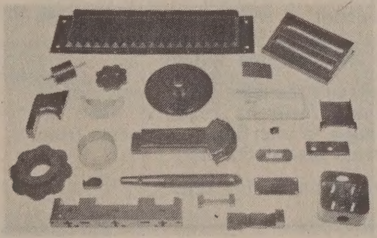
POLYSTYRENE • POLYPROPYLENE • POLYCARBONATES • ACETALS • POLY-VINYL-CHLORIDE • POLYETHELENE • NYLONS • ACRILONITRILE-BUTADIENE-STYRENE • NEOPRENE • Others



SEMI-AUTOMATIC WIRE-WRAPPING; AUTOMATIC TEST

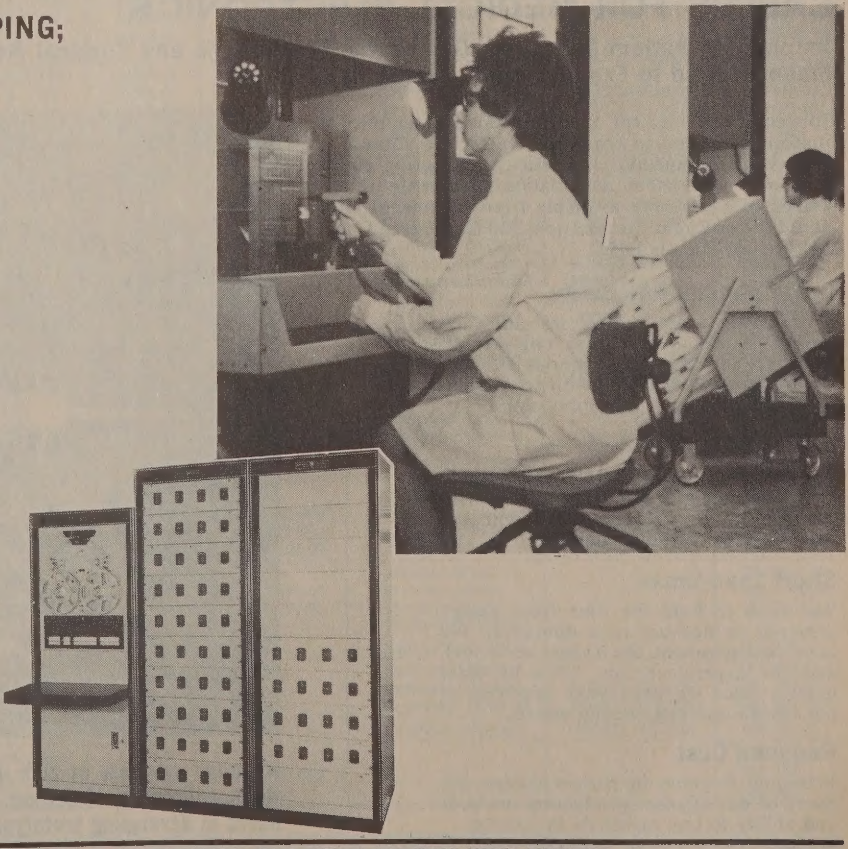
We can handle your complete back-panel wire-wrapping including all inventories right up to and including final inspection. You just have to bolt it in. And you can be sure of a completely tested, 100%-error-free back panel.

All your back panels can be tested with an Omnitester 900 Wiring Analyzer. This unit, pictured here in the center, has forward scan capabilities to determine, for example, whether a missing wire went to some other point. It then identifies that point.

The unit further tests for continuity resistance, insulation resistance, DC hipot, and features programmable dwell time.

All this at a price less than in-house fabrication. No costly inventories, no capital tied to costly equipment. You can furnish the back panels or we can supply our own.

Delivery? Just 2 to 8 weeks, depending on the job and material availability. For more details just call your nearest Amphenol sales office or contact us direct. Amphenol Division, Bunker Ramo Corp. 900 Commerce Drive, Oak Brook, IL 60521.



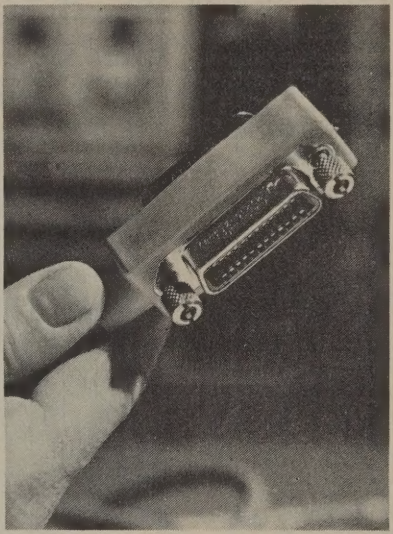
The right idea at the right time / **AMPHENOL®** / BUNKER RAMO®

IEEE STD 488-1975 DIGITAL INTERFACE FOR PROGRAMMABLE INSTRUMENTATION

The Amphenol® 488 Interface Bus Cable Assembly serves systems utilizing a byte-serial, bit-parallel means to transfer data among a group of instruments and systems components. This product is designed as an interdevice for system components in relatively close proximity that are able to communicate over a contiguous party-line bus system.

BENEFITS

- Eliminates the troublesome aspects of assembling an automatic instrumentation system, and provides that critical link between system components.
- Interconnect up to 15 devices (over total distance of 60 feet).
- Provides a convenient method of interconnecting a wide range of products from any number of manufacturers, into an integrated system.
- Eliminates the need for extensive jerry-rigging previously required when attempting to interface components from different manufacturers.
- Minimum assembly time.



Three standard cable lengths, 1, 2, and 4 meter, are available off-the-shelf. Other lengths are available on special order.

The Amphenol 488 Interface Bus Cable Assembly uses 24 conductor cable terminated to 57 Series Micro-Ribbon® Connectors.

SPECIFICATIONS

Interconnection Path: Star or linear bus network up to 20 meters total transmission path length.

Number of Devices: 15 maximum on one continuous bus.

Active Signal Lines: A total of 16 composed of 8 data lines, 3 transfer control lines, and 5 bus management message lines.

Message Transfer Scheme: Byte-serial, bit parallel asynchronous data transfer using an interlocked 3-wire handshake technique.

Data Rate: One megabyte/sec. maximum over limited distances; 250-500 kilobytes/sec. over full transmission path (dependent on device).

Address Capability: Primary addresses — 31 TALK and 31 LISTEN; Secondary (2-byte) addresses — 961 TALK and 961 LISTEN. Maximum of 1 TALKER and up to 14 LISTENERS at one time.

Control Shift: Although systems can have more than one controller, only one can be active at a time. Currently active controller can pass control to another, but only the designated system controller can assume control over others.

Interface Circuits: Driver and receiver circuits are TTL compatible.

CABLES FOR MEDICAL ELECTRONICS

Amphenol® Patient Cables for Diagnostic, Therapeutic and Surgical Needs Manufactured to Exacting High Standards of Quality

Connectorized medical interface cable assemblies — custom designed to transmit electronic signals to diagnostic, therapeutic and patient monitoring equipment without system degradation or loss — are described in a brochure available from Amphenol Division, Bunker Ramo Corporation, 900 Commerce Drive, Oak Brook, Illinois 60521.

Custom-made Reliability

Since patient cables must transmit biomedical signals faithfully for long periods, materials and assembly methods are chosen for proven reliability with strict quality control on every assembly step.

Aesthetic Design

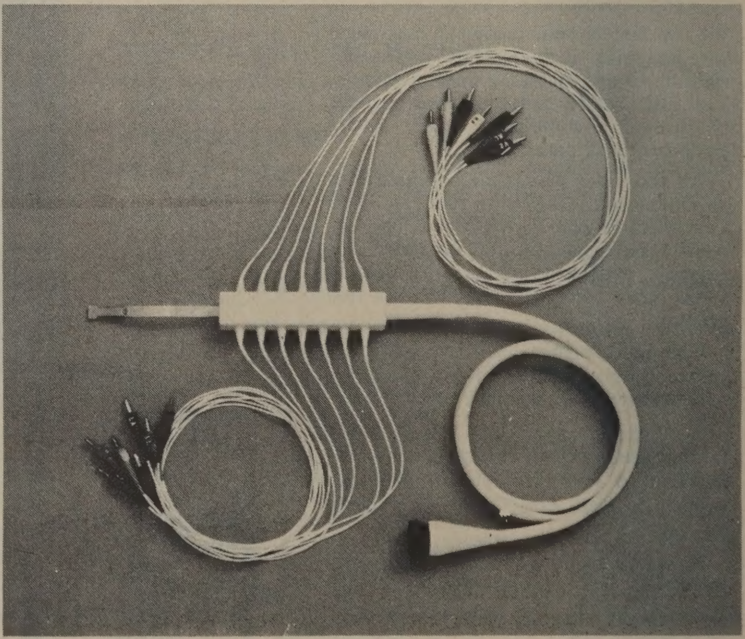
The components, such as junction boxes, are streamlined to give them an unobtrusive look and to blend in well with the overall design of your equipment.

Short Lead-times

We strive to hold the time from design approval to delivery to a minimum. We have the equipment, the trained personnel, and the experience that helps us react quickly once we have your approval of our design and engineering efforts.

Reduced Cost

Economy is yours in patient cables, because of our efficient production methods and ability to buy materials in volume.



We offer a variety of high quality medical interface cables for diagnostic therapeutic surgical devices. We are ready to assist you with your specific needs in developing prototypes for your evaluation.

SMA SERIES COAXIAL CONNECTORS

SMA's are 50 ohm semi-precision sub-miniature (3mm), high-frequency (0-18 GHz) connectors with ¼-36 threaded coupling. They meet all MIL-C-39012 requirements for SMA connectors and are available in stainless steel or beryllium copper.

SMA TOOLS

Tool Kit contains recommended jacket and dielectric trim tools for precise cable preparation required to obtain the electrical performance specified. Complete assembly instructions are included.

Tool Kit with jacket and dielectric trim tools (less Taper Tool).	901-2500
Taper Tool for .141(3.5mm) semi-rigid center conductor	901-2400
Torque Tool for 901-470 stripline launcher	901-2450

CABLE ASSEMBLIES

Custom semi-precision cable assemblies are available with .141(3.5mm) and .085(2.2mm) dia. semi-rigid cable fitted with SMA connectors;contact factory with your specifications.

The right idea at the right time / **AMPHENOL®** / BUNKER RAMO®

BNC SERIES COAXIAL CONNECTORS

Miniature in size and light in weight, the BNC is characterized by its two-stud quick disconnect bayonet lock coupling arrangement. They function well to 11 GHz and are available in a wide selection of configurations for all popular cables.

☐ To order without resistor, add -1 to part number; to order with resistor, add resistor value to part number. ½Watt 5% resistor values (ohms) stocked: 47, 51, 68, 75, 82, 91, 100, 120, 130, 150, 180, 240, 270, 300, 470, 510, 560, 680, 750, 820, 1000, 1500, 3900, 4700, 10000, 100000, 150000.

The right idea at the right time / AMPHENOL® / BUNKER RAMO®

N SERIES COAXIAL CONNECTORS

Series N connectors are medium size weatherproof, threaded coupling units with a frequency limit of 11 GHz. They have a peak voltage rating of 1500 volts and are impedance matched to either 50 or 70 ohm cables as listed. Cable affixment methods include crimp, clamp and solder-type.

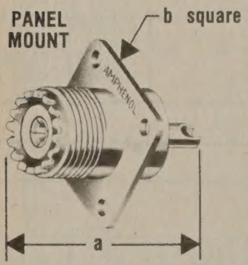
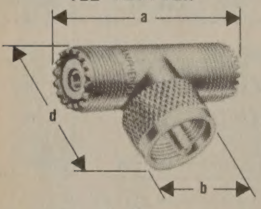
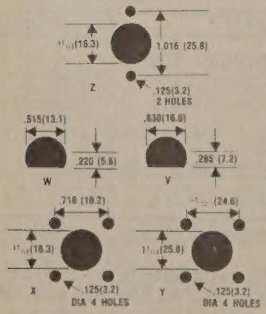
PANEL MOUNT



TEE ADAPTER





Threaded coupling UHF series are low-cost, general purpose connectors for lower frequency applications up to 500 MHz. Both threaded and push-on mating are available with Braid-solder, solderless clamp, hex crimp and the new FCP style cable affixment which requires no special tools.

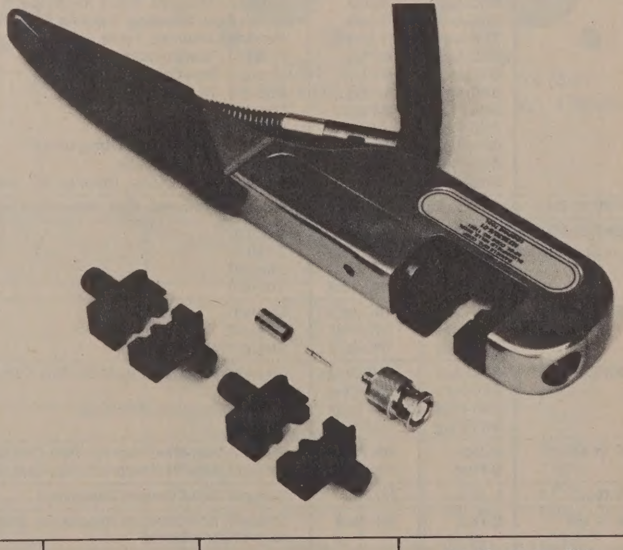
TOOLS

TWIN-HEX CRIMP TOOL SYSTEM

APPLICATION NOTES



Amphenol has introduced a new concept in cable-connector assembly tools, consisting of a universal tool frame with interchangeable crimping dies selected according to the cable and connector being assembled. A single Twin-Hex tool and one set of dies will crimp the outer ferrule to the cable braid and the center contact to the center conductor of the cable. With a few additional die sets, a wide variety of diameters can be crimped.

Die sets are easily interchanged. They are designed so there is no confusion regarding proper orientation. For permanent installation, a set of roll pins is included with each die set. Complete instructions are supplied.

HOW TO ORDER

Twin-Hex tool frame 227-944 is purchased separately. Select the die set required for your application from the table below and order by Amphenol Die Set number. (Hex size dimensions are listed for reference only.) Die sets are stamped with the Military number on one side and the Cavity designation on the reverse side. (Cavity A crimps outer conductor and Cavity B crimps inner conductor.)

RG-/ Cable Group	Connector Series	Cavity	Amphenol Die Set Number	Military Die Set Number	Hex Size Across Flats Cavity A (Outer)	Hex Size Across Flats Cavity B (Inner)
5, 6, 21, 143, 212, 222, 304	N	A & B	227-1221-29	M22520/5-29	.324	.100

ADAPTERS BETWEEN SERIES

Many different combinations of between series adapters are available. They are of non-constant impedance, but designed so that inherent electrical discontinuities are minimal. We describe an adapter by referring to its own construction. We indicate the specific series involved and the mating configuration of each end of the adapter . . . BNC jack to N plug, for instance. One end of the adapter is a BNC jack. The other end is an N plug. The fact that it joins a BNC plug and N jack is understood.

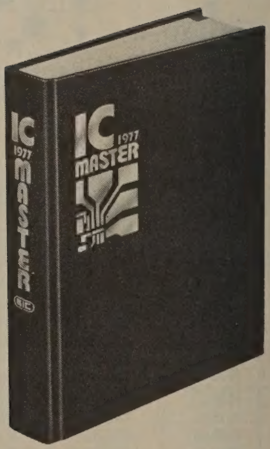
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS



IC 1977 MASTER
IC 1977 MASTER

eem/ELECTRONIC ENGINEERS MASTER CATALOG —

The "blue-ribbon" catalog/directory that has become "the standard of the industry" for electronic engineers, buyers and specifiers.

ELECTRONIC ENGINEERS CATALOGUE —

The new catalogue/directory of electronic products available to and from Western Europe and the United Kingdom. Designed especially for the European electronics engineer.

IC MASTER AND THE UPDATES —

The only complete single-source directory including all IC devices manufactured in the United States. Updated three times yearly with accumulative supplements.

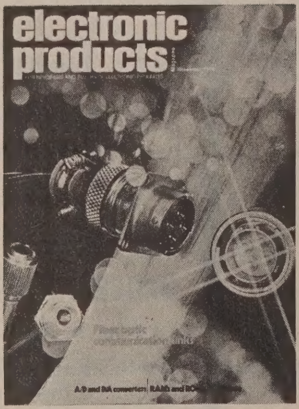
THE MASTER CATALOG
'78
THE ELECTRONIC DISTRIBUTORS MASTER CATALOG
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS



electronic products

ELECTRONIC DISTRIBUTORS MASTER CATALOG —

(Formerly O-T-S Catalog) The only national catalog designed exclusively for distributors and their customers featuring electronic parts, instruments and equipment.

ELECTRONIC PRODUCTS MAGAZINE —

The products magazine . . . A 100% product-oriented magazine including hundreds of new products and special features every month.

eem FILE SYSTEM —

The only filing system designed specially for the electronics engineer. Instant retrieval and organization of data sheets and catalogs.

UNITED COST AND PRICING SERVICES —

The electronic distributors' proven method of being up to the minute on his cost and selling prices.

UTP CUSTOM CATALOGS —

The Cadillac of individualized catalogs for the electronic parts distributor, featuring solely his lines and services.

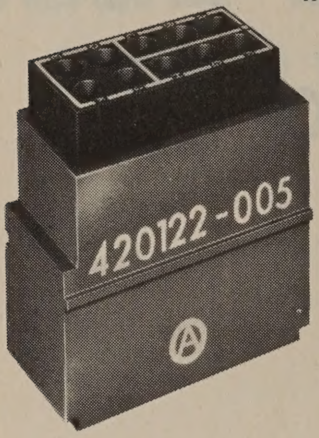
TERMINAL JUNCTION SYSTEM MODULES (MIL-T-81714)

Appleton ELECTRIC COMPANY *electronics division*

DEPT. EM / 1701 WELLINGTON AVENUE / CHICAGO, ILLINOIS 60657 / (312) 281-6400

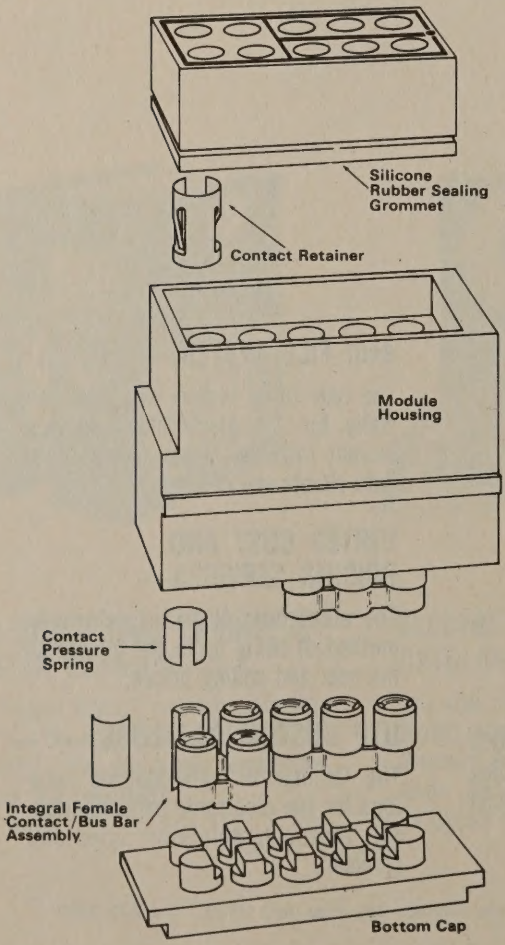
Terminal Junction System Modules — QPL Approved in accordance with MIL-T-81714 Contacts are approved to MIL-C-39029. Appleton terminal junction system modules are available in feedback and feedthru types, sizes 16, 20, and 22, with a full selection of bussing arrangements. Several mounting track variations are also available. An Appleton exclusive, total peripheral pin-to-socket surface contact and one-piece contact/bus design, provides superior electrical characteristics.



INSIDE THE APPLETON TERMINAL JUNCTION MODULE

The most important element in a terminal junction system is the **terminal junction module.** It is here that environmental conditions are overcome, margins for error are reduced, versatility is the highest, and the most important, reliability is, above all, achieved.

To attain these goals, the Appleton terminal junction module embodies several outstanding advantages. The exploded view below shows you how these advantages work.



Silicone Rubber Sealing Grommet
Contact Retainer
Module Housing
Contact Pressure Spring
Integral Female Contact/Bus Bar Assembly
Bottom Cap

SPECIFICATIONS FOR APPLETON TERMINAL JUNCTION SYSTEMS

Insulators: Glass-filled, flame-retardant thermoset plastic. **Contacts:** Copper alloy, plated with gold per MIL-G-45204. **Wire-Sealing Grommets:** Silicone rubber. **Tracks:** Aluminum alloy, anodized per MIL-A-8625. **Hardware:** Non-magnetic stainless steel passivated. **Sealing Plugs:** Teflon®. **Applicable Specifications:** Appleton Terminal Junction Modules, Splices, and Track Assemblies meet or exceed the electrical, mechanical, and environmental requirements of MIL-T-81714. **Contact Resistance:** Appleton's unique peripheral surface contacts exhibit millivolt-drop readings consistently BELOW the range specified in MIL-T-81714. **Reproducibility:** Appleton contacts are made from uniform half-cylinders, gold-plated after forming, and joined by a pressure spring, they are remarkably free of performance variations. From contact to contact, and from module to module, critical performance characteristics are highly reproducible.

WIRE RANGE ACCOMMODATIONS

Module Size	Conductor Size, AWG	Module Size	Conductor Size, AWG
22	26 24 22	16	20 18 16
20	24 22 20	12	14 12

CLASSIFICATION

Class A 150°C max. Environmental type, limited fluid resistance.
Class B 175°C max. Environmental type, extended fluid resistance.
Class C 200°C max. Environmental type, limited fluid resistance.

ORDERING INFORMATION

To order an Appleton Terminal Junction System:

1. Choose the basic size: 20, 22, etc.
2. Choose the class: A, B, C.
3. Choose the bussing arrangement in relationship to the class designation.
4. For example: Size 20 module, Class C, all common bus; order, 420120-101 (reference M81714/2-CA1).

This new series of terminal junction modules feature internal resistors, diodes, and capacitors with no increase in size over standard MIL-T-81714 terminal junctions. The specific modules are used for balancing unmatched impedance values incurred when using various electronic components.

These terminal junction modules also feature a rigid wire support which allows severe bending of wires without opening wire seals of the silicone rubber grommet. All components are welded to the field-proven socket contact design developed for the MIL approved modules.

These modules can be mounted in the standard feedback track (see Appleton Terminal Junction Module page). Listed below are several available schematic diagrams and their respective value designations.

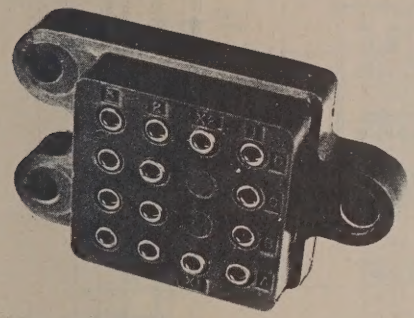
RELAY SOCKETS (MIL-R-6106)

DEPT. EM / 1701 WELLINGTON AVENUE / CHICAGO, ILLINOIS 60657 / (312) 281-6400

Appleton relay sockets for MIL-R-6106 relays are available in many configurations with a full range of standard styles with fixed and removable closed-entry socket contacts. The low profile designs can be mounted from the top or bottom of the panel. Appleton relay sockets provide numerous variations of polarization; and possible terminal styles include: crimp removable, solder pot, pierced tab, turret lug, dip solder, and wire wrap.



APPLICATION

Appleton relay sockets can be used in conjunction with airbourne and shipboard equipment, plus any and all industrial electronic equipment utilizing MIL-R-6106 electro-mechanical relays and commercial relays having the same interface design.

APPLETON FEATURES

- Low Profile Design
- Closed Entry Socket Contacts
- Bottom and Top Mounting Versatility
- Positive Polarization
- Unique .200 Grid Pattern
- Plus a wide variety of contact termination possibilities: solder pot, pierced tab, turret lug, dip solder, wire wrap.

PERFORMANCE

Appleton connector assemblies meet the requirements of NAVORD 3020237.

MATERIALS

Insulators: Dialyl Phthalate Type SDG-F Per MIL-M-14 color Green.
Contacts: Copper Alloy — Gold Plated Per MIL-G-45204
Contact Hood: Stainless Steel 300 Series
"C" Ring — Contact Retainer: Stainless Steel Per MIL-S-7720
Mounting Hardware:
Stud: Stainless Steel per MIL-S-7720
Spacer: Stainless Steel per MIL-S-7720
Washer: Stainless Steel Per MIL-S-7720
Hex Nut: MS 21043-06

Appleton *electronics division*
ELECTRIC COMPANY

DEPT. EM / 1701 WELLINGTON AVENUE / CHICAGO, ILLINOIS 60657 / (312) 281-6400

MATERIALS

- Attractive tan housing is thermoset material in accordance with MIL-M-14, Type SDG-F.
- Fixed, closed-entry type socket contacts are made of copper alloy and gold plated per MIL-G-45204.
- Mounting hardware is available; to order, change first digit after dash to "8." For example, without hardware, 451116-080; with hardware, 451116-880.

451116-131	Size 16 Contact, Mating End, Crimp End to Accommodate 16-18-20 AWG	422046-900
451116-132	Size 16 Contact, Mating End, Crimp End to Accommodate 20-22-24 AWG	422047-900

MATERIALS

- Attractive light green housing is thermoset molded material in accordance with MIL-M-14, Type SDG-F.
- Red sealing grommet is made of silicone rubber.
- Closed entry, crimp type sockets are copper alloy gold plated per MIL-G-45204.
- Stud material and mounting hardware are made of corrosion resistant steel.
- All hardware is supplied in separate bag within socket package.
- A MS3191 crimp tool should be used to terminate pin contacts to their respective wire sizes.
- NAS1664-16 and -12 tools should be used for inserting and removing wired contacts.
- Contacts are supplied in separate bag within socket package (see table).

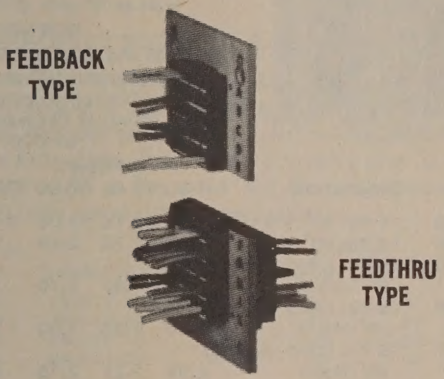
PROGRAMMING TERMINAL BLOCKS

DEPT. EM / 1701 WELLINGTON AVENUE / CHICAGO, ILLINOIS 60657 / (312) 281-6400

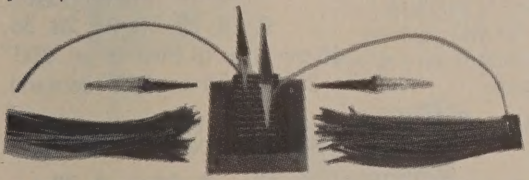
Appleton programming terminal blocks offer a complete selection of bussed or individual circuits. Choose from feedback or feedthru types in sizes 16 and 20 (color coded). The unique one-piece socket contact design provides uninterrupted circuit through all bussed positions. Appleton individual terminal blocks meet your needs for interconnection, bussing, and signal distribution.



FEEDBACK TYPE
FEEDTHRU TYPE

TERMINAL BLOCKS

Appleton Programming Terminal Blocks are offered in Feedthru and Feedback types to provide electrical continuity program bussing for input/output as required for your application. Size 16 blocks (color coded blue and rated at 13 amps) accept 16, 18, and 20 AWG stranded wire, and provide up to 15 contacts per square inch. Size 20 blocks (color coded red, rated at 7.5 amps) accept 20, 22, and 24 AWG stranded wire, and provide up to 21 contacts per square inch. Appleton Programming Terminal Blocks are available for plate mounting; call or write Appleton's quality engineering staff for assistance in order to meet your various application problems. They will follow your designs or develop mounting plates for your particular situation.



EASY INSERTION/REMOVAL OF PIN CONTACTS

Standard plastic tool permits simple insertion or removal of pin contacts for disassembly or programming circuit changes without disturbing other program functions. Highly reliable crimp wire termination pin contacts are used. Crimping is accomplished with standard industry-accepted manual or semi-automatic tools.

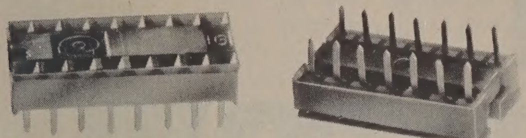
*Tin plated. Gold plating also available.
See Catalog 5000.

Sockets with collet type pins available from 2 to 40 pins.
Consult factory.

Jumpers, Headers

The product listings shown here are abbreviated. Complete data, dimensions and material specifications are available in various Aries catalogs, which have been noted with each listing. Our line of DIP packaging accessories is extremely broad and we urge you to contact the factory or our sales representative in your area. Your inquiries will receive our prompt attention.



LO-PROFILE SOCKETS 8 to 40 Pins

Extremely low profile socket (.150 nominal height). Side and end stackable on .100 grid (closed entry top). Bottom sealed to prevent solder wicking or flux contamination. Bifurcated contacts grip smooth flat edges of IC's. Body of S.E.O. rated thermoplastic. .020 high stand off for easy cleaning.

No. of Pins	Catalog No.	Prices

Coaxial connectors? Automatic wrote the books!

Automatic has earned its leadership role in the design and production of special coaxial connectors and RF devices. Perhaps the broadest line in the industry. A learning experience of 40 years. A completely integrated capability from prototype to volume manufacturing capacity. A reputation for quality that sets the standards for commercial, industrial and mil-spec application.

Make a new connection for coaxial connectors. Make it Automatic. For your next requirement, standard or special design, check Automatic for availability and prices. They're best sellers

AUTOMATIC CONNECTOR, INC.
400 Moreland Road
Commack, New York 11725

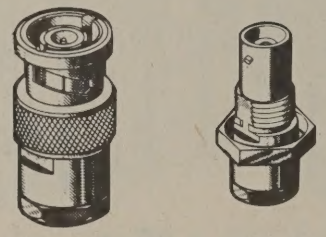
A subsidiary of **ASU** *Industries, Inc.*

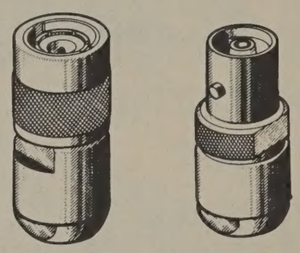
AUTOMATIC CONNECTOR, INC.

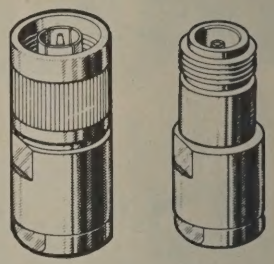
TYPE BNC
These Connectors are small and lightweight, equipped with a bayonet lock coupling for fast connection and disconnection. They are of constant impedance with a nominal value of 50 ohms and introduce little discontinuity in 50 ohm coaxial circuits. BNC's are fully weatherproofed, and rated for use where maximum voltage does not exceed 500 volts.

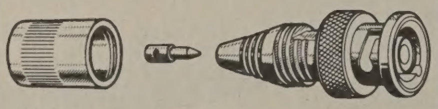
TYPE C
C series connectors are recommended where fast connection and disconnection by means of a bayonet-lock coupling is required. For these purposes, this series which has improved mechanical and electrical characteristics is ideal. They are of constant impedance and may be used with minimum mismatch in 50 ohm circuits employing such medium size cables as RG-213, 214/U etc.

TYPE N
Recommended for use where a medium size connector with screw type coupling is desired. They are a general purpose connector of constant impedance and may be used with minimum mismatch in 50 ohm circuits. These connectors have a maximum peak rating of 1500 volts and a practical frequency limit of 10,000 mc. They are also gasketed for weatherproof operation.

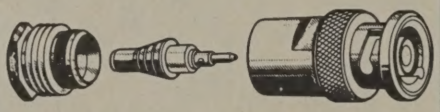


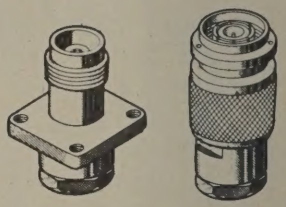






Typical captive contact, Wedge-Lock construction.





WEDGE-EZE^{T.M.} TYPE BNC
The WEDGE-EZE connectors provide reliability, efficiency, and economy far exceeding that of ordinary "crimp" type connectors. WEDGE-EZE connectors are field serviceable and reusable! They utilize an exclusive "spiral ratchet" that allows assembly by automatic machinery, as well as assembly and disassembly in the field without the use of special tools. WEDGE-EZE connectors are available in many series types.

WEDGE-LOCK^{T.M.}
The CAPTIVE CONTACT, WEDGE-LOCK provides the ultimate in efficiency, reliability and economy in the application of coaxial connectors. The time used for normal assembly procedures is reduced by more than 50%. Combing and trimming of the cable braid is not required, thereby greatly reducing, if not completely eliminating, the possibility of "shorting" inside the connector. These connectors are completely field serviceable and reusable.

TYPE TNC
TNC connectors are a threaded coupling version of the improved BNC connectors. The threaded coupling and safety wire provisions insure locking and secure mating under conditions of extreme vibration and shock. They are rated at 500 volts and have been designed to give low voltage standing wave ratios at frequencies up to 11,000 MHz in 50 ohm circuits and are gasketed for weather-proof operation.

WEDGE-LOCK, WEDGE-EZE and ECONO-CRIMP, TM's Automatic Connector, Inc.

A subsidiary of **ASU** *Industries, Inc.*

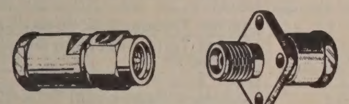
AUTOMATIC CONNECTOR, INC.

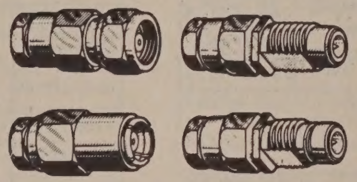
TYPE SMA

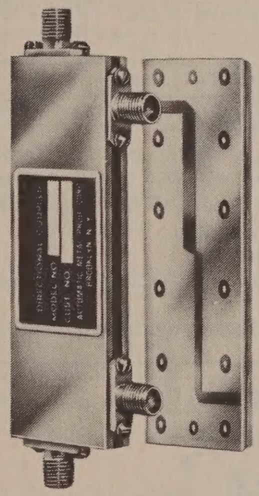
Developed to fill the need for a low VSWR general purpose connector for use at all microwave frequencies. Its inherent ruggedness, simplicity and size lend well to lower frequency usage. It is especially well suited for systems as well as components use; with a complete range of types available. The relatively small size and low VSWR, compared to other commonly used microwave connectors, has contributed measurably to the miniaturization of microwave connectors. It also allows operation at all frequencies up to 26 GHz. Choice of materials is an important consideration. All shell and body parts are made of stainless steel for ruggedness and long life.

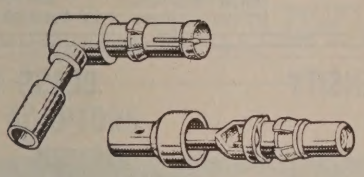
TYPE SMB & SMC

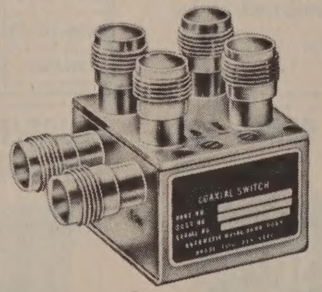
Designed for critical miniaturization requirements. Recommended for use in test equipment video lead applications, communication receivers, IF & RF circuits, or wherever miniaturization is a factor. Their rugged construction, matched impedance and excellent frequency characteristics make them well suited to missile & satellite applications. Both series are fundamentally of the same interior construction allowing outside dimensions to remain essentially constant for most cable sizes used.











ADM CONTACTS

Due to the increased usage of modularization and miniaturization of military and commercial communications, radar, IFF, and test equipment, there is an ever expanding need for miniature multipin connectors that include D.C., low frequency, video and high frequency, as well as high voltage and high power connection capabilities in one unit. These connectors afford a reliable multipin connection in all these combinations mentioned above in a mix or match type of application.

MICROWAVE SWITCHES

Automatic Connector, Inc. coaxial switches are designed for compactness, fast operation, maximum economy, and with a view toward extreme reliability. They are available in many combinations of connector series and configuration.

SPECIAL PRODUCTS

Automatic Connector, Inc. has full capability to manufacture many microwave products as well as various types of coaxial cable assemblies. Some of the other products are attenuators, directional couplers, dummy loads, coaxial filters, power dividers. Why not give us a call for your next production requirement?

AUGAT® Boards/Accessories

SOCKET/TERMINAL VARIATIONS

Two piece tapered entry socket terminal — four leaf machined closed entry inner contact and machined outer sleeve.

All catalogued boards are supplied with 3 level socket terminals, gold over nickel plated sleeves and contacts.

Any board may be purchased with 2 level socket terminals and optional plating combinations, by adding the proper suffix to the part number, as indicated in the example box below.

SOCKET TERMINAL OPTIONS: For wrap length, plating and replacement parts, see table below.

Example Part Number	Suffix Added to Number	Contact Plating	Sleeve Plating	Socket Terminal Length	Replacement Part Number
8136-PG1-30	None	Gold	Gold	12,95/.510 (3 level)	LSG-1FG1-1
8136-PG1-30-TG	-TG	Gold	Tin		LSG-1FG1-14
8136-PG1-30-2	-2	Gold	Gold	9,40/.370 (2 level)	LSG-1FG6-1
8136-PG1-30-2TG	-2TG	Gold	Tin		LSG-1FG6-14

MATERIALS

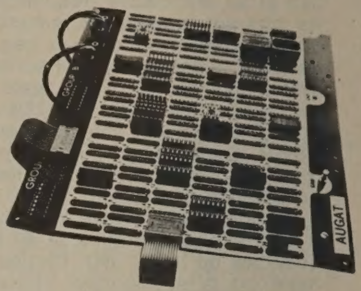
Two-piece, Machined Socket Terminal:
Inner Contact — beryllium copper, gold over nickel plated.
Outer Sleeve — brass, gold over nickel plated or tin over copper plated.

Board: Glass epoxy, 2 oz. copper circuitry, tin plated both sides.

Pins: phosphor bronze, gold over nickel plated.

PATTERNED BOARDS CLASS 005

P-SERIES

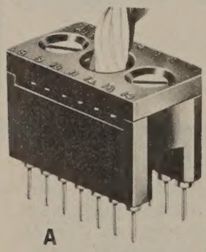


- 1/8" thick board accepts 14 and 16 lead dip I.C.'s.
- Modular Construction — boards may be purchased in multiples of 30 patterns (up to 180 patterns) indicated by suffix number. EXAMPLE: 8136-PG1-90 90 patterns.

See specs. for socket terminal variations.

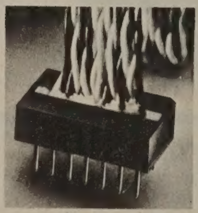
Part Number	Socket/ Terminals Per Pattern	Voltage & Ground Connections	I.O. Area (for Every 30-Pattern Section)
8136-PG1	14	7 & 14	Socket Terminals (2 Rows of 23)
8136-PG18			Feed Thru Pins (2 Sets: 2 Rows of 13) Total-52 Pins
8136-PG3	14 + 2 (V & G)	V & G Sleeves	Socket Terminals (2 Rows of 23)
8136-PG189			Socket Terminals, High Density (4 Rows of 7)
8136-PG19			Feed Thru Pins (2 Sets: 2 Rows of 13) Total-52 Pins
8136-PG5	16	8 & 16	Socket Terminals (2 Rows of 23)
8136-PG190			Socket Terminals, High Density (4 Rows of 7)
8136-PG20			Feed Thru Pins (2 Sets: 2 Rows of 13) Total-52 Pins
8136-PG13	16 + 2 (V & G)	V & G Sleeves	Socket Terminals (2 Rows of 23)
8136-PG191			Socket Terminals, High Density (4 Rows of 7)
8136-PG21			Feed Thru Pins (2 Sets: 2 Rows of 13) Total-52 Pins

PLUGS/MALE CLASS 130

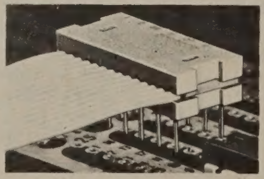


A

Styles A & B plugs available unassembled.



C



.300" x .100" Spacing

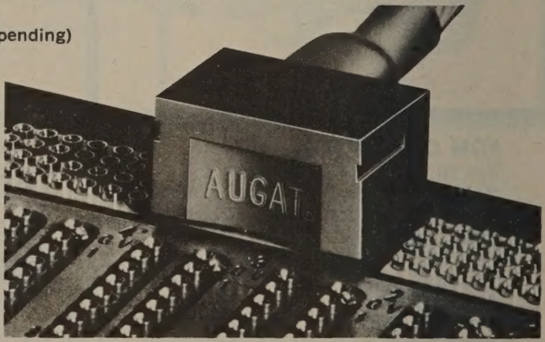
B

Part Number	Style	No. of Pins	Description
1P14-3T12-1	A	14	Inter-facing Plugs
2P14-1R12-1	B	14	Flat Cable Plugs
7P14-2T12-1	C	14	Ribbon Cable (twisted pair)
7P14-3T12-1	C	14	Ribbon Cable (flat cable)

NOTE: Standard 12", 24" and 36" lengths available. EXAMPLE: 1P14-3T12"-1. NOTE: For 16 pin assemblies, replace 14 with 16. EXAMPLE: 1P16. NOTE: For double ended plug assemblies, replace -1 suffix with -2. EXAMPLE: 1P14-3T12-2.

PLUGS/HIGH DENSITY CLASS 130

(patent pending)



28 PINS
.100" x .100"
Grid Spacing

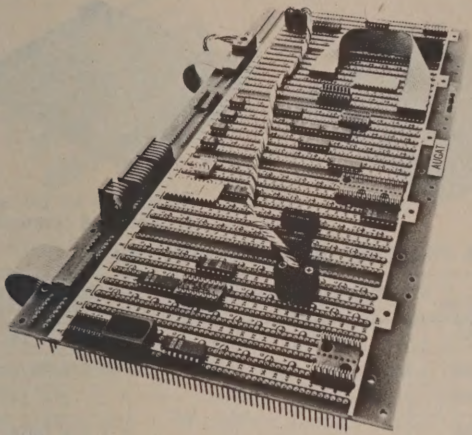
Part Number	Description
9P28-2S12-1	Assembly
8136-742P1	Hood
9P28-2G1	Base (with pins)

NOTE: Standard 12", 24" and 36" lengths available. EXAMPLE: 9P28-2S12"-1. NOTE: For double ended plug assemblies, replace -1 suffix with -2. EXAMPLE: 9P28-2S12-2.

MATING SOCKETS AVAILABLE
Part No. 528-AG28D (P.C.)
Part No. 528-AG24F (Wire wrap)

Boards / Accessories

UNIVERSAL BOARDS CLASS 005



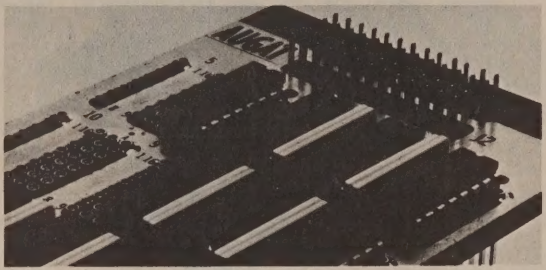
U-SERIES

• 1/8″ thick board accepts any combination of 6 through 40 lead dip I.C.'s. • Modular Construction — boards may be purchased in multiples of 9 rows (up to 54 rows) indicated by suffix number. EXAMPLE: 8136-UG1-27 27 rows on .300″ centers. See specs. for socket terminal variations.

Part Number	Voltage & Ground Connections	I.O. Area (for every 9-Row Section
8136-UG1	V & G Sleeves	Socket Terminals (2 Rows of 23)
8136-UG119		Socket Terminals, High Density (3 Sets: 4 Rows of 7) Total-84-Pins
8136-UG56	V & G Socket/Terminals	Socket Terminals (2 Rows of 23)
8136-UG6	V & G Sleeves	Feed-Thru Pins (2 Sets: 2 Rows of 13) Total - 52 Pins
8136-UG61	V & G Socket/Terminals	

ECL BOARDS CLASS 020

(3 PLANES)



ECL/SIP SERIES

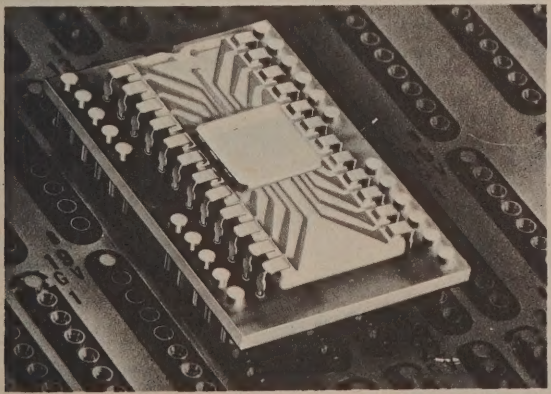
(patent pending)

• 1/8″ thick, 3 voltage plane boards include — 2.0V plane to terminate pull down resistors. Accommodates pluggable sip resistor networks without loss of density. Board available for ECL/TTL translators. 24-pin ALV and standard 16 pin gates.

• Modular construction available in multiple I.C. positions. See specs. for socket terminal variations.

Part Number	Function	Socket/ Terminals Per Pattern	Voltage & Ground Connections	I.O. Terminations
8136-ECL21	Standard	16	Vcc Pin 1 + 16 (ALU) 1 + 24 (Translator) 16 Vee Pin 8 (ALU) 12 + Vcc (Translator) 9 Vtt (All sip networks Pin 1)	Feed Thru
8136-ECL23	Translator			
8136-ECL26				
8136-ECL24	Array Multiplier	16 and 24		
8136-ECL25	ALU			

LSI ADAPTORS CLASS 105



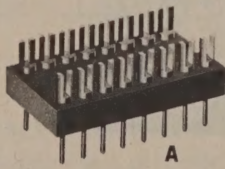
• Accept up to 40 lead LSI dip's. • Interposing LSI circuits on 14 and 16 pin patterns. • Adaptor pins located to prevent improper position on panel. •Dip's soldered into adaptor which plugs into panel. • Adaptor plugs also available for TO-5 conversion.

Part Number	Application
628-HG16	Up to 28 Pins .600″ x .100″ Spacing
640-HG16	Up to 40 Pins .600″ x .100″ Spacing

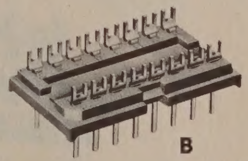
ADAPTORS CLASS 100

- 3 Pin styles.
- Single, double patterns.

- Slotted pin only.
- Low profile.
- Low cost.
- Cover available.



A



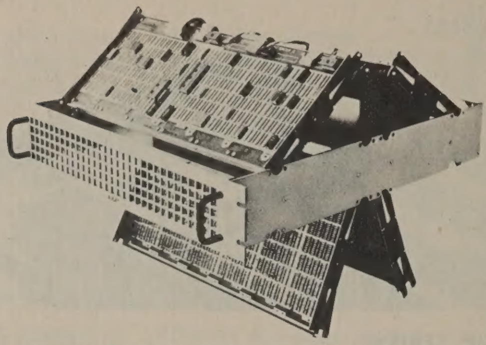
B

Part Number	Style	No. of Pins	Pin Spacing	Description
614-CG1	A	14	.300″ x .100″	Slotted Pin
616-CG1	A	16		
614-DG5	B	14		
616-DG5	B	16		
614-CG3	A	14	.600″ x .100″	Slotted Pin
616-CG3	A	16		
624-CG1	A	24		
628-CG2	A	28		
636-CG1	A	36		
640-CG1	A	40		

NOTE: Plugs available in 3 pin styles: round, solder pocket and slotted — single and double patterns. (Style A only.)
Cover — 14 pin, 614-2P1: 16 pin, 616-2P1. (Style B only.)

AUGAT® *Drawers Boards/Racks*

DRAWER ASSEMBLIES CLASS 200



DRAWER ASSEMBLIES

- Accepts up to four plane mount boards, up to 720 dip I.C.'s.
- Frames are hinged either side for accessibility and easy removal.
- Dust covers furnished.
- Designed for 19″ rack mounting.
- Optional perforated or solid end plates.

FULL DRAWER DEPTH: 20.425 ±.030

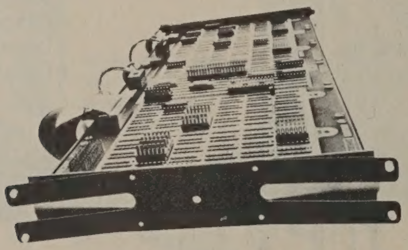
Part Number	Description
8170-DG1	Drawer assembly with fan cutout rear plate and perforated front plate. (Accepts 4 board frames.)
8170-DG2	Drawer assembly with rear blank plate and front blank plate. (Accepts 4 board frames.)

HALF DRAWER DEPTH: 12.325 ±.030

Part Number	Description
8170-DG4	Drawer assembly with fan cutout rear plate and perforated front plate. (Accepts 2 board frames.)
8170-DG5	Drawer assembly with rear blank plate and front blank plate. (Accepts 2 board frames.)

NOTE: Order board frames separately.

MATERIALS: (Full drawer and half drawer)
All frame members are aluminum, gold iridite. Front plate is painted blue.



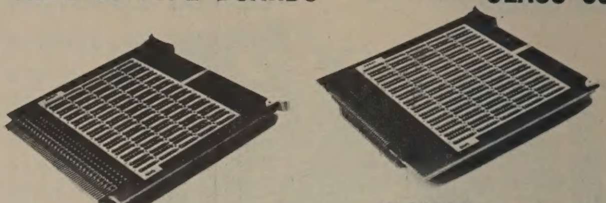
BOARD FRAMES

Frames are hinged at both ends with spring latch, permitting accessibility to either component side or wire wrapped side of board. Frame may also be removed by depressing both ends of spring latch. Mounts full 180 pattern board or a combination of board styles up to 180 patterns.

Part Number 8170-14G1
Accepts any board series with 175,26/6.900 Max. Width x 411,48/16.200 Max. Length.

Part Number 8170-14G2
Accepts any board series with 190,50/7.500 Max. Width x 411,48/16.200 Max. Length.

PLUG IN TYPE BOARDS CLASS 005



W-SERIES for pin and socket type connections.

R-SERIES FOR EDGE BOARD CONNECTIONS

Part Number	Socket/Terminals Per Pattern	Board Thickness	Voltage & Ground Connections
8136-RG1	14 .300″ x .100″ Spacing	⅛″	7 + 14
8136-RG2			V + G Terminals
8136-RG7		1/16″	7 + 14
8136-RG8			V + G Terminals
8136-RG3	16 .300″ x .100″ Spacing	⅛″	8 + 16
8136-RG4			V + G Terminals
8136-RG9		1/16″	8 + 16
8136-RG10			V + G Terminals
8136-RG58	Blank Card	⅛″	
8136-RG85		1/16″	
8136-138G1	Extender Card	⅛″	
8136-RG86		1/16″	

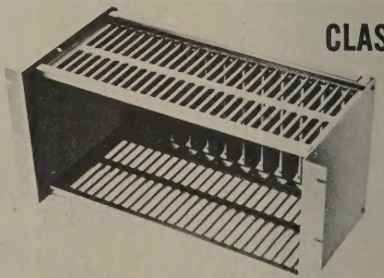
NOTE: Connector only — Part No. 14005-1P1 (⅛″) 14005-19P1 (1/16″) (120 contact — 60 dual row).

UNIVERSAL TYPE

Part Number	No. of Rows	Board Thickness	Voltage & Ground Connection
8136-URG1	20 Rows of 50 Contacts on.300″ Centers	⅛″	V + G Terminals
8138-URG14		1/16″	

Also available . . . A universal style I.C. packaging board for station access in the "CAMAC" crate.

RACKS CLASS 205



R-SERIES RACKS FOR R SERIES BOARDS

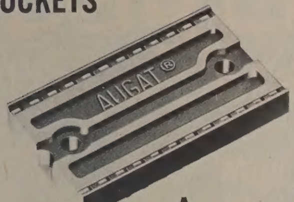
Part Number	Accepts Panel Thickness	Description
8160-EG10	⅛″	Back Panel Only (with 13 connectors)
8160-EG21	1/16″	
8170-RG1	⅛″	Rack with Back Panel for 19″ Rack Mounting
8170-RG14	1/16″	
8170-RG3	⅛″	Same as RG1 or RG14, Except without Back Panel
8170-RG16	1/16″	

NOTE: The above part numbers are for 13 connector positions. For 3,6 or 9 connector position racks and back panels, simply add proper suffix to the end of part number.
EXAMPLE: 8160-EG10-3 (3 connector position).

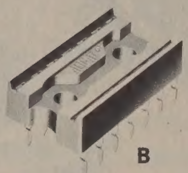
AUGAT INC. 33 Perry Avenue, P.O. Box 779, Attleboro, Massachusetts 02703 / (617) 222-2202 / TWX 710-391-0644

Sockets

SOCKETS CLASS 410



A



B

(Low Profile — Printed Circuit)

• Low Cost. • Low Profile — **.163 above P.C. board** (I.C. Seating Plane). • Two termination styles available: APPLICATION: Style A — any hole size down to .025 dia., Style B — recommended mounting hole .035 ±.002 dia. for good retention in P.C. board during wave soldering. • Beryllium copper contacts insures greater and more uniform normal force.

Part Number	No. of Contacts	Insulator		Contact Plating	Termination
		Length	Width

324-AG39D	24 .600″ x .100″	1.200″ Max.	.705″ Max.	Tin	A
324-AG40D				Gold	
324-AG37D				Tin	B
324-AG38D				Gold	
340-AG39D	40 .600″ x .100″	2.000″ Max.	.705″ Max.	Tin	A
340-AG40D				Gold	
340-AG37D				Tin	B
340-AG38D				Gold	

NOTE: Request information on 22 and 28 contact sizes.

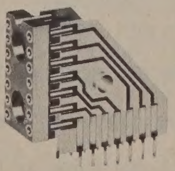
MATERIALS

Insulator: Thermoplastic polyester, UL rated 94V-O.
Contacts: Beryllium copper, gold over nickel or tin plated.
Wafer: .005 Tk. Nomex.

SOCKETS (L.E.D.) CLASS 425

45°, 60°, and 90° L.E.D. NUMERIC DISPLAY SOCKET

• Two piece machined contact assembly — inner contact and outer sleeve. • Design will permit gang mounting on P.C. board — .400 centers or greater.

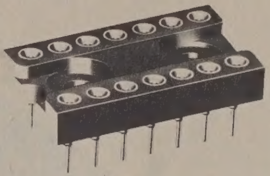


(patent pending)

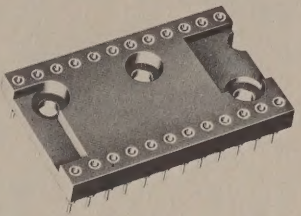
Part Number	No. of Pins	Socket Angle	Termination
514-AG21D	14 .300″ x .100″	90°	Printed Circuit
514-AG25D		45°	
514-AG26D		60°	

NOTE: For 16 pin, replace 14 with 16. EXAMPLE: 516-AG21D.

SOCKETS CLASS 415

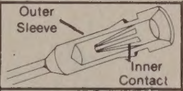


(Machined Contact)



• Meets most severe environmental conditions including military requirements of high shock and vibration. • Two piece tapered entry socket terminal — four leaf machined closed entry inner contact and machined outer sleeve. • Wire Wrap* (2 or 3 level) or P.C. termination. Gold plated contacts, gold or tin plated outer sleeves.

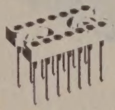
All sockets listed are with printed circuit termination. See note below for ordering sockets with wire wrap termination.



Part Number	No. of Contacts	Insulator			Contact Plating	Sleeve Plating
		Length	Width	Height		
508-AG10D	8 .3″ x .1″	.400″ Max.	.450″	.180″ Max.	Gold	Gold
508-AG11D					Gold	Tin
514-AG10D	14 .3″ x .1″	.750″	.450″	.135″ Max.	Gold	Gold
514-AG11D					Gold	Tin
516-AG10D	16 .3″ x .1″	.850″	.450″	.135″ Max.	Gold	Gold
516-AG11D					Gold	Tin
518-AG10D	18 .3″ x .1″	.900″ Max.	.450″	.135″ Max.	Gold	Gold
518-AG11D					Gold	Tin
522-AG10D	22 .4″ x .1″	1.150″	.550″	.135″ Max.	Gold	Gold
522-AG11D					Gold	Tin
524-AG10D	24 .6″ x .1″	.1200″ Max.	.750″	.135″ Max.	Gold	Gold
524-AG11D					Gold	Tin
528-AG10D	28 .6″ x .1″	1.400″ Max.	.750″	.135″ Max.	Gold	Gold
528-AG11D					Gold	Tin
532-AG10D	32 .6″ x .1″	1.600″ Max.	.750″	.135″ Max.	Gold	Gold
532-AG11D					Gold	Tin
536-AG10D	36 .6″ x .1″	1.800″ Max.	.750″	.135″ Max.	Gold	Gold
536-AG11D					Gold	Tin
540-AG10D	40 .6″ x .1″	2.000″ Max.	.750″	.135″ Max.	Gold	Gold
540-AG11D					Gold	Tin

NOTE: The above sockets are also standard with wire wrap termination, simply replace "D" suffix with "F" suffix for three level and "F"-2 for two level. EXAMPLE:

	Gold/Gold	Gold/Tin
2 Level	516-AG10F-2	516-AG11F-2
3 Level	516-AG10F	516-AG11F



MATERIALS

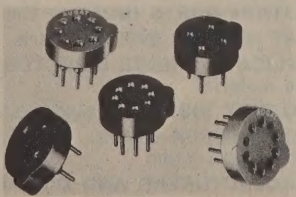
Insulator: Thermoplastic polyester, UL Rated 94V-O.

SOCKET/TERMINALS:

Terminal: Brass, gold over nickel or tin plated.
Female Contact: Beryllium copper, gold over nickel or tin plated.

SOCKETS CLASS 510

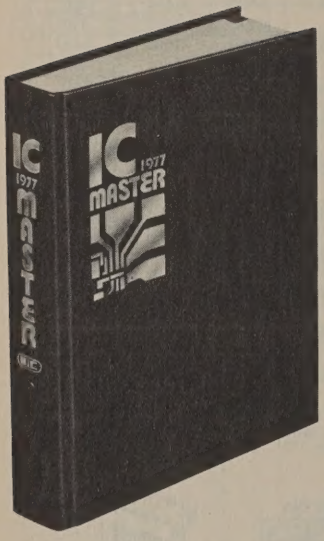
(Trans. & I.C., Low Profile)



• Low cost. • Molded insulator and automated contact assembly — save you money. • Ultra low profile — precision machined contact assembly.

WHEN THE CHIPS ARE DOWN...

THE NEW 1977 IC MASTER PAYS OFF!



The new IC MASTER is the ultimate IC source book.

It lists virtually every IC device manufactured in the United States.

The IC MASTER is the easy, sensible means of narrowing down your IC choices quickly, accurately and systematically. All information is cross-referenced and indexed for rapid problem solving and device selection. And, additionally, the MASTER is updated three times yearly by accumulative supplements.

THE FORMAT OUTLINED:

- **FIVE MASTER SELECTION GUIDES** — 84 companies' IC's organized by type, function, key parameters
- **OVER 1,000 PAGES OF TECHNICAL INFORMATION** — Provided directly by manufacturers covering 17,000 IC's
- **ALTERNATE SOURCE DIRECTORY** — The only industry-wide, pin-for-pin version available
- **MILITARY PARTS INDEX AND CROSS REFERENCE CHART** — Identifies all IC's with JAN qualification
- **MILITARY DEVICE TESTING TABLE** — List companies that screen to Mil. Std. 883
- **MILITARY PARTS INDEX** — The first functional guide to JAN qualified parts
- **PART NUMBER INDEX** — Parts from 84 manufacturers, in numerical sequence
- **APPLICATION NOTE DIRECTORY** — Digest of currently active application note material
- **PRODUCT INDEX** — Provides alphanumeric listing of 84 manufacturers' lines
- **PART NUMBER GUIDE** — Instantly decodes each company's part numbering system
- **MANUFACTURERS AND DISTRIBUTORS DIRECTORY**

NEW CUMBERLAND, PENNSYLVANIA 17070 • TELEPHONE (717) 938-6711 / IN EUROPE; 's-HERTOGENBOSCH, NETHERLANDS • TELEPHONE 073-123432

BergCon™ .025" square modular interconnection system . . .

offering high density .100" grid stacking . . . end-to-end or side-to-side . . . across a wide range of connector types.

BergPin™ male terminals for disconnect and wire-wrapping

System provides a fast, reliable method for staking pins in circuitboard. Here are the features that distinguish BergPin terminals from ordinary wire-wrapping pins:

Pin tip is designed to facilitate wire-wrapping or disconnect lead-in.

Sharp corners held to .003" maximum radius.

Star-wedge shape provides 8 lbs. retention (at nominal hole size) before soldering; up to 50 lbs. retention after soldering.

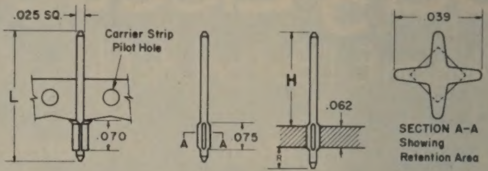
Pin tip is designed to facilitate lead-in when staking.

Uniform cross-section. Made from drawn, not stamped, material. Result: smooth, flat contact surfaces.

Available in six types of surface platings.

Pins are ¾-hard phosphor bronze.

Tapered lead-in will not damage plated through hole or multi-layer construction.



Part Number	Plating	Underplating	Material
75401-	30 mill min. gold*	50 mill min. nickel	Phosphor-bronze (¾ hard) ASTM B159-66
75402-	50 mill min. gold**	10 mill copper flash	Phosphor-bronze (¾ hard) ASTM B159-66
75403-	50 mill min. gold**	50 mill min. nickel	Phosphor-bronze (¾ hard) ASTM B159-66
75404-	150 min. acid tin***	none	Phosphor-bronze (¾ hard) ASTM B159-66
75405-	100 mill min. gold	50 mill min. nickel	Phosphor-bronze (¾ hard) ASTM B159-66
75406-	100 min. gold	100 min. copper	Phosphor-bronze (¾ hard) ASTM B159-66
75407-	PLAIN	none	Phosphor-bronze (¾ hard) ASTM B159-66
75408-	PLAIN	none	Cupro-Nickel C.D.A. No 725

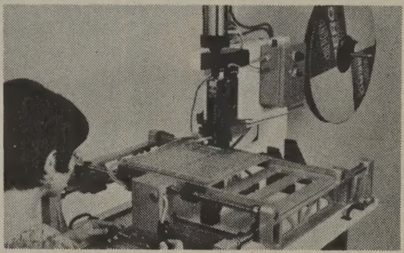
*MIL-G-45204 Type 2 **MIL-G-45204 Type 1 Class 1 ***MIL-T-10727A Type 1

This listing gives the material, plating and underplating; it does not show the pin length or height above board. For these dimensions, we refer you to Berg Bulletin 105 which is available upon request.

BergPin staking machines cut costs, control quality

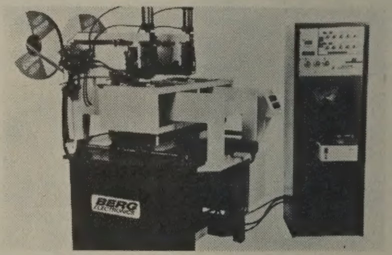
PRODUCTION MACHINE (Model BP-161)

For staking boards with limited number of pins or boards with varying pin configurations. Operator manually locates hole position and initiates staking cycle for up to 2000 insertions per hour.



PANTOGRAPH MACHINE (Model BP-151)

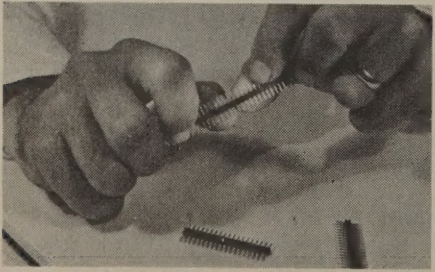
Ideal for straight-line insertion in boards or for high quantities of identical boards. Stakes up to 3500 pins per hour.



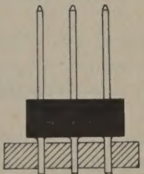
NUMERICALLY-CONTROLLED MACHINE (Model NC)

For high-speed automatic staking. Features a numerically-controlled, X-Y positioning system for programming pin-to-pin spacing and row patterns. Twin insertion heads simultaneously stake two identical boards at rates up to 12,000 per hour.

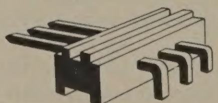
BergStik™ straight and right angle headers on .100", .125" and .150" centers



IT'S A SNAP! Headers can be broken to desired length by hand.



Straight Header



Right Angle Header

An inexpensive new method for inserting .025" sq. pins in boards for wire-wrapping or input/output usage. Suitable for high-volume production as well as prototyping. Supplied in many lengths and in choice of platings. Stackable to grid pattern on their respective pin centers. BergStik Headers are notched to allow user to break to any desired number of positions.

See Bulletin 140 for complete details.

BergCon™ .025″ square modular interconnection system

Dual-metal PV receptacles provide superior electrical and mechanical properties

(Beryllium copper spring; ¼-hard brass body)

PV Receptacles . . . mate with .025″ square pins on .125″ grid or greater

The Berg "PV" connector is the most reliable .025″ post receptacle in use today. This unique terminal provides a virtually constant retention force even after repeated cycles on a male pin. The spring of the PV is available in a choice of thicknesses enabling you to "design in" a retention force that is tailored to the application.

Mini-PV Receptables . . . mate with .025″ square pins on .100″ grid spacing

The smaller version of the PV is of similar two-piece design for lasting retention after repeated disconnects. The Mini-PV is available in 4 varieties of platings including SPOT O' GOLD. (The latter gives you the electrical and mechanical properties of gold where you need it—in the contact area and in the spring.) Install the Mini-PV in a latch housing for 1 through 72 simultaneous connections. See application machines below.

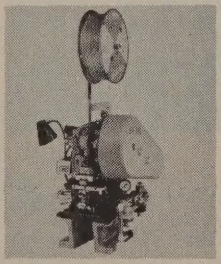
*Gold Contacts Only
For complete details, contact your local Berg Sales Engineer.

Applying PV Receptacles

MODEL 200 PV CRIMPER

This electrically-operated bench press provides 1500 or more quality crimps per hour. Machine has 2½ ton capacity and features a short press stroke and direct clutch linkage. Size: 29″ high x 26″ long x 16″ wide. Weight: 150 lbs. Power Requirements: 80-100 psi air; 120 V electrical.

(See Bulletin 101B for additional information)

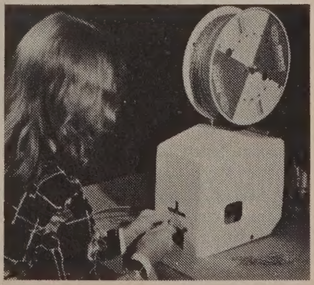


MODEL 250 PV CRIMPER

Air-powered unit is compact, delivers approximately 1000 terminals per hour (depending on operator dexterity.) Operates on 80 psi air. Uses 110 V for light source. Size: 26½″ high x 18″ long x 10″ wide. Weight 50 lbs.

HAND TOOL (not shown)

Sturdy. Duplicates the quality of crimping machines. Features a positive ratchet that does not release until full crimping pressure is applied to a terminal.



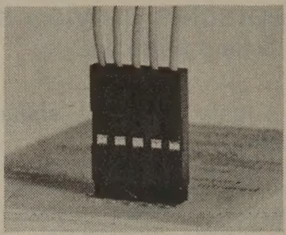
BergCon™ .025″ square modular interconnection system

Housing (Latch or Rod Type)

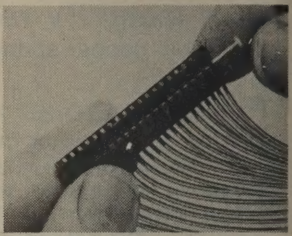
Berg Mini-Latch Housings allow simultaneous connection of as many as 72 Mini-PV terminated conductors; are available in many standard sizes.

Berg Lock-Rod Housings employ a lock rod to retain the terminal; ideal for applications requiring frequent wiring changes or for prototyping. Lock-Rod Housings connect as many as 31 Mini-PV terminated conductors in a single row—up to 62 in twin rows on .100″ grid. Supplied 31 single row for .150″ centers.

(See Bulletin 101B for complete details.)



Latch Housing



Lock-Rod Housing

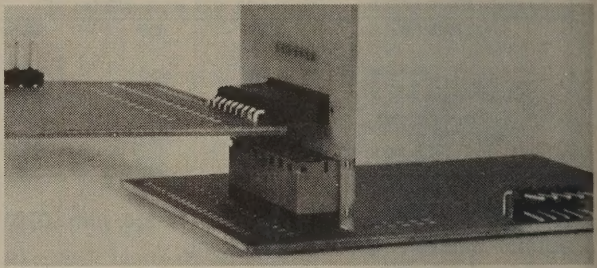
PV Card Connectors–Vertical-Horizontal

These PV Card Connectors are available in single and double row configurations to mate with .025″ square pins on .100″ or .150″ grids. Applications: Programmable or functional board-to-board mounting at right angle, parallel or the same plane.

Number of Positions

		Horizontal	Vertical
.100″ GRID	Single Row	5–52	2–50
	Double Row	10–130	4–100
.150″ GRID	Single Row	5–30	2–72
	Double Row	10–86	12,16,20&24

(See Bulletin 112C or your Berg Sales Engineer for additional information)



BergPin .025″ square post and ferrule assemblies mate with Berg PV card connectors.

Vertical Stake-to-Board PV Receptacle

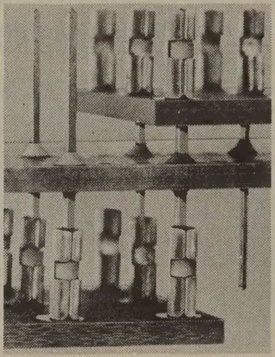
Receptacle stakes to PC board allowing dense packaging configuration by parallel mounting 1/16″ glass-epoxy circuit boards. Features top or bottom entry which gives greater flexibility in placement on circuit board. Two-piece design provides lasting retention even after repeated cycling. Reliable application machines substantially reduce applied cost.

(See Bulletin 118 for additional information.)

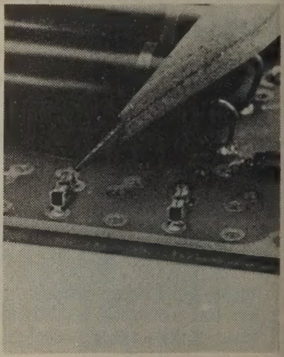
Horizontal Stake-to-Board PV Receptacle

This version of the Berg PV receptacle is staked to the PC board, then wave soldered. Its design allows for dense packaging configurations in vertical mounting 1/16″ glass-epoxy circuit boards. Horizontal PV receptacles can be employed with BergPin terminals to provide quick pluggability. Receptacles are supplied in strip form for high-speed machine staking.

(See Bulletin 333 for additional information)

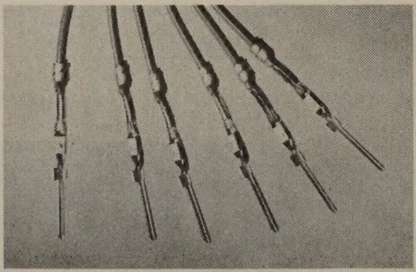


Vertical PV Receptacle



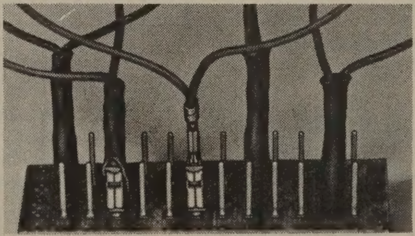
Horizontal PV Receptacle

Crimp-to-Wire Male Pin



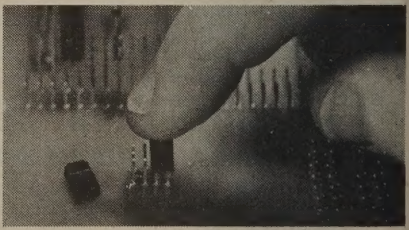
Compatible with BergCon .025″ square interconnection system. Makes flying-type connector when mated with Berg Mini-PV receptacle and used with Mini-latch housing. Maximum current rating: 5 amperes. 5.0 milliohms maximum contact resistance when mated with a Mini PV contact. *(See Bulletin 101B for additional information)*

Daisy Chain for Pre-testing Layouts



Here's a back-panel wiring system in easy-to-handle reel form. Consists of a continuous length of #28 gauge stranded wire with 250 insulated PV's crimped at constant intervals (2½″ to 5″ center-to-center spacing). Eliminates wire measuring, stripping, soldering, or expensive hand-tool terminating in your plant. *(See Bulletin 101B.)*

Mini-Jump Connector

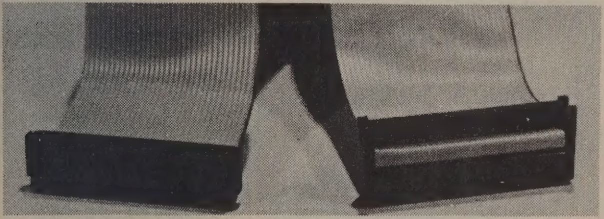


MINI-JUMP, provides flexibility in circuit programming of mini-computers, card readers, printers, modems, and POS equipment. It allows for high density packaging; is stackable in both directions on .100″ centers and up. Low-profile design permits tight packaging in the vertical plane. Mates with industry standard .025″ square pins or .028″ round pins. MINI-JUMP, which features Berg dual-metal receptacles, is supplied in a variety of package sizes. *(See Bulletin 144 for additional information)*

Positive-Latch Quickie™ Connectors terminate multi-lead cable in about 10 seconds

The Berg QUICKIE series of connectors is designed to interface with flat, flexible round conductor cable on .050″ centers. Connectors in this series eliminate the time, problems and expense of pre-stripping.

Standard Female Connector *



This form is used to interface flat flexible round conductor cable on .050″ centers to .025 square wire-wrapping pins on .100″ square grid. (It also mates with .025″ round pins.) The standard QUICKIE Connector consists of two basic parts—the housing and the cover. A third part—the strain relief—is not essential in all uses.

Quickie assemblies supplied with strain reliefs

Type	Part Number	Cover Style
2 X 5	65484-001	A
2 X 5	65484-003	B
2 X 7	65484-025	A

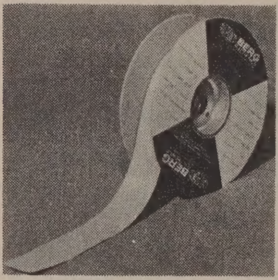
2 X 13	65485-011	B
2 X 17	65485-013	A
2 X 17	65485-015	B
2 X 20	65485-017	A
2 X 20	65485-019	B
2 X 25	65485-021	A
2 X 25	65485-023	B

Notes: A—Closed end cover style   B—Thru end cover style

*Note: A polarized version of the standard female is also available. Polarization is accomplished without loss of a pin position.

Quickie Assembly Equipment

Berg offers both hand-powered and pneumatically powered assembly presses.



Quickie Cable

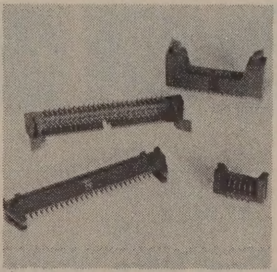
Cable is supplied in PVC insulation including a choice of 28 AWG stranded or 30 AWG solid wire. Cable is available in 8 sizes.

BERG
CONNEL

Quickie Male Dip and PCB Connectors

The Male DIP Connector is available in 2 X 7 and 2 X 8 configurations . . . may be plugged into standard IC sockets.

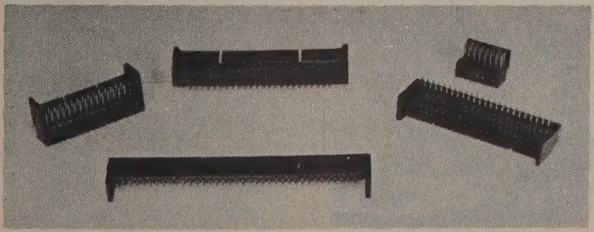
The PCB Connector is available in 6 sizes for solder application directly to the printed circuit board.



Quickie Shielded Right-Angle Headers and Straight Headers

Berg QUICKIE Right-Angle Headers are fully compatible with the standard female connector. Available with plastic latches which give assurance that connector remains mated during vibration. The Straight Header also is fully compatible with the standard female connector; it is shielded on three sides.

See Bulletin 131C for a comprehensive listing of the various forms of the QUICKIE Connector.



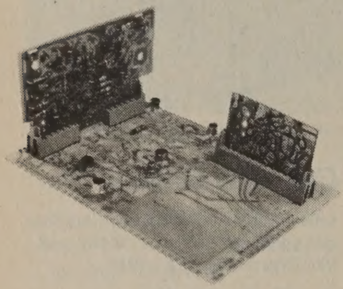
Shielded Right Angle Headers for .100″, .125″ or .150″ Grid

Headers consist of glass-reinforced Nylon housings having .025″ square pins on .100 grid which are molded in position for maximum strength. The configuration provides an integral top shield that serves to protect the pins from damage, plus side shields that prevent pin bending when female housings are removed. *See Bulletin 150*

BergLok™ Modular Interconnection Blocks . . . a simple, reliable way to mount replaceable daughter-board modules in electronic assemblies

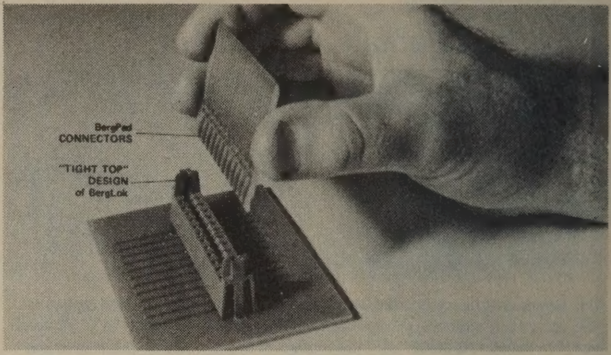
BergLok Connector Blocks provide a vertical mounting system for logic cards, ceramic substrates, and printed circuit cards, single or double sided. These blocks afford complete pluggability of modules into any conventional PC mother board, ⅛₆" thick. Standard center-to-center spacing is .200".

These connector blocks can be mounted in any position on the mother board and, thus, permit complete flexibility in packaging design and assembly. In most applications, BergLok Interconnection Blocks resist impact, shock and vibration without **supplementary support devices.**



Blocks have snap-lock base to anchor connectors firmly in mother board prior to wave soldering. No tools or fixtures needed. End-block latches lock daughter-boards firmly in place during handling and shipping. Yet boards can be easily removed for servicing or replacement.

(See Bulletin 116 for complete details)

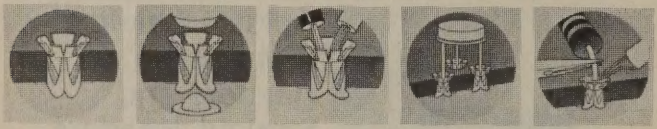


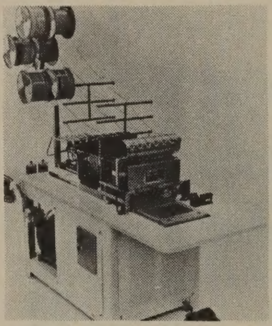
The tightly-controlled card guide that guarantees the stabilization of .062" daughter board in BergLok blocks is known as **"Tight-Top."**

"BergPad," a terminal which is applied to the edge of P.C. board to replace copper-clad fingers, eliminates the problems of peel strength and wave solder thickness control. BergPad terminals can be applied to one side of the standard .062" board or to both sides of .031" to .045" board. (Write for details or see your local Berg Electronics Sales Engineer.)

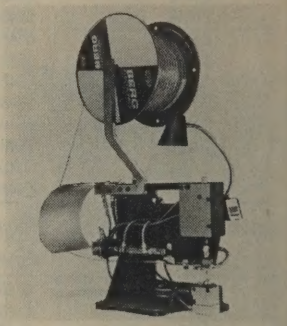
Griplet® Lead-Holding Connector for PC Boards . . . machine-insertable at rates up to 100,000 per hour

The Griplet connector is inserted into holes in a PC board in order to hold component leads or wires at a desired depth. It protects the pads, firmly retains the inserted conductor and promotes a more reliable solder joint . . . while providing faster circuit assembly. Griplets are also used as a mechanical means of obtaining an electrical connection between two sides of a PC board.





MULTIGRIP MACHINE The Multigrip is designed for multiple inserting and staking of Griplet connectors in large quantities of identical boards. Rate: approximately eight boards per minute; inserts up to 70,000 Griplet connectors per hour. Berg also has several other Griplet model machines.

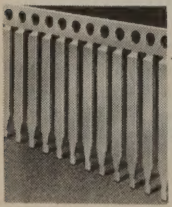


MODEL K Semi-Automatic Machine. Designed for economy and reliability. Inserts and stakes one connector per cycle. Rate: approximately 1,800 per operator-hour.

(See Bulletin 301 for complete listing.)

BergLance™ Low-Cost Wire-Wrapping Posts . . . for rapid, reliable staking in circuit board

BergLance posts and application machines provide high-speed staking of termination points in circuit boards for radio, TV, electronic organ, and similar consumer electronic products. Available in 2 basic cross-sections (.025" x .061" and .025" square) and with choice of lengths. Terminals, which are supplied in strip form for automatic insertion, have solder pre-coat and high-quality 60-40 tin lead finish.



(See Bulletin 107 for additional information.)

Berg "Shotgun" Machine has staking potential of up to 150,000 pins/day. Board area—11" x 12". Many other machines available to meet production needs.

Minisert™ Low Profile, Miniature PC Socket
. . . provides repeated pluggability

The Berg MINISERT is a superior pluggable socket that assures positive retention in the circuit board prior to soldering, and spring-to-board electrical contact after soldering. The unique design of the MINISERT cup and spring extension allows solder to be drawn to the top surface of a two-sided board, producing a solder fillet on the top pad without overflow into the socket.

An elastomeric seal keeps foreign matter out of the socket before and after the component lead has been inserted. This seal remains in place throughout the life of the socket.

The MINISERT accepts round leads ranging from .012″ to .022″ diameter, or flat leads .008″ to .015″ thick by .015″ to .023″ wide. Sockets will fit a hole size ranging from .050″ to .058″ and are furnished on a metal carrier strip for insertion by the Berg MS-105 Machine. This machine provides substantial savings in time and in total applied cost.

The MINISERT socket is also supplied in Kapton tape; it can be clipped to length for manual insertion in dual-in-line pattern or for terminating flat cable PC board jumpers. Those sockets are on .100″ centers. Supplied on reels of 25,000 or 5,000 socket quantities.

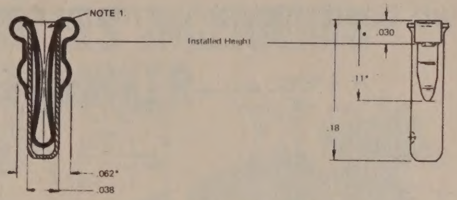
Features

- Low-Profile—Extends only .030″ above and .088″ below a 1/16″ board.
- Fits wide range of hole sizes; accepts many sizes of round or flat leads.
- Provides repeated pluggability for dual-in-line packages, LED's, lamps, transistors, etc.

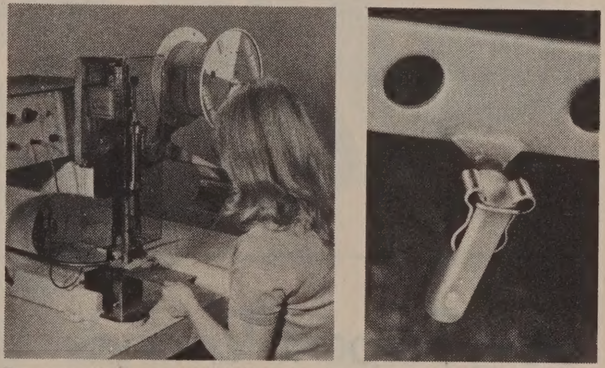
Part Number	Standard Packaging	Recommended Applicator
75060-007	25M per reel	MS-105
75060-008	5M per reel	MS-100
75315-001	Loose piece	Tool
75540-001	25M reel (KAPTON)	Hand Inserted
75540-002	5M reel (KAPTON)	Hand Inserted

(See Bulletin 120 for complete details.)

Minisert Sockets are now supplied in Kapton® Tape. Just clip to length for manual insertion.



NOTE 1. Elastomeric Seal keeps foreign matter out of the socket before and after component lead has been inserted. This seal remains in place throughout the life of the socket.

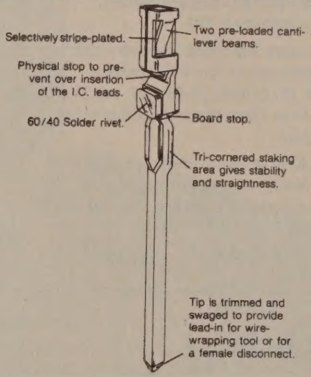


Berg pneumatically operated MS-105 machine inserts approximately 2,000 sockets per hour. A hand-operated (MS-100) insertion device is available for small runs; rate 800–1,000 per hour. A handtool kit can be purchased for prototyping purposes.

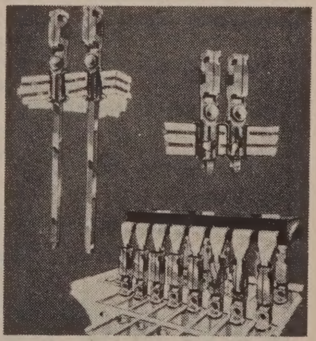
Berg Tri-Socket™. . . a .025″ square wire-wrapping or solder-tab socket for 1/16″ through 1/8″ thick boards.

Berg's Tri-Socket is a one-piece, free-standing design which will accommodate a variety of lead sizes. It has tri-cornered fins in the staking area which extend beyond the suggested hole diameter of the PC board. When inserted, the fins retract allowing gentle entry into the board. The 3-point contact gives the Tri-Socket stability and straightness without causing damage to the thru plating. (The Tri-Socket does not introduce the great stresses to the PC board that are created with interference-fit type pins).

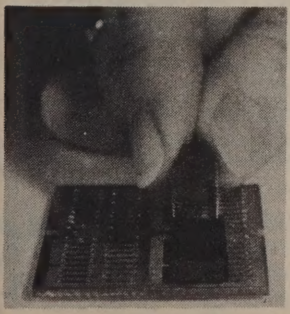
A unique feature is a 60/40 solder rivet which is precisely positioned above the tri-cornered area. This rivet is already for reflow. After reflow, retention force exceeds 60 pounds. *(See Bulletin 390 for complete listing.)*



Selectively stripe-plated.
Two pre-loaded cantilever beams.
Physical stop to prevent over insertion of the I.C. leads.
60/40 Solder rivet.
Board stop.
Tri-cornered staking area gives stability and straightness.
Tip is trimmed and swaged to provide lead-in for wire-wrapping tool or for a female disconnect.



Low-Profile, Dual-Beam IC Socket Package

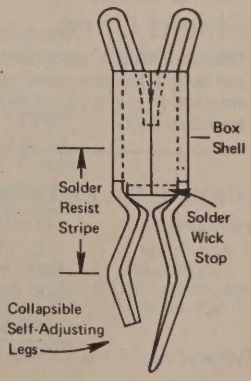


Berg's Dual-Beam I.C. Socket is a highly reliable low-profile DIP Package which will not allow solder wicking. The target area is .020″ X .040″; socket design has a press-fit leg so the package will not fall out of the P.C. board after insertion. Ventilated molding and stand-offs allow for easy cleaning of the complete P.C. board assembly. This package consists of tin or gold plated phosphor bronze sockets which are inserted into a precision molded one-piece glass-filled polyester thermoplastic housing.

The Berg Dual-Beam DIP Package will accept leads ranging from .009″ to .012″. Face-wipe design provides maximum wiping action with mating package leads. Beams serve to track a bent or biased lead.

Plastic housing has a height of .175″ maximum; its width allows for side-by-side mounting and measures .430″ maximum. Housing material is rated UL 94V-0.

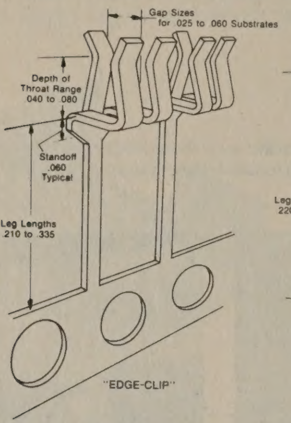
(See Bulletin 147 for complete listing)



Solok* Terminations for Ceramic Hybrid Microcircuits

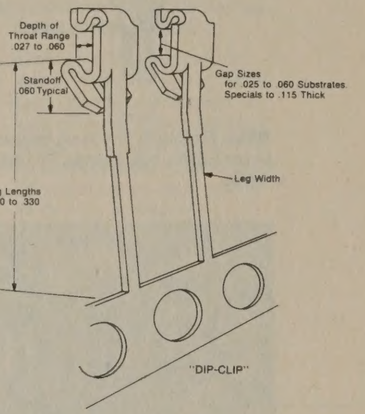
Solok* Terminations clip onto substrate rather than into holes drilled through it. They mechanically hold their position until soldered for a permanent connection. Berg offers a complete terminal application machine system. Its broad standard line is backed by an unusual custom design capability. *DuPont Trademark

Two basic types . . . many configurations

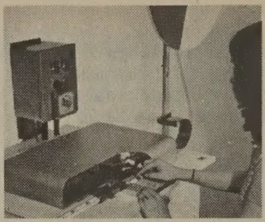


Gap Sizes
for .025 to .060 Substrates
Depth of Throat Range .040 to .080
Standoff .060 Typical
Leg Lengths .210 to .335

"EDGE-CLIP"

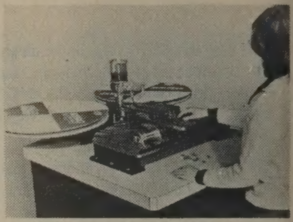


"DIP-CLIP"



Edge-Clip Machine

This machine is used for single edge-mounted terminals. It can be programmed to install terminals at any given pad location or to skip terminals in an area where there is no pad. Rate: Up to 1500 packages per hour.



Dip-Clip Machine

This semi-automatic machine is used for DIP type terminations; it, too, operates at rates up to 1500 substrates per hour. (Terminals must be ordered "left" and "right" handed for this machine.)

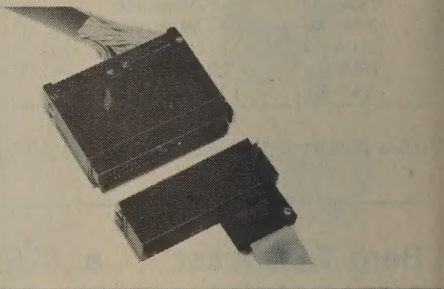
Definition of Terms

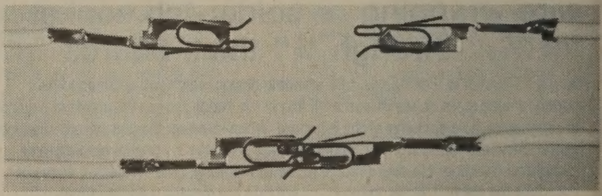
1. **Depth of Throat**—Distance from edge of substrate to point where terminal contacts pad.
2. **Standoff**—Distance that terminal will hold substrate away from mouting board.
3. **Leg Length**—Distance from substrate to end of leg **with carrier strip removed.**
4. **Gap Size**—Opening in clip area of terminal designed to assure a mechanical hold on the substrate.

For complete details and specifications, contact your local Berg Sales Engineer or request Bulletin 124.

Berg Serpent Terminals

. . . mate with input/output connectors of IBM 360 and 370 Systems





The Berg "Serpent" is a 48-position connector which provides a reliable I/O connection within your system . . . or plug compatibility to IBM.

Its crimp-type contact, is made of phosphor bronze, and plated gold-over-nickel for excellent conductivity. Contacts have insulation-support ears which provide termination strength for conventional wires in 18–20 AWG, 22–26 AWG, and 28–32 AWG ranges as well as coaxial and shielded wires. These contacts self lock in the connector housing and provide firm wiping action.

Connector housings, made of polycarbonate, have an alphanumeric coding on front and rear for easy cavity identification. Other features include: a spring-loaded jackscrew which assures positive locking, a strain-relief cover, and mounting slots for panel mounting.

(See Bulletin 250 for additional information)

Lugs and Tie Points

for Bobbins, Coil Forms, Shield Cans

THRU-LUG TERMINALS—are precision stamped with sections that, when staked, clinch the terminal securely to both sides of the board. Catalog Section #406.

EXTRUDED COLUMN LUGS—designed for high-strength retention in circuit and terminal boards. Job-matched machines rapidly stake as many as six lugs simultaneously. Catalog Section #407.

COIL FORM AND BUTTERFLY TERMINALS—feature specially designed tips for rapid insertion and immediate retention in circuit boards. Provide wrapping and soldering points for coil winding wire. Catalog Section #202.

CAN LUGGING SYSTEMS—Berg offers a complete line of lugs for mounting shield cans to circuit boards. Designs include flat-sided or cylindrical can types for flush or elevated mounting and four styles to automatically key cans. Catalog Section #203.

BOBBIN TERMINATIONS—Berg's system for inserting lugs into molded bobbins eliminates costly insert molding and provides secure connection points. Available in thru-lug and blind-pocket types. Catalog Section #204

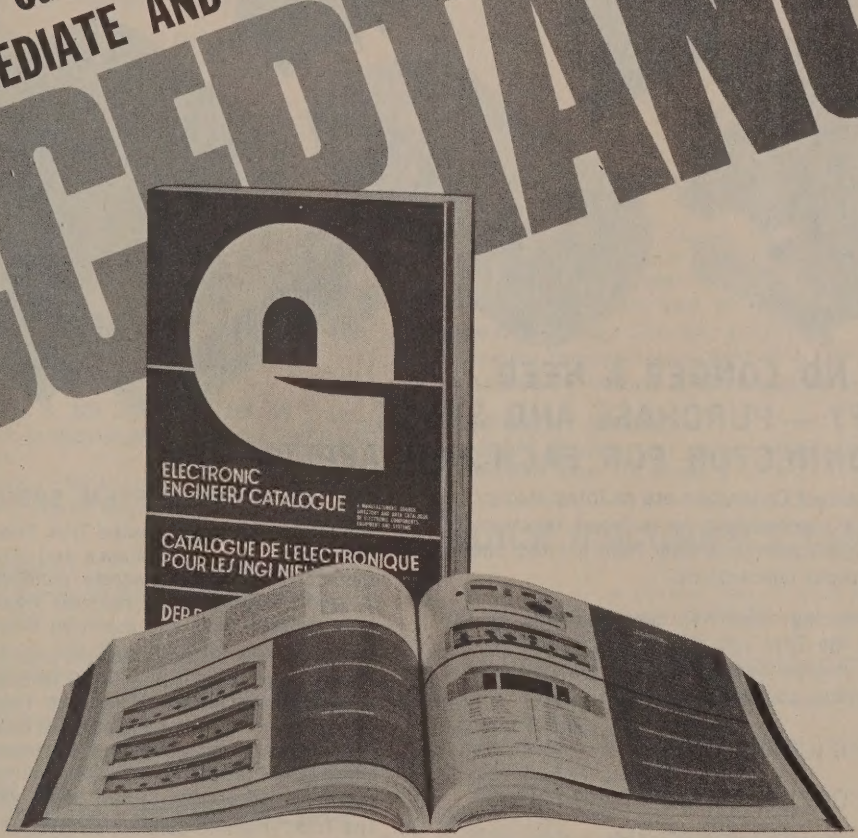
ELECTRONIC ENGINEERS CATALOGUE
CATALOGUE DE L'ELECTRONIQUE POUR LES INGENIEURS
DER PRODUKTKALOG FÜR ELEKTRONIKER

The book is out...and the response is in...

IMMEDIATE AND OVERWHELMING

ACCEPTANCE



The ELECTRONIC ENGINEERS CATALOGUE is the only comprehensive, trilingual catalogue/source-directory of electronic products available to - and from - Western Europe and the United Kingdom.

It is divided into three distinct sections: 1. **The Product Index and Directory,** which lists more than 3,000 products alphabetically in English with their French and German equivalents. 2. **The Manufacturers' Catalogue Section,** which is a compilation of Manufacturers' Catalogues in alphabetical order. 3. **The Manufacturers' Sales Offices and Trade Marks Directory,** which alphabetically includes country, address, telex or TWX numbers of the Manufacturers' main and local sales offices and/or agents.

The ELECTRONIC ENGINEERS CATALOGUE offers U.S. manufacturers the most cost-efficient method of distributing their catalogue data to **25,000** electronic engineers and buyers throughout Western Europe and the United Kingdom. It represents the carefully conceived application of the time-proven **eem** "cataloging" concept to the elusive European marketplace.

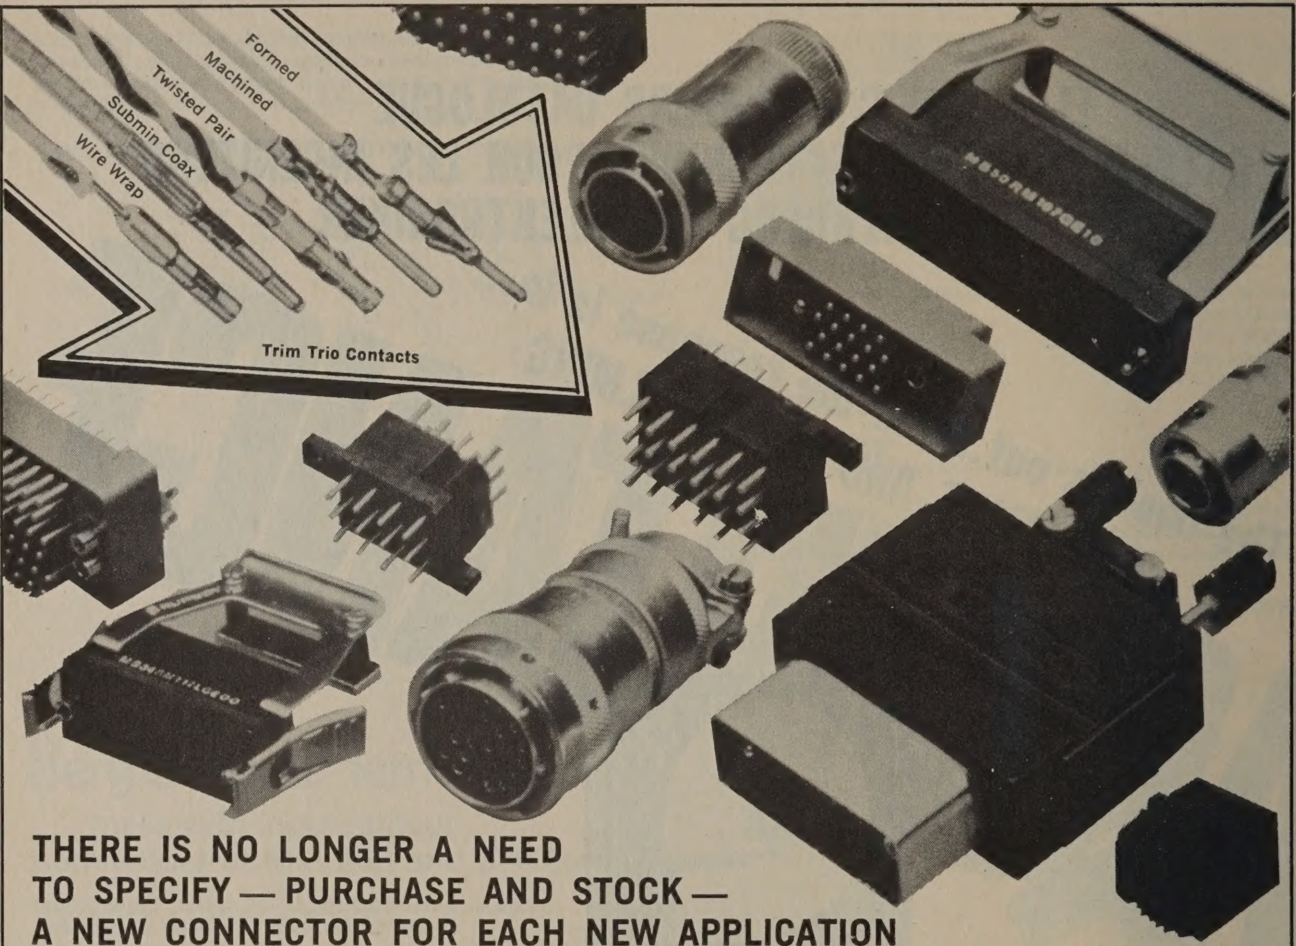
BURNDY

TRIM TRIO™ INTERCONNECTION SYSTEM



THERE IS NO LONGER A NEED TO SPECIFY — PURCHASE AND STOCK — A NEW CONNECTOR FOR EACH NEW APPLICATION

The Trim Trio™ Contact Connectors are an integrated group of reliable, versatile connectors for a broad spectrum of interconnection applications, varying from printed circuit board to input/output connections.

True value engineering objectives are obtainable by the Universal use of the Trim Trio contacts and their associated connectors. Independent of external geometries and mounting techniques, commonality exists in:

CONTACT CONFIGURATION

RETENTION CONFIGURATION

HOUSING (INSERT) CONTACT CAVITY CONFIGURATION

CRIMP TOOLING

ASSEMBLY PROCEDURES

QUALITY ASSURANCE PROCEDURES

MAINTENANCE AND FIELD SERVICE PROCEDURES

PERSONNEL TRAINING

ONE CONTACT SYSTEM SERVES THEM ALL

The internationally accepted Trim Trio contacts will fit into a variety of connector shapes and sizes from 1 up to 152 contact positions in discrete connectors and up to 456 contact positions using modular frames. All are serviced with common tools and assembly methods.

The Trim Trio contacts accommodate an extensive range of wire sizes from No. 14 AWG through No. 28 AWG, plus subminiature coaxial cables and twisted pair wires. Any combination of contacts, wire and cable, in any connector family, of any geometry may be used. Additional contact termination variations are available to accommodate wire wrapping and printed circuit board mounting.

The Trim Trio Interconnection System assures the benefits of convenience in the evolution and expansion of equipments and product lines by maximizing the available choices and options to the equipment designer.

No matter how many different combinations you use, you still get all the advantages of standardization, faster, more economical assembly, reduced inventory, uniform quality control procedures, universal tooling, simplified operator training.

Design goals and objectives easily achieved with the Trim Trio Interconnection System are:

STANDARDIZATION/VERSATILITY

RELIABILITY/ECONOMY

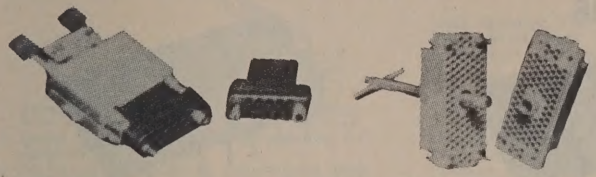
RACK AND PANEL CONNECTORS
TRIM TRIO INTERCONNECTION SYSTEM

RECTANGULAR Connectors



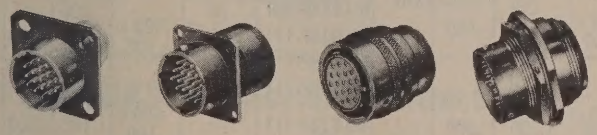
PHYSICAL AND ELECTRICAL

Number of Contacts: 14, 20, 26, 34, 42, 50, 75, 104, 152
Test Potential: 200 VAC at 60 Hz
Operating Voltage: 750 VAC at 60 Hz
Operating Temperature: −55°C to +125°C
Insulation Resistance: 5,000 Megohms (min.) at 500 VAC

COMPONENT MATERIALS

MS-M Blocks: Glass-filled Phenolic per MIL-M-14F, Type MFH
MSD-M Blocks: Diallyl Phthalate per MIL-M-19833
Guide Pins and Sockets: Brass per ASTM B1.6 (accessories #303 stainless steel)
Keyed Jacks and Rotating Jacks: #303 stainless steel

BANTAMATE™ Connectors



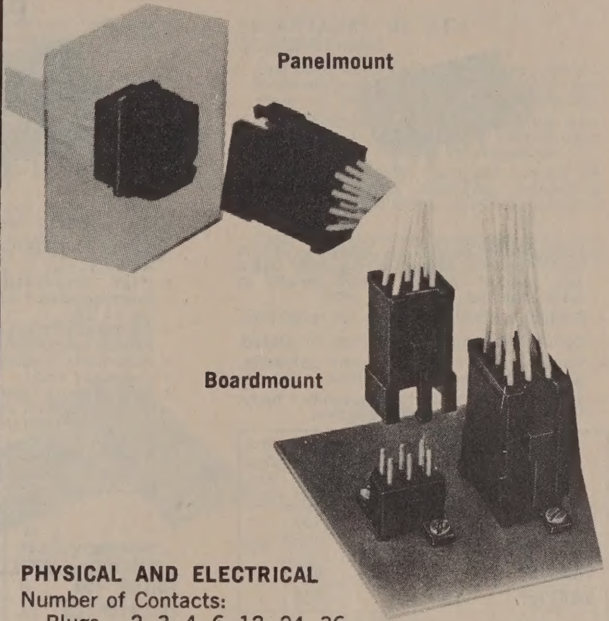
PHYSICAL AND ELECTRICAL

Number of Contacts: 4, 8, 12, 19, 22, 30, 38, 48
Test Potential (Dielectric Withstanding Voltage): 2,000 VAC, 60 Hz for 1 minute
Operating Temperature: −55°C to +125°C
Insulation Resistance: 5,000 Megohms (min.)
Durability: 500 cycles

COMPONENT MATERIALS

Plug and Receptacle Shells: High strength aluminum
Finishes: Consult factory
Inserts: Diallyl Phthalate per MIL-M-19833
Terminations: High strength aluminum

QIKMATE™ Connectors



PHYSICAL AND ELECTRICAL

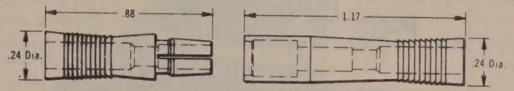
Number of Contacts:
- Plugs — 2, 3, 4, 6, 12, 24, 36
- Boardmount Receptacles — 2, 3, 4, 6, 12, 24, 36
- Panelmount Receptacles — 6, 12, 24, 36

Test Potential: 2,000 VAC, 60 Hz
Operating Voltage: 250 VAC at 60 Hz
Operating Temperature: −55°C to +105°C
Insulation Resistance: 5,000 Megohms at 500 VAC

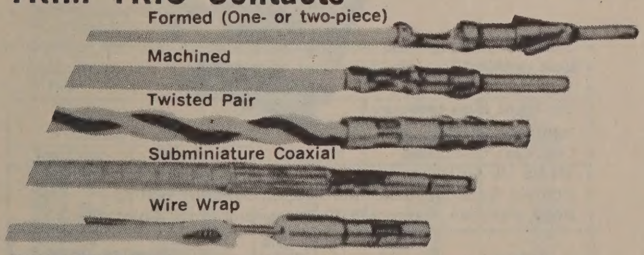
COMPONENT MATERIAL

QIKMATE Blocks and Components: Nylon per MIL-M-20693A Type III, Grade E

QUICK DISCONNECT Cable Splice



TRIM TRIO Contacts



TRIM TRIO Contacts fit all the above connectors; rectangular, cylindrical, and QIKMATE. Differing types of contacts can be applied in any one connector body. Mix and match all contact variations. See opposite page for more information on the TRIM TRIO system.

PHYSICAL AND ELECTRICAL

Contact Voltage Drop:
Machined — 23 millivolt, max.
One-/two piece — 25 millivolt, max.

Contact Rating:
- Machined — 13 Amp
- Two-piece — 7.5 Amp
- One-piece — 5 Amp

Wire Range:
- Machined — #16 to #28 AWG per MIL-W-16878 or equivalent
- Two-piece — #14 to #26 AWG
- One-piece — #16 to #26 AWG

Note — For subminiature coaxial, wire wrap, and twisted pair contacts consult factory.

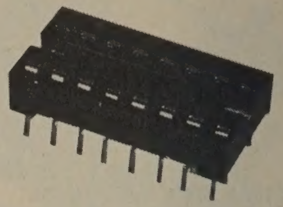
ECONOMY P-111



- Exclusive GTH™ contacts for highest reliability. Yet costs less than 1¢ per line in volume.
- Self-extinguishing thermoplastic body. Flammability Rating: UL 94V-0
- Compact size for high-density packaging. Profile height only .175″ max.
- Automatic loading capability.
- Polarized body.
- Self-aligning contacts.
- Unique contact design prevents wicking.
- Contact Material: Copper alloy.
- Body Material: Thermoplastic polyester glass-reinforced. Color, black with white stripe for identification.

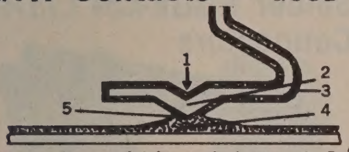
BURNDY

GTH™ CONTACTS FLEXLOK™ CONNECTORS

GTH Contacts — GOOD AS GOLD — AT A FRACTION OF THE COST



1 Spring force maintains contact pressure. Prevents fretting corrosion.
2 Unique contact geometry concentrates pressure at point of contact for gas-tightness.
3 Whisker-free tin-alloy plating.
4 Ordinary soft solder target rather than gold.
5 High-pressure plastic deformation forms gas-tight, corrosion-free contact without the use of gold.

With Burndy GTH connectors, you enjoy the performance characteristics of gold — without suffering its high cost.

The secret behind the amazing performance of GTH is the use of high pressure plastic deformation to achieve a gas-tight, corrosion-free contact, and a contact geometry that provides an ingenious mechanical interlock to insure good metal-to-metal contact despite vibration or thermal expansion.

Burndy GTH contacts not only eliminate the need for gold in the connector, they eliminate gold in the mating component as well. You save both ways — without sacrificing performance or reliability.

ADVANTAGES OF GTH CONNECTIONS

- **Low Cost, High Reliability:** Helps you cut interconnection costs up to 33% and more — without sacrificing reliability.
- **Interchangeability:** May be used with existing gold, tin or solder-plated components with no loss in reliability.
- **Design Flexibility:** Compact design for close packaging densities, simplified handling, installation and field serviceability.
- **Ease of Installation:** Requires no special tooling or operator training. Installs like any ordinary connector.

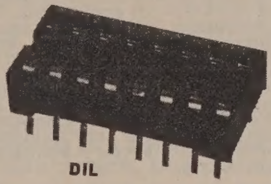
GTH™ Contacts are used with these connectors:

FLEXLOK™ FC (Flat Cable)

EDGE-TITE™

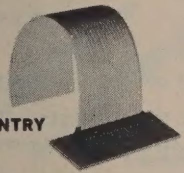
QIKSTACK™

FLEXLOK™ RC (Round Cable)



DIL

FLEXLOK™ FC Series Connectors



TOP ENTRY

SIDE ENTRY

- For flexible printed circuitry and flat cables.
- Top and side entry styles available.
- Will accommodate flat cable thicknesses from .005″ to .022″.
- Exclusive GTH contacts using tin instead of gold give total savings up to 60% with reliability equal to gold even in hostile environments.
- Solder connector to pc board so no extra handling.
- Supplied complete with assembled contacts so no special tooling or operator training needed.
- Compact low profile design.
- Self-extinguishing thermoplastic body. Flammability Rating: UL 94V-0
- Contact Material: Copper alloy, tin alloy plating.
- Body Material: Thermoplastic polyester, glass-reinforced. Color, black.

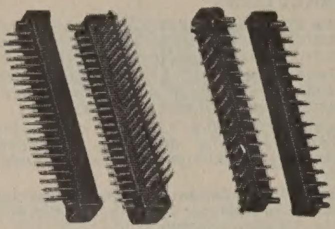
BURNDY

PRINTED CIRCUIT CONNECTORS

Solder Plug and Receptacle — Qualified MIL-C-55302



TYPE UPC — .100″ AND .150″ SPACING

The UPC Series is an ultraminiature plug and receptacle printed circuit connector. It is used in board-to-board (both single- and multi-layered) applications. The plugs accommodate .062″ thick boards; the receptacles .094″ thick boards. Both plugs and receptacles are dip soldered to the pc board though some sizes can be obtained with solder-cup or solderless wire wrap terminations. Both two-row and three-row styles are available. The two-row can be ordered with either .100″ centers or .150″ centers. The three-row is available in .100″ centers only.

Two-row, .100″ Centers: Available contact positions — 17, 25, 33, 41, 77

Two-row, .150″ Centers: Available contact positions — 17, 23, 28, 41

Three-row, .100″ Centers: Available contact positions — 13, 25, 37, 49, 59, 61, 92, 107

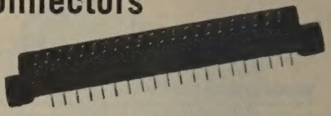
Performance Characteristics

Operating Voltage: 300 VAC, 60 Hz
Current Rating: 3 Amp
Operating Temperature: −55°C to +125°C
Contact Resistance: Measured at 0.010 Amp shall not exceed .010 ohms average and .020 ohms individual
Insulation Resistance: Between adjacent contacts, 1,000 Megohms min.

Materials

Connector Bodies: Glass-filled Diallyl Phthalate per MIL-M-14F, Type SDG-F. Color, green
Contacts, Pin and Socket: Beryllium copper per QQ-C-530 plated in accordance with MIL-C-55302
Guide Pins and Guide Sockets: Brass per QQ-W-321b composition B plated in accordance with MIL-C-55302

Solder EDGE-ON™ Connectors



TYPE PSC — .156″ SPACING

The PSC EDGE-ON Connector is available in 15 and 22 contact positions spaced .156″ center-to-center. Termination is solder dip. These connectors can accept single-sided boards (.058″ to .072″ thick) and double-sided boards (.054″ to .072″ thick).

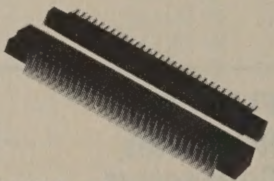
Performance Characteristics

Operating Voltage: 350 VAC or 490 VDC
Current Rating: 3 Amp
Operating Temperature: −55°C to +175°C
Initial Contact Voltage Drop: 50 millivolt max. at 3 Amp
Insulation Resistance: 5,000 Megohms

Materials

Body: Glass-filled phenolic per MIL-M-14F, Type MFH. Color, green
Spring Contact: Beryllium copper per Fed. Spec. QQ-533
Finish: 30 microinch min. gold

Solder Plug with Solderless Wrap Receptacle



TYPE ML2B — .100″ SPACING

The ML2B Series two-piece connectors are tooled for 16, 28, 40, 80, and 100 contact positions. Other sizes, in increments of two positions, are available on special order. The receptacle half of the connector has .025″ square solderless wrap posts on a .100″ square grid. The right-angle type plug has solder dip terminations on .100″ centers.

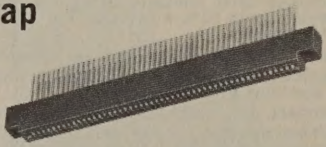
Performance Characteristics

Operating Voltage: 300 VAC
Current Rating: 3 Amp
Operating Temperature: −55°C to +125°C
Contact Resistance: 30 milliohms max. at 3 Amp
Insulation Resistance: 5,000 Megohms min.

Materials

Body: Glass-filled Phenolic per MIL-M-14F, Type MFH
Socket Contact: Phosphor bronze Grade A per Fed. Spec. QQ-B-750 or QQ-W-321
Blade Contact: Brass, CDA alloy #260 Fed. Spec. QQ-B-613
Plating: 20 microinch gold over nickel in contact area; 5 microinch min. gold over nickel for remainder of contact

Solderless Wrap EDGE-ON™ EDGE-TITE™



PWBH4DD — .100″ SPACING, Gold Contacts
ETBH4DD — .100″ SPACING, GTH Contacts

This .100″ by .200″ wiring grid connector is available with 10, 15, 22, 25, 30, 36, 40, 43, and 50 contact positions in single-sided or double-sided construction. Other sizes can be made available on special order. Solderless wrap tail lengths are either .200″ or .630″.

Performance Characteristics

Working Voltage: 230 VAC, 330 VDC
Current Rating: 5 Amp
Operating Temperature: −55°C to +125°C (Edge-Tite to +105°C)
Contact Resistance: 30 milliohms max. at 5 Amp
Dry Circuit: 25% variance max. on contact resistance spec.
Insulation Resistance: 5,000 Megohms min.

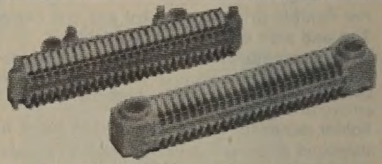
Materials

Body: 30% glass-filled polyester to MIL-M-24519. Color, black

PWBH
Spring Contact: Phosphor bronze, Grade A per Spec. QQ-B750
Plating: 20 microinch gold plate over nickel on contact areas and 5 microinch gold plate over nickel for remainder

EDGE-TITE
Spring Contact: Copper alloy
Plating: Tin alloy

QIKSTACK™ Stacking Connectors



FEED-THRU AND SOLDER TAIL TYPES — .100″ SPACING

QIKSTACK Connectors are designed for interconnections between two parallel pc boards. Contacts on the connector press tightly against solder pads on the pc boards. These connectors also can be obtained with one side having solder tails for permanent soldering to the pc board. Two body configurations are available. The B6054966 version has a body height of .335″ and has 28 contact positions. The B6056984 version has a body height of .387″ with 25 contact positions. Integrally molded mounting/alignment bosses on both versions ensure the proper alignment of the GTH contacts with the pc board solder pads.

Performance Characteristics

Operating Voltage: 300 VAC
Current Rating: 3 Amp
Operating Temperature: −25°C to +85°C
Contact Resistance: 30 Milliohms at 3 Amp
Insulation Resistance: 100 Megohms min. between any two positions

Materials

Body: Thermoplastic polyester. Color, natural
Contacts: B6054966 — Copper alloy
B6056984 — Phosphor bronze
Plating: Tin/lead
Flammability Rating: UL 94V-0

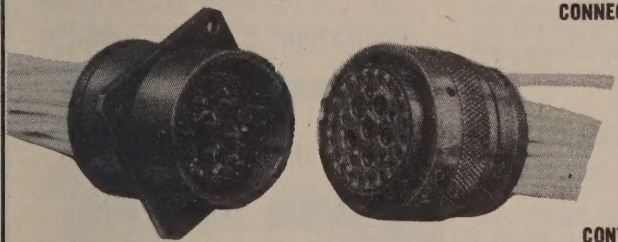
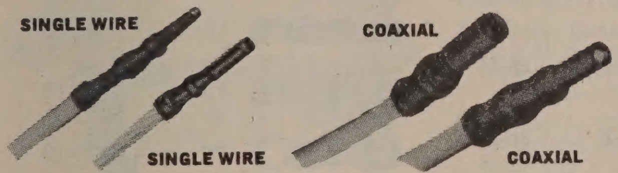
MIL-C-26482 Miniature Environmental



CONNECTORS Burndy is a military qualified manufacturer of these connectors and contacts. Known as SMOOTH BANTAM they are available with either solder contacts as an integral part of the connector or crimp, removable contacts. They are intermateable and interchangeable.

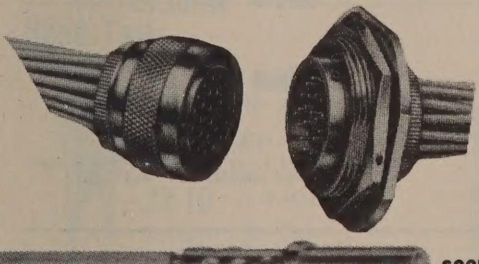
Operational within a temperature range of −55°C to 125°C, they are shock and vibration resistant. Moisture resistance is provided by interfacial and wire seal grommets. SMOOTH BANTAM will accommodate AWG #24 thru AWG #12.



CONTACTS The military qualified crimp removable contacts may also be ordered separately; reel mounted for semi-automatic "BANDOMATIC" installation. Burndy can provide crimping machines. This offers significant cost savings over more expensive hand crimping.

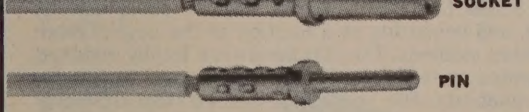
Standard signal and power contacts, coaxial contacts as well as thermocouple (Alumel/Chrome or iron constantan) are available.

MIL-C-38999 Miniature Environmental

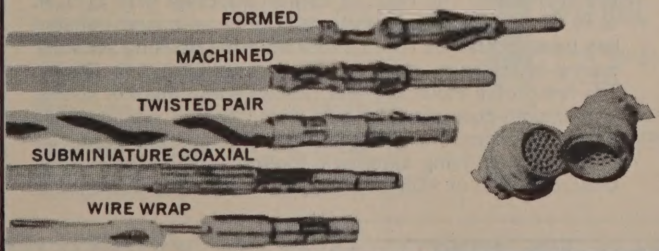


CONNECTORS The COMPACT BANTAM connector has received full military qualification. The design is a rear release type and they are manufactured to meet the reliability requirements of MIL STD 790.

Operational within a range of −65°C thru 200°C, COMPACT BANTAM has the capability of meeting very high vibration and shock parameters. In addition to high moisture resistance, the connectors have been designed to resist a variety of exotic fluids as well as hydraulic and lubrication oils.



CONTACTS Qualified contacts of all specification sizes are normally supplied with connectors. Contacts may be ordered separately, mounted for machine crimping on the BANDOMATIC machine. Coaxial contacts in #16 and #12 sizes are also available.



TRIM TRIO BANTAM Connectors

Part of the TRIM TRIO family these cylindrical connectors can be equipped with a mixture of contact sizes and styles from the collection of TRIM TRIO contacts shown. All contacts are crimp removable. More details on p 1811.

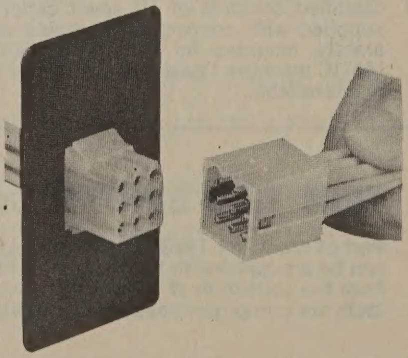
HYLOK™ Connector System Series 900



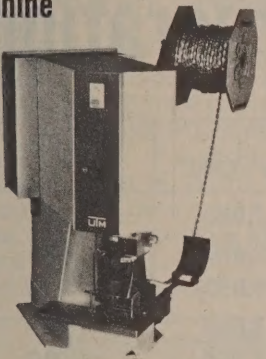
The 900 Series Connector System, HYLOK, offers quality, reliability, and versatility at a fraction of the cost of more sophisticated methods. The 900 Series is a totally matched and integrated system of housing, contacts, and tooling for low-cost reliability. The housing is molded from UL-recognized 6/6 nylon that is tough, resilient, and has good dielectric properties. The housing can be supplied with 2, 3, 4, 6, 9, 12, or 15 contact positions. The panel-mount housing has integral take-up springs that hold the housing securely over a wide range of panel thicknesses (.025″ to .125″). The low profile mounting ears occupy a minimum of space. The smooth-nose pin and bell-mouth socket provide easy and sure mating. The contacts are crimp removable and can be assembled using automatic tooling such as the Burndy UTM, or ASET, or ADET.

BURNDY CORP. / DEPT. EM / NORWALK, CT 06856 / TEL: (203) 838-4444

BURNDY

INSTALLATION TOOLING

UTM-Universal Terminating Machine

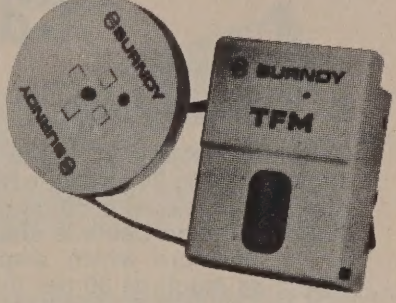


The Burndy UTM installs open barrel — end or side fed — strip terminals and contacts. The crimp mechanism has a dial selection for independent wire and insulation crimp heights. Crimp a wide range of wire sizes without changing the crimp tooling. The UTM is electrically powered and controlled.

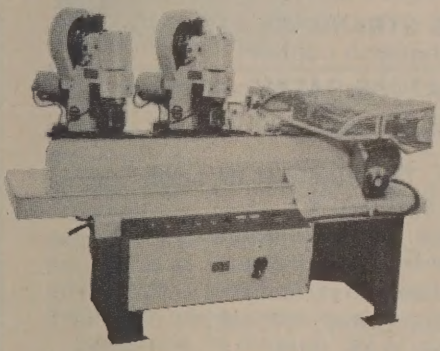
BANDOLUG™-Semi-Automatic Terminating Machine

Burndy's BANDOLUG machine is fed with terminals mounted on a continuous metal band. A sensing unit is featured which insures the correct positioning of the stripped wire into the terminal and automatically trips the crimp cycle.

TFM-Tape Fed Machine



The Burndy TFM machine installs vinyl insulated, nylon insulated and uninsulated terminals sizes #22-#10 without time-consuming die changes. Rotating turret die holder consists of three die sets. The TFM is powered by air and electrically controlled.



ASET-Automatic Single End Terminator (see photo)

Wire Range: #22-#10 AWG

Lead Lengths: 3½″ to 194″

Terminals: Open Barrel — fed from continuous strip
Closed Barrel — insulated or uninsulated — fed from tape.

Rates: Up to 60,000 leads per hour, terminated one end — stripped the other end

ADET — Automatic Double End Terminator

Wire Range: #24 to #10 AWG.

Lead Lengths: 7½″ to 100″

Terminals: Open Barrel — fed from continuous strip.

Closed Barrel — insulated or uninsulated — fed from tape mounted.

Rates: Up to 4000 leads per hour, terminated both ends.

Hand Tools

HYTOOL™ MR8-(RATCHET TOOL)

Wire Range:
22-10
Weight: 1 lb. 7 oz.
Length: 10½″

HYTOOL M8ND (RATCHET CONTROL)

Wire Range:
26-8
Weight: 1¾″
Length: 10¾″
Removable "N" dies

HYTOOL M10S-1 (RATCHET TOOL)

The M10S-1, four indent full cycling, ratchet controlled hand tool is a high reliability installation tool, conforming to the requirements of MIL-T-22520 and MS-3191. These specifications cover crimp and tool configuration required to install the Military Standard contact barrel specified in MS-3190. All contact sizes covered by MIL-C-39029 can be accommodated.

HYTOOL Y10M

Wire Range:
22-10
Weight: 10½ oz.
Length: 9⅜″

BURNDY
BANDOMATIC

BANDOMATIC™

The automatic four and eight indent, BANDOMATIC machine meets the applicable sections of MIL-T-22520 and MS-3191. It is recommended for high speed, high quantity production. Crimping rates are better than two thousand per hour.

C³ RIBBON CABLE

C³ Ribbon Cable is available in standard PVC insulation, utilizing 28 gauge, seven-strand #36 copper wire. Flat cable with 30 gauge solid wire is available. C³ Ribbon Cable is ideal for use with U-contact connectors which displace insulation, thus saving as much as 90 per cent in production time and 50 per cent in termination costs. Spacing between conductors is .050″, with controlled tolerance of ±.002″, providing predictable/controlled capacitance, attenuation and impedance. Precise, controlled spacing also makes possible accurate matching of conductors with circuit board and connector hole patterns.

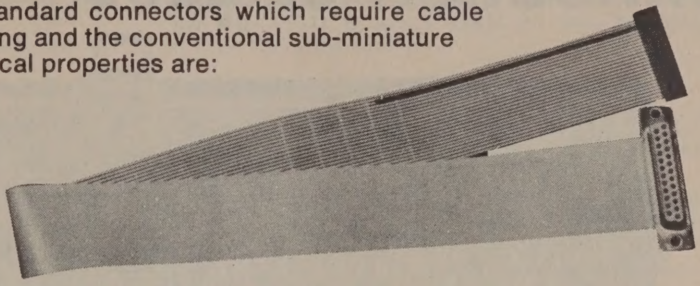
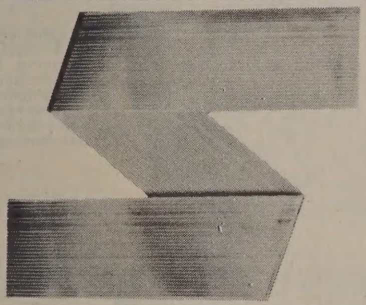
TRANSITION CABLE (PVC)

Cable to allow connection between standard connectors which require cable spacing at .050″ center-to-center spacing and the conventional sub-miniature D type of input output is available. Typical properties are:

Impedance (Zo) 94 ohms
Ground-Signal-Ground
Capacitance: 14.6 pf/Ft
Inductance: 0.16 μH/Ft
Propagation Delay: 1.46 NS/Ft

The cable is available in 26 AWG bare copper or 28 AWG (7/36) TC and is 25 conductors wide.





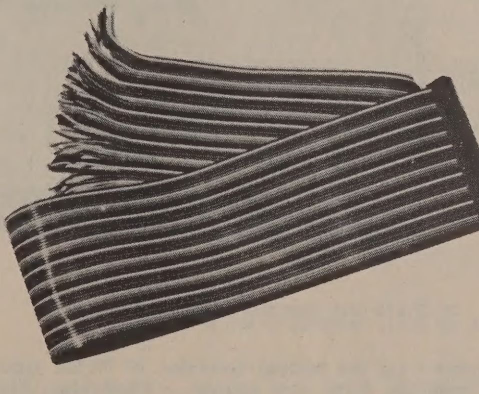
FLAT CABLE WITH RECTANGULAR CONDUCTORS

Generally speaking rectangular conductor cable is used with Mylar* or Kapton* as the insulation. The requirement varies from customer to customer and are all considered special. The advantage of flat conductor flat cable is better form factor and head dissipation and the combining of different effective gauges by varying the width of the conductors.

MULTICOLOR RAINBOW CABLE (PVC)

Multiple conductor ribbon cable made by laminating discrete pre-insulated wires in 10 colors and repeat allows mass termination techniques to be used with conventional wiring. The individual wires can be separated and wired to lights, switches, fuses, and actuators in different locations while still taking advantage of precise centers and the use of insulation displacement connectors.

Generally, 28 AWG (7/36) TC conductors are used and laminated on .050″ centers. The general specifications of the solid color cable using the same wire construction and spacing will apply. Special constructions and color sequences for specific production applications can be supplied.



EXTREME ENVIRONMENTAL CONDITIONS

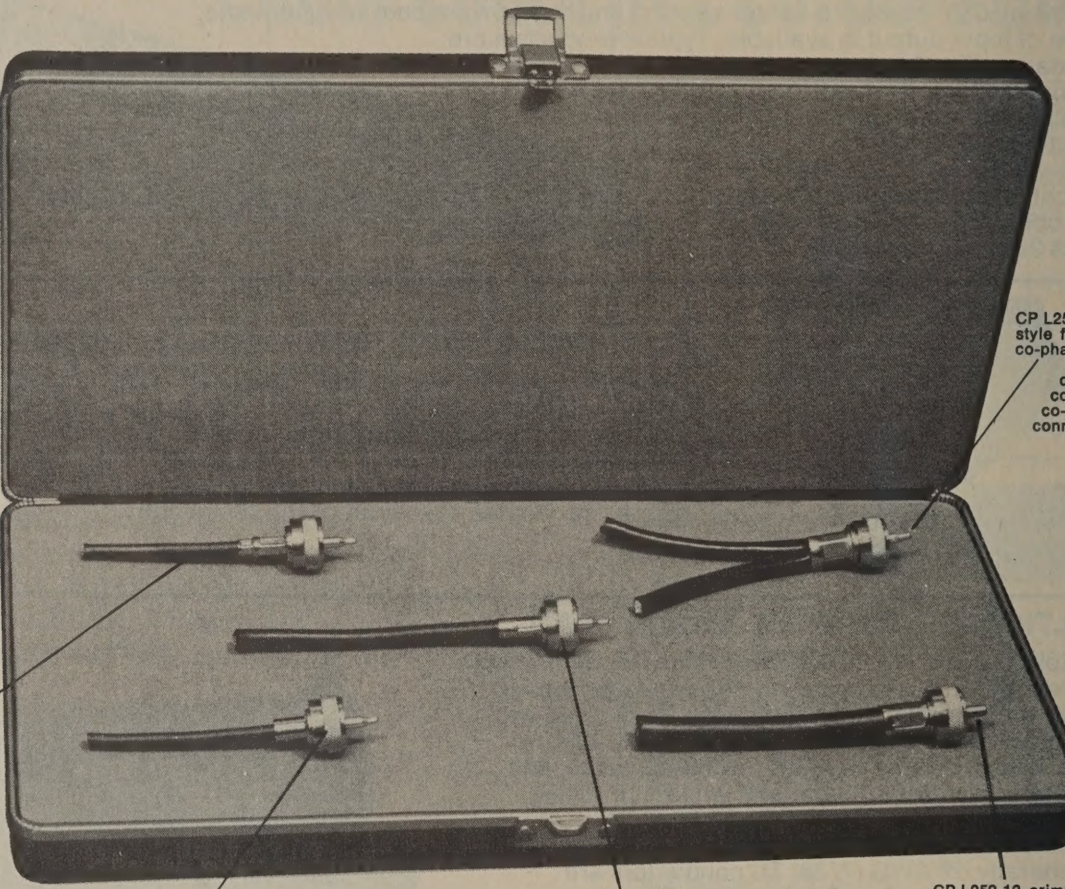
C^3 Ribbon Cable with special insulations is available to resist extreme thermal, electrical, chemical or physical conditions.

FIGURE 2
COMPARATIVE EVALUATION OF DIFFERENT INSULATIONS****

	Temp. Range °C	Chemical Resistance	Dielectric Properties*	Relative Cost Position**	Application
Vinyl Insulated Wire Vinyl Film	−25 to +80	Excellent except for some organic solvents	dc 3.9 Avg. Hipot > 500V/mil	8	General Usage Low Cost
Teflon Insulated Wire Vinyl Film	−25 to +80***	Excellent except for some organic solvents	dc 2.5 Hipot > 500V/mil	5	High temperature Chemical Resistance
Teflon Insulated Wire Teflon Film	−76 to +200	Excellent	dc 1.8 Hipot > 500V/mil	2	High temperature Chemical Resistance
Teflon Insulated Wire Teflon & Kapton Films	−76 to +225	Excellent	dc 2.1 Hipot > 500V/mil	1 - Most Expensive	Thermal stability Chemical Resistance
Bare Wire Mylar/Polyolefin Film	−76 to +80	Very Good	dc 2.0 Hipot > 500V/mil	7	Excellent dielectric properties — good chemical properties
Bare Wire Polyester/Adhesive Film	−76 to +125	Very Good	dc 2.5 Hipot > 500V/mil	6	Good design versatility — may be single side insulation
Bare Wire Vinyl Film	−25 to +105	Excellent except for some organic solvents	dc 2.7 - 5 Hipot > 500V/mil	9 - Least Expensive	High density wiring Low Cost
Bare Wire Teflon Film	−76 to +200	Excellent	dc 1.6 - 2.2 Hipot > 500V/mil	4	High density wiring, good chemical & electrical properties
Bare Wire Kapton Adhesive Film	−76 to +220	Excellent except strong alkalies	dc 2.7 Hipot > 500V/mil	3	High temperature thermal stability design versatility

*Average composite dielectric constant in cable form will vary with wire size and spacing.
**These figures are for cost relationship only. In some configurations these relative positions may change.
***Ends of wires may enter hostile environments if film support is not required in this area.
****Kapton, Mylar, Teflon are Dupont Trademarks.

The CAMBRIDGE Connection CP L259



CP L259-9 crimp style for 59U co-phasing. Easily installed compared to conventional co-phasing connectors.

CP L259-1 Crimp style for 58U cable. Specify CP L259-14 for 59U cable.

CP L259-15 field installable without special tools and without soldering for 58U or 59U cable.

CP L259-5 solder style for 58U or 59U cable. Also available is CP L259-6 crimp on ferrule/solder center pin.

CP L259-12 crimp style for 8U cable.

Your choice from the Widest Selection of PL259 type connectors available from one source . . . Cambridge Products Corporation. We have CP L259 models for 58U, 59U, 8U, 59U co-phasing and 58U co-phasing. You can also have your choice of crimp installation, solder installation, or installation with a field-installable connector which requires no special tools and no soldering. Whichever you need, CP L259 connectors are quality manufactured of brass with a bright nickel plate finish. A few of our more popular models are shown above. Made in U.S.A.

Our services don't stop with connectors themselves. For our crimp connectors, we offer a complete line of hand operated, manual bench mounted, pneumatic and electric crimp tools, each with the necessary crimp dies.

Shown here is our high-speed electric press, complete with dies and dual palm controls for safe operation.

CAMBRIDGE PRODUCTS CORP
A Hi-G Company

COMPAC™ LOW COST RFI SHIELDED CASES

COMPAC's line of cases gives the customer the choice of BLANK CASE assemblies without connectors, STANDARD CASES with flange mounted RF connectors, and RFI filter feedthroughs, and a CUSTOM LINE of cases made to order at low cost. An optional circuit board is available which is part of COMPAC's accessory group.

COMPAC's RFI shielded cases are effective from 60 to ≥ 100 dB @ 100 MHz. Even greater shielding capacity is achieved when an RFI gasket is positioned between the covers and the case frame. The cases are made of extruded aluminum alloy Type 6063-T5 with .12 thick walls. The top and bottom covers are made of .062 thick aluminum alloy, Type 6061-T4. Case enclosures are completely finished with a chemical film per MIL-C-5541 B, which makes for excellent conductivity. (Prices start from $9.85.)

BLANK SERIES

COMPAC's BLANK SERIES consists of blank cases in 13 standard sizes, with five various heights (.75, 1.00, 1.38, 1.75, 2.12). All have top and bottom covers mounted in place with four flat head machine screws. Extended covers are available to give mounting flexibility.

STANDARD SERIES

COMPAC's STANDARD SERIES consists of 9 standard case sizes, each having a top and bottom flush cover mounted in place with four screws (extended covers available), and a selection of four flange mounted "female" connectors (SMA, TNC, N, BNC) all military approved per MIL-C-39012. One nut plate is supplied with each connector which secures the connector to the case, and supports the circuit board providing an excellent ground plane. COMPAC's cases offer very easy accessibility to the circuit board. By removing the four screws, the top and bottom covers disengage to allow complete accessibility to both sides of the board. Three sample configurations are shown.

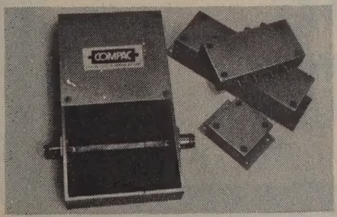
CUSTOM SERIES

COMPAC's CUSTOM SERIES serves the need for special design requirements where size, type and location of connectors and feedthroughs are important. COMPAC makes these cases in 13 basic case sizes found in the "blank" series. COMPAC works from drawings supplied by the customer to reduce design and drafting time, and makes the special cases to their specifications. COMPAC furnishes at no cost a software package consisting of to-scale, reproducible "A" size drawing forms. COMPAC also has the facilities to fabricate RF cases in all sizes. Contact factory for details.

ACCESSORY GROUP

COMPAC provides a full line of accessories including circuit boards, RF gaskets, feedthroughs, connectors and additional hardware.



This listing will give you some indication of the capabilities of COMPAC. For additional details and specifications, send for our complete catalog.

CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

For many years the electronic industry has relied on the wide range of products, engineering services and consistent production quality of Connector Corporation.

A limited cross section of Connector Corporation's line is illustrated. Your specific requirement can be exactly met and mass produced with good delivery. Many items can be supplied with leads attached and color coded, offering production savings for your assembly. Special items can be designed or developed at relatively low cost. Just let us know what you need.

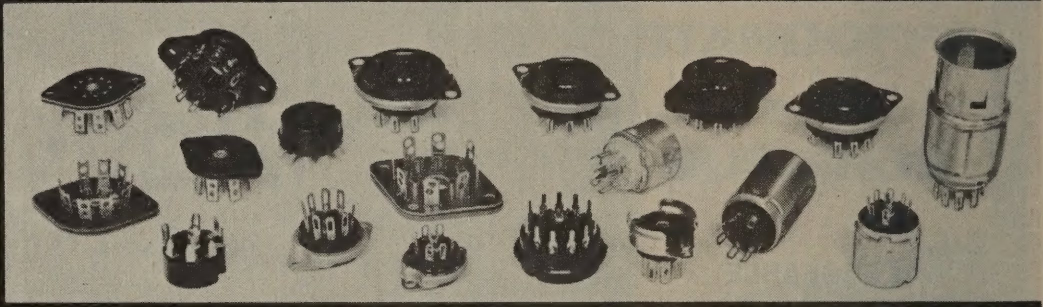
Products are available in a wide range of insulations and contact materials:

Insulations include: general purpose or mica-filled low loss Phenolic, glass filled alkyd, polypropolene, ceramic,etc., in molded versions. Laminated types include XP, XXP, XXXP Phenolics, X2B Hard Rubber, Glass Epoxy, Glass alkyd.

Contacts and Platings include: High tensile brass, phosphor bronze or beryllium copper with cadmium, electro tin, silver, hot tin dipped, silver-gold flash, gold plating, etc.

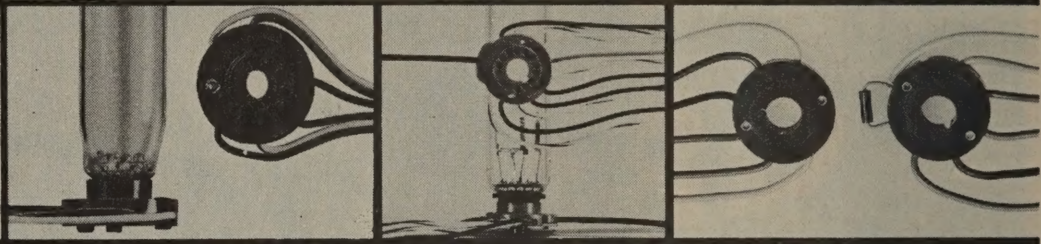
TUBE SOCKETS

Most standard and many special molded & ceramic configurations available as well as laminated socket types. Fixed or collapsible types of shielding are available.



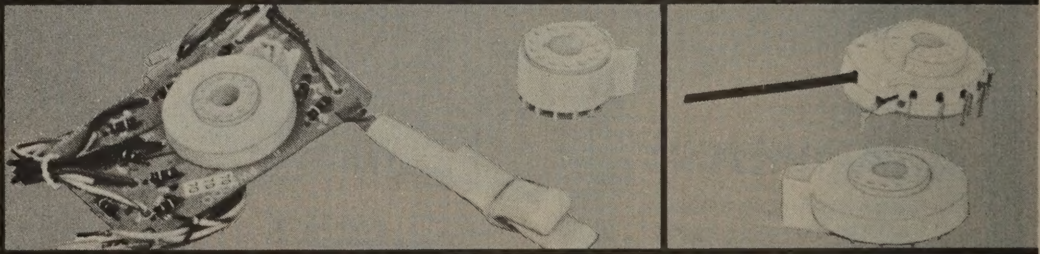
KINESCOPE SOCKET ASSEMBLIES

Include: Miniature Di Heptal Socket for 90° color tubes, 110° Eightar CRT sockets, miniature types for JEDEC E7-91, B7-247 basing (HEPTAL). Many special configurations and types may be furnished in quantity lots.



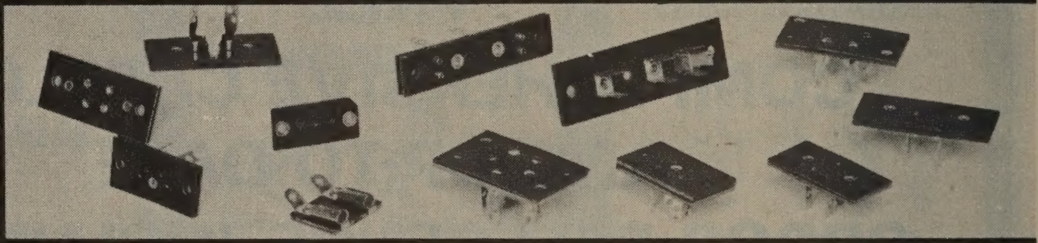
PC KINESCOPE SOCKETS

With or without internal spark gapping.



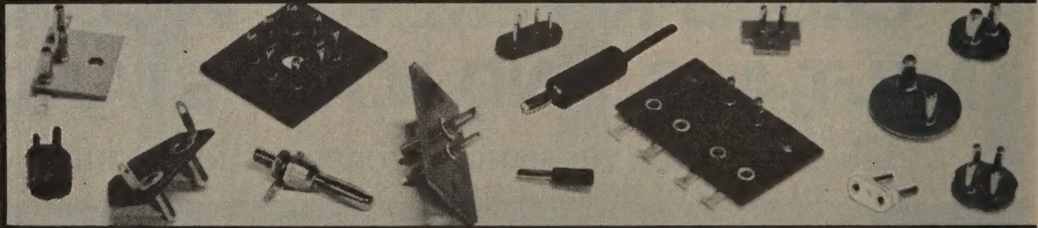
RECEPTACLES

Numerous varieties. Available in molded or laminated construction. Reliable contacts offer positive electrical and mechanical mating.



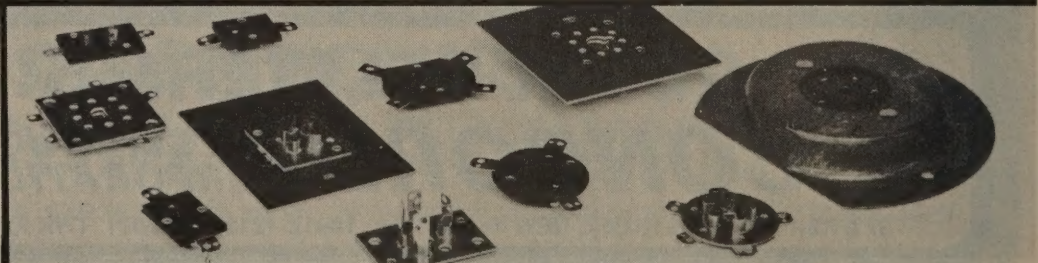
PLUGS

Numerous types available, with molded or laminated phenolic insulations. Leads may be supplied to specification.



BATTERY SOCKETS

Complete line for commercial & military batteries. Custom designed to your requirements.



CONNECTOR CORPORATION

6025 N. KEYSTONE AVENUE • CHICAGO, ILLINOIS 60646 • TELEPHONE: 312, 539-3108

TRANSISTOR SOCKETS

3- or 4-pin on .100 or .200 centers. Accept TO3 and TO66 types power transistors.

NUVISTOR SOCKETS

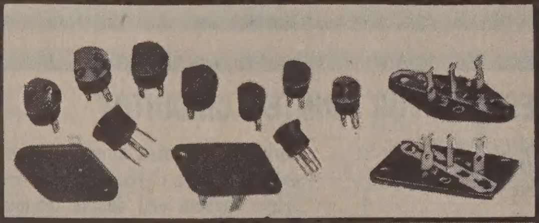
Miniature positive contact.

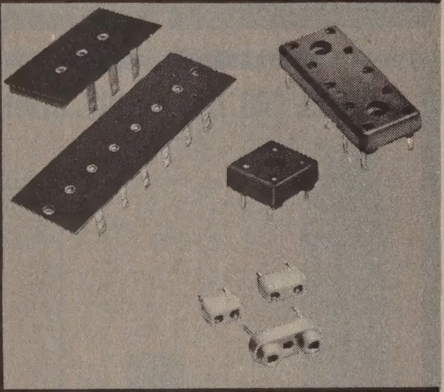
IC SOCKETS

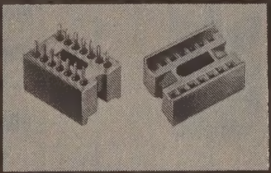
14-pin dual in-line on .100 centers.

CRYSTAL SOCKETS

Accommodate single and multiple crystals. Both p.c. and solder lug versions for crystals with .486, .273 and .192 pin centers and with .050 or .040 pin diameters. Available to MIL Specs.





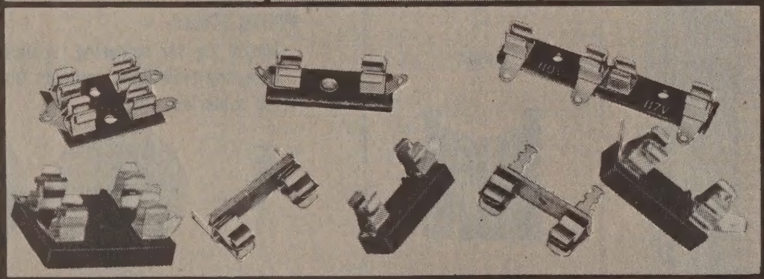


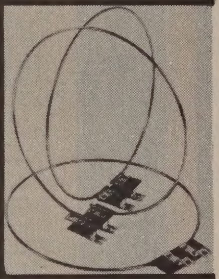
FUSE HOLDERS

Positive grip open type. Features: easy solderability, and versatility of construction which permit multiples or variations to your spec at reasonable cost.

UHF TV ANTENNAE

Attaches easily. Can be rotated in many different planes for optimum performance. Long life, trouble-free operation.



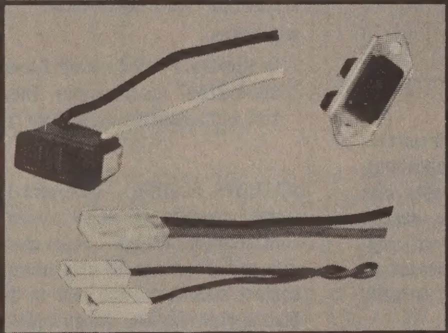


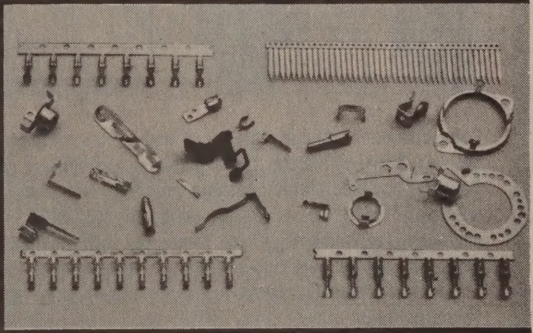
VARIOUS INSULATED CONNECTOR ASSEMBLIES

Includes 110 Volt AC Power Receptacles.

PRECISION METAL STAMPINGS

Bulk or chain type contacts, terminals and flat stampings for your high production needs.



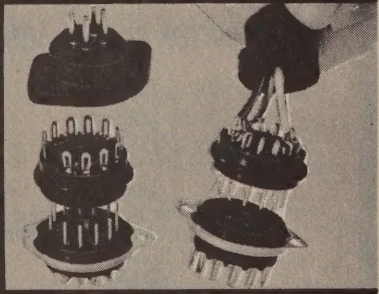


RF COAXIAL ANTENNA CONNECTORS

For auto receivers & similar applications. Rugged construction. Excellent contact resistance and retention.

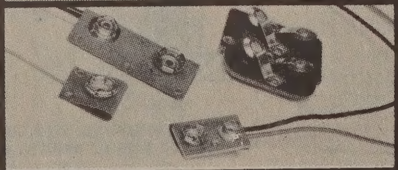
MULTI-PIN MALE/FEMALE CONNECTORS

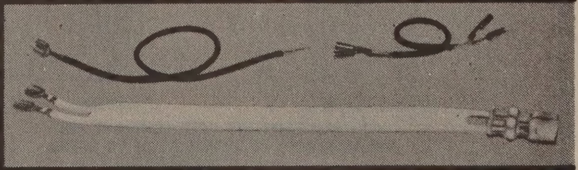
Provide quick reliable connect and disconnect for cable assemblies. Insert and extract easily, yet have reliable contact retention and resistance.



BATTERY CONNECTORS AND WIRE ASSEMBLIES

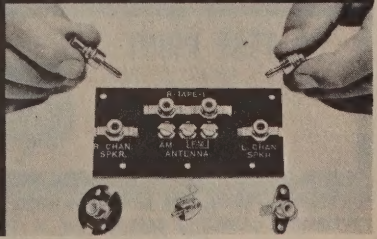
Snap-on and positive contact types available with wired leads if desired. Wire assemblies furnished to your specifications as to type of wire, length and termination attachments.





MULTI PURPOSE PHONO CONNECTORS

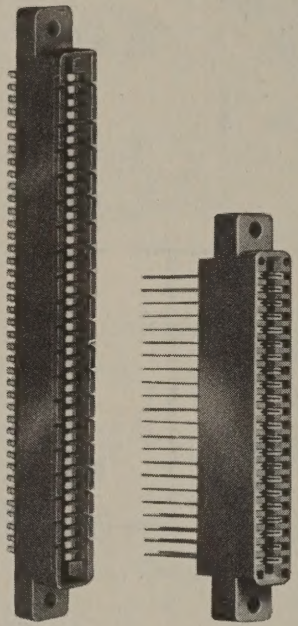
Sockets available in multiples up to 12 per section. Broad line of individual male and female types in a variety of mountings. Highly reliable for dependable repeated use.



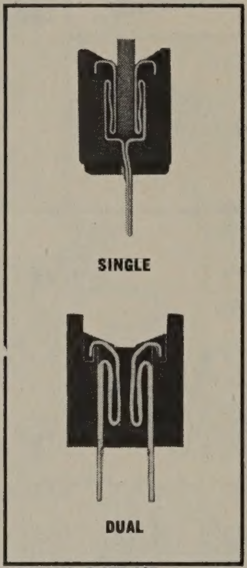
CONTINENTAL CONNECTORS

Precision Electronic Connectors For Commercial & Military Applications

SERIES 600 CARD-EDGE CONNECTORS FOR PRINTED CIRCUITRY



BELLOWFORM CONTACTS*



* PAT. NO. 2,875,425

Connector body molding material is made of a variety of compounds such as Diallyl Phthalate, for commercial and military applications. Contacts are gold plated phosphor bronze or beryllium copper with optional plating in accordance with all MIL SPECS or special customer requirements. These contacts, with "bellowform" construction, are durable and capable of withstanding thousands of insertions and withdrawals without failure; they are virtually indestructible.

Series 600 printed circuit connectors represent one of the most extensive lines of receptacle or card-edge types. A wide variety of single readout and double readout construction, with sizes from three to 210 contacts are available.

CONTACT CENTERS:

.050″, .075″, .100″, .125″, .140″, .150″, .156″ and .200″

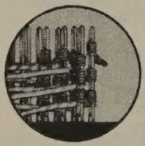
BOARD THICKNESS:

1/32″, 3/64″, 1/16″, 3/32″ and 1/8″

WIRING STYLES:

Eyelet lug for soldering, solderless-wrap terminations for wire-wrapping technique, contacts for dip or flow soldering and taper tab solderless wiring

EYELET LUG



SOLDERLESS-WRAP

DIP SOLDER

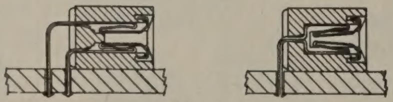
TAPER TAB

MIL SPECS:

Continental Printed Circuit Connectors meet or exceed applicable MIL-C-21097 specifications. They withstand a 50-hour salt spray test and ambient temperature range of −55°C to +125°C.

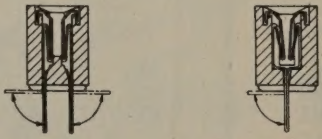
SELECTIVE PLATING — Continental's continuous process selective plating deposits an equal amount of gold on each contact. The contacts pass through various cleaning and plating baths, resulting in a controlled amount of gold uniformly deposited on the critical contact area. By plating gold on the contact surface only, selective plating automatically brings down your connector cost enormously.

PRINTED CIRCUIT APPLICATIONS



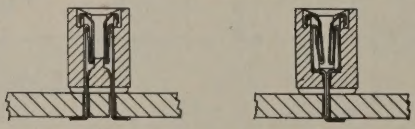
DUAL SINGLE

RIGHT ANGLE MOUNTING WITH CONTACTS FOR DIP SOLDERING TO UNDERSIDE OF PC BOARD



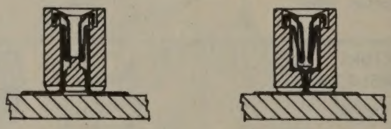
DUAL SINGLE

VERTICAL MOUNTING WITH CONTACTS FOR SRAIGHT OR RIGHT ANGLE HARNESS WIRING



DUAL SINGLE

VERTICAL MOUNTING WITH CONTACTS FOR DIP SOLDERING TO UNDERSIDE OF PC BOARD



DUAL SINGLE

VERTICAL MOUNTING WITH CONTACTS SOLDERED TO TOP SIDE OF PRINTED CIRCUIT BOARD

PC TEST POINT

SERIES 672. Provide conveniently located test points to check printed circuitry. Available with 4, 5, 6, 8, 10, 11, 20, 21, 28, 30, 42 and 63 contacts which grip and hold securely a standard .080″ test probe. Connectors have recessed and floating pin terminals mounted at right angle to the test socket. Pins dip solder to printed circuit board.

SERIES 6100-200 and 6125-250. The most extensive line of printed circuit connectors for miniature wire wrapping in the industry. All densities from 2 to 200 contacts can be supplied . . . the most popular sizes being tabulated above. Available in two grid patterns — .100 x .200 (Series 6100-200) and .125 x .250 (Series 6125-250) with .025 square terminals true positioned to make these particularly suitable for automatic wiring techniques. Terminal lengths to exact customer needs for one, two or three wraps; or for flow soldering to boards of any thickness. Choice of mounting styles — thru hole, thd. inserts, floating bushing, flat bottom and without mounting "ears." Connector body molding material may be any of a variety of compounds for commercial and military applications. Contacts are gold plated phosphor bronze with optional plating in accordance with all MIL specs or special customer requirements.

Voltage Rating (sea level) — 1800 V. RMS (.100 spacing); 2100 V. RMS (.125 spacing) Current Rating — 3 amps continuous.

CONTINENTAL CONNECTORS

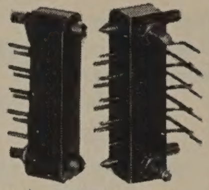
Precision Electronic Connectors For Commercial & Military Applications

RIGHT ANGLE SERIES PLUG & SOCKET TYPES FOR PRINTED CIRCUITRY

IN ACCORDANCE WITH MIL-C-55302, MIL-E-5400, MIL-C-28748 SPECIFICATIONS

.050″, .100″, .156″, .200″ CONTACT CENTERS

SERIES 145-5. 7, 9, 11, 15, 19, 23, 37 contacts. Solder cup on socket, dip solder pin for plug. For use in airborne electronic equipment in accordance with MIL-C-55302 specs.



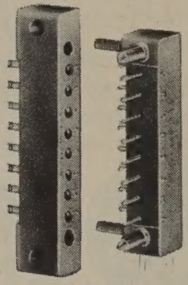
SERIES 145-5

SERIES 600-1-45. 17, 23, 25, 33, 41, 45 & 77 contacts on .050″ center spacing. Right angle configuration of two and three rows of dip solder contacts.

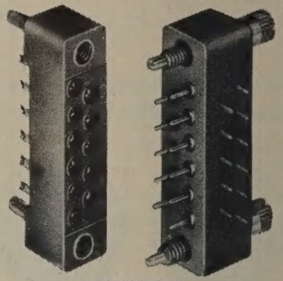
SERIES 600-1-50. 50 contacts on .100″ center spacing.

SERIES 670. 4, 8, 10, 12, 13, 22, 28 single row contacts on .156″ center spacing. Guide pins in plug and guide bushings in socket provide polarized mating of parts.

SERIES 683. 11, 12, 18, 19, 23, 32, 33, with polarizing screwlocks or guidepins and guide sockets. Meet aircraft requirements for vibration and high altitude.



SERIES 670_



SERIES 683

SERIES J RIGHT ANGLE OR STRAIGHT THRU WIRING — .050″/.100″ CONTACT CENTERS

9, 11, 15, 21, 25, 31, 37, 51 CONTACTS

These plug and socket connectors are widely used in all electronic systems. Their size and rugged construction make them particularly adaptable to aircraft applications. They can be used for mounting on single or dual sided printed circuit boards of varying thickness. The contact configuration is excellent for flat cable use. Plug contacts are integrally molded into the rugged body material and are protected by a high strength, single piece molded shell of glass fiber reinforced phenolic. Molding configuration prevents mismatching of plug and socket.

Socket contacts are wire crimp removable and free floating. They feature a self-wiping action that eliminates the need for precious metal plating such as gold. Excellent conductivity and a low millivolt drop. Hoods are available.

ELECTRICAL AND MECHANICAL RATINGS:

Voltages	Breakdown	Recommended Test
At Sea Level	2000V. RMS	1325V. RMS
At 70,000 Ft.	400V. RMS	300V. RMS

Current Rating: 3 Amps Continuous .... 5 Amps Max.
Minimum Creepage Between Contacts .... .047″
Minimum Air Space Between Contacts .... .047″
Male Contact Pin Diameter .... .030″
Crimp Barrel for Socket Contact: Accommodates #22, #24, #26 AWG Wire

NOTES:

1. Body Material: Glass fiber reinforced phenolic Type MFH per MIL-M-14.
2. Contact Material: Copper alloy, gold plated.
3. Socket contact 2500-S2A22-39 must be ordered separately.
4. For electroplated tin contact add suffix "SN" to connector part number (J21P90-15-SN).

CONTINENTAL CONNECTORS

Precision Electronic Connectors For Commercial & Military Applications

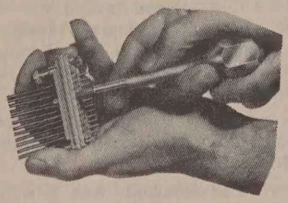
RACK AND PANEL CONNECTORS FOR VARIOUS EQUIPMENT

A complete line of high-reliability connectors for computers, missile, aircraft, communications and other critical electronic applications. In addition to standard specifications, these connectors can be supplied with such optional accessories as aluminum hoods, protective shells, polarizing screwlocks* and solder filled contacts. Various molding compounds are also available.

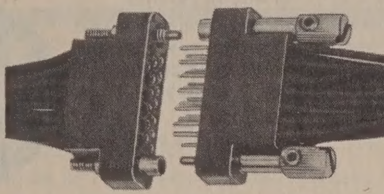
* PATENT NO. 2,746,022

MICROMINIATURE AND MINIATURE WITH CRIMP REMOVABLE CONTACTS

AVAILABLE WITH 7, 9, 14, 18, 20, 26, 34, 42, 50, 66, 75, 104 & 152 CONTACTS CONFORM TO MIL-C-28748 SPECIFICATIONS



Continental Connector's removable contacts and wire crimp terminations eliminate all connector soldering operations. Contacts are supplied separately and wired independently of connector body, and can be readily replaced with simple, low cost hand tools. Connectors are available with guide pins and sockets or screwlock hardware.

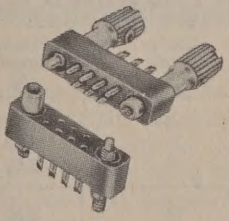


SERIES 25. Removable contact connectors are interchangeable with our Series 20 fixed contact types. .025″ and .045″ square solderless-wrap terminations with .062″ or .040″ pin diameters are also available. Optional aluminum hoods, protective shells and mounting plates can be supplied. Shielded crimp removable contacts for RG-178B/U and RG-196A/U coaxial cable can be intermixed in any combination with the standard type contacts. Select guide pins and sockets or polarizing screwlocks for mating hardware.

SERIES MMM. Five thru 75 contact sizes. Interchangeable with Series MM-22 fixed contact types. Can be supplied with guide pins and guide sockets, polarizing screwlocks and aluminum hoods.

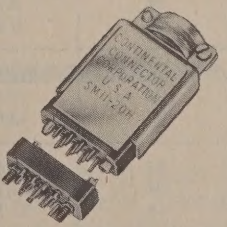
SERIES 25MM. Center screwlock locking device. Available with 50, 76, 100 and 200 contact sizes. Contacts are on .100″ centers.

FIXED CONTACT MICROMINIATURE, SUBMINIATURE, MINIATURE



SERIES MM-22 MICROMINIATURE. Five to 104 contacts. Ruggedized to withstand shock and vibration extremes. Meet MIL-C-28748 specs or commercial type. Available with guide pins and guide sockets, polarizing screwlocks, cable brackets and aluminum hoods.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 3A • Minimum Creepage Between Contacts, .070″ • Minimum Air Space Between Contacts, .040″ • Contact Center Spacing, .093″ • Pin Diameter, .030″ • Solder Cup, #22 AWG wire.



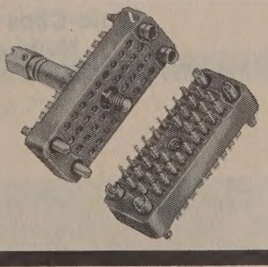
SERIES SM-20 SUBMINIATURE. Five to 104 contacts. Meet MIL-C-28748 specs or commercial type. Optional features include guide pins and guide sockets, polarizing screwlocks, protective shells and aluminum hoods.

Breakdown Voltage (sea level), 2000V. RMS • Current Rating, 5A Continuous, 7.5A Maximum • Minimum Creepage Between Contacts, .078″ • Minimum Air Space Between Contacts, .045″ • Contact Center Spacing, .125″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.

SERIES 20 MINIATURE. Five to 104 contacts. Similar to above except larger size. Meet MIL-C-28748 specs or commercial type. Hexagonal configuration with 1, 4, 5, 7, 9 and 10 contacts is also available.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 5A Continuous, 7.5A Maximum • Minimum Creepage Between Contacts, .125″ • Minimum Air Space Between Contacts, .070″ • Contact Center Spacing, .150″ • Pin Diameter, .040″ • Solder Cup, #20 AWG wire.

CENTER SCREWLOCK



SERIES 1900. 10, 22, 34, 50, 78, 104 and 152 contacts. Double lead thread action screwlock, stainless steel side channels and closed entry contacts for maximum reliability. Series 2500 available with 152 removable contacts.

Breakdown Voltage (sea level), 3000V. RMS • Current Rating, 10A Continuous, 13A Maximum • Pin Diameter, .062″ • Minimum Creepage Between Contacts, .110″ • Minimum Air Space Between Contacts, .050″ • Contact Center Spacing, .150″ • Solder Cup (also solderless-wrap and taper pin) #16 AWG wire.

PROTO-CLIPS FOR FOOL-PROOF, SHORT-PROOF, POWER-ON, IN-CIRCUIT IC TESTING.

Wherever you use DIP's, you need CSC Proto-Clip connectors. The clip-on, short-proof way to bring up leads from crowded circuit boards, for fast signal-tracing, signal injection . . . even wiring unused circuits into existing boards. In time (and components) saved, they'll pay for themselves the very first time they're used.

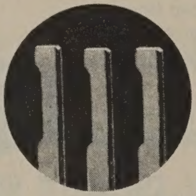
Squeeze the two ends together, slip them over a DIP and release—that's all there is to it. Molded flexible web insures positive operation for thousands of tests; high-impact plastic construction eliminates troublesome springs and pivots. Self-aligning, non-corroding nickel-silver contacts give simultaneous low-resistance connections to all IC leads; molded-in spacers automatically prevent shorts.

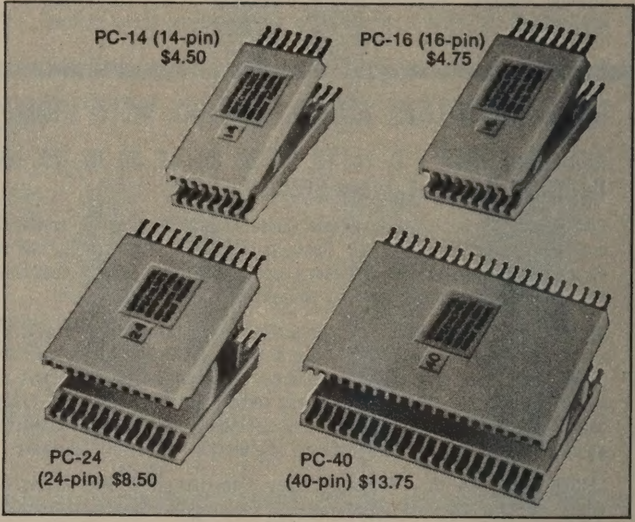
Once contact is made, you simply hook probe over one of the unique slip-proof teeth (see inset). Easy-grip design won't let probe slip off, frees hands for other work.

Proto-Clip models are available with or without cable for 14, 16, 24 and 40-pin DIP's (larger-capacity clips can generally be used with smaller DIP's e.g., PC-16 with 14-pin DIP).

Factory assembled and tested, Proto-Clips with prewired cables simplify a wide variety of jobs. Like simplifying IC connections to other IC's, other boards, test fixtures . . . even interconnecting Proto-Board units.

*U.S. Pat. Des. No. 3914007





NEW! PROTO-CLIPS WITH PREWIRED CABLES

Model No.	Cable length: inches	Price: Single clip	Price: Dual clip
PC-14-	18	$7.75	$14.75
PC-14-	24	8.00	15.00
PC-14-	36	8.50	15.50
PC-16-	18	8.50	16.00
PC-16-	24	8.75	16.25
PC-16-	36	9.25	16.75
PC-24-	18	12.25	25.25
PC-24-	24	12.50	25.50
PC-24-	36	13.00	26.00
PC-40-	18	21.00	42.00
PC-40-	24	21.25	42.25
PC-40-	36	21.75	42.75

Note: S = Single Clip D = Dual Clips
When ordering include Part No.—Cable Length-Single (S) or Dual (D) Clips.

Factory assembled and tested, Proto-Clips with prewired cables simplify a wide variety of jobs. Like simplifying IC connections to other IC's, other boards, test fixtures . . . even interconnecting Proto-Boards. Available with connectors at one or both ends, cables are rated to 150V and 105°C. Conductors are #28 AWG stranded conductors with PVC insulation.

Proto-Clips with and without cable are standard in-stock items.
Need an IC test clip? Why wait! See your CSC dealer
or call 203-624-3103 (East Coast) or 415-421-8872 (West Coast) 9 AM to 5 PM local time.

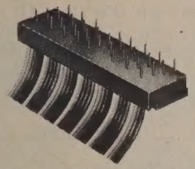
GeeWee* ROUND WIRE FLAT CABLE CONNECTORS

CF006 PCB CONNECTORS

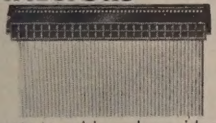


Permanently connects cable to printed circuit board.

- For connecting cable with up to 50 conductors
- Connections can be inspected before cover is applied
- No cable stripping necessary

Sizes are available for terminating flat cable having 10, 20, 26, 34, 40 or 50 round conductors. Cover with integral strain relief and lip for protection of bare ends of wires is standard; cover without lip that permits wire to pass freely through connector (daisy chaining) without interference from protective lip is also available.

CF008 SOCKET CONNECTORS

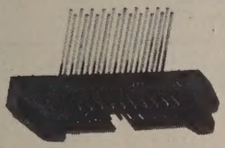


Connects to cable and provides female socket nose to mate with headers CN711 and CN712, or to properly oriented pins permanently fastened to a PC board.

- For connecting cable with up to 50 conductors
- Connections can be inspected before cover is applied
- "T" Bars on cover simplify assembly and disassembly

For terminating cable with 10, 20, 26, 34, 40, and 50 conductors. Designed for rapid connect/disconnect of cable to two rows of .025" square or round posts on .100" x .100" centers. Cover variations include a self-locking cover with built-in strain relief for termination of conductor ends (standard); also available is a cover for intermediate connections that permits conductor cable to pass through connector (daisy chaining).

CN711 & CN712 HEADERS

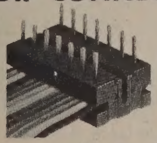


For quickly connecting cable that is terminated with female socket CF008 to either printed circuit board or to wire wrap termination.

- Accepts connectors with up to 50 contacts
- Side guides assure correct alignment of mating connectors
- Posts can be soldered to PC boards or wire wrapped

Headers available to mate with CF008 sockets terminating 10, 20, 26, 34, 40, or 50 conductor cable. Each has two rows of .025" diameter contacts that are straight through or bent at 90°. End of contacts opposite to socket mating end are .025" x .025" square pins for wire wrap termination, or .025" diameter round pins usually wave soldered permanently to PC board. Protective lip prevents damage to contacts when not in use. Available with latches that lock headers to mating CF008 sockets.

CP200 DIP CONNECTORS

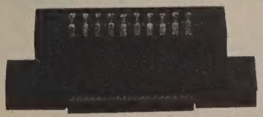


Permanently connects flat cable to printed circuit board having holes on standard DIP .100" x .300" spacing, or with connect/disconnect provision to I.C. socket.

- Cover ridges assure proper cable alignment
- Cover preassembled to connector base at factory to simplify handling
- Numbered contact positions simplify conductor identification

DIP (Dual in-line package) connector for terminating 14 conductor and 16 conductor cable. Provision for connect/disconnect into I.C. socket or permanent wave solder termination to mating PC board. Pre-assembled cover permits rapid termination with simple hand tool.

CF100 CARD EDGE CONNECTORS



Connects/disconnects flat cable with etched conductive lines on edge of 1/16" thick PC board.

- Accepts cable with up to 50 conductors
- Contacts are bifurcated for maximum integrity of connection
- Cantilever contact will operate with up to .075" PC board thickness

Sizes available for termination of 10, 20, 26, 34, 40, and 50 conductor strip cable. Standard connector includes integral strain relief. Available with or without mounting ears.

For additional information, request CW Connector Catalog 2101.

DALE®

CONNECTORS QUICK REFERENCE GUIDE

PRINTED CIRCUIT

DALE TYPE		BASIC DESCRIPTION
EB 7 **Edgeboard**		Choice of single or dual readout models with .156″ spacing. Accepts card thicknesses from .054″ to .071″. 6 to 22 contacts.
EBT 156 **Edgeboard**		Single readout modified tuning fork contacts with .156″ spacing. For 1/16″ boards. Accommodates thickness variance from .054″ to .070″. 6 to 22 contacts.
ES 1 **Digital Display Connector** **ES 5** **Digital Display Connector**		Single readout digital display connectors. Both ES 1 and ES 5 accommodate substrate lengths from 1.000″ to 6.000″. Incremental variation is .100″ for ES 1 and .050″ for ES 5. Both models accommodate 3/64″, 1/16″ and 1/8″ substrate thicknesses. ES 1 is available with from 10 through 60 contacts on .100″ spacing. ES 5 is available with from 20 through 120 contacts on .050″ spacing. No tooling charge for variations within these ranges.
ED 1 **Edgeboard** **ED 5** **Edgeboard**		Dual readout edgeboard connectors. Both ED 1 and ED 5 accommodate substrate lengths from 1.200″ to 4.500″. Incremental variation is .100″ for ED 1 and .050″ for ED 5. Both models accommodate 1/32″ and 1/16″ substrate thicknesses. ED 1 available with 10 through 44 contacts on .100″ spacing. ED 5 available with 20 through 87 contacts on .050″ spacing. No tooling charge for variations within these ranges.
300 **Dip Solder**		Right angle or straight through terminals. 7 to 25 staggered contacts with .250″ spacing (.125″ grid). Meets applicable paragraphs of MIL-C-28748.
303 **Dip Solder**		45 contacts in compact 3-row design. Meets applicable paragraphs of MIL-C-8384.
315 **Dip Solder**		50 contacts with .200″ spacing. Staggered rows provide a .100″ grid.
PJ **Test Point**		Right angle or straight through types with dip solder pin for permanent mounting.
500SR5 **Test Point**		One-piece molding with 5 dip solder contacts for permanent mounting.

RANK AND PANEL

MM22, MM24 **Microminiature**		Choice of solder cup or dip solder contacts. 5 to 44 contacts with .09″ spacing. Meets MIL-C-8384. Available with or without hardware.
SM20 **Subminiature**		Compact, lightweight. Fixed or turnable screwlocks. 5 to 75 contacts on .12″ spacing. Meets MIL-C-8384.
S20 **Housed**		Lightweight. Protective housing and hood. For RF and power interconnect applications.

SIDE MOUNT

A20		Body components available with any desired pin and socket combination. Floating contacts. Hole through body permits flat or building block type mounting. Meets applicable paragraphs of MIL-C-8384. Special locking device on G16.
G20		
G16		

SPECIALS

QX32 **QX72 & MX72** **400 & 401**		Umbilical and round keyed shell types.

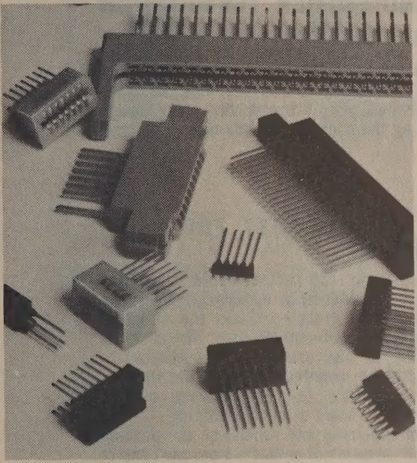
ELECTRONIC CONNECTORS AND INTRACONNECTION SYSTEMS

ELECTRONIC CONNECTOR PRODUCTS



CONNECTORS & SOCKETS,

Standard or Custom

Dynatech proprietary fabrication and high volume assembly techniques offer low cost production of precision P.C. card edge connectors with 0.100", 0.125", 0.156" or 0.200" contact spacing and 14 or 16 pin DIP sockets.

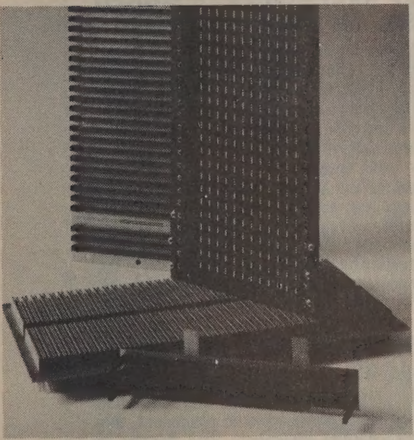
Custom designs to customer specifications.

EXCLUSIVE "ZIP" GOLD PLATING

Dynatech exclusive contact plating process reduces gold use up to 90% compared to conventional techniques. "ZIP" puts high density 23K gold on the contact surface where it's needed in thicknesses of 10 to 100 millionths. Nickel underplate available, but not required.

Exclusive Dynatech "ZIP" plating process puts gold on contact surface where it's needed, thus eliminating wasteful plating of non-contact surfaces.

iC INTRA-CON BACKPANEL INTRACONNECTION SYSTEMS

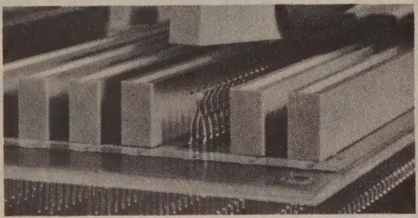


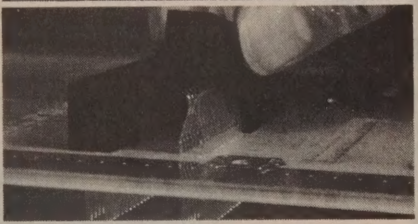
ALUMINUM BACKPANELS

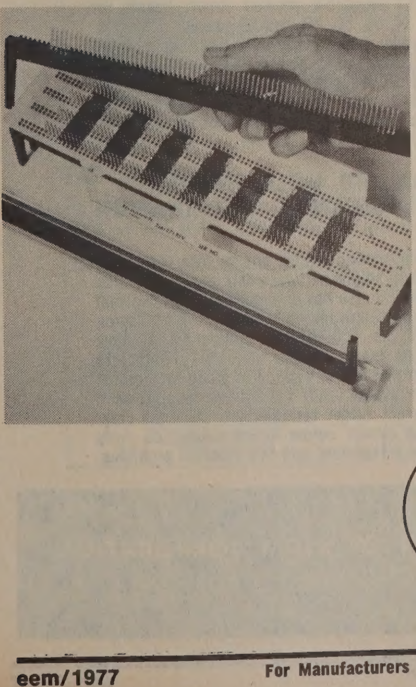
Dynatech aluminum backpanels reduce external wiring using standard connectors and insulated layers for various voltage or grounding intraconnections. They also offer the versatility of mixing several connector types.

PRINTED CIRCUIT BACKPANELS

Dynatech two-sided and multilayer backpanels will intraconnect several random voltages and reduce external wiring. They use friction fit contacts that can simultaneously connect several plated-thru holes. Minimum thickness for the P.C. board backpanel is 0.125".







MICROPROCESSOR BACKPANELS

Dynatech backpanels simplify use of microprocessors such as Intel's, Motorola's and National's. Many standard configurations are available, but custom designs can be created from either aluminum or printed circuit backpanels.

TELEPHONE CROSS CONNECT BACKPANELS

Dynatech Cross Connect systems save cable, cut space 50% or more and reduce craftsman wiring time. Systems are directly interchangeable with accepted telecommunication systems.

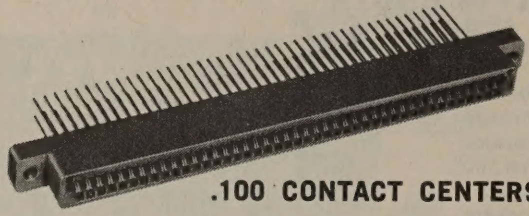
Eby™

CONNECTORS
CARD-EDGE . . . BOX EDGEBOARD . . . MOLDED MALE HEADERS

CE-CON CARD-EDGE CONNECTOR

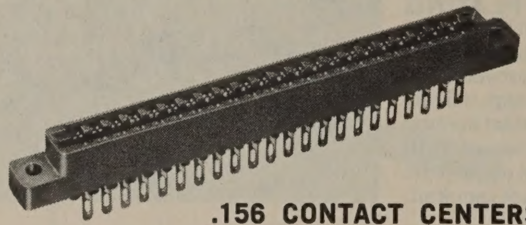


.100 CONTACT CENTERS

SOLDERLESS WRAP AND SOLDER TERMINATION

Ce-Con Series Connectors are supplied in a complete range of sizes up to 50/100 contact positions. They have .025" square wire wrap contact tails on .100 centers that permit hand, semi-automatic and automatic wire wrapping. Printed circuit solder termination is also available. Designed to accommodate an .062 thick printed circuit board, the entry design prevents overstressing or deforming the contacts. Standard and selective plating available.

CE-CON CARD-EDGE CONNECTOR

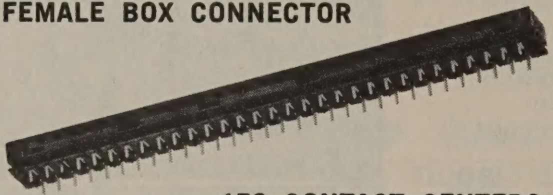


.156 CONTACT CENTERS

HIGHER RELIABILITY AT LOW COST FOR COMMERCIAL APPLICATION

Eby's economical card-edge connector on .156 contact centers has been designed for commercial computer and industrial applications. With its body and contact design, this connector greatly reduces the effect of board rocking and board warpage. Smooth acting, long life contacts enhance the operational reliability of the assembly. The housing is designed for flush mounting and can be mounted either on the front or rear of a panel. A durable key is available that fits between contact positions. Contacts are supplied with standard or special plating . . . and various sizes and terminations. For efficiency and reliability, the housing and contacts are designed to permit omission of contacts from any contact position without impairing the function.

EB-CON SERIES 102 EDGEBOARD FEMALE BOX CONNECTOR

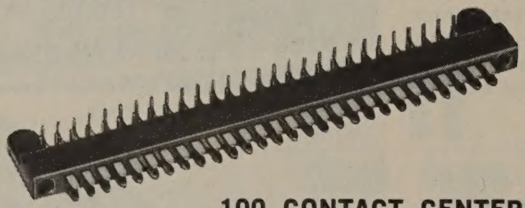


.150 CONTACT CENTERS

CLOSED ENTRY FEMALE RECEPTACLE DESIGNED TO MATE WITH .025 SQ. OR ROUND CONTACTS

Versatile new female connector series for PC Board applications. Mates with either .025" round or square pins. Contacts have a dual wiping surface for mating with square wire wrap terminals, staked in printed circuit back panel assemblies. Molded body of connector has a closed entry interface that protects contact members and acts as a guide in positioning male pin. A significant feature is staggered pattern of contact rows. This two-tier pressure point design halves the peak insertion force needed to mate connector to mother board. Reduced mating force does not affect reliability of individual contacts. Terminations are designed for thru board wave soldering. Connector housing is molded of rugged glass-filled phenolic that assures circuit fidelity and dependability, and a unique integral insulator barrier that prevents accidental shorting by pass-through penetration of the lower row of female contacts. Contacts are gold plated phosphor bronze.

RA-CON RIGHT ANGLE MALE HEADERS

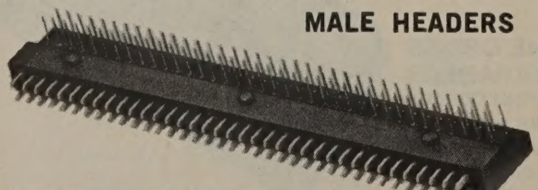


.100 CONTACT CENTERS

RIGHT ANGLE MALE HEADERS FOR USE WITH PRINTED CIRCUIT BOARDS

Designed primarily for terminating printed circuit boards into wire-wrap back panels on military airborne and shipboard electronic equipment, this header also has applications in commercial computers. High density of molded male allows packaging of pluggable printed circuit boards on .200 centers. Standard sizes are 34, 50, 56, 60, and 80 contact positions. Insulator material is diallyl phthalate; male contacts are brass, gold plated and molded in place for precise consistent contact location. Male blades (.020 x .050) are located on a .100 square grid and printed circuit terminations are on a staggered .100 grid. All printed circuit terminations are fully exposed eliminating potential gas entrapment and flux removal problems.

RA-CON SERIES 100 RIGHT ANGLE MALE HEADERS



.100 CONTACT CENTERS

HIGH RELIABILITY MOLDED MALE HEADERS FOR USE IN SOLDERLESS WRAP TERMINATION SYSTEMS

Designed primarily for terminating printed circuit boards into wire-wrap back panels on military airborne and shipboard electronic equipment, this sturdy, reliable, highly efficient header also has applications in commercial computers. The high density, low profile of molded male allows packaging of pluggable printed circuit boards on .400 centers. Standard units have 50, 74, 90 and 110 contact positions. Insulator material is diallyl phthalate and male contacts are brass, gold plated and molded in place for precise consistent contact location. Male blades (.020 x .050) are located on a .100 square grid, and printed circuit solder terminations are on a staggered .100 grid. All the printed circuit solder terminations are fully exposed eliminating potential gas entrapment and flux removal problems.

Eby™

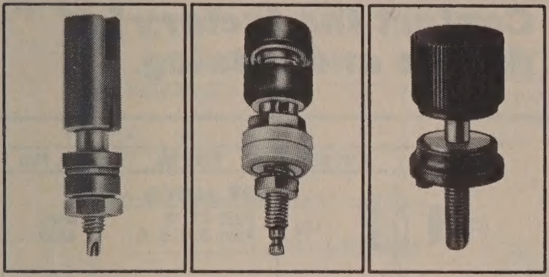
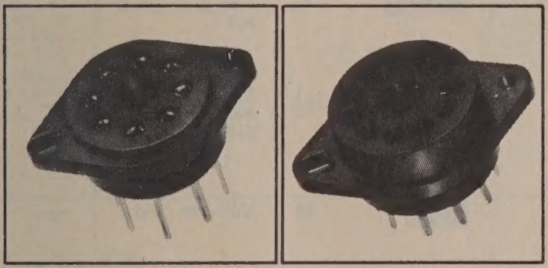
BINDING POSTS . . . TEST POINTS . . . SOCKETS



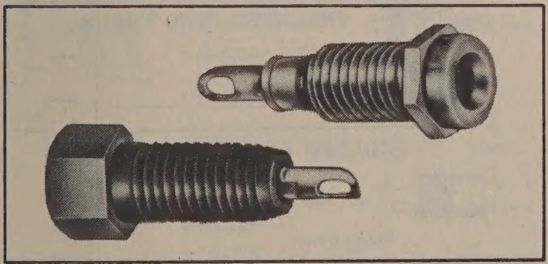
MILITARY BINDING POSTS, WATERPROOF BINDING POSTS, PANEL MOUNT BINDING POSTS

Eby produces more waterproof and panel mount binding posts per MIL-P-55149 than any other supplier. Binding posts are also available for commercial and industrial applications. They are supplied in panel mount, screw, and spring-activated.



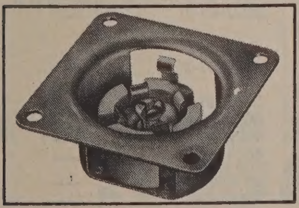
RELAY SOCKETS, ROUND, 8 AND 11 CONTACT

8 and 11 contact relay sockets; molded integral saddles; rugged proven reliability; commercial prices.



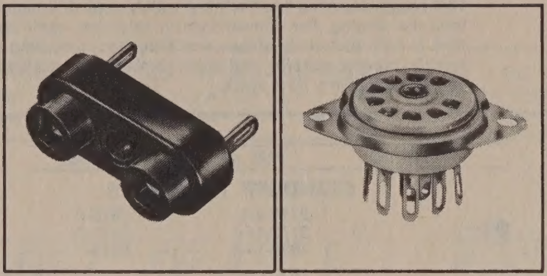
TIP JACKS

Tip jacks and test points; plastic bodies; metal sleeves; screw machine and sheet metal contacts; press fit and thread mounting.



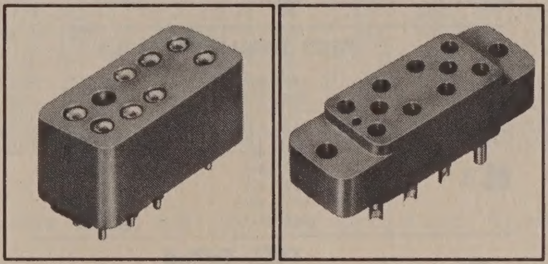
SPECIAL SOCKETS, POWER TUBE SOCKETS

Special and custom designed sockets and plugs, built to your specifications.



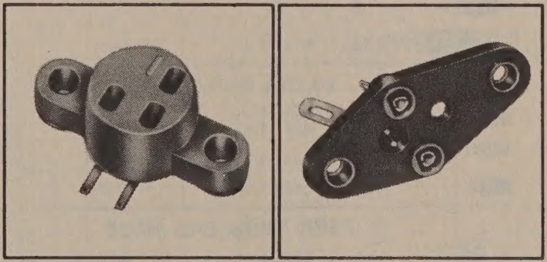
CRYSTAL SOCKETS, TUBE SOCKETS

Crystal and tube sockets; ceramic and plastic; Eby supplies more Q.P.L. listed sockets per MIL-S-12883 than any other manufacturer — the only listed supplier! 7 to 9 pin tube adaptors available.



RELAY SOCKETS, RECTANGULAR, 8 CONTACT AND 10 CONTACT

Military approved rectangular relay sockets, printed circuit and panel mounted.



TRANSISTOR SOCKETS

A broad line of transistor sockets, TO-66, TO-3, TO-5, etc., low cost commercial and industrial applications.

CONSIDER Eby™ **YOUR CONNECTION**

This is just a small sampling of our standard products — send for a catalog — consult us for special custom devices. Small and large volume.

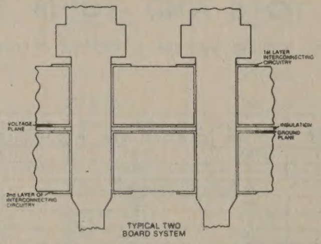
A patented card edge backpanel system. A pre-loaded contact (1) is press-fit directly into plated-thru holes in the etched board. (2) The insulator is held firmly into place by an interference fit with the contact. Use the design parameter information shown above for specifying your custom backpanel.

U.S. Patent #3,671,917

Combines the reliability of EDGE-PAC® with the cost savings of multi-layer backpanels. The discrete two-sided plated-thru boards (2, 3, 4) are sandwiched together with the high force press-fit contacts. A mylar insulating layer separates each board allowing interconnect systems of up to eight planes of circuitry.

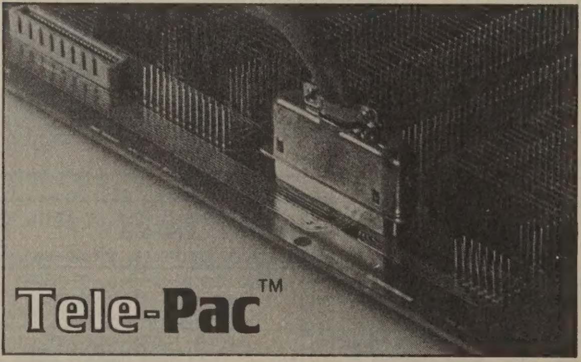
U.S. Patent #3,660,726



1st LAYER INTERCONNECTING CIRCUITRY
VOLTAGE PLANE
INSULATION
GROUND PLANE
2nd LAYER OF INTERCONNECTING CIRCUITRY
TYPICAL TWO BOARD SYSTEM

Developed by ELFAB as an extension of our reliable press-fit contact system, the 8500 series receptacle is mateable with standard telephone 25 pair connectors. Utilizing similar design features of EDGE-PAC®, the contacts make solderless, gas tight connections with the plated-thru hole, TELE-PAC™ can be used with single, two and three board MULTI-PAC® System assemblies.

U.S. Patent #3,671,971
3,868,162



Mag-Pac™
PWR-Pac™

Hybrid systems for arraying metal planes into the backpanel where low-loss voltage supply or EMI shielding is required.

Patents Pending

Dip-Pac®

Combines MULTI-PAC® packaging with the advantages of low profile (.160") press-fit Dip sockets 8-40 contact positions available.

Patent Pending

©1976 Elfab Corporation

Elfab Backpanel Connector Systems

Elfab Corporation is the leader in solderless press-fit printed circuit board system technology. Under its patented concept, multi-pin glass planar interconnect backpanels are manufactured utilizing the EDGE-PAC® and MULTI-PAC® technology; edgecard circuit connectors are integrated with the printed circuit backpanel in single and multiple board sandwiching. The result is low-cost connector systems incorporating signal interconnection as well a ground and voltage termination.

Every phase of backpanel construction is housed within our facility, affording us full control over all the component processes involved in the manufacture of our products. Not only does this assure you of reliability and precision quality, it provides us a clear competitive edge in the field.

Elfab — the innovative leader in the interconnect industry.

Card Guides

End card and center connector card guides are available on series 1212 and 1225 only. Consult factory for availability of additional designs.

Busbar

Elfab solid copper alloy busbars are used as an extension of, or part of, the voltage and ground plane system. The buses are press-fitted to lengths as specified by customer requirements.

EPK Series

Contact Replacement Kit
Contacts are readily removable and can be replaced using this kit. Ask for instruction sheet RK4-76.

Specify the Pac . . . solderless press-fit backpanel connector systems from Elfab. Call or write today for our free design catalog.

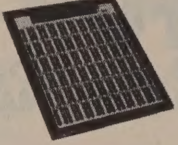
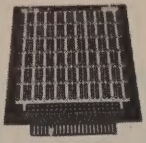
EXCEL

DEPT. EM, EXCEL PRODUCTS COMPANY INC.
401 Joyce Kilmer Ave., New Brunswick, N.J. 08903
(201) 249-6600 • TWX 710-480-6255

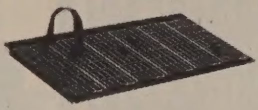
Excel manufactures in-house every standard panel made by Augat and others. They are completely interchangeable in every manner.
Excel manufactures complete ranges of newest versions of ECL and Shottky panels.



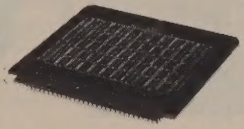
EXCEL SERIES 1000
14+V&G or 16+V&G pin patterns in 30 or 60 positions.



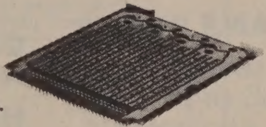
EXCEL SERIES 2000
14+V&G or 16+V&G pin patterns 30 or 60 position.
Gold finger edge connector take off.



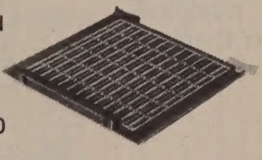
EXCEL SERIES 3000
30 position to 240 position.
Available in all pin patterns including 24 pin. Also universal 50 pin rows. Sockets or feed thrus in I/O areas.



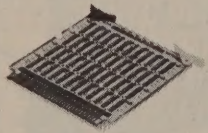
EXCEL SERIES 4000
60 position available in all pin patterns including universal 50 pin rows and also combination 14 and 16 pin patterns.



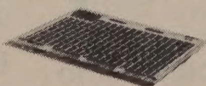
EXCEL SERIES 5000
Edge board connections-provision and hardware for mounting voltage regulators. 20 rows of 62 contacts each.



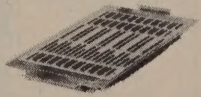
EXCEL SERIES 6000
Complete range of high density DIP packaging panels in all patterns—60 and 72 positions including 20 rows of universal 50 or 58 contacts. 1/16″ or 1/8″ thick. Can accommodate IC's with legs centered at .300, .400 and .600.
All panels supplied with high density 120 pin 3 row male .100″ centers connector affixed. Female connectors available separately.



EXCEL SERIES 7000
Series edgeboard 24 position—special sockets and slotted pins for variable voltage and ground and mounting components. 14-16 patterns.

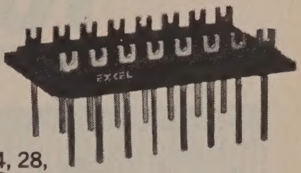


EXCEL SERIES 8000
8430 and 8460 are Mini Panels to interface with Data General's Nova® computers. Series 84A1 and 8532 are Mini Panels to interface with DEC PDP8® and PDP11® computers.

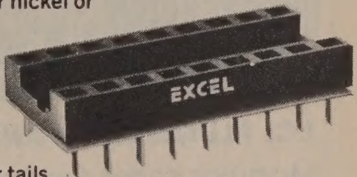


MPU PANEL EXCLUSIVE—
EXCEL SERIES 9000
This is a new family of pluggable panels for Microprocessor kits. Panel #9045-3BD-60 accommodates nearly all MPU kits currently available. Memory panel #9042-3BD-60 accepts any 16 - 18 - 22 or 28 pin LSI, RAM, ROM or PROM in 4K byte increments. Both panels have all necessary provisions for I/O drivers, receivers, buffers and control lines. Measuring 6″ x 10″ the panels mate to standard 44 pin edge connectors for ease of system expansion during prototyping, evaluating and programming of MPU devices.
For the first time, most requirements for processor boards, memory boards, I/O boards and the multitude of various sizes of panels used for MPU devices, and in the various MPU kits can be condensed into and handled by the two new **Excel** panels.

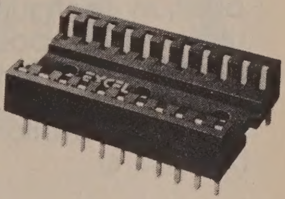
ONE SOURCE, ONE INSPECTION,
AND ONE COMPANY RESPONSIBLE TO YOU



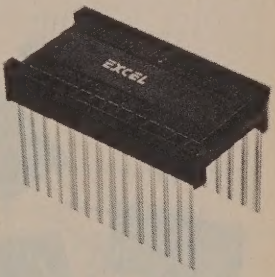
EXCEL SERIES 400
Component leaders 14, 16, 17, 24, 28, 36, 40- glass filled polyester SE-O, Phosphor Bronze, Gold over nickel or bright tin covers available.



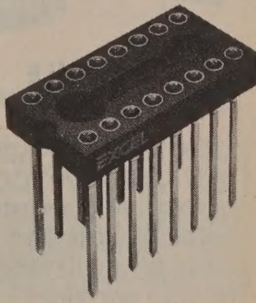
EXCEL SERIES 500
Low Profile. 8-40 pin solder tails, gold over nickel or bright tin plated. Glass filled Polyester SE-O. Beryllium copper holds the edge of IC leg for better contact.



EXCEL SERIES 600
Low Profile. Low cost 8-40 pin solder tail. Gold over nickel or bright tin. Glass filled Polyester SE-O. Beryllium copper holds the flat of the IC leg. End stackable.



EXCEL SERIES 700
Standard Profile. 8-40 pin wire wrap or solder tails. Contact is gold over nickel or bright tin plated Phosphor Bronze. Body is SE-O rated glass filled Polyester. Tapered entry holds the edge of IC leg for best contact.



EXCEL SERIES 800
8-14-16-22-24-28-36-40-42
Highest quality available. Precision Swiss screw machine contacts. Wire wrap 1, 2 or 3 levels. Solder tails or component headers. Terminal contact is beryllium copper over nickel, terminal body is brass, gold over nickel or tin plated. Body for 8-14-16 contact is SE-O rated Polyester for 18-42 body is 94V-O rated FR-4 Glass Epoxy. Very low profile.

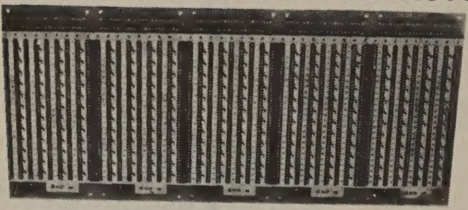
One Source Responsibility for your Packaging Needs

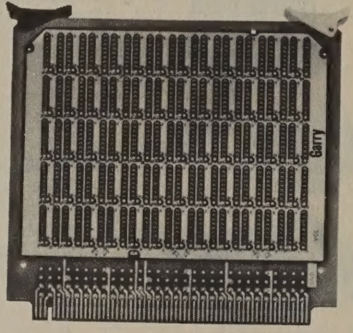
GARRY'S "TOTAL PACKAGING" CONCEPT PUTS IT ALL TOGETHER FOR YOU!

WITH I.C. PLUGGABLE PANELS, LOW PROFILE SOCKETS AND AUTOMATIC WIRE WRAP* MACHINES



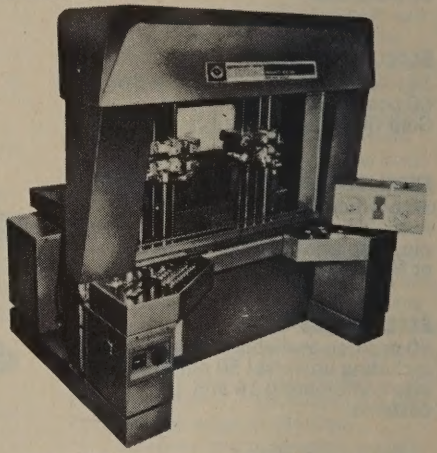
I.C. PLUGGABLE PANELS

Modular series features your choice of 4 I.C. position configurations or universal I.C. position configuration in one section of 30 I.C. positions through 8 sections (240 I.C.'s)



I.C. PLUGGABLE PANELS

Card Edge series offers 12, 16, 24, 30, 60 or 72 positions in your choice of 4 I.C. configuration, plus universal I.C. position configuration and 72 to 120 I-O pins.

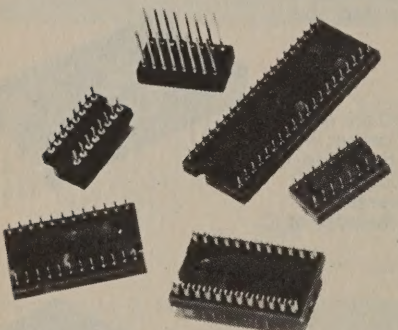


GARRY'S AUTOMATIC WIRE WRAP* MACHINES

Never a Bum Wrap! Think of it. No more scrapped PC boards. (You can actually fix a faulty wire wrap!) No more high inventory costs. No more complicated "doctoring" in the field. No more expensive tooling start-ups. No more headaches because you're "locked into" a PC design.

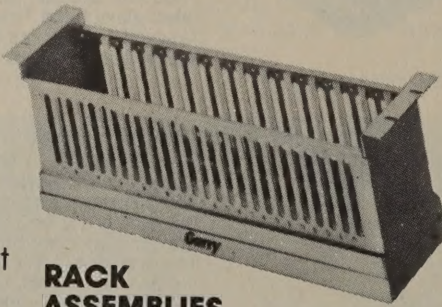
A complete in-house wire-wrap service is also available to give you quick turnaround.

It Never Varies. Our precision beryllium spring clip has the most consistent I.C. insertion-withdrawal ratio in the industry. All this because our facilities are among the world's best.



LOW PROFILE SOCKETS ADAPTORS

Low profile sockets accept standard DIP packages. Machined contact features closed end construction, eliminating solder or flux wicking problem.



RACK ASSEMBLIES

Card racks accept up to 13 boards on 1 .200 centers, or up to 25 boards on .600 centers.

Send for Garry's new free catalog!

Find out why the leading electronics companies use thousands of our wire-wrapped panels each week...

We won't pin a bum wrap on you!

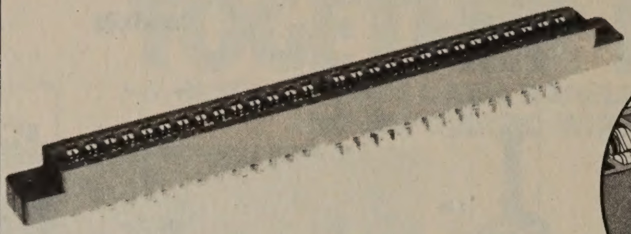
GTE SYLVANIA INCORPORATED

CARD EDGE CONNECTORS



FEATURES OF THE GOLD DOT CONTACT

- Bifurcated Gold Dot (contact point) is a coined gold/silver alloy assuring maximum conductivity at the exact point of contact.
- Designed for easy card insertion.
- Discrete contact identification.
- Designed to meet the applicable performance requirements of MIL-C-21097.
- Between-position and on-position polarizing available.
- Economy connector with maximum reliability.
- Multiple mounting styles available, including: thru hole, threaded bushing, and no mounting ear.

FEATURES OF THE BELLOWS CONTACT

- Bifurcated bellows-shaped contact springs provide constant pressure and maximum protection against vibration, corrosion, and repeated card insertion.
- 24 karat gold-plated mating surface assures maximum conductivity and reliability.
- Designed for easy card insertion.
- Discrete contact identification.
- Designed to meet the applicable performance requirements of MIL-C-21097.
- Between-position and on-position polarizing available.
- Multiple mounting styles available, including: thru hole, threaded bushing, and no mounting ear.

GOLD DOT AND BELLOWS CONTACT CONNECTOR SPECIFICATIONS:

- Operating voltage (sea level). . .600v dc.
- Current. . .3 amps.
- Designed to mate with circuit boards from .054(1.372) to .071(1.803) thick.
- Temperature range. . .−85°F(−65°C) to 257°F(125°C).
- Voltage drop not to exceed 30 mv @ rated current.
- Diallyl Phthalate or Phenolic housing materials.
- Phosphor bronze contact material.
- Specifications subject to change. Consult GTE Sylvania Product Specifications for additional technical information.

This is only a sample of the GTE Sylvania connector product line. For additional information or complete catalogue, please write to GTE Sylvania.

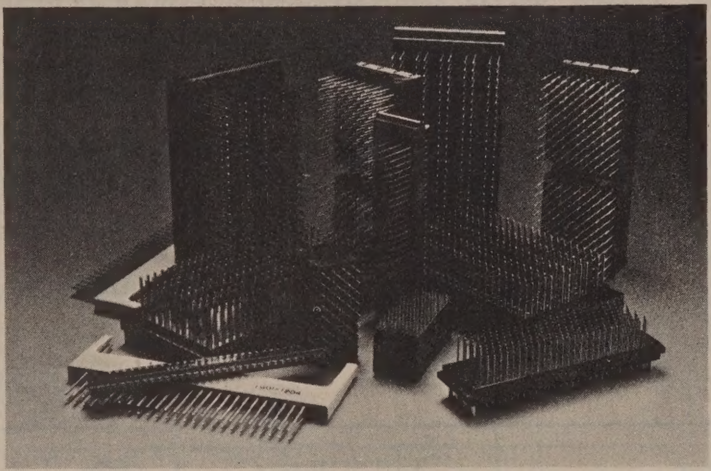
GTE SYLVANIA INCORPORATED

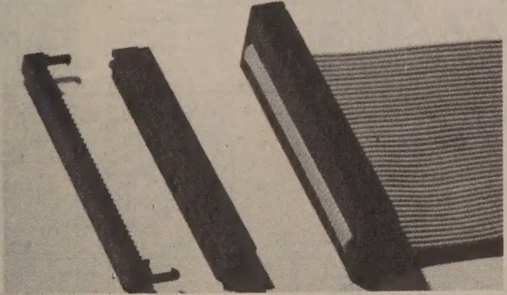
CUSTOM CONNECTORS

- Designed to specific customer applications.
- Provide reliable connectors to major industries for over two decades.
- Feature complete material and process control from product concept to customer shipment via total vertical integration.
- Provide highest reliability contact in the industry including the GTE Sylvania proven gold dot.
- Designed to provide the highest possible packaging density.
- Available with both solder tab and wrap-post contact tails.
- Available in wide range of sizes and mounting styles.
- Choice of housing materials.



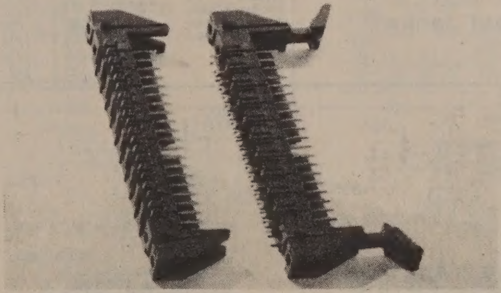
Have GTE Sylvania combine its expertise with yours to design a custom connector to your exact specifications.

FLAT CABLE CONNECTOR SYSTEMS



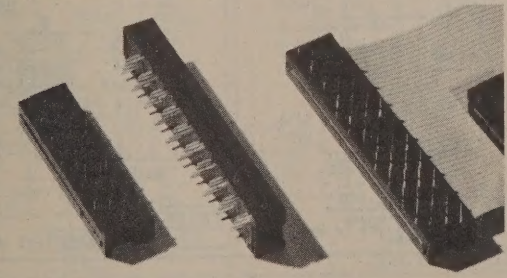
"BA" SOCKET CONNECTORS

- Designed to terminate to cable on .050 (1.270) conductor centers.
- Mass insulation displacing concept offers good gas-tight termination.
- Accepts 28-30 AWG solid or stranded conductors.
- Designed to mate to .025 (.635) sq. posts or .025 dia. pins.
- Positive locking assembly.



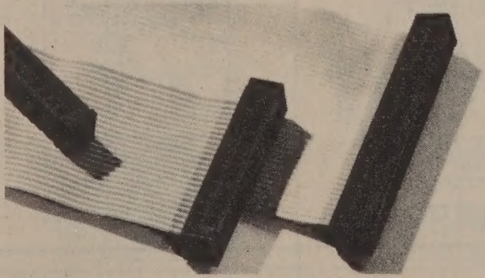
"BB" HEADER CONNECTORS

- Low Profile Design - max. height for vertical application is .700 (17.780) not including latch option.
- Designed for solder or wire-wrappable applications.
- Positive latch option.
- Shielded design to protect contacts when disconnected.
- Vertical or right angle applications.



"BC" PCB FLAT CABLE CONNECTORS

- Positive locking assembly.
- Low profile design .255 (6.477) max. height.
- Open or closed cover designs for end-wire or thru-wire applications.
- Optional contact lengths for PC boards up to .125(3.175) thick.
- Connector design and termination tooling guarantee uniform reliable interconnections.



"BD" STACKABLE SOCKET CONNECTORS

- Mass insulation displacing concept, offering good gas-tight seal.
- Positive locking assembly.
- Low profile package with maximum height of .275(6.985) permits stacking of two connectors on a typical wire-wrappable post.
- Latest concept in interconnect packaging.
- Lowest total applied cost than other I/O (input/output) connector types.

HIRAM JONES

Teflon† Insulated * Press-Type * Terminals and Test Jacks

TEFLON†

(TFE-FLUOROCARBON) per MIL-P-19468 has outstanding mechanical and electrical properties over a wide range of frequencies and temperatures (−100°C to +250°C), extreme chemical inertness, high heat resistance, zero water absorption and complete anti-hesiveness which make it a superior insulation.

TERMINALS

MATERIAL: Half-hard Brass per QQ-B-626, CDA360.
FINISH: Standard plating is Gold per MIL-G-45204. Other finishes supplied on request.

INSTALLATION TOOLS

Tools are available for all HIRAM JONES components. Specify Part Number and prefix "S." Example: S-602 Assembly Tool.

'78
THE MASTER CATALOG
THE ELECTRONIC DISTRIBUTORS MASTER CATALOG '78
FORMERLY: OFF-THE-SHELF CATALOG
THE ONLY NATIONAL CATALOG OF ELECTRONIC PARTS, INSTRUMENTS AND EQUIPMENT DESIGNED EXCLUSIVELY FOR DISTRIBUTORS AND THEIR CUSTOMERS.
YESTERDAY'S RADIO MASTER IS TODAY'S
ELECTRONIC DISTRIBUTORS MASTER CATALOG

Known as O-T-S, OFF-THE-SHELF CATALOG until this edition, the MASTER CATALOG encompasses the following product areas: audio and communications equipment; electromechanical components; electronic circuit components and subassemblies; panel components and hardware; production equipment and tools; test instrumentation; power sources; wire and cable; and related materials and chemicals.

The MASTER CATALOG is broken down into four basic sections. **A GENERAL INDEX** which lists manufacturers and products alphabetically. **A MANUFACTURERS' CATALOG SECTION** which displays their respective product pages and lists their addresses and phone numbers. **A MANUFACTURERS' DIRECTORY,** where participating manufacturers, again listed alphabetically with addresses and phone numbers, highlight their distributors. And a **GEOGRAPHIC DISTRIBUTORS' DIRECTORY** which includes the names, addresses and phone numbers of the local distributors nationwide which stock the products of manufacturers whose data appears in the "Manufacturers' Catalog Section."

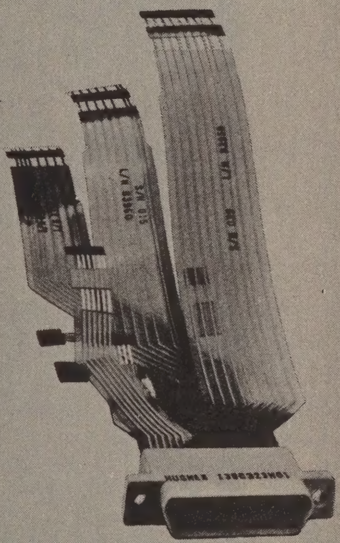
CABLES, CIRCUITS, CONNECTORS – HUGHES PUTS IT ALL TOGETHER.



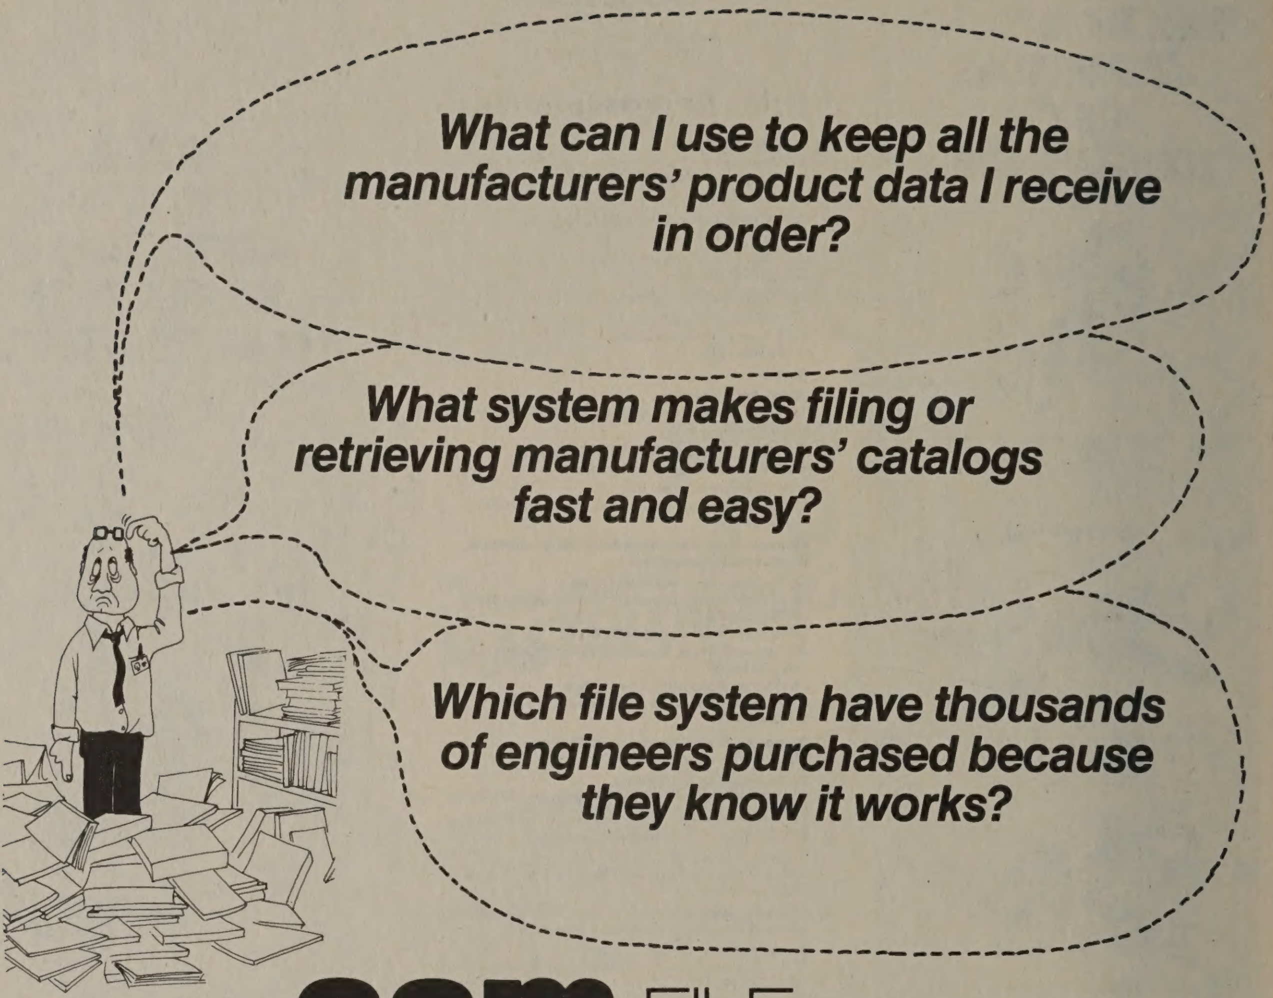
We're the company that has total interconnection capability—in flat cable, flex circuits and connectors. And we've had more experience designing them for high technology applications.

But we do more than design them to work together—we also put them together for you in special assemblies.

So call the people you can count on. Call us. (714) 549-5701. Or write: 17150 Von Karman Avenue, Irvine, CA 92714.

HUGHES
HUGHES AIRCRAFT COMPANY
CONNECTING DEVICES DIV.

We crack the tough ones.



What can I use to keep all the manufacturers' product data I receive in order?
What system makes filing or retrieving manufacturers' catalogs fast and easy?
Which file system have thousands of engineers purchased because they know it works?

eem FILE SYSTEM

THE ONLY FILE SYSTEM DESIGNED SPECIALLY FOR THE ELECTRONIC ENGINEER!

The publishers of **eem** have put together a unique filing system for electronic product information. The complete system includes: a product index booklet which classifies electronic products into 3,000 listings both alphabetically and by product group, and 45 file folders imprinted with the **eem** product sections (extra gummed labels included for expanding the system.)

As you receive manufacturers' catalog data sheets, technical bulletins, or clip magazine articles, jot down the proper Product Section Numbers from the **eem** PRODUCT-TO-SECTION INDEX. Then simply file in order. When you require information on a specific product, refer to PRODUCT-TO-SECTION INDEX again to locate the correct file folder. It's simple, and you'll always have the necessary data to compare, specify and buy, right at your fingertips.

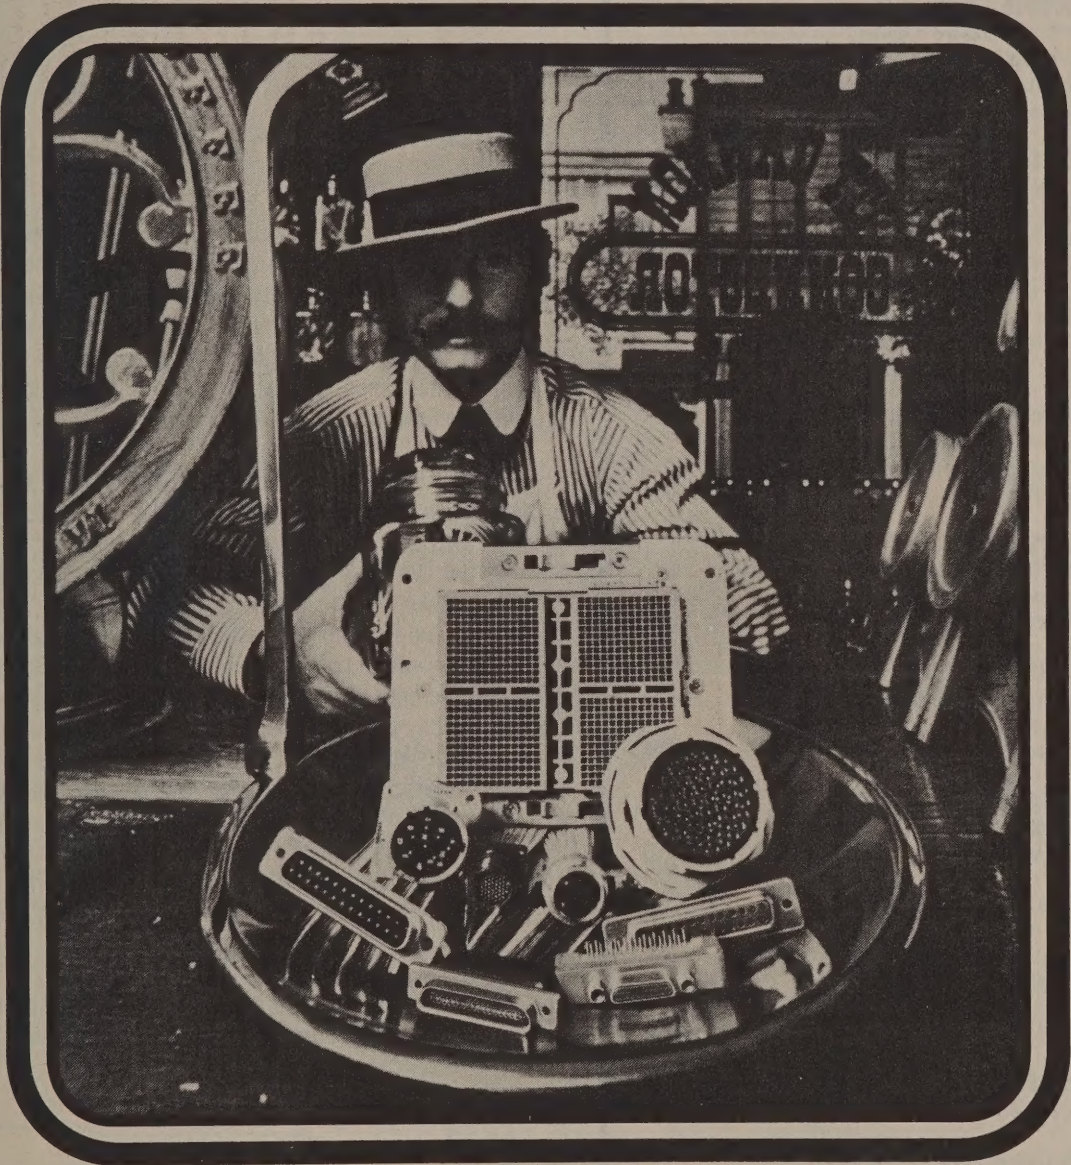
Here's how to order your eem FILE SYSTEM:

For the complete system send $10 (plus tax; N.Y., 8%, CA, 6½%) in check or money order to:

United Technical Publications, Inc.,
645 Stewart Avenue, Garden City, N.Y. 11530
Att: Circulation dept.

For an **eem FILE SYSTEM** without file folders send $7.50 (plus tax; N.Y. 8%; CA, 6½%).

United Technical Publications, Inc., Div. of Cox Broadcasting Corp. • 645 Stewart Ave., Garden City, N.Y. 11530



CANNON STANDARD LINE CONNECTORS

for commercial, industrial, military and aerospace

Six decades on the leading edge of interconnect technology.

CANNON ITT

1977/1978 EDITION

ITT CANNON ELECTRIC

AUDIO Connectors — for audio, electronic and other low-level circuit applications 1859

CV/MIL-C-005015 Standard Circular Connectors — threaded coupling, removable rear release crimp contacts, intermateable with MIL-C-5015 and MIL-C-83723 (threaded) type connectors 1863

CVA/M83723 Standard Circular Connectors — threaded coupling, removable rear release crimp contacts, environment and fluid resistant, intermateable with MIL-C-5015 type connectors 1870

K Connectors — lightweight, rugged, circular connectors with quick connect/disconnect Acme threads 1878

KJL/KJ Subminiature Circular MIL-C-38999 Connectors — high performance, high contact density, lightweight, bayonet coupling, rear release crimp snap-in contacts 1851

KPT/KPTM/KPSE Miniature Circular MIL-C-26482 Connectors — general purpose, solder and crimp removable contacts, bayonet coupling 1886

MSA/MSB/MSE/MSF/ER MIL-C-5015 Standard Circular Connectors — general purpose, threaded coupling, solder and crimp removable contacts 1896

PV Miniature Circular Connectors — designed to M83723 Series I) and M26482 (Series II), bayonet coupling 1916

D Subminiature Rectangular Connectors — for commercial/industrial and general military/aerospace MIL-C-24308 applications (ORIGINAL D, BURGUN-D, D*P (all plastic PCB), GOLDEN-D, ROYAL-D, MAS/TER-D) 1925

SMA Connectors — for RF and coaxial requirements for commercial and military applications 1961

ADAPTA-CON Connectors — low force receptacle and post interconnections for PC and I/O applications 1965

DL "ZIF" Connectors — designed for commercial/industrial, computer and peripheral equipment; zero mating force via cam actuated contacts 1973

MAS/TER-UND Interconnect System — high reliability, low cost, high speed mass termination insulation displacement spring-action contacts 1981

MICROMINIATURE Connectors — rectangular, circular, strip configurations, with MICRO (3 amp), Centi (5 amp) and NANO (1 amp) Twist Pin Contacts*...................... 1985

INTRODUCTION

It's almost impossible to find electrical or electronic equipment anywhere in the world that doesn't involve the use of one or more ITT Cannon products. Our interconnection devices are currently solving problems in equipment and systems ranging from computers to cable TV, telecommunications to transportation, vending machines to nuclear reactors, deep space to deep submergence, braking systems for trucks to applications on every commercial aircraft now flying.

The result of this is a truly unequalled depth of engineering experience in all phases of interconnection technology.

Through our CAPS® distributors (Cannon Authorized Plug Specialists), we offer customers the world's largest organization of stocking and assembling distributors — with representation in every major electronics center. Having passed the same quality standards we impose on our own assembly operations, these distributors buy component parts and sub-assemblies from our factories, then assemble them to your requirements at their facilities. Thus, they can customize your connectors and save you the cost of inventory. More specialized orders are passed on to our factories where they are expedited by one of the finest computerized production control systems in the world. It all adds up to getting you the right product at the right time. And at the right price.

For more information, please contact your local ITT Cannon representative or distributor. If you have an interconnect problem, we can help you.

Who can fill all your needs for KJL-Series I and KJ-Series II connectors designed to MIL-C-38999?

Cannon can!

Six decades on the leading edge of interconnect technology.

CANNON ITT

MINIATURE CIRCULAR CONNECTORS KJL/KJ CONNECTORS

For immediate budgetary information contact your nearest Cannon Sales Office or Distributor (see Manufacturers' Directory).

KJL-SERIES I SCOOP-PROOF AND KJ-SERIES II LOW PROFILE CONNECTORS... DESIGNED TO MIL-C-38999

- **High contact density**
- **Lightweight/low-profile/scoop proof**
- **Environment-resistant**
- **Operating temperature range from −29°C to +200°C (−85°F to +392°F)**
- **Crimp snap-in contacts in the NEW SUPER CAESAR™ rear release contact retention assembly**

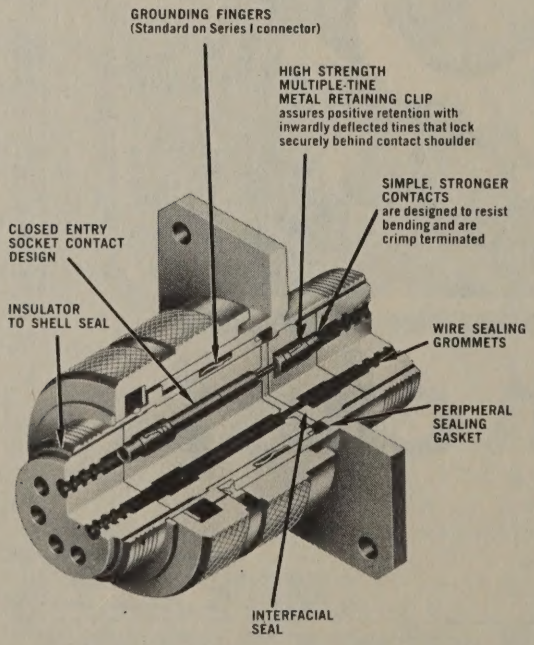
ITT Cannon's KJL and KJ miniature circular connectors are environment-resistant and designed to meet the critical performance and design requirements of MIL-C-38999. Engineered for high density circuitry capabilities, these connectors are designed to operate at temperatures ranging from −29°C to +200°C (−85°F to +392°F). They are readily adaptable to both commercial and space age requirements where size, weight, low-profile/scoop proof design and high reliability are key factors. KJL/KJ connectors are offered in nine shell sizes. A total of 59 contact arrangements are available that will accommodate from 3 to 128 contacts using AWG wire sizes 16 through 28. Contacts are of high conductivity copper alloy with gold plated finish.

The KJL-Series of connectors are designed with a "scoop-proof" feature which provides a safety factor in blind mating applications.

Contact retention is provided by the newly developed SUPER CAESAR™ rear release contact assembly. SUPER CAESAR more than meets the MIL Specs, for contact retention. The assembly features a multiple-tine **metal** retaining clip housed in a monobloc plastic insert. Contacts are inserted, released, and extracted from the rear of the connector, offering lower installation and maintenance costs to the user.

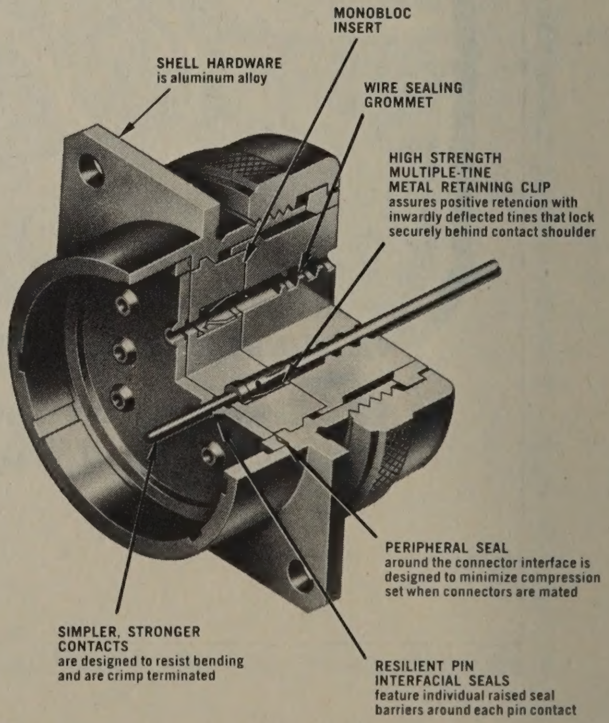
Monobloc (one-piece) inserts are made of strong, durable plastic. Pin contact cavities in the insert are constructed with a closed-down effect. This feature offers superior pin stability and positive axial alignment of the contacts. Lead-in chamfers in the socket front insert face provide for positive contact mating. The shells feature five-keyway shell polarization to assure alignment during engagement. A three-point bayonet lock coupling provides fast connect and disconnect. Complete environmental sealing is accomplished by an interfacial seal, with individual raised tapered sealing barriers around each pin contact; a peripheral seal, and a multiple-ripple wire sealing grommet. Hermetic shell styles are also available.

KJL-SERIES 1



GROUNDING FINGERS
(Standard on Series I connector)
HIGH STRENGTH MULTIPLE-TINE METAL RETAINING CLIP
assures positive retention with inwardly deflected tines that lock securely behind contact shoulder
SIMPLE, STRONGER CONTACTS
are designed to resist bending and are crimp terminated
CLOSED ENTRY SOCKET CONTACT DESIGN
INSULATOR TO SHELL SEAL
WIRE SEALING GROMMETS
PERIPHERAL SEALING GASKET
INTERFACIAL SEAL

KJ-SERIES 2



MONOBLOC INSERT
SHELL HARDWARE
is aluminum alloy
WIRE SEALING GROMMET
HIGH STRENGTH MULTIPLE-TINE METAL RETAINING CLIP
assures positive retention with inwardly deflected tines that lock securely behind contact shoulder
PERIPHERAL SEAL
around the connector interface is designed to minimize compression set when connectors are mated
SIMPLER, STRONGER CONTACTS
are designed to resist bending and are crimp terminated
RESILIENT PIN INTERFACIAL SEALS
feature individual raised seal barriers around each pin contact

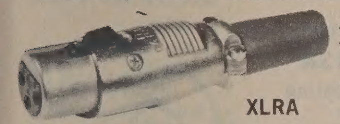
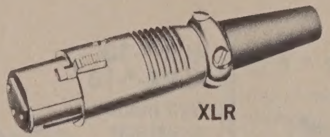
XLRA/XLR SERIES



XLRA

Newest Audio connector series, available with dual purpose insertable contacts that can be terminated by crimp or solder. Contacts can be supplied in reel or bulk form.



XLR

Similar to XLRA except for factory installed solder termination contacts only. Socket insulator is resilient.

CANNON® Audio connectors are designed for use in audio/video and other low level circuit applications where reliability, quiet operation, and the elimination of mechanical interference are necessary. In addition to audio applications, these plugs have found wide usage in the industrial/electronic field. Common uses include microphones, tape recorders, amplifiers, test instrumentation, computers, medical instruments, cameras, control devices, and high fidelity systems.

XLRA FEATURES

- **Most economical advanced design audio connector.**
- **Popular high strength glass-filled nylon insulator provides exceptional dielectric properties.**
- **Latch-lock coupler molded of reinforced plastic.**
- **Contact termination by high speed automatic crimp, hand crimp or solder.**
- **High strength drawn shell with grounding tab.**
- **Polarization accomplished through contact arrangement and polarizing boss and groove.**

XLRA/XLR Audio Connectors developed by ITT Cannon Electric feature the most innovative design characteristics: Strong, compact, and streamlined shells with a protective satin finish. Cross ribbing sections increase the inherent shell strength for rugged applications. Glass-filled nylon insulators provide outstanding dielectric properties and improved shock construction. The XLRA is available in a three-contact arrangement, which accommodates three 10-amp contacts, and also features a shell grounding tab housed in any one of five shell styles. Crimp/solder type contacts offer the option of high speed automatic crimp, hand crimp, or standard solder termination. For high speed automatic crimp termination contacts are available in reel form. For small quantity usage the same contacts may be terminated by either solder or a hand crimp tool. The integral cable clamp used for both XLRA and XLR provides two clamping positions for a positive grip on cable sizes ranging from 7/32" to 5/16" diameter. Neoprene bushings provide strong cable relief with an internal design to permit easy cable insertion.

HOW TO ORDER

XLRA - 3 - 11C
XLR - 4 - 12C

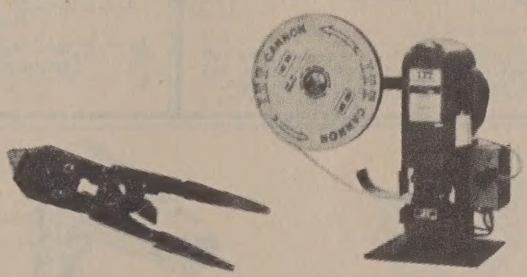
See following pages

In this catalog the XLRA and XLR Series connectors are shown. Of these two series, the XLRA is the newest, most economical audio connector. The XLRA is available with dual purpose contact terminations that can be **soldered or crimped** at the option of the user (socket side only for the present), while the XLR connector is available in standard solder contact termination.

ASSEMBLY & TERMINATION TOOLING DATA



The new XLRA crimp contact is available in reel form for high speed, large volume, automatic termination. ITT Cannon's ABT-500 automatic termination tool is factory equipped with the XLRA die set to insure quality contact terminations. XLRA crimp contacts are also available in individual packaging for hand termination with the CCT-XLRA, for smaller quantity contact terminations.

49/64

Adapter receptacles are for mounting in or onto microphones or other units where they can be adequately supported. They are brass with satin nickel finish. Type 50 is a plain shell; type 50N includes a coupling nut to mate with the threaded portion of a microphone unit; and type 50T has a threaded barrel to mate into the equipment. All socket plugs (type 11C, 11SC, and 15) mate with these adapter receptacles.

With clamp in this position grip is provided for small cables to 7/32 of an inch
.215 (5,46) dia.
Cross ribbing
Improved neoprene cable relief

ACCESSORIES

REPLACEMENT PARTS

Replacement parts are available for the XLR and XLRA connectors. Contact your local ITT Cannon sales office or distributor for price availability.

FLOOR MOUNTING BRACKETS

XLR series receptacles can be installed in the floor by using a bracket for mounting in a Russell and Stoll floor box number 2503.
The bracket permits the floor mounting of the following receptacles:

XLR-13N and XLR-14N. (These receptacles are mounted by using different sides of the same bracket. See illustration.)

Part number for this bracket is 015-0094-000.

DUST CAPS

XLR dust caps are furnished with a chain and coupling. The coupling has clearance for a #6 screw for use on wall mounted receptacles. When the plug is a straight cord type, a ring is attached for mounting on the cable relief bushing. When the receptacle is a panel type, a ring is attached for mounting on the shell. Dust caps are on the shell. Dust caps are brass with satin nickel finish.
